Griffith AND Turner Co.

SUPPLIES

GENERAL OFFICES, 205-215 N. PACA ST.

BRANCH HOUSE. 366 N. GAY ST.

BALTIMORE, MD.

Prospective Customers who are not rated in the Commercial agencies will save time in having their goods shipped by accompanying their Orders either with the Cash or satisfactory references. Baltimore references preferred.

NOTICE.—We make a specialty of quoting on complete outfits. **SEND FOR PRICES.**

FILLING ORDERS.—Every order is filled and forwarded as promptly as possible, but if not duly received, please notify us and we will make every effort to trace it without delay. Do not fail to sign your name and give full address.

PACKING AND SHIPPING.—We make no charge for boxes or packing of retail orders, and deliver all goods to any railroad or steamboat free of charge. We charge for cotton bags as follows: Peck and ½ bushel, cents each; 1 bushel, cents each; 2 bushels, cents each.

HOW TO REMIT.—Remittances should be made by draft, Express Money Order, P. O. Money Order or Registered Letter.

We deliver by **PARCEL POST FREE** to any Postoffice in the United States all cash orders for Flower and Garden seeds at catalog prices, except Peas, Beans, Corn and Field Seeds. No seed delivered free unless order is accompanied with the cash. For postage on Peas, Beans, Corn, Field Seeds and All Merchandise, consult table on opposite page.

ON EVERY ORDER be sure to **SIGN YOUR NAME** and give your address **PLAINLY**, as we frequently receive orders lacking either or both; also give full shipping instructions, State if by freight or express and give route. This saves delay.

PRICES TO MARKET GARDENERS.—Market gardeners, and all purchasers of Seeds in large quantities, should submit us a list of their wants and we will name them special prices.

TIME FOR SOWING IN THE OPEN GROUND.

THESE DIRECTIONS apply to the vicinity of Baltimore and Philadelphia. South of this they should be sown earlier, and North later.

BEANS.—From 1st of May till August.

BEETS.—Soon as ground can be worked in spring.

CABBAGE.—For early use, sow in hot bed in February and transplant in April to open ground; for late use, sow in May or June.

CAULIFLOWER.—Sow about the same time as Cabbage. For late crop sow in June, and they will head up in cool weather, and escape injury from the heat.

CARROT.—For early, sow from 1st of April to middle of May, and for late crop in June or July.

CELERY.—Sow as soon as the ground is open in spring, and transplant in July.

CUCUMBER.—Sow about 1st of May for early, and for pickling, in July.

LETTUCE.—Sow as soon as ground can be worked in spring, and at intervals as desired.

MELONS.—Sow in May and June.

ONIONS.—Sow early as possible in spring.

PARSNIP.—Soon as ground can be worked.

PEAS.—Sow in March, and at intervals through the season, as desired.

PUMPKIN.—Plant in May or June.

RADISH.—Soon as ground is ready, and all through the season, at intervals.

SQUASH.—Soon as ground is warm.

TOMATO.—Sow in hot bed in March, and transplant about middle of May.

TURNIP.—For early use, in April; for main crop, July and August

TO COUNTRY MERCHANTS.

WE PUT UP VEGETABLE SEEDS in papers for the Country Trade in quantities to suit purchasers.

Our seeds are select and tested, and give satisfaction wherever used.

Beans, Peas, Corn, etc., in bulk, at lowest wholesale rates.

Write for special quotations in quantities.

Should you have placed your order for small papers for this year, we will be pleased to fill any shortage you may have, and solicit your patronage for another season.

HINTS ON TRANSPLANTING TREES.

The proper season for transplanting fruit trees is during the months of February, March and April in the spring, and October, November and December in the autumn.

PROPER AGE AND SIZE OF TREES FOR TRANSPLANTING.

Experience has taught observing planters that a small, young tree, set at the same time, will in a few years overtake and pass a large one, and continue more vigorous and productive. Large trees are necessarily or unavoidably more injured in digging than small ones. The latter can be moved with their system of roots almost entire.

NUMBER OF TREES AND PLANTS TO AN ACRE.

Squash, running varieties, in hills.....	3 to 4 "
Turnip, in drills.....	1 lb.
Turnip, broadcast.....	2 lbs.
Tomato, to transplant.....	¼ lb.

QUANTITY OF SEEDS REQUIRED FOR A GIVEN NUMBER OF PLANTS, NUMBER OF HILLS, OR LENGTH OF DRILLS.

Asparagus.....	1 oz. to 50 ft. drill
Beet.....	1 oz. to 50 ft. drill
Celery.....	1 oz. to 100 ft. drill
Carrot.....	1 oz. to 100 ft. drill
Endive.....	1 oz. to 150 ft. drill
Egg Plant.....	1 oz. to 300 ft. drill
Lettuce.....	1 oz. to 150 ft. drill
Okra.....	4 oz. to 100 ft. drill
Onion.....	1 oz. to 100 ft. drill
Onion Sets, small.....	1 qt. to 100 ft. drill
Parsley.....	1 oz. to 150 ft. drill
Parsnip.....	3 oz. to 100 ft. drill
Radish.....	2 oz. to 100 ft. drill
Salsify.....	1 oz. to 70 ft. drill
Spinach.....	2 oz. to 100 ft. drill
Turnip.....	1 oz. to 150 ft. drill
Peas.....	1 qt. to 100 ft. drill
Dwarf Beans.....	1 qt. to 100 ft. drill
Leek.....	1 oz. to 100 ft. drill
Pole Beans.....	1 qt. to 150 hills
Corn.....	1 qt. to 200 hills
Cucumber.....	1 oz. to 50 hills
Watermelon.....	1 oz. to 30 hills
Muskmelon.....	1 oz. to 60 hills
Pumpkin.....	1 oz. to 40 hills
Early Squash.....	1 oz. to 50 hills
Marrow Squash.....	1 oz. to 16 hills
Cabbage, 1 oz. seed will produce 2,000 plants	
Caulif'r, 1 oz. seed will produce 2,000 plants	
Celery, 1 oz. seed will produce 3,000 plants	
Egg Plant, 1 oz. seed will produce 1,000 plants	
Lettuce, 1 oz. seed will produce 3,000 plants	
Pepper, 1 oz. seed will produce 1,000 plants	
Tomato, 1 oz. seed will produce 1,500 plants	

GRIFFITH & TURNER CO.

BALTIMORE, MD., U. S. A.

For Small amounts send Postage Stamps.

We deliver by Parcel Post free to any Post-office in the United States, all cash orders for Flower and Garden Seed at Catalog Price, except Peas, Beans, Corn and Field Seeds. No seed delivered free unless the order is accompanied with the cash. For Peas, Beans, Corn and Field Seeds, add to Catalog Price 6 cents a pint and 8 cents a quart. For each additional quart add at the rate of 2 cents a quart, for distances not over 150 miles from Baltimore. For other seed and merchandise rate consult first page in Catalog.

VERY IMPORTANT. No difference how often you have written us, always give your full address, and write your Name, Post-office, County and State very plainly. We frequently get orders without address or signature.

GRIFFITH & TURNER CO. gives no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If purchaser does not accept goods on these terms, they are at once to be returned. All claims must be made within five (5) days after receipt of goods.

1919 GARDEN CALENDAR

JANUARY

Su	Mo	Tu	We	Th	Fr	Sa
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30	31	

Draw a diagram of the garden. Locate the crops which take the most room (corn, potatoes, vines of the cucumber family), then locate the other crops, grouping them as follows: Peas, potatoes, beans; asparagus, rhubarb, herbs; parsnips, turnips, salsify; beets, carrots, onions; cabbage, cauliflower; okra, tomatoes, egg plant, peppers; spinach, Swiss chard, radish, salad plants. Vegetables should be planted in rows. Plan a hardy border. (See September.) **Sow Indoors or in Hotbed January 15:** Foxglove, pansy, Iceland poppy.

Order Seeds. Quantity of Seed for a Family of Eight: Artichoke, Brussels sprouts, carrot, turnip, radish, 1 oz.; onion, spinach, okra, 2 oz.; cauliflower, egg plant, peppers, 2 pkgs.; cucumbers, 25 hills, 1 oz.; squash, 20 hills, 1 oz.; string beans, 2 qts.; lima beans, 1 qt.; peas, 4 qts.; corn, 3 pts. (3 plantings); lettuce, 1 oz. **Buy Garden Tools:** Wheelbarrow, roller, watering-can, sprayer, spade, fork, wheel hoe, common hoe, weeder, rake, scythe, sickle, trowel.

FEBRUARY

Su	Mo	Tu	We	Th	Fr	Sa
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	

When to Sow: Early crops between March 15 and May 1. Main crops about May 5. Cover seeds twice or three times their thickness. Distances: Drills from 1 to 2 feet apart; corn, 3 feet; vines of the cucumber family, 4 feet; tomatoes, 3 feet. **Sow Out of Doors Between March 15 and April 1:** Beets, cabbage, carrots, kohlrabi, lettuce, onions, parsley, parsnips, radish, salsify, spinach, turnips, sweet-peas (height, 3 feet, many colors). **Sow Indoors March 1 or in Hotbed:** Artichoke, cabbage, endive, egg plant, lettuce, peppers, tomato. **Sow Indoors March 1 or in Hotbed:** Sweet-alyssum, balsam, calendula, coreopsis, nasturtium, petunia, sweet-william, zinnia.

Sow Out of Doors April 15: Beets, cabbages, carrots, Swiss chard, celery, corn salad, garden cress, endive, lettuce, okra, onion, parsley, parsnips, peas, radish, salsify, spinach, sage, thyme, turnip. **Sow Out of Doors April 15:** Sweet-alyssum, calendula, candytuft, corn-flowers, carnation, forget-me-not, larkspur, marigold, mignonette, Iceland poppy, snapdragon, sweet-william, zinnia. Set out roots of dahlias, cannas, gladiolas, elephant ears, tube roses and plants of hardy chrysanthemums.

Sow Out of Doors May 15: Brussels sprouts, cauliflower, beets, beans, cabbage, carrots, corn salad, chicory, cucumbers, endive, tomatoes, lettuce, lima beans, muskmelon, peas, peppers, potatoes, pumpkin, radish, sweet corn, Swiss chard, spinach, squash, sage, watermelon. **Sow Out of Doors May 15:** China aster, balsam, coreopsis, cosmos, foxglove, morning-glory, nasturtium, petunia, Phlox Drummondii, sunflower. Vegetables and flowers should be transplanted from hotbed to garden about May 10. Flowering shrubs should be pruned immediately after they have blossomed. Fruit trees should be sprayed when the blossoms fall.

Sow Early in June: Beans, beets, cucumbers, lettuce, peas, radish, sweet corn. Ten-week Stock, pansy. Roses should be grown on a southern exposure. The soil should be a rich loam. Set out ever-blooming roses the middle of April; Hybrid, Perpetual and Hardy Roses the middle of October. Rose bushes should be set out 2 feet apart, sprayed in April and May, and pruned in March. The rose-bed should be well covered the last of November, and uncovered as soon as danger of frost is past. From the numerous varieties on the market, the following roses are selected: Pink Mamam Cochet, American Beauty, My Maryland, Rhea Reid, Killarney, Helen Gould, Ulrich Brunner, Vicks' Caprice, Meteor, Magna Charta, Paul Neyron, La France, Kaiserin Augusta Victoria, Bridesmaid, Baby Rambler (climber), Tausendschon (climber), Dorothy Perkins (climber), Empress of China (climber), Philadelphia (climber), Crimson Rambler (climber).

First Week in July: Beans, carrots, lettuce, radish, sweet corn, turnips. **Bordeaux Mixture** is excellent for all kinds of blight. **Arsenate of Lead** will destroy insects that chew. **Directions:** 2 to 3 pounds to 50 gallons of water. **Lemon Oil Co.'s Standard Insecticide** will kill plant lice of every description.

August 1, last planting of beans and peas. Buy a High-grade Complete Fertilizer for general use if unable to compound your own fertilizers. Quantity, 500 lbs. to the acre, or 1 oz. to the square yard. Where a rich soil is required, 1250 lbs. to the acre, or 4 oz. to the square yard. In artificial fertilizers there are no weed seeds. **General Hints:** Bone-Meal is excellent for lawn, garden, orchard; **Wood Ashes** for lawn (sparingly), garden, orchard; **Air-Slacked Lime** for heavy, damp soil; **Cottonseed Meal** for lawn (scatter early in April); **Muriate of Potash** for apple trees and peach trees (2 to 3 lbs. for a full-grown tree). **Bone-Meal and Nitrate of Soda** in equal parts for asparagus. **In the Flower Garden** in the spring a handful of bone-meal may be worked into the soil about a plant with marked results. In midsummer, if flowers are few, rake in some nitrate of soda and a little bone-meal. **Liquid Manure** is a good fertilizer for roses.

Set Out Bulbs Early in Fall: Phlox (perennial), peonies. Plant spring-flowering bulbs: Crocus, daffodils, lily of the valley, narcissus, snowdrops, tulips, hyacinths. Spring-flowering bulbs should be planted about 4 inches deep. Plant bulbs of German Iris and Japanese Iris. **In the Window Garden:** Roman hyacinths, Chinese sacred lilies, narcissus and crocuses can be grown in sand and water.

Some Flowering Shrubs for the Home Garden: Forsythia, hydrangea paniculata grandiflora, Japanese snowball, Japanese quince, lilac, magnolia, Rhododendron maximum, Rose of Sharon, Philadelphia syringa grandiflora, Spiraea, Weigelia. Vines: Boston ivy, crimson Rambler, clematis paniculata (also large-blossomed purple and white varieties), English ivy, honeysuckle, hops, Japanese gourd (annual), passion flower (annual), trumpet-creeper, Virginia creeper, wistaria.

Books for the Farmer and Gardener: "American Farm Book," by R. F. Allen; "Farmer's Encyclopedia of Agriculture," by E. V. Wilcox and C. B. Smith; "Ten Acres Enough"; "Book of Vegetables and Garden Herbs," by A. A. French; "Cyclopedia of American Horticulture," by L. H. Bailey (four volumes); "American Horticultural Manual," by J. L. Budd and N. E. Hanson (two volumes); "Horticulturist's Rule Book," by L. H. Bailey; "Principles of Plant Culture," by E. S. Goff; "Bookkeeping for Farmers," by T. C. Atkeson. Periodicals: Country Life in America and The Garden Magazine.

OUR SEEDS are the BEST that can be obtained anywhere, because we are as careful in our selection as it is possible for anyone to be, and are constantly on the lookout for the best of everything, but will not put on the market anything until it has been thoroughly tried and proved.

No matter what others may ask for their seeds, better quality cannot be obtained anywhere, as our constantly and rapidly increasing trade does and will testify.

Our Seeds are ALL TESTED thoroughly before being placed on the market.

HOW TO ORDER TO AVOID DELAY.—All orders from unknown correspondents should be accompanied with the cash. Money can be safely sent by check, post-office order, express money order, registered letter or by express, or postage stamps for small amounts. We prepay postage on all orders of Vegetable and Flower Seeds, by the packet, ounce, quarter pound and pound, except Beans, Peas and Corn, at prices named in this Catalogue, when orders are accompanied with the cash. On Beans, Peas, Corn, and other merchandise use Parcel Post Table. SEEDS BY EXPRESS are far more satisfactory than Parcel Post, because of quicker transit and more careful handling. To points beyond the Third Zone it is cheaper to ship by Express than by Parcel Post.

For other seed and merchandise rate, consult table on this page. POISONS CANNOT BE SENT BY MAIL.

By writing out your order on the Order Sheet sent with each Catalogue you will greatly facilitate our work. Extra Order Sheets sent on application. Be sure to sign your name in full, giving post-office and shipping point. If you have rural delivery, give name and number of route. If you want goods shipped by boat or railroad, state which you prefer, and what line to send by.

GRIFFITH & TURNER CO. give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any Seeds, Bulbs or Plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

FREE DELIVERY BY PARCEL POST

We deliver by PARCEL POST FREE to any post-office in the United States all Cash Orders for Flower and Garden Seed at Catalogue Prices, except Peas, Beans, Corn and Field Seeds. No Seed delivered free unless order is accompanied with the cash. For Peas, Beans, Corn, Field Seeds, and Merchandise rate consult the table which appears on this page.

NOTES ABOUT PARCEL POST.—Poisons and Insecticides Cannot be Sent by Mail. Weight Limit in First and Second Zones, 70 lbs.; in Other Zones, 50 lbs. Bulk Limit (Measurement Around Package Both Ways) in all Zones, 84 Inches. Liquids and Goods Packed in Glass Should be Sent by Express.

RELIABLE VEGETABLE SEEDS OF QUALITY

UNITED STATES FOOD ADMINISTRATION LICENSE
No. G 22972.

ARTICHOKES

Globe or French Artichoke.

This is a very nice vegetable to eat. Some prefer it cooked like asparagus—that is, take the flower head before it begins to open and cook much the same way.

Sow in March in hotbed and when danger of frost is over transplant in very rich, well-drained soil in rows four feet apart and two feet apart in the row. The plants can be raised in seed beds out of doors, but in that case will not be likely to produce heads the first year. Late in the fall cut off the old tops and thoroughly protect the crowns with leaves or straw to prevent severe freezing.

The second year thin the starting shoots to three of the best, which will commence to form heads about June 1st. The plants may also be blanched by cutting back the stems close to the ground in June, the rapidly growing shoots which then start up may be tied and blanched like celery. As artichoke plants do not yield satisfactorily after three or four years, it is best to start a new plantation every three years.

LARGE GREEN GLOBE.—A favorite French vegetable of medium height with rather deep green leaves. The buds or flower-heads are green, nearly round or somewhat elongated. **Pkt., 5c. Oz., 40c.**

JERUSALEM ARTICHOKE ROOTS.—Used for table and stock feeding. The tubers roasted or boiled and served with butter, well seasoned, make a dish, some think, greater than Potatoes. However, their greatest value is for hogs. Plant and cultivate like potatoes. **Peck, 75c., Bushel, \$3.00.**

ASPARAGUS

This is one of the earliest spring vegetables, and should be in universal use. Many persons think it is difficult to grow, but we consider this a mistake, and believe it can be produced as cheaply and easily as any on the list. Sow the seed in the seed bed late in the fall or the early spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. When the plants are four or five inches high, great care should be taken to keep the bed free of weeds. One ounce of seed will sow forty feet of row.

PALMETTO.—A very early maturing variety, producing an abundance of very large, deep green shoots.

Pkt., 5c. Oz., 10c. ¼ lb., 20c. Lb., 60c. 5 lbs., \$3.00.

MAMMOTH WHITE.—Produces large, white shoots six inches above the surface; fine quality. **Pkt., 5c. Oz., 10c. ¼ lb., 20c. Lb., 60c.**

BARR'S MAMMOTH.—The stalks are very large, and retain their thickness completely up to the top of the shoots; light in color.

Pkt., 5c. Oz., 10c. ¼ lb., 20c. Lb., 60c. 5 lbs., \$3.00.

CONOVER'S COLOSSAL.—A mammoth, green sort of the largest size and of good quality. One of the best known and most generally cultivated varieties.

Pkt., 5c. Oz., 10c. ¼ lb., 20c. Lb., 60c. 5 lbs., \$3.00.

GIANT ARGENTEUIL.—A French variety. Stalks large and thick. **Pkt., 5c. Oz., 10c. ¼ lb., 20c. Lb., 60c.**

Palmetto Asparagus.

Asparagus Roots.

ASPARAGUS ROOTS.—A saving of one to two years is effected by planting roots. A bed 12x40 feet, requiring about 100 roots, should give a sufficient supply for an ordinary family. 7260 roots will plant an acre. Select good loamy soil, plow deep, put in good quantity of manure and 100 pounds kainit to 1000 square feet of bed. Incorporate thoroughly, make a trench eight inches deep, set plants nine inches apart. In field culture rows are placed four feet apart.

	Per 100	Per 1000		Per 100	Per 1000

Prices, by Express, Not Prepaid.

ASPARAGUS KNIFE

Made of solid steel; see the cutting point. **Price, 60c. each.**

RAFFIA

The best material for tying plants, vines, etc. Per pound, —.

ASPARAGUS BUNCHER

This Asparagus Buncher is adjustable with patented clamp. **Price, \$2.75 each.**

BEANS

 UNITED STATES FOOD ADMINISTRATION LICENSE
No. G 22972.

DWARF OR BUSH-WAX PODDED

Select light, warm soil and plant when danger from frost is past in the spring, in drills 2 to 2½ feet apart, dropping the beans about 6 to 8 inches apart in the drills, and cover 2 inches deep. A succession of sowings can be made from the first week in May until August.

Add 6 cents per pound on all Beans if to be sent by mail. For larger quantities see table on page 2. **Crop very short, order early.**

IMPROVED RUSTPROOF GOLDEN WAX.

This is the earliest, handsomest and hardiest of all the Wax Beans. The pods are straight, long and thicker than the ordinary Golden Wax, much superior in quality, absolutely rust-proof and sure to become the favorite Wax Bean; in fact, it has already gained great popularity with growers.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

GOLDEN-EYED WAX.

This Bush Bean is very early; the vine grows vigorously to about one and a half feet high, holding pods off the ground. The pods are handsome, long, straight and flat, remarkably free from rust.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

DAVIS' KIDNEY WHITE WAX.

Vigorous grower, bears abundantly; long, white, handsome pods, which are crisp and tender when young.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

DWARF PROLIFIC BLACK WAX

Yellow pod, a very superior snap sort, ripening among the first earlies and having the best characteristics. Very tender.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

HODSON WAX.

The most vigorous wax-podded bean yet introduced. The yield of large, handsome pods is enormous. Its dense foliage protects the pods, so that their color is clear creamy white. Pods very long, straight or slightly curved, flat, but fleshy, quite stringless and of very good quality. While late in maturing, the remarkable vigor of the plant is a safeguard against blight and other diseases.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

CURRIE'S RUSTPROOF GOLDEN WAX.

NEW BALTIMORE STRINGLESS WAX.

Black seeded, early; thick flat yellow pod. No strings. Have appearance of Currie's Rustproof Wax, but are better cropper, and absence of strings make them much more desirable for canning and other uses.

Price: Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

CURRIE'S RUSTPROOF BLACK WAX.

For earliness and freedom from rust it is at the head of the Wax Bean family. Habit, upright and robust, holding the pods well from the ground. Pods long, straight, flat and very meaty, of a beautiful color; quality not surpassed, and for productiveness it is unequaled.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

WARDWELL'S KIDNEY WAX BEAN.

This is one of the best wax sorts. The vines are remarkably vigorous, hardy and productive. The pods are very large, smooth, showy, tender, perfectly stringless and of unusually fine quality.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

NEW PENCIL POD WAX BEAN.

Very early and productive. Pods long, straight and handsome; color, light golden yellow; strong and vigorous bush. One of the best varieties.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

BEANS, GREEN-PODDED BUSH

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

The green podded dwarf sorts are perhaps the most important class of garden beans and are probably more extensively used for snaps than the wax podded varieties, although the latter are considered by many as the more attractive in appearance. The green podded sorts are as a rule the more productive, being less sensitive to unfavorable conditions of soil and climate and of late years have been less susceptible to bean diseases.

**G. & T.'S IMPROVED
EXTRA EARLY RED
VALENTINE
BEANS.**

equally early with Red Valentine and has that beautiful silvery green color in the pods that is so much desired.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

REFUGEE, or 1000 TO 1.

A medium to late variety, very productive and largely grown for pickling; handsome and tender pods.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

GREEN-PODDED STRINGLESS REFUGEE.

Medium-early, round-podded green stringless; exceptionally good cropper. Fine for canning and table use. Newest thing in Green Pod Stringless Beans.

Pound, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

BURPEE'S NEW STRINGLESS GREEN POD.

One of the earliest varieties, pods round and full, absolutely stringless and of beautiful fleshy appearance; quality excellent. The only green pod bean of which the pods never develop any strings.

Pound, 30c. 5 Pounds, \$1.50. 100 Pounds, \$25.00.

**BURPEE'S STRINGLESS GREEN
POD BEANS.**

GIANT STRINGLESS GREEN POD.

Resembles very much the old Valentine. The plants are of strong growth, very productive; pods 5 inches long, light green, slightly curved, very meaty, brittle and stringless at all stages and of mild flavor. **Pound, 30c. 5 Pounds, \$1.50. 100 Pounds, \$25.00.**

EARLY MOHAWK.

This exceptionally hardy sort can be planted earlier than others and in this way will often furnish beans fit for use before any other green podded variety. The plants are large and stout, with large coarse, dark green leaves. The pods are medium dark green, long, six to six and one-half inches, straight, coarse, flat, with long tapering points. **Lb., 30c. 5 Lbs., \$1.50. 100 Lbs., \$25.00.**

LONG YELLOW 6 WEEKS.

The plants of this hardy variety, large, vigorous, erect and very productive. The leaves are large. The pods are long, about six inches, straight, flat, handsome, rather light green and when young are of good quality for snaps. **Pound, 30c. 5 Pounds, \$1.15.**

DWARF HORTICULTURAL (Cherry).

Very green podded sort, used as a shell bean, and for this purpose is one of the finest in general use; long a favorite with those who use a shell bean in a green state. **Pound, 30c.**

BEST OF ALL.

One of the most valuable green podded sorts for family or market use. Pods are six inches long, very fleshy, succulent, stringless, of rich flavor; produced early and abundantly. **Pound, 30c.**

WHITE MARROWFAT.

Extensively grown for sale as a dry bean for winter use. **Pound, 20c.**

WHITE NAVY, or SMALL PEA BEAN.

A well-known variety for field culture; very prolific. **Pound, 20c.**

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

BUSH LIMA BEANS

U. S. FOOD ADMINISTRATION LICENSE No. G 22972.

Plant in drills two to three feet apart, dropping the beans three to four inches apart and covering one and one-half to two inches deep. If planted in hills, make the hills two to three feet apart one way and two to two and one-half feet the other and plant four beans in a hill. Hoe often but only when the leaves are dry.

BURPEE'S BUSH LIMA.

When Beans are sent by mail add, for postage, 6c. per pound. For larger quantities refer to table on page 2.

FORDHOOK BUSH LIMA.—An improved dwarf Lima of the Kumerle type. The plant is vigorous and erect growing, bearing well above the ground. The pods are produced in large clusters, each containing three to five large beans of exceptionally fine quality. Much more productive than Kumerle and matures earlier. We consider this a decided acquisition to the dwarf Lima, possibly the best of the class. **Lb., 40c. 5 Lbs., \$1.50.**

BURPEE'S IMPROVED BUSH LIMA.—Will outyield Burpee's Bush Lima by fully one-third. This greater yield is due to the increased size of both pod and beans. The dried beans are very handsome, and generally show a greenish-white coloring, while dried beans of the Burpee Bush Lima, like those of the Large Pole Lima, are pure white. **Lb., 40c. 5 Lbs., \$1.50.**

BURPEE'S BUSH LIMA.—Bushes grow 18 to 20 inches high, stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush 2 to 3 feet in diameter; an immense yield, each bush bearing 50 to 200 handsome, large pods, well filled. **Lb., 40c. 5 Lbs., \$1.50.**

KUMERLE, or DREER'S BUSH LIMA.—Dwarf variety of Dreer's Improved Lima, which has been fixed in its character of a bush bean; very prolific, single plants often producing 150 to 200 pods. Equal in quality and tenderness to Dreer's Pole Lima. **Lb., 40c. 5 Lbs., \$1.50.**

DREER'S WONDER BUSH LIMA.—Very desirable on account of earliness, productiveness; of strong, upright growth, and are completely covered with large pods, many of which contain four beans, which are fully as large as the Pole Limas. The beans are flat in shape and of excellent quality. **Lb., 40c. 5 Lbs., \$1.50.**

HENDERSON BUSH LIMA.—These are very valuable, because they do not need poles, and, being so dwarf, can be planted close together. They are very early and prolific, continuing to bear until frost. **Lb., 40c. 5 Lbs., \$1.50.**

Set the poles 3 to 4 feet apart and plant 6 to 8 beans, with the eyes downward, around each pole, thinning to 4 healthy plants when they are up. They require the same soil and treatment as the dwarf varieties.

POLE LIMAS

CARPENTERIA POLE LIMA.—The newest large pole Lima; enormously prolific; early green and delicious flavor. **Lb., 40c. 5 Lbs., \$1.50.**

HENDERSON'S EARLY LEVIATHAN.—This is the very earliest. It will not only give large Lima beans earlier than any other strain, but is also much more productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods hang out from the foliage in large clusters and contain three or four and sometimes five large beans to the pod. **Lb., 40c. 5 Lbs., \$1.50.**

KING OF THE GARDEN LIMA.—This bean has met with enormous sales the past few seasons. They are vigorous growers, setting their beans early at bottom of pole, producing continuously to the end of the season. They are more prolific than the ordinary Lima, bearing pods 5 to 7 inches long, in clusters of 4 and 5, with 5 or 6 beans in a pod. **Lb., 40c. 5 Lbs., \$1.50.**

EXTRA LARGE WHITE LIMA.—This is a splendid sort, and takes a leading place with growers, because of its many excellent qualities. As a shell bean surpasses all in quality, and is the favorite with most people. **Lb., 40c. 5 Lbs., \$1.50.**

FORD'S MAMMOTH POLE LIMA BEAN.—The pods grow to an average length of 8 inches, are produced in great clusters, with from 5 to 7 beans per pod of most excellent quality for using either green or dry. The vines grow vigorously, setting the beans early at the bottom of the pole, and continue in bearing up to frost. **Lb., 40c. 5 Lbs., \$1.50.**

EXTRA EARLY JERSEY LIMA.—This variety is two weeks earlier than other sorts; the pods are large and numerous, making it a very profitable sort to grow. **Lb., 40c. 5 Lbs., \$1.50.**

SEIBERT'S LARGE EARLY.—A very early and prolific strain of the Large Lima. The vines begin bearing pods considerably earlier than the regular strains of Large Limas. While the pods are only of medium length, they are well filled, containing 3 and 4 large, fleshy beans, which are extremely tender and fine in flavor. **Lb., 40c. 5 Lbs., \$1.50.**

DREER'S IMPROVED OR CHALLENGE POLE BEAN.—This popular bean is considered by many growers superior to all others in quality and productiveness. When green it is as large as the Large Lima, thicker, sweeter and more tender and nutritious, remaining green in the pod for a long time after maturing. **Lb., 40c. 5 Lbs., \$1.50.**

CAROLINA OR SIEVA.—A seedling variety of Large White Lima, with small pods, usually about 2 inches long. A little earlier and hardier. **Lb., 40c. 5 Lbs., \$1.50.**

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

BEANS==Pole or Running

These are of strong running growth, and need stout poles on which to climb. They require a longer season in which to mature than do the bush varieties, but by reason of their stronger growth are more productive, and growing on poles are more easily gathered.

MARYLAND WHITE.—This new White Pole Bean is destined to take its place as one of the best beans ever grown for general purposes. Its thick, meaty, green pods are very tender, rich in flavor, and produced in great abundance. It is equally valuable as a snap or shell bean. **Lb., 40c. 5 Lbs., \$1.50.**

LAZY WIFE.—Large pale green pods, very thick meated, stringless, rich, tender and buttery; ripens early; clings well to the pole; enormously productive; splendid either as a snap or shell bean. **Lb., 40c. 5 Lbs., \$1.50.**

KENTUCKY WONDER, OR OLD HOMESTEAD.—A very prolific sort, bearing its pods in large clusters; pods green, often reaching 9 to 10 inches in length, nearly round when young, and very crisp. **Lb., 40c. 5 Lbs., \$1.50.**

SPECKLED HORTICULTURAL, OR WREN'S EGG.—An old favorite for both snap-shorts and dry beans. **Lb., 40c. 5 Lbs., \$1.50.**

CREASE BACK, OR FAT HORSE.—A well-known and highly esteemed Southern variety; very productive; forms full, round pods; fleshy; stringless. **Lb., 40c. 2 Lbs., 75c.**

SPECKLED CUT-SHORT, OR CORN HILL.—An old variety, very popular for planting among corn; pods short, cylindrical and tender. **Lb., 40c. 5 Lbs., \$1.50.**

DUTCH CASE KNIFE.—Vines moderately vigorous, climbing well; may be used for a corn-hill bean; pods long, flat, irregular green, but becoming cream white. **Lb., 40c. 5 Lbs., \$1.50.**

Kentucky Wonder Pole Beans.

BROCCOLI

1 Ounce of Seed to 100 Yards of Row.

The heads resemble somewhat a coarse cauliflower and the culture is the same as for that vegetable. Broccoli is well adapted only to those sections where the season is long, cool and rather moist. One of the most valuable features is that it withstands greater extremes of temperature than cauliflower.

EARLY PURPLE CAPE.—Large, compact. **Pkt., 10c. Oz., 50c.**

LARGE EARLY WHITE.—Head white, like cauliflower; the best. **Pkt., 10c. Oz., 50c.**

BORECOLE

This is often called Broccoli by market gardeners, but belongs to the Kale family. Very spreading in habit and beautifully curled.

Seed should be sown in May and transplanted in July, in the open field and treated same as Savoy Cabbage. **Pkts., 5c. and 10c. Oz., 15c. ¼ lb., 50c. Lb., \$1.75.**

BORECOLE.

BROCCOLI.

SWISS CHARD

(Sea Kale or Spinach Beet.)

This kind of beet is grown exclusively for the numerous, fleshy, tender leaves and leaf stalks, which are superior to those of other beets for use as greens. Later in the season the wax-like leaf stems are cooked like asparagus or are pickled. This variety we offer has large, broad, undulated leaves, and remarkably broad stalks and midribs or chards. It is well worthy of a place in the home garden as well as for market use. **Pkt., 5c. Oz., 15c. 2 Oz., 30c. ¼ Lb., 60c. Lb., \$2.00.**

BRUSSELS SPROUTS

1 Ounce of Seed to 100 Yards of Row.

Brussels Sprouts are used in the fall and early winter and by some considered more tender and delicious than any cabbage. The plant resembles the cabbage, the edible part being the numerous very small heads or sprouts an inch or two in diameter formed on the stalk at each leaf joint. The culture is the same in all essentials as for cabbage, except the leaves should be broken down in the fall to give the little heads more room to grow. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 60c. Lb., \$2.25.**

Swiss Chard.

SWISS CHARD.

Brussels Sprouts.

BEETS

One Ounce of Seed Will Sow One Hundred Feet of Drill

Select a deep, rich sandy loam and manure with well decomposed compost or a good chemical fertilizer. Sow in drills, 14 to 16 inches apart, and cover 1 inch deep. When the young plants appear, thin to 4 or 5 inches apart. For early use, sow as soon as the ground can be worked in the spring; for autumn use, about the middle of May, and for winter use, during June or July, according to the variety—the long varieties requiring more time to mature than the round, early kinds.

Crosby's
Improved Egyptian.

EGYPTIAN BEET. CROSBY'S IMPROVED

A very superior strain of the well-known Egyptian, carefully selected, blood color, quick, rapid growth. The shape is very desirable, as shown in the accompanying photograph, being not so round as the Eclipse, or quite so flat as the ordinary Egyptian. It may be sown outside as late as July. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

BASSANO, OR EXTRA EARLY TURNIP.

Flesh white and rose; very sweet and tender. **Pkt., 5c. Oz., 15c. ¼ lb., 50c. Lb., \$1.75.**

EXTRA EARLY EGYPTIAN.

This is a flat Beet, very early and deep red color. Owing to the small top it can be planted very close. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

G. & T. CO.'S EARLY MARKET.

Its qualities are extra early, dark red color, fineness of shape and small top. One of the most attractive varieties grown, and is especially desirable for hotbeds on account of its small top and close-growing habit. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

Eclipse Beet.

ECLIPSE BEET.

This extra early Beet is remarkable for its fine quality and rapid growth; is of deep red color and handsome shape. As an early market sort it is unrivaled. It is to a large extent superseding the Egyptian, being earlier in development, more attractive in appearance, and of superior quality for the table. **Pkt., 5c. ¼ lb., 40c. Lb., \$1.25.**

EDMAND'S RED TURNIP.

The most uniform of all Turnip Beets. It is of handsome round shape, good marketable size and deep blood color. It has a small top, and may be planted close. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

DETROIT DARK RED TURNIP BEET.

This is one of the finest formed and handsomest-colored Beets on the market. It is unsurpassed in the uniformity and beauty of the crop. It is exceedingly early, and produces more marketable specimens on the same acreage than any other variety. **Pkt., 5c. Oz., 15c. ¼ lb., 50c. Lb., \$1.50.**

G. & T. CO.'S EARLY BLOOD TURNIP BEETS.

This is our Special Stock of Early Blood Turnip Beet, which we have been growing for a number of years, and which the market gardeners of Baltimore and other places prefer. It is of dark red color, handsome shape and early. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

LARGE LONG BLOOD.

A large and desirable late variety of deep red color. **Pkt., 5c. Oz., 10c. ¼ lb., 40c. Lb., \$1.25.**

MANGEL WURZEL BEETS FOR STOCK

SOW 4 POUNDS TO THE ACRE.

Stock Beets grow larger than any other Beets, and hence require more room. They should be sown from April to June, in drills 2½ feet apart, and the plants thinned to 12 to 15 inches in the row. The attention of farmers to the growing of Beets for stock feeding has rapidly increased, but it should be grown more generally, and will show the results in the health and condition of the stock. It supplies good, rich food for cattle during the winter.

LONG RED MANGOLD WURZEL.

The well-known, large, long variety, grows well out of ground. Color light red. Very productive. **Pkt., 5c. ¼ lb., 30c. Lb., 90c.**

GOLDEN TANKARD MANGOLD.

The best type of Mangold—small top, smooth, rich skin, broad shoulders, very solid fleshed, golden stemmed, heavy producer. **Pkt., 5c. ¼ lb., 30c. Lb., 90c.**

WHITE SUGAR BEET.

A large-growing sort, and used for feeding stock. **Pkt., 5c. ¼ lb., 35c. Lb., 90c.**

CHAMPION YELLOW INTERMEDIATE, OR GATE-POST MANGOLD.

One of the very finest Mangolds ever introduced, giving unbounded satisfaction wherever grown. With good cultivation will crop at the rate of 200 bushels per acre. **Pkt., 5c. ¼ lb., 30c. Lb., 90c.**

Golden Tankard Mangold.

CABBAGE

One Ounce of Seed to 100 Yards of Row.
EARLY CABBAGES.

Cabbage will thrive on any good corn land, though the stronger the soil the better they will develop. New land is preferable. Plow deep and manure very liberally, as cabbage is a strong feeder, and will repay for the care bestowed upon it. The early sorts bear planting from eighteen inches to two feet apart in the rows, with the rows from two to two and a half feet apart. The larger varieties to be from two to four feet apart in the rows, with the rows from two and a half to four feet apart, the distance varying with the size. It does not pay to buy cheap cabbage seed. Ours are American grown, and from the best stock in the country. For early use, sow in a hotbed in February or March, and transplant to a cold-frame as soon as large enough. In April the plants may be set out in the rows. For late crop, sow in nursery bed in May or June, and transplant as soon as the plants are five or six inches high. The ground should be thoroughly cultivated every week until the plants meet in the rows.

Select Early Jersey Wakefield **American Grown.**

The very best early Cabbage, and grown more extensively by market gardeners than any other variety. It is early, the heads are pyramidal in shape, very large and solid, and having but few outside leaves, the plants can be set close together. We secured our seed from a grower of the best Wakefield Cabbage in the country, and it is giving good results wherever it is used, so much so that our sales of this sort are rapidly increasing each year. The demand for this sort has brought on the market inferior stock at a low price; but when select stock, such as we offer, is used it cannot fail to give satisfaction. **Pkts., 5c. and 10c. Oz., 60c. ¼ Lb., \$2.00. Lb., \$8.00.**

Charleston, or Large Wakefield **American Grown.**

This is now a very popular market cabbage, fully meeting the demand for a cabbage having all the characteristics of the Jersey Wakefield, but larger. It is five to six days later than Early Jersey Wakefield. The heads are fully one-half larger and quite solid. It is very compact in growth, and can be easily planted in rows two feet apart and twenty inches in rows. One great advantage is, it does not burst open when ripe, like many other early sorts, and consequently can be left standing on the ground a long while without injury until a favorable opportunity for cutting. No market or private gardener desiring a cabbage of this kind should fail to plant this valuable sort.

Pkts., 5c. and 10c. Oz., 60c. ¼ lb., \$2.00. Lb., \$8.00.

KING OF EARLIES.—Our own introduction; American grown. An extra early variety, fully a week ahead of all other varieties in forming marketable heads; the heads are tall and slim and of rather small size, formed like a Wakefield. Habit, vigorous; short stem and proof against sun. **Pkts., 5c. and 10c. Oz., 60c. ¼ Lb., \$2.00. Lb., \$8.00.**

EXTRA EARLY EXPRESS.—Heads are comparatively thicker and less pointed than Jersey Wakefield and slightly earlier. Head softer, but stands shipping better. **Pkts., 5c. and 10c. Oz., 60c. ¼ Lb., \$2.00. Lb., \$8.00.**

LARGE OR CHARLESTON WAKEFIELD.

EARLY WINNINGSTADT.—Head large, cone-shaped and solid. An old and popular sort. **Pkts., 5c. and 10c. Oz., 60c. ¼ Lb., \$2.00. Lb., \$8.00.**

LARGE EARLY YORK.—(American Grown)—One of the earliest. Forms a medium size, pointed head. **Pkts., 5c. and 10c. Oz., 60c. ¼ Lb., \$2.00. Lb., \$8.00.**

COPENHAGEN MARKET.—A new round head, solid cabbage, recently introduced from Denmark. It is without doubt the finest large round-headed early cabbage in cultivation. The type is thoroughly fixed and the heads mature uniformly, which enables the crop to be harvested at one time, so that the ground can be cleared in two cuttings.

It matures as early as the Charleston Wakefield, and will give a heavier yield per acre. In an average season heads will weigh about 8 pounds or more each.

The leaves are light green in color, tightly folded, which produces a short stem plant. We consider it the finest flat-head variety for spring or summer. Our seed comes from the originator direct.

Pkts., — and —. Oz., —. ¼ Lb., —. Lb., —.

Copenhagen Market
Cabbage, New
From Denmark.

CABBAGE---CONTINUED

ALL HEAD EARLY

ALL-HEAD EARLY—American Grown, is the largest of all early Cabbages, fully one-third larger than the Early Summer. It is the nearest approach to a thoroughbred cabbage of any variety, both in size and uniform development. As the All-Head comes in quicker than any of the other flat cabbages, it is consequently more tender. It is also valuable for a late or winter Cabbage.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

EARLY DWARF FLAT DUTCH—
American Grown.

An old standard variety which stands the sun and produces fine, large heads, coming in soon after the Wakefield.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

NEW EARLY—American Grown.

This is one of the finest large early cabbages grown. Forms solid, compact heads, and leaves grow close to the head, thus allowing many more cabbages to be grown on the acre than any other sort. One of its most striking features is its earliness. It heads so rapidly that the worms can't hurt it.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

SUCCESSION CABBAGE.—A fine early variety, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is nearly double the size, and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed. It is one of the finest sorts in existence today; whether for medium early, main crop or late use, it has no superior. It is so finely bred and so true to type that in a field of twenty acres every head appears alike. We can recommend it either for the market gardener, trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of handsome color and of the finest quality. It is probably the safest variety for an amateur to plant, as it does well at all seasons, and one is almost sure of getting a crop, no matter when it is planted.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

EARLY SUMMER CABBAGE.—American grown. One of the earliest of the summer varieties. Heads large and flat; short stemmed, few outside leaves, uniform in character, and about 10 days later than the Wakefield. It is very popular with the truckers. Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

LOUISVILLE DRUMHEAD.—American grown. This is the most popular intermediate or second early with market gardeners around Louisville and the Southwest. It comes off medium early, withstands heat to a remarkable extent, heads large, solid and uniform in size and color. We can recommend this sort very highly for the Southern and Middle States. Pkts., 5c. and 10c. Oz., 50c. $\frac{1}{4}$ lb., \$1.50. Lb., \$6.00.

FOTTLER'S EARLY DRUMHEAD OR SHORT STEM BRUNSWICK CABBAGE.—In its improved type, this is a very fine summer or early fall variety. Good both for intermediate and winter use. Pkts., 5c. and 10c. Oz., 50c. $\frac{1}{4}$ lb., \$1.50. Lb., \$6.00.

SUCCESSION CABBAGE.

ALL SEASONS—American Grown.

This forms a fine, large head, of superior quality, nearly as early as the Early Summer. Suitable for planting at any season.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

SUREHEAD—American Grown.

This popular cabbage is rightfully named Surehead, as it never fails to make a fine, large, solid head, with few outer leaves. It is a strong, vigorous grower, and very uniform in size and color. Always brings the highest price in our markets.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

ALL-HEAD EARLY CABBAGE.

LATE OR AUTUMN CABBAGE

BOSS FLAT DUTCH—LATE CABBAGE.

PREMIUM LARGE FLAT DUTCH—LATE CABBAGE.

BOSS FLAT DUTCH CABBAGE—

In again calling the attention of market gardeners and truckers to this magnificent Cabbage, we would say that it has fully met the claims we made for it upon its introduction. When we ask our customers how they like it, their answer is "Splendid!" or "Elegant!" "Everything heads!" "You can scarcely find any that don't head!" The heads are large, hard, thick and flat, the leaves lapping across the center, making it the most desirable winter variety in cultivation. Try it and be convinced of its superior quality.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

PREMIUM LARGE LATE FLAT DUTCH CABBAGE—

American Grown.

Large and excellent for winter; very extensively grown. The head is broad, thick and flat, well covered in by leaves lapping across the center, outside leaves feathered to the base of the leaf stem.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

ENKHUIZEN GLORY CABBAGE

ENKHUIZEN GLORY.

A most valuable second-early Cabbage that is becoming immensely popular. It produces fine marketable heads fully as early as our famous **Allhead Early**—but round or ball-like in form. The heads are very solid, with but few outer leaves—and of such compact growth as to permit quite close planting, thus increasing the yield. The heads are of medium size, tender and of fine flavor. They keep well when put away and consequently **Enkhizen Glory** is valuable also for sowing later in the season for early winter use. Plants set out in mid-summer will produce fine heads before cold weather. The seed we offer has been grown by the originator in Holland and will yield heads that will delight the most critical planters.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

DANISH BALL HEAD.

This most excellent variety of cabbage, coming from Denmark, has grown very rapidly into favor with both market and private gardeners. It is a large, round, solid heading, medium early variety; a very sure header, having few loose leaves, consequently can be planted very close together. Although a medium early, can also be grown for a fall and winter crop, being one of the best keepers. Very popular in Philadelphia, New York and Boston markets.

Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$8.00.

DANISH BALL HEAD CABBAGE.

LARGE LATE AMERICAN DRUM-HEAD (American Grown).

One of the largest, most solid and best keeping late varieties. This variety seldom fails to head, and is of good quality. Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

WORLD-BEATER, or AUTUMN KING.

This is a very superior late cabbage. The large, broad heads are very thick through, slightly rounded at the top, fine grained and tender, has a short stalk, green color, and one of the best keepers we know, and is a rapid grower. Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

RED DUTCH.

The head is round, large, solid and a deep red color, the best of the red cabbages. Pkts., 5c. and 10c. Oz., 60c. $\frac{1}{4}$ lb., \$2.00. Lb., \$7.00.

LATE CABBAGES==Continued

DRUMHEAD SAVOY.

PERFECTION DRUMHEAD SAVOY

AMERICAN GROWN.

This is without any exception the finest stock of Savoy cabbage to be found anywhere. The heads are large and solid, the leaves beautifully curled, and in tenderness and flavor it is almost equal to cauliflower, while its keeping quality is first class. To say that our market gardeners are pleased with it is putting it mild; they are enthusiastic over it, as they find it so much superior to the old-time Savoy. It is specially adapted to private use, as when grown in the fall and allowed to be touched by frost it is one of the most delicious

Packets, 5c. and 10c. Oz., 60c. ¼ lb., \$2.00. Lb., —

GEORGIA COLLARDS

Called the Cabbage Collard on account of its close bunching growth. The plant produces center leaves generally perfectly white, though sometimes dashed with pink. It is a very delicate vegetable and of the finest quality.

Packets, 5c. and 10c. ¼ lb., 40c. Lb., \$1.50.

G. & T. CO.'S LARGE GILT EDGE SNOWBALL CAULIFLOWER

Is without exception one of the finest sorts now in cultivation. It is very early. Nearly every plant will, under proper cultivation, form a perfect snow-white head, and its close growing, compact habit enables the grower to plant one-third more on the same space of ground than other varieties. In fact, it is, and deserves to be, the standard with the market gardener and amateur.

Packets, 25c. and 50c. ½ oz., 90c. Oz., \$1.75.
¼ lb., \$6.00.

EXTRA EARLY SNOWBALL.—Our stock of this well-known variety is unexcelled. It is one of the best sorts for open ground or forcing under glass.

Packets, 25c. and 50c. ½ oz., 75c. Oz., \$1.50.

G. & T. CO.'S "DROUTH-RESISTING."—Produces large white solid heads, maturing about a week later than our large Gilt Edge Snowball. The best for hot, dry weather.

Packets, 25c. and 50c. ½ oz., 90c. Oz., \$1.50.
¼ lb., \$5.00.

G. & T. CO.'S SELECT EARLY DWARF ERFURT.—Long the standard of highest excellence, and still holding its own with a great many people.

Packets, 25c. and 50c. ¼ oz., 50c. Oz., \$1.50.

Culture.—The same as for Cabbage, except that extra manure and plenty of water will pay upon Cauliflower. If the soil be dry, water frequently, and if the plants could have a heavy mulch of hay from drouth. The early kinds should be strong by planted out same time as for Cabbage.

or straw, it would keep the soil moist, and the plants would not suffer enough to plant out not later than the middle of April; the late kinds may

CORN SALAD

Three Ounces of Seed to 100 Feet of Row.

A favorite salad plant, and very hardy. Sow in August or September, and protect with leaves during the winter; it can be gathered in the spring very early. Sown in April, it is soon ready for use. The leaves are sometimes boiled and served as spinach.

Pkt., 5c. Oz., 10c. ¼ lb., 25c.
Lb., 75c.

CRESS, OR PEPPER GRASS

Used as a small salad. Sow very thickly in shallow drills, on a smooth surface, at short intervals throughout the season.

CURLER.—Pkt., 5c. Oz., 10c. ¼ lb., 25c. Lb., 75c.

WATER CRESS.—Water Cress may be grown along the margin of running streams, ditches or ponds, and has a ready sale in the hotels and markets.

Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.00. Lb., \$3.00.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

G. & T. CO.'S CARROTS

1 OZ. OF SEED TO
100 FEET OF ROW

Carrots thrive best in rather a light, rich loam. The ground should be well manured with fine, well-rotted or composted manure, and be thoroughly worked quite deep. Sow from middle of April to middle of May, in rows 14 inches apart, and thin the plants to 5 or 6 inches in the row. For late crops sow in June or July. An important point is to tread the rows firmly after sowing. For field culture, Carrots should be sown in drills 3 to 3½ feet apart, so as to cultivate with horse.

OXHEART OR GUERANDE.

Oxheart or Guerande

One of the heaviest yielders and the best for stiff and heavy soils where the long varieties would fail. The roots are often 3 to 3½ inches thick at the top; nearly oval in shape; the flesh is bright orange, fine grained and sweet. Of the finest table quality and equally good for stock.

Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

CHANTENAY.

CHANTENAY

A most excellent, medium early, half long variety. It is one of the best in quality for the market and home garden, while its great productiveness and the ease with which it can be harvested make it desirable as a field sort. The tops are medium sized with small neck. The mature roots are thick, five and one-half to six inches in length, uniformly half long or stump rooted but tapering slightly, smooth, deep orange-red in color. The flesh is very crisp and tender. Although a medium early sort the roots are suitable for use nearly as early as any. The variety is extensively used for bunching.

Pkt., 5c. Oz., 15c. 2 Oz., 30c. ¼ lb., 40c. Lb., \$1.25.

EARLY SCARLET HORN.

EARLY SCARLET HORN

The earliest variety in our list. Blunt-pointed, about 3 inches long, 1½ inches thick, very fine grained, sweet flavored; deep rich orange color. Fine for bunching.

Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

HALF LONG DANVERS

A decided acquisition of the half-long type, broad-shouldered, cylindrical, admirable in color, fixed in habits, a wonderful producer. It is a first-class Carrot for all soils.

Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

IMPROVED LONG ORANGE

Deep orange color, long, smooth, fine for either garden or field culture. All who have cattle should raise a surplus of this Carrot for feeding milch cows during winter. It increases the flow of milk and imparts to the butter a delicious flavor and a rich golden color.

Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

SCARLET INTERMEDIATE

A fine handsome Carrot, in form midway between the Long Orange and Early Scarlet Horn. The roots are smooth and handsome, deep orange color, medium length tapering to a blunt point. The flesh is sweet, crisp and tender.

Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

DANVERS.

IMPROVED LONG ORANGE.

1 Oz. Will Produce 2000 Plants. CELERY

CELERY

Requires water, and lots of it, from the time the seed is sown in boxes in March until it is pulled in the autumn or winter. The seed is slow to germinate, and the soil where it is planted needs to be kept very wet.

Plant seed in hotbed or very early in open ground. Transplant 4 inches apart when 3 inches high in rich soil, finely pulverized; water and protect until well rooted. In June or July transplant into rows 3 to 4 feet apart, either on surface or well-manured trenches a foot in depth, half filled with well-rotted manure. Set the plants from 6 to 8 inches apart. To blanch, draw earth around the plants from time to time, taking care not to cover the top of the center shoots.

FRENCH GOLDEN SELF-BLANCHING

This cannot be too highly recommended, as after being thoroughly tested it has fulfilled all that has been claimed for it. It is decidedly the very best and most profitable Celery in cultivation; it is very early and entirely self-blanching. The beautiful appearance of the plant, its close habit, compact growth, straight, vigorous stalks, solid, crisp, brittle ribs, fine quality and delicious flavor commend it to all lovers of Celery. No variety can surpass it, indeed, equal the Paris Golden Self-Blanching in its striking appearance and delicious flavor. Our stock of this variety has been giving the market gardeners the very best results for several years.

Pkts., 5c. and 10c. Oz., \$1.00. $\frac{1}{4}$ lb., \$2.50. Lb., \$8.00.

WHITE PLUME CELERY.

FRENCH GOLDEN SELF-BLANCHING CELERY.

IMPROVED BOSTON MARKET

This is a decided improvement on the old Boston Market, being earlier, larger in size and of more vigorous growth.

Pkts., 5c. and 10c. Oz., 20c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

WHITE PLUME

An early, handsome, self-bleaching variety, growing in popularity every year. Like the Golden Self-Blanching, it requires very little earthing up to blanch it, and as a Celery for fall and early winter use it is unsurpassed.

Pkts., 5c. and 10c. Oz., 20c. $\frac{1}{4}$ lb., 60c. Lb., \$2.25.

WHITE SOLID

A large standard sort. One of the large growing sorts.

Pkts., 5c. and 10c. Oz., 20c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

CELERY SEED FOR FLAVORING

This seed is used for flavoring pickles, soups, etc.

Pkt., 5c. $\frac{1}{4}$ lb., 25c. $\frac{1}{2}$ lb., 40c. Lb., 80c.

CELERY—CONTINUED

1 Oz. Will Produce 2000 Plants.

WINTER QUEEN CELERY.

GOLDEN HEART, OR GOLDEN DWARF CELERY.

GIANT PASCAL CELERY.

A selection from the well-known Self-Blanching Celery. It partakes of the best qualities of that variety, is somewhat larger, and an excellent keeper. It is of fine nutty flavor, being entirely free from any bitter taste. It grows about 2 feet high. The stalks are very broad, thick and crisp; the width and thickness of these are distinctive features of this variety.

Pkts., 5c. and 10c. Oz., 20c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

GOLDEN HEART, OR GOLDEN DWARF CELERY.

This old standard variety still holds a high place in the estimation of market gardeners, and is largely used, always giving satisfaction. A showy sort, solid, of fine flavor and a good keeper.

Pkts., 5c. and 10c. Oz., 20c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

WINTER QUEEN CELERY.

It is, without doubt, the most valuable variety of Celery for winter and spring use ever introduced. It is also much stouter, thicker and heavier, with double the amount of heart of any known Celery. The plant is beautiful in appearance, of close habit and compact growth, and blanches to a beautiful cream white. Ribs perfectly solid, crisp and of delicious nutty flavor.

Pkt., 10c. Oz., 20c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

NEW YORK GIANT SELF-BLANCHING CELERY.

A fine large, white self-blanching celery. It is extra early, and if sown in early spring can be had for market in August. We consider it the best white variety for the early fall trade; has a vigorous growth and attains a very large size; is crisp, tender, brittle and very sweet, with a nutty flavor superior to any of the old kinds.

Pkts., 5c. and 10c. Oz., 30c. $\frac{1}{4}$ lb., \$1.00. Lb., \$3.00.

CELERIAC

OR TURNIP ROOTED CELERY.

LARGE SMOOTH PRAGUE.

The largest, smoothest and best of the Celeriacs. Pkts., 5c. and 10c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

NEW APPLE SHAPE.

Small foliage, large, round and smooth. Pkts., 5c. and 10c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.75.

Large Smooth Prague.

CORN FOR TABLE USE

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

WHEN CORN IS WANTED BY MAIL, ADD 6 CENTS PER POUND TO PAY POSTAGE.

CULTURE.—Sugar Corn may be planted in rows 3 to 4 feet apart, and the seeds placed about 8 inches apart in the rows, or planted in hills 3 to 4 feet apart each way, according to variety grown, or richness of soil. Do not let more than three plants remain in each hill. It can be planted in this vicinity from first of May to last of July for succession of crop. By planting every two weeks a family may have good corn throughout the whole season.

FIRST EXTRA EARLY VARIETIES.

Extra Early Baltimore.

Not a Sugar Corn, but are used for very early planting, and will mature nice roasting ears before the sweet corn.

G. & T. Co.'s New Sixty Day.

FIRST EARLY VARIETIES

56 POUNDS PER BUSHEL.

EXTRA EARLY BALTIMORE.—The hardest and earliest variety for table use; it can be planted earlier than any other, but is not a sweet corn; white indented grains and short ears. **Pound, 20c.**

G. & T. CO'S NEW 60-DAY CORN.—The largest extra early corn grown. As early as Extra Early Adams, but grows larger ears. **Pound, 20c.**

EXTRA EARLY ADAMS.—Extremely hardy and early; one of the best for early planting. **Pound, 20c.**

EARLY ADAMS.—A favorite in the South. **Pound, 20c.**

EARLY BURLINGTON HYBRID.—Not a true sugar corn, but a hybrid or mixture between the sugar corn and the Adams Early, being as early as Adams, but having a larger ear. It closely resembles the sugar corn. **Pound, 20c.**

NINETY-DAY CORN (Red Cob.)—This is an elegant corn for truckers and market gardeners, as it is as good a seller as green corn, and if not used as green corn makes a good variety for feeding purposes. It may be planted for early crop, and at intervals until the middle of July. Many truckers use it for their late planting, as it produces a very sure crop. **Pound, 8c. 14 lbs., \$1.00. 56 lbs. or 1 Bushel, \$3.50.**

New Golden Bantam Sugar Corn.

SWEET OR SUGAR CORN

EXTRA EARLY VARIETIES. (Bushel Sweet Corn, 44 Lbs.).

NEW GOLDEN BANTAM SUGAR CORN.—The earliest and best of sugar corns. It is of golden color and delicious flavor, with the sweetness of honey; can be planted earlier than the other varieties of true sweet corn, as it is very hardy. The stalks are dwarf in habit, growing about four feet high, producing two or three good ears five to six inches long, well set from the ground. **Pound, 30c.**

PREMO.—The best early sweet corn on the market. A genuine sweet corn as early as the Adams Extra Early, and larger than any other early variety. The quality is the best, ears measuring 7 to 9 inches long, being well filled to the end; generally bearing two ears to the stalk. **Pound, 30c.**

CORY.—An early variety red cob. **Pound, 30c.**

FIRST OF ALL.—A selection from the Cory, the ears about the same size as the Cory, lighter in color and earlier. **Pound, 30c.**

WHITE CORY.—An early variety, with good-sized ears and large kernels. **Pound, 30c.**

STABLER'S EARLY.—Of larger size than usual for the early kinds. It is remarkable for the fine flavor and sweetness, and is a desirable gardeners' and canning variety. **Pound, 30c.**

CROSBY'S EXTRA EARLY.—An early market variety, very productive; ears rather short and rich, sugary flavor. **Pound, 30c.**

EARLY MINNESOTA SUGAR.—One of the first early among sugar corn. **Pound, 30c.**

BLACK MEXICAN SUGAR.—The black corn is especially rich in sugary qualities. **Pound, —. Crop failed.**

CAUTION.—Sweet Corn in bulk, even after being thoroughly cured, will often gather moisture and spoil, particularly if it has been exposed to a low temperature. To prevent this it should be taken out of the bag as soon as received and spread in a dry place.

SWEET OR SUGAR CORN FOR TABLE USE

CAUTION.—Sweet Corn in bulk, even after being thoroughly cured, will often gather moisture and spoil, particularly if it has been exposed to a low temperature. To prevent this it should be taken out of the bag as soon as received and spread in a dry place.

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

Main Crop Varieties

BUSHEL SWEET CORN CONSISTS OF
44 POUNDS.

COUNTRY GENTLEMAN CORN.—This is the sweetest and most deliciously flavored of all sugar corn. It is the finest variety for the table, and will delight the most fastidious epicure. It produces three to four ears to the stalk, and retains its greenness longer than other sorts. Pound, 25c. 5 Pounds, \$1.25.

STOWELL'S EVERGREEN.—So well known that it scarcely needs description. Excellent; keeps green till cold weather; ears large; one of the best. Pound, 25c. 5 Pounds, \$1.25.

TRUCKERS' EARLY SUGAR CORN.—This is the most desirable variety of sugar corn for truckers and gardeners to plant early. As its many excellent qualities are becoming generally known, it has come to be one of the standard sorts. It is ten days earlier than Evergreen, very productive, growing two to four ears to the stalk. The ears set low, are large and well filled. The grain long and narrow, similar to Evergreen, but smaller. It is one of the most productive varieties in cultivation. Pound, 25c.

HICKOK.—A very handsome and excellent variety of sugar corn; large, white grain and sweet.

Pound, 25c.

IMPROVED NE PLUS ULTRA.—Early. good-sized ears and deep grain; very productive, some stalks yielding four ears and an average crop running as high as three ears to the stalk.

Pound, 25c.

LATE HAMMOTH.—The largest variety grown; very fine for market purposes.

Pound, 25c.

EGYPTIAN, OR WASHINGTON MARKET.—A large variety, somewhat resembling the Evergreen; flavor peculiarly rich and sweet, and of superior quality; fine for market.

Pound, 25c.

ZIGZAG EVERGREEN.—This is one of the sweetest and best late sweet corn, not even excepting the celebrated Country Gentleman and Shoe Peg. The ears resemble Stowell's Evergreen in size and shape, except that the kernels are placed irregularly or zigzag upon the cob, which is always an indication of great sweetness in any variety of sugar corn.

Pound, 25c.

KENDALL'S EARLY GIANT.—The largest early sweet corn known, and is very productive.

Pound, 25c.

EARLY HAMMOTH.—A splendid market sort, producing large, handsome ears; grain large, white and sweet; fills out well at the end.

Pound, 25c.

WHITE EVERGREEN.—Has ears as large as Stowell's, is five days earlier; grains pure white. A valuable acquisition for the gardener and canner.

Pound, 25c.

SUGAR CORN.—For fodder. Write for prices.

COUNTRY GENTLEMAN.

STOWELL'S EVERGREEN.

TRUCKERS' EARLY CORN.

CUCUMBER

CULTURE

For very early Cucumbers sow the first of April in a hotbed upon pieces of sod (grass side down), so that they can be readily transplanted to the open ground in rich soil when danger of frost is over, or protect by hand-glasses. The vines require a warm location for early Cucumbers. Plant after the ground has become warm in hills 4 feet apart for the smaller varieties, and 6 feet for the larger sort. For pickling, sow from middle of June to last of July. Manure with ashes, fertilizer or some well-rotted compost, working the manure just under the surface. Sprinkle the vines with slug-shot, plaster or air-slaked lime to protect from bugs. The Cucumbers should be gathered when large enough for use, whether required or not; if left to ripen, it destroys their productiveness.

IMPROVED BALTIMORE WHITE SPINE.

IMPROVED BALTIMORE WHITE SPINE

This is the best Cucumber for early planting, because it will retain its green color longer than any other sort. It is of good size and shape, and the popular variety with truckers around Baltimore and Norfolk, as well as the growers from Virginia to Florida. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

EARLY FORTUNE CUCUMBER.

EXTRA EARLY WHITE SPINE.—A strain of White Spine which has been improved through careful selection, with a view to use for forcing in hothouses and frames; also elegant for field culture. Our stock produces handsome, dark-colored fruits, which retain their color longer than other sorts. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

ARLINGTON WHITE SPINE.—A favorite extra early variety, of desirable size, handsome shape, dark green color, holding its color longer than most others. Good shipper and sells well. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

JERSEY PICKLING.

EARLY FORTUNE CUCUMBER.—One of the earliest and best dark green White Spine Cucumbers. Extremely early, and beautiful shape. Good for market gardeners, truckers or private family; in fact, any one who likes a dark green white spine cucumber it cannot help but please. Fine for Southern growers, as it stands shipping remarkably well. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. $\frac{1}{2}$ lb., 65c. Lb., \$1.25.

JERSEY PICKLING.—This is the most popular sort with the market gardeners around Baltimore and Philadelphia for pickling. Said to green better than any other variety.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 30c. Lb., \$1.00.

IMPROVED LONG GREEN

The skin is of a deep green, and the flesh is solid, crisp and of fine quality. We have the very best strains of this variety and recommend it as much the best cucumber of all, and the variety every one should plant. The best known and most popular variety for general use. Is vigorous and productive, and forms fruit fit for use almost as early as the shorter varieties. The mature fruit is almost 12 inches long.

Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 35c. Lb., \$1.25.

CHICAGO PICKLING.

Very Popular with Chicago Market Gardeners, and Extensively Grown in That Vicinity.

Fruit medium length, pointed at each end, with very large and prominent spines; color deep green. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 30c. Lb., \$1.00.

BURR, OR WEST INDIA GHERKIN.

An extremely small fruited variety, grown exclusively for pickles. It has no value for slicing. Is very prickly, but tender and crisp if picked when young. Seed germinates slowly. Pkt., 5c. Oz., 20c. $\frac{1}{4}$ lb., 60c. Lb., \$2.00.

LONG GREEN TURKEY.

A very showy and excellent sort. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 35c. Lb., \$1.25.

IMPROVED LONG GREEN.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

CUCUMBERS---CONTINUED

EARLY GREEN PROLIFIC.

Early Green Prolific

A very productive variety, having fruits of good length and handsome form. Desirable for producing pickles of medium size and of fine quality when sliced for the table.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 30c. Lb., \$1.00.

EVER-BEARING CUCUMBER.

Ever-Bearing Cucumber

This variety is unique, and will prove valuable both for the table and for pickling. Is of small size, very early, enormously productive and extremely valuable as a green pickler. The peculiar merit of this new Cucumber is that the vines continue to flower and produce fruit until killed by frost, whether the ripe Cucumbers are picked off or not, in which respect it differs from all other sorts in cultivation.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

CUMBERLAND

A new and distinct variety. Said to have originated from crossing the Parisian Pickling and the Early White Spine. It certainly has the good qualities of each of these sorts. The fruits are large, symmetrical, dark green, covered with innumerable small white spines, and are of prime quality for slicing. The vine is vigorous, wonderfully prolific, and continues in bearing much longer than most sorts.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

EARLY CLUSTER

A short, prickly variety, bearing in clusters near the root. A good bearer. Pkt., 5c. Oz., 10c. $\frac{1}{4}$ lb., 40c. Lb., \$1.25.

JAPANESE CLIMBING CUCUMBER

It bears abundantly throughout the season, while the climbing habit enables the hanging fruit to grow perfectly straight, from 12 to 16 inches in length; the Cucumbers are thick, tender and of delicate flavor; flesh white, skin dark green, turning to brown, and netted when ripe.

Pkt., 10c. Oz., 15c. $\frac{1}{4}$ lb., 40c.

TELEGRAPH (English Forcing)

Should be grown in hotbeds where the temperature does not fall below 65 degrees at night. Pkt., 25c.

EARLY CLUSTER CUCUMBER.

GREEN CURLED ENDIVE

Is One of the Best Salads for Fall and winter Use. One Ounce of Seed to 150 Feet of Row.

For early use, sow as soon as the ground can be worked in the spring, in drills 15 inches apart, and then thin plants to 6 or 8 inches in the row. To blanch the leaves, gather them carefully together when perfectly dry and tie them with matting or soft fibrous material. Another method is to invert flower pots over the plant. The leaves are very highly esteemed for use as salads.

GREEN CURLED

The best sort in use. Useful as a salad, and also used for garnishing.

Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 40c. Lb., \$1.50.

GREEN CURLED ENDIVE.

BALTIMORE

EGG PLANT

EGG PLANT

CULTURE.—Sow the seed in hotbeds early in March. When three inches high pot the young plants, using small pots, and plunge them in the same bed so that the plants may become stocky. They can be planted out from the pots when the season becomes sufficiently warm in May or June, or they can be transplanted into a second bed to make them strong until the weather is warm enough to transplant about three feet apart each way in thoroughly-worked and well-enriched soil. Draw the earth up to the stems when about a foot high. Egg Plant Seed will not vegetate freely without a strong, uniform heat, and if the plants get the least chilled in the earlier stages of growth they seldom recover. Therefore, repeated sowings are sometimes necessary. Care should be observed in cutting the fruit so as not to disturb the roots of the plants. One ounce will produce about 1000 plants.

BLACK BEAUTY EGG PLANT.—The earliest of all large fruited Egg Plants, and produces fruit quite as large as the **NEW YORK PURPLE** in 10 days' less time. The fruit is symmetrical in shape, of uniform size, of a dark rich purple color, which does not fade or change to lighter color at blossom end like some other varieties. Just the variety for the market gardener and trucker for early spring trade. Pkt., 10c. Oz., 45c. ¼ lb., \$1.75. Lb., \$6.50.

NEW YORK IMPROVED LARGE PURPLE EGG PLANT.—This market garden variety has plants of strong growth, and is very productive, producing plants of large size and fruits of smooth, deep purple color until frost. Pkts., 5c. and 10c. Oz., 40c. ¼ lb., \$1.50. Lb., \$6.00.

THE FLORIDA HIGH-BUSH EGG PLANT.—Is in great demand by Southern truckers. It has a very vigorous growth and remarkably hardy. The plant grows very erect and holds the fruits clear of the ground. Pkts., 5c. and 10c. Oz., 40c. ¼ lb., \$1.50. Lb., \$6.00.

BALTIMORE EGG PLANT.—This is decidedly the best and most profitable Egg Plant in cultivation. It is large, thornless, of beautiful shape and handsome purple color. We have never seen finer specimens of Egg Plant than those grown from our seed. When inspecting the field of Egg Plants growing for seed we were surprised at the regular size and uniform, handsome color of the fruit all over the field.

Pkt., 10c. Oz., 40c. ¼ lb., \$1.50. Lb., \$6.00.

EXTRA CURLED NEW AMERICAN KALE.

KALE

One Ounce of Seed Will Sow a Drill of About 200 Feet.

The Kales are more hardy than Cabbage, and make excellent greens for winter and spring use, and are improved by frost. For early spring use, sow broadcast in September and protect during winter. It must also be sown in April or May for later use.

DWARF GREEN GERMAN KALE.—This variety sow in September broadcast, and gather in early spring, like spinach. It may also be sown early in the spring for later use. Pkt., 5c. ¼ lb., 40c. Lb., \$1.25.

EXTRA CURLED NEW AMERICAN KALE.—This is an extra curled, long-standing variety of a beautiful green color; stands the winter well, and will stand longer in the spring before going to seed than any other variety. Pkt., 5c. ¼ lb., 40c. Lb., \$1.25.

NEW IMPERIAL CURLED LONG-STANDING KALE.—Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.

NORFOLK.—A variety used by the truckers of Norfolk for shipment North. Light green color and leaves much curled. Pkt., 5c. Oz., 15c. ¼ lb., 60c. Lb., \$2.00.

KOHLRABI

1 OZ. OF SEED TO 100 YARDS OF ROW.

WHITE VIENNA

BULB LIGHT GREEN.
FLESH WHITE.
VERY RAPID IN GROWTH.
EARLY MATURITY.
FINE IN TEXTURE, and
SYMMETRICAL IN FORM.
SUPERIOR.

Pkts., 5c. and 10c.
Oz., 20c. Lb., \$2.00. ¼ lb., 60c.

IMPROVED KOHLRABI.—Pkts., 5c. and 10c. Oz., 15c. ¼ lb., 60c. ½ lb., \$1.00. Lb., \$2.00.

LEEK

1 OZ. OF SEED TO 150 FEET OF ROW.

Select good Onion soil, manure liberally, plant in April in drills 6 to 8 inches deep, and 18 inches apart, and thin to 9 inches apart in the drill. Gradually draw the earth around the plants until the drills are filled level with the surface. Draw for use in October. To be used in soups or boiled as Asparagus.

EXTRA LARGE MAMMOTH.—A large and strong plant; hardy. The best variety for general culture. Pkt., 5c. Oz., 20c. ¼ lb., 70c. Lb., \$2.50.

MUSSELBURGH.—Oz., 20c. ¼ lb., 70c. Lb., \$2.50.

LARGE ROUEN.—Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 70c. Lb., \$2.50.

Lettuce requires a rich and rather moist soil. The rows should be about 12 inches apart, and the plants thinned to 10 or 12 inches apart for the leading varieties. The more rapid the growth, the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth.

G. & T. CO.'S WHITE SEED SUMMER LETTUCE

The Best Summer Lettuce Ever Introduced.—This variety, introduced by us recently, has exceeded our expectation. Those who purchased it were delighted with their crops, and came back for more seed. This Lettuce will stand the summer heat better than most sorts, and makes magnificent heads. We expect this sort to grow in favor wherever known. It has a beautiful green color; head solid; light leaves, nicely crinkled; very tender, and of most excellent flavor. **Pkt., 5c. Oz., 20c. ¼ lb., 50c. Lb., \$1.50.**

G. & T. CO.'S SUMMER LETTUCE (Black Seed).

This Lettuce is becoming very popular among gardeners for summer use. It produces a splendid large, solid head, of the Cabbage type, remaining a long time in prime condition without going to seed; in fact, it is often necessary for the seed growers to slit open the head in order to allow the seed stalk a chance to develop. It is of a light green color, fine quality, crisp, tender, and nearly every plant will make a fine, solid head in the hottest weather, when other varieties refuse even to grow. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

IMPROVED NEW YORK, OR "WONDERFUL."

Plants of extra large growth, producing heads of immense size under favorable conditions. Inner portion is beautifully blanched and stands for a considerable time before running to seed. Outer leaves a deep, rich green. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

CALIFORNIA CREAM BUTTER LETTUCE.

This is fairly well known, and has given good results with the growers. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

MAY KING

A very early new variety, forming fine hard heads within a few weeks after planting. It is medium sized, light green, with buttery but crisp heads. There is just a faint tint of brown on the head.

We have had no end of praise from our friends and customers who have tried this variety. It is essentially a spring sort, and does well all summer. Being of rapid growth and quick heading, it is especially recommended for home garden, and is universally esteemed. **Pkt., 5c. Oz., 15c. ¼ lb., 50c. Lb., \$1.50.**

"ICEBERG" LETTUCE.

The heads are large, crisp, solid and tender. **Pkts., 5c. and 10c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

EARLY PRIZE HEAD (Seed White)

A large, clustering, non-heading lettuce, most excellent for the home garden and undoubtedly the most easily grown variety in cultivation. It is too tender, however, to stand shipping or handling on the market. The leaves are finely curled and crumpled, bright green tinged with brownish red, and are very crisp, tender and sweet. **Pkt., 5c. Oz., 15c. 2 Oz., 25c. ¼ lb., 40c. Lb., \$1.25.**

EARLY WHITE CABBAGE, OR BUTTER.

A broad-leaved, vigorous-heading sort; white, showy and desirable. **Pkt., 5c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

EARLY CURLED SIMPSON.

Black seed. Very early; excellent for salads; forms a compact mass of leaves. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

TENNIS BALL.

Black seed. A favorite forcing variety; a very hard head. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

ROMAINE OR WHITE PARIS COS

The best of the Cos or celery varieties. Forms a large light-green plant with the head well folded and quite solid. Cos lettuce is also called Romaine, and is very popular with our foreign population, for it is highly prized in England and France, while little known to our own people. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

LETTUCE

U. S. SUMMER LETTUCE.

ROMAINE, OR WHITE PARIS COS LETTUCE.

LETTUCE---Continued BALTIMORE CABBAGE LETTUCE

G. & T. CO.'S TRUE STOCK.
Large Heads, Beautiful Heads, Solid Heads;
Stands Heat Well. Best of all for
FALL PLANTING.

This new Lettuce, which we introduced a few years ago, and claimed to be one of the best ever put on the market, and which produced such a sensation among the large growers who tried it, still holds a high place among lettuce. As soon as the growers discovered its merits they came for more seed, and recommended it to all their friends; these, in turn, were delighted with their crops, as the result more than justified all we claimed for it. A grower at Gardenville, Md., says: "I had 3000 heads of your Baltimore Cabbage Lettuce, and they all headed but one; they are slow to run to seed." The heads are large and solid; color pretty light green, and very slow to seed; in fact, it is just what the truckers and gardeners want. A large trucker in New Jersey writes: "The Baltimore Cabbage Lettuce I had of you was certainly very fine." **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 50c. Lb., \$1.50.**

LARGE LOAF LETTUCE.

This is so well known to truckers and gardeners around Baltimore and Norfolk that for them it scarcely needs description. For the benefit of those who are not acquainted with it, would say it makes large, compact heads, is of beautiful light green color, very tender and crisp. This is unsurpassed for frame use, and is also an excellent outdoor lettuce for fall or early spring.

Pkt., 5c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

LARGE LOAF LETTUCE.

BIG BOSTON.

BALTIMORE CABBAGE LETTUCE.

MAMMOTH BLACK-SEEDED BUTTER LETTUCE.

A strain of large, smooth-leaved, head lettuce, forming very large, solid cabbage-like heads of thick, brittle leaves, the inner ones becoming very white, tender and fine flavored.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

BALTIMORE OAK LEAF.

This lettuce will resist the heat of summer and stand longer before running to seed than any variety we have ever known. It makes a large, solid head, and is very popular with those who know it.

Pkts., 10c. Oz., 20c. ¼ lb., 50c. Lb., \$1.50.

BIG HEAD LETTUCE.

The "Big Head" is certain to please market gardeners and truckers, because it always produces large, salable heads. It is very solid and crisp, of tender quality, which makes it attractive. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

HANSON.

A variation of the Indiana, forming a half-closed head. **Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.**

BOSTON MARKET.

White seed. A celebrated variety in New England, of good heading habit; small, early and compact; quite desirable.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

GRAND RAPIDS.

This variety is largely grown for shipment, and is considered by many the best loose-headed Lettuce for forcing under glass. Leaves medium size, of light, yellowish green color, much crimped and frilled, thin, but of very upright growth; crisp, tender and of good quality. Owing to its upright habit, it may be planted very closely. It is of extremely rapid growth; not very liable to rot; will stand without spoiling a week to ten days after it is fit to cut, and retains its freshness a long time after cutting.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

DEFIANCE.

Stands summer heat better than any other variety; one of the finest large-growing varieties. It forms very large, solid heads, so firm they have to be cut open to allow the flower heads to come through.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

SALAMANDER (Black Seed).

An excellent sort for spring or summer use; forms good-sized heads of excellent quality.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 30c. Lb., \$1.00.

BIG BOSTON.

The same in color, shape and general appearance as the Boston Market, double the size. A most desirable sort either for forcing in cold frames or planting in open ground. Is popular with truckers, as it makes large, solid, salable heads. Very highly recommended by those who have tried it.

Pkts., 5c. and 10c. Oz., 20c. ¼ lb., 40c. Lb., \$1.25.

Muskmelon

**NEW
MARYLAND**

CULTURE.—One ounce of seed to 50 hills. Sow about the last of spring or the first of summer in hills of light, rich, sandy soil, 4 feet apart, allowing but three plants to grow in each hill; after they have grown about a foot long, pinch off the points of shoots, which causes the vines not only to become stronger, but makes them produce lateral branches and prove more productive and mature earlier. It should not be grown near squashes, cucumbers or pumpkins, as the flavor will be affected in consequence.

NEW MARYLAND CANTALOUPE.—The latest acquisition to our collection of muskmelons. It is earlier, larger and cuts better than the Rocky Ford. Flesh is green, of fine flavor and heavily netted, making it the most attractive melon on the market. A sure money-maker. Our truckers around Baltimore will have no other after planting our New Maryland. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

ROCKY FORD MELON

This has become one of the most popular of small or basket melons, largely owing to the fact that growers in the **Rocky Ford** region pack and ship their fruit in a most attractive manner. The fruit is oval, slightly ribbed, densely covered with coarse netting. Flesh thick, green, very sweet and high-flavored.

We have an exceptionally fine stock of this variety grown from choice selected specimens. **Pkt., 5c. Oz., 10c. ¼ lb., 35c. Lb., \$1.00.**

ROCKY FORD CANTALOUPE.

Baltimore Nutmeg Cantaloupe

**The Old Standard Variety That Has Found Favor
Wherever Grown.**

The stock seed of this splendid melon was secured from a trucker who enjoys the reputation for raising the finest Cantaloupes that come to the Baltimore market. The writer also tested the fruit, and found it to be of excellent flavor. It is green-fleshed, and the rind is handsomely netted. It is well known and popular with the truckers and market gardeners of Baltimore, Washington, Norfolk and other places—in fact, it is a leading sort all over the country. **Pkt., 5c. Oz., 10c. ¼ lb., 35c. Lb., \$1.00.**

IMPROVED JENNY LIND.

A small, early variety of surpassing good quality, highly recommended for family garden. We consider this the most delicious Cantaloupe we have ever eaten, and while the fruit is small, it is an abundant bearer. A market gardener having this sort for sale would in a short time have no difficulty in disposing of all he could raise. **Pkt., 5c. Oz., 10c. ¼ lb., 35c. Lb., \$1.00.**

BALTIMORE NUTMEG.

EMERALD GEM.

Meat, salmon color, exceedingly sweet and delicious; very early and prolific. One of the best for family use. Its appearance is not attractive, but try it, and you will want it again.

Pkt., 5c. Oz., 10c. ¼ lb., 35c. Lb., \$1.00.

OSAGE, OR MILLER'S CREAM.

Most delicious. The flesh is a rich salmon color, very thick, sweet and rich; rind very thin and finely netted.

Pkt., 5c. Oz., 10c. ¼ lb., 35c. Lb., \$1.00.

EARLY NETTED GEM.

EXTENSIVELY grown, and many prefer it to all others for table use. Grows remarkably uniform; thick meated; flesh light green in color, and of fine, luscious flavor; skin green, regularly ribbed and thickly netted; very productive and extra early in ripening; will keep for nearly a week after picking, and is especially suited for shipping in baskets or crates.

Pkts., 5c. and 10c. ¼ lb., 35c. Lb., \$1.00.

MUSKMELONS--CONTINUED

KNIGHT CANTALOUPE

A NEW EARLY CANTALOUPE OF SUPERB QUALITY AND AT THE SAME TIME MAKES AN EXCELLENT MARKET OR SHIPPING MELON

KNIGHT CANTALOUPE

PAUL ROSE

NORFOLK BUTTON

An improved strain of Early Jenny Lind, having a nub or button on the blossom end, which gives it a distinction over all other varieties. It is very early, of remarkably fine texture and delicious flavor, and produces fruits of the finest quality. It is extra fine for both home and market use. We are putting the above on the market for the first time, and have but a limited supply of seed. Those who wish to secure a trial order will do well by placing their order at once. **Pkts., 5c. and 10c. 1/4 Lb., 35c. 1/2 Lb., \$1.00.**

EXTRA EARLY HACKENSACK

Netted green flesh and excellent; very showy market variety and an excellent keeper. Ten days earlier than the Old Hackensack. **Pkt., 5c. Oz., 10c. 1/4 Lb., 35c. 1/2 Lb., \$1.00.**

LONG ISLAND BEAUTY—Pkt., 5c. Oz., 15c. 1/4 Lb., 35c.

This new Cantaloupe has been grown in Anne Arundel county for the past several years, and has created a furore with our truckers, on account of its earliness, productiveness, uniformity in shape and appearance and its fine table qualities. It matures about a week earlier than the regular Rocky Ford, is larger in size and makes a most attractive and salable melon. It has thick, green flesh, shading to orange at the center. The fruits are oblong in shape, well ribbed and well netted. It is a leader, both for planting for home use and market and for shipping. Its early maturity, together with its fine qualities, are strong points in its favor. **Pkt., 5c. Oz., 15c. 1/4 Lb., 40c. 1/2 Lb., \$1.25.**

PAUL ROSE.—In this new sort are combined all the good qualities of the Netted Gem and the Osage, the varieties from which it originated. The fruit is oval, about 5 inches in diameter, and in shape and general appearance similar to the well-known Netted Gem or Rocky Ford. The firm flesh is a rich orange-red color, like that of the Osage, but even sweeter and higher flavored, retaining its good qualities quite to the rind. We think it really has no equal as a market melon for professional melongrowers, and it is one of the very best sorts for the home garden. **Pkt., 5c. Oz., 10c. 1/4 Lb., 35c. 1/2 Lb., \$1.00.**

ANNE ARUNDEL CANTALOUPE

(Original Stock.)

This handsome melon, introduced by us several years ago, was for years a special favorite with a number of the leading growers of Anne Arundel county, Maryland. This county is justly celebrated as growing the finest Cantaloupes in the country. We might almost say the finest in the world. Knowing its value, we selected the stock and placed it before our customers. It has met every promise we made for it upon its introduction. **Pkt., 5c. Oz., 10c. 1/4 Lb., 35c. 1/2 Lb., \$1.00.**

EDEN GEM OR NETTED ROCK

One of the handsomest melons in our list. Splendid shape and thorough netting and absence of deep spaces between the ribs, indicating strong shipping properties. The flesh is unusually thick, the seed cavity very small, the flavor exquisite. A heavy yielder, the melons very uniform, but few run too large, and still fewer too small. For shipping we recommend it highly; also for home growers. **Pkt., 5c. Oz., 10c. 1/4 Lb., 40c. 1/2 Lb., \$1.25.**

Netted Rock or Eden Gem Cantaloupe.

WATERMELONS

LORD BALTIMORE.

CULTURE.—One ounce of seed to 30 hills. Watermelons require a rich, sandy soil for best development. Cultivate the same as for cantaloupes, except that the hills should be eight or ten feet apart.

Lord Baltimore

It is very early, of oblong shape, and the flesh is of handsome crimson color, deliciously sweet and extending close up to the rind. It has a thin, hard rind, beautifully mottled light and dark green. Its perfect shape, faultless color, fine texture and excellent flavor combine to make it one of the very best melons that grows. It is a good shipper, and beats all others as a seller.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 30c. Lb., \$1.00.

FLORIDA FAVORITE.

FLORIDA FAVORITE

This we consider one of the richest and sweetest flavored melons grown, of medium size and prolific. The best of all for family garden. It is now very popular with the truckers and melon-growers of Maryland and Virginia, and sells readily in the Baltimore markets.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

McIVER'S SUGAR WATERMELON.

In outward appearance it somewhat resembles the old Rattlesnake. The quality is much superior. It is an extremely productive and hardy variety.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

FORDHOOK EARLY.

This is a very early variety, growing to a good size; color, medium green; form, nearly round; seeds, white; flesh, bright red and very sweet.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

BLACK BOULDER.

It is enormously productive, reaching a mammoth size, with rich, dark green skin. It cuts equal to any melon we have ever eaten, and its shipping qualities are phenomenal, no other melon equaling it in tough skin and rind; in this respect even superior to the Kolb Gem.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

DARK ICING.

An extra early and extra good melon for home use and nearby market. One of the most delicious of melons; rich red and sugary to the very thin rind.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

TRIUMPH WATERMELON

Is very prolific, very early and of uniformly large size. The rind, like Duke Jones, is of dark green color; the seed is exactly the same color as that of Kolb Gem.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

GRAY MONARCH, OR LONG WHITE ICING.

This distinct melon is without a doubt one of the largest of all, frequently attaining a weight of 70 pounds and over. The skin is a mottled gray color, shape long, flesh bright crimson, and of sweet, delicious flavor. It is also a fine shipper, carrying well long distances and bringing very high prices.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

DUKE JONES WATERMELON

In shape the **DUKE JONES** resembles very closely the Kolb Gem. The rind is darker green in color, with indistinct irregular stripes of dark and light green alternating; in general appearance it is a dark green melon. It averages very large in size, comparatively no small melons; is very productive; it is also very early in maturing.

Pkt., 5c. Oz., 10c. $\frac{1}{4}$ Lb., 25c. Lb., 90c.

DUKE JONES.

WATERMELONS---CONTINUED

TOM WATSON (NEW)

TOM WATSON.

A recent introduction. A large oblong melon, dark green skin, with thin, tough rind, which gives it excellent shipping qualities. Melons are produced from 18 to 24 inches long and from 8 to 12 inches in diameter. Flesh, deep red, crisp, melting and of the finest flavor. Heart large, with little or no core. One of the best eating melons known.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., 90c.

RATTLESNAKE WATERMELON.

Large, oblong, striped and mottled; flesh bright red; a good shipper; a favorite variety in the South.

Pkts., 5c. and 10c. ¼ lb., 30c. Lb., 90c.

DIXIE.

It is earlier and larger than the well-known and popular Kolb Gem, and in color a darker green, with beautiful stripes, making it one of the handsomest melons on the market. Flesh deep red, sugary and melting.

Pkts., 5c. and 10c. ¼ lb., 30c. Lb., 90c.

SWEETHEART.

An entirely distinct and handsome new Watermelon. Vine vigorous and productive, ripening early. Fruit large, oval, very heavy, uniformly mottled light and dark green. Flesh bright red, solid and very sweet.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., 90c.

KLECKLEY'S SWEETS.

Skin dark green, thin rind, flesh scarlet, very solid, firm and most luscious quality for the home market or family garden. It is decidedly one of the best.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., 90c.

BLUE GEM.

This splendid Melon resembles the Kolb Gem in shape, and is one of the very best shippers and table melon; is of a dark bluish color, with small grayish stripes. Is much superior to the Kolb Gem. Very productive, and is handsome and showy.

A grower in Dixie (Georgia) says: "If you want a shipper that will go around the world, you can safely select the **BLUE GEM.**"

Pkts., 5c. and 10c. ¼ lb., 30c. Lb., 90c.

GEORGIA RATTLESNAKE.

KOLB'S GEM.—This is one of the largest, most productive, best keeping and best shipping watermelons grown. Sells readily at the highest market prices. In fact, it is so well known that it speaks for itself. Our stock of this comes direct from the original grower. Special prices on large quantities.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., 90c.

BLACK STRIPED KOLB GEM WATERMELON.—The size of this fruit is uniformly large; shape, oval; color, a rich dark green, with fine stripes of lighter shade; much darker and richer than the old well-known Kolb Gem. The exceptionally strong rind makes it an excellent shipper.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., 90c.

CITRON—For Preserves. Fruit round and handsome. Used in making preserves only.

Pkts., 5c. and 10c. ¼ lb., 35c. Lb., \$1.00.

NEW WATERMELON—"IRISH GREY."

IRISH GREY

The newest and best in watermelons, recently introduced. Considered by the best growers and shippers to excel all other varieties. Fine flavor, red to rind, dark tough skin; long keeper and excellent shipper.

Pkt., 5c. Oz., 10c. ¼ lb., 40c. Lb., \$1.25.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

ENGLISH MILL TRACK MUSHROOM SPAWN

Lb., 25c. By Mail, 30c. Lb., Postpaid. 10 Lbs., \$2.50. 100 Lbs., \$20.00, by Freight or Express.

CULTIVATION

The cultivation of the Mushroom is a very simple matter and requires only ordinary intelligence and care. The materials needed are fresh horse manure, good soil and live spawn. The manure should not be too short, as it does not combine the necessary qualities. Long strawy litter, plentifully mixed with short manure, makes by far the best beds, as it does not heat too violently, decomposes slowly and retains its heat for a long period. Put in a heap and turn every three or four days to permit the escape of noxious gases and prevent burning. When ready for use it should be as hot as can be borne comfortably by the hand, and should also be moist. Make the beds 3 feet wide at the base, 2½ feet high, and of any desired length. The manure, when in proper condition, should be quickly handled to prevent the loss of heat, and be beaten down to make the heap firm and compact, and covered with long litter. The bed should within a few days warm to a temperature of 110 to 120 degrees. Never spawn a bed when the heat is rising, but always on the decline and under 90 degrees. Have a ground thermometer, and keep it plunged in the bed; by pulling it out and looking at it you can ascertain exactly the temperature of the bed. Should the temperature not exceed 100 or 110 degrees, no alarm should be felt, for if the manure was fresh it will likely produce a good crop. When the heat has decreased to 90 degrees, the bed is ready to receive the spawn, which is done by raising the manure with the hand and inserting pieces of spawn 2 inches square and 9 inches apart each way. At the expiration of a few days the bed may be covered with soil to the depth of about 2 inches. If in a closed cellar or mushroom house, wait about ten days, but if in open shed five days will do. If the soil is poor, add a liberal quantity of bone meal. It requires a period of 5 to 7 weeks before they are ready for use.

Two pounds of spawn are sufficient for a bed 3 feet by 6 feet.

Mushrooms can be readily grown in cellars, stables, sheds or pits. Many are successively grown on a shelf in an ordinary cellar, and yield sufficient crops to compensate the grower for his effort. The space under greenhouse benches or stagings will suit them exactly, using materials in the same manner as described.

MUSHROOMS ON PASTURE LAND OR LAWN.

About the first of June take pieces of spawn an inch square and lift the sod with a trowel or spade just sufficient to get a spawn under it, and then press the soil down hard. Set the spawn 1 to 2 feet apart. In a favorable season a crop may be expected in 3 or 4 months from the time of planting.

OKRA, OR GUMBO

Select warm location and rich soil, and plant when the ground becomes warm, in rows three feet apart, thinning plants a foot apart in the row. As the seeds are liable to rot in cool weather, they should be sown thickly. The pods are used to thicken soup, being gathered when young. It is one of the most wholesome vegetables in use.

DWARF OKRA.

This is the preferred kind with the growers; is of dwarf habit and very productive.

Pkt., 5c. Oz., 10c. ¼ lb., 25c. Lb., 75c.

WHITE VELVET.

It is very distinct, and the pods are perfectly round and smooth, of an attractive white velvet appearance, and of superior flavor and tenderness. The pods are of extra large size, and produced in great abundance.

Pkt., 5c. Oz., 10c. ¼ lb., 25c. Lb., 75c.

ONION SETS

CULTIVATION FOR SETS.

Have a clean and very rich soil, which should be thoroughly cultivated, or it will not do well enough to pay for the trouble. The most successful growers work their ground several times in the fall to kill out the weeds and get ground in nice condition. Use well-rotted manure freely, and be sure to get the seeds in as early as possible in the spring, no matter if it is ever so cold or unpleasant, and keep the soil mellow and clear of weeds, and if seed is good you will have a large crop of onion sets. On no other condition can you hope for success. Disturb the roots of the onion as little as possible, either in thinning or hoeing, and never hoe earth toward them to cover or hill, as we do most other things.

Sow the seed in drills about 12 inches apart. It will require from 40 to 60 pounds to sow an acre.
WHITE—Qt., 25c.; mailed, 35c. **YELLOW**—Qt., 20c.; mailed, 30c. Write us for quotations by the bushel.

ONION SEED

CULTIVATION TO GROW LARGE ONIONS FROM SEED.—The seed should be sown as early as possible in the spring, as they grow much better during the cool weather, and should make most of their growth before the hot weather sets in. Sow 5 pounds of seed to the acre for large onions.

THE NEW ONION CULTURE.—Sow the seed in hotbed and transplant early as possible to open ground. They can be grown very successfully by this plan.

WHITE S. S. ONION.

YELLOW DANVERS ONION.

WHITE SILVERSKIN, or PORTUGAL.—A good variety for family use, skin and flesh pure white, mild flavor and flat shape. The best white onion to grow largely for sets. Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.00. Lb., \$3.50.

WHITE PEARL ONION.—Earliest of all, growing with all the rapidity of a summer radish. Pearly white, waxy and transparent. Form flat and broad, flavor very mild, and it can be eaten raw almost like an apple. On rich soil it will grow very large. This is an elegant sort to sow for large onions, because of its rapid growth and fine quality. Pkt., 5c. Oz., 35c. $\frac{1}{4}$ lb., \$1.00. Lb., \$3.50.

AUSTRALIAN BROWN—A Valuable Long-Keeping Onion.—This new Onion, introduced into the United States a few years since, has met with wonderful success, and is pronounced the best keeper of all onions. The outside skin is of a deep amber brown, distinct from all other onions, extremely hard and firm, of fine flavor, and will keep almost indefinitely. Australian Brown is the only onion Australian growers will plant. Pkts., 5c. and 10c. Oz., 30c. $\frac{1}{4}$ lb., 75c. Lb., \$2.25.

WETHERSFIELD LARGE RED.—Well-known and favorite sort. A large yielder and good keeper. Pkt., 5c. Oz., 30c. $\frac{1}{4}$ lb., 75c. Lb., \$2.25.

YELLOW DUTCH, or STRASBURG.

YELLOW DUTCH, or STRASBURG.—The most popular and best variety for set purposes. Is similar to the Yellow Danvers. Flat in shape, color and size, but as a set onion it has the quality of ripening down earlier and more uniformly. Pkt., 5c. Oz., 30c. $\frac{1}{4}$ lb., 75c. Lb., \$2.25.

YELLOW GLOBE DANVERS.—A very handsome, round, yellow onion; a large yielder and splendid keeper; the preferred sort with market gardeners and large growers all over the country. We unhesitatingly recommend it for growing either sets or large onions. Pkt., 5c. Oz., 30c. $\frac{1}{4}$ lb., 75c. Lb., \$2.25.

YELLOW FLAT DANVERS.—A good onion, both for the home garden and for market—combining reliability in ripening with large yield. It ripens more surely in moist locations than do the globe-shaped varieties, as well as earlier. The thin-necked flattened bulbs are quite thick through; light yellow skin; fine-grained, mild, white flesh. Pkt., 5c. Oz., 30c. $\frac{1}{4}$ lb., 75c. Lb., \$2.25.

ONIONS—CONTINUED

PRIZE-TAKER.—This is the large, beautiful onion that is seen every fall offered for sale at the fruit stores in Baltimore and other large cities. It has a rich straw color, and is of enormous size. Although of such large size, it is very hardy and an excellent keeper. The flavor is mild and delicate, making the Prize-taker a favorite variety for salads. By sowing this sort early you can raise a large crop of large onions the first season with very little trouble. All that is necessary is good ground, proper cultivation, and not to have them too thick. Those of our growers who have tried this variety have had remarkably fine success. **Pkt., 5c. Oz., 30c. ¼ lb., 75c. Lb., \$2.25.**

PRIZE-TAKER ONION.

PARSNIP

The Parsnip will nourish best and give the longest, largest and smoothest roots in a very deep, rich soil—one that has been made rich from manure the previous year. Fresh manure makes the roots somewhat ill-shaped. Sow as early in the spring as the ground can be made ready, pretty thickly in drills from 12 to 18 inches apart, and about an inch deep. Thin the plants to five or six inches apart.

HOLLOW CROWN OR SUGAR

The Hollow Crown is superior in quality to all other varieties, and the preferred kind with Baltimore gardeners. The roots are smooth, tender, handsome shape and early. We have the finest stock of Hollow Crown Parsnips that we know of in this country. **Pkts., 5c. and 10c. ¼ lb., 50c. ½ lb., 75c. Lb., \$1.50.**

MUSTARD

GIANT CURLED.—Highly esteemed in the South, where the seed is sown in the fall and used in the spring as a salad. Our stock is the true curled leaf, and produces plants two feet high and of greater breadth, forming enormous bunches.

WHITE MUSTARD.—**Pkt., 5c. Oz., 10c. ¼ lb., 15c. Lb., 50c.**
¼ lb., 10c. Lb., 30c.

NASTURTIUM

Plant in May, the climbing varieties to cover arbor or fence, and the dwarf for beds or hanging baskets. The leaves are used for salad, and the seeds, when soft enough to be penetrated by the nail, for pickles.

TALL.—**Pkt., 5c. Oz., 10c. ¼ lb., 40c. Lb., \$1.25.**

DWARF.—**Pkt., 5c. Oz., 10c. ¼ lb., 40c. Lb., \$1.50.**

PARSLEY

SELECT rich soil; sow the seed in drills one foot apart, covering half an inch deep. It would be well to firm the soil with the foot after sowing the seed. As the seed is usually from 15 to 25 days in germinating, it will be necessary to sow early. Thin plants to 4 inches apart when 2 inches high. The beauty of the plant may be increased by several successive transplantings. It is used principally for flavoring soups, etc., and for garnishing in its natural state.

DWARF EXTRA CURLED.—The most beautiful and valuable variety in use; handsome bright green color; finely crimped, beautifully curled.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., \$1.00.

MOSS CURLED.—A very select crimped variety.

Pkt., 5c. Oz., 10c. ¼ lb., 30c. Lb., \$1.00.

PEAS

U. S. FOOD ADMINISTRATION LICENSE No. G 22972.

NOTICE.—In ordering Peas to be sent by mail, please add 6c. per pound to pay postage. For larger quantities see table on page 1.

The dwarf varieties should be liberally manured; the tall sorts will run too much to vine if heavily manured, it being better to depend on the richness of the land that was previously in good condition. Plant the dwarf in rows two feet apart; those varieties attaining a height of from two to three feet in rows three feet apart, and the rows of the tallest sort four feet apart. Bushing the tall kind when six inches high, on poles set every six or eight feet, with twine fastened to them about four inches apart, will answer finely.

G. & T. Co.'s First Early Peas

(In Sealed Bags, Thoroughly Rogued and Hand-Picked.)

This is the earliest of all and the most profitable early market Pea, because of its early maturity, uniformity of growth, and ripening and its productiveness. It ripens up so evenly as only to require about two pickings to secure the crop. It is grown from selected stock, under our own supervision, and the greatest care is exercised to keep it up to the highest standard of quality. It is a great favorite with the truckers, and is largely used by private families. Our sales of this sort increase annually.

Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

NEW LARGE PODDED ALASKA.—In general habit and growth resembles the well-known Alaska. Ripening about three days later, but with much longer and thicker pods. Handsomely shaped, of a beautiful dark green color, which is retained long after other varieties have lost their usefulness. The seed is somewhat wrinkled and dented. We strongly recommend this new Pea to gardeners, truckers and shippers as a most productive and large extra early variety.

Pound, 30c. 5 Pounds, \$1.50. 100 Pounds, \$20.00.

ALASKA.—Our best rogued and hand-picked stock. Height, 26 inches. The earliest Blue Pea; very uniform in growth and time of ripening. The dark green color of pods makes this a most desirable sort for canners and shippers, as it can be carried long distances without losing color.

Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

DEXTER (Genuine Stock).—Thoroughly rogued and hand-picked. Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

RURAL NEW YORKER.—Height, 2½ feet. In maturity it is among the early varieties. Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

FIRST AND BEST.—Height, 2½ feet. Grown with special care. One of the early varieties. Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

TRIUMPH PEAS.—Pound, 40c. 5 Pounds, \$1.50. 100 Pounds, \$25.00.

PHILADELPHIA EXTRA EARLY PEAS.—Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

PEDIGREE EXTRA EARLY.—Introduced several years ago, has steadily increased in favor until now the truckers all want it. Early as Alaska, large pods, white seeded, very prolific. All mature at one time and can be gathered in one picking. Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

Prolific Early Market

New. Recently introduced. The finest, largest and most prolific extra early variety. Larger than Alaska, nearly as early, quite as prolific. Handsome pods, which command the highest prices. Just the pea for the trucker, market gardener and family garden.

Price: Pound, 25c. 5 Pounds, \$1.00. 100 Pounds, \$16.00.

Large Podded Extra Early Sugar Variety

MARYLAND PRIDE PEAS.

Introduced by us last season for the first time, giving universal satisfaction to the market gardeners and shippers. Pods large, of a deep green color and nearly as early as Alaska.

Pound, 25c. 5 Pounds, \$1.10. 100 Pounds, \$23.00.

THOMAS LAXTON.

Habit and growth same as GRADUS, but pods are a deeper green color, square at the ends, having fine flavor.

Pound, 25c. 5 Pounds, \$1.10. 100 Pounds, \$23.00.

GRADUS, OR PROSPERITY—Pale Green Wrinkled.

The most attractive novelty of recent years. Large, handsome pods, well filled, ripening with the earliest and of vigorous habit.

Pound, 25c. 5 Pounds, \$1.10. 100 Pounds, \$23.00.

EXTRA EARLY ALASKA PEAS.

MARYLAND PRIDE PEAS.

ALL PRICES IN CATALOG SUBJECT TO CHANGE WITHOUT NOTICE.

PEAS--Continued

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

Dwarf Extra Early Variety NOTT'S EXCELSIOR

It is the best of dwarf wrinkled extra early of recent introduction. The vines are larger and more vigorous than the American Wonder, while the pods are fully one-third larger, containing 6 to 8 fine, large Peas, packed so closely together in the pods that the Peas are always more square than round. The pods are always well filled with Peas, which in sweetness and quality have no superior.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

AMERICAN WONDER

Very luscious in flavor. Try it. Height, 12 inches. The earliest wrinkled Pea; very productive and sweet. Better suited to the private than to the market garden.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

PREMIUM GEM

Height, 15 inches. An improvement upon the Little Gem. A splendid wrinkled dwarf Pea; very luscious in flavor.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

McLEANS LITTLE GEM

Similar to Premium Gem, but more straggling in growth; pods not so well filled; height, 18 inches; seed, green, wrinkled.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

EARLY BIRD PEAS

Recently introduced. Hardy, prolific, early. Earlier than Alaska or First and Best. Large podded and very prolific. Fine luscious flavor. Hardiness unsurpassed.

Found, 30c. 5 Pounds, \$1.25. 100 Pounds, \$25.00.

Second Early Half Dwarf Wrinkled Varieties

GARDENER'S FAVORITE.

Height, 30 to 36 inches. A wrinkled variety named and introduced by us, and which is constantly gaining friends; of most delicious flavor; prolific bearer, specially suited for the market garden trade. It is also attracting considerable attention with some of our leading canners, as when packed they find the quality to be superior to any other sort.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

ADVANCER.

Height, 2½ feet. A green wrinkled variety; introduced some years ago, and has always given satisfaction.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

EVERBEARING.

Vines are about 2 feet high, of a branching character, forming as many as 10 stalks from a single root stalk. Peas large and of fine quality.

Lb., 25c. 5 Lbs., \$1.10. 100 Lbs., \$20.00.

YORKSHIRE HERO.

Height, 2½ feet. A wrinkled variety; productive and of very superior flavor.

Lb., 25c. 5 Lbs., \$1.10. 100 Lbs., \$20.00.

SHROPSHIRE HERO.

A grand new second early Wrinkled Pea, producing long, handsome, well-filled pods in great abundance. Height, 2½ feet.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

ABUNDANCE.

Height, 30 to 36 inches. An excellent half-dwarf, medium early, wrinkled variety; pods 3½ inches long, containing 6 to 8 large Peas of excellent quality.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

PRIDE OF THE MARKET.

A medium early dwarf Pea of vigorous habit and very productive. The pods are large, of a medium green color, and contain 7 to 9 Peas of fine quality; 1½ feet high.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

HORSFORD'S MARKET GARDEN.

Height, 2½ feet. A medium early wrinkled variety; highly recommended.

Lb., 25c. 5 Lbs., \$1.10. 100 Lbs., \$20.00.

IMPROVED STRATAGEM.

Height, 2½ feet. A large wrinkled blue Pea of excellent quality; very long, large filled pods. More regular in its growth than the ordinary Stratagem, and in every way superior.

Found, 25c. 5 Pounds, \$1.10. 100 Pounds, \$20.00.

DWARF GREEN WRINKLED MARROW.

An excellent new wrinkled variety. Large pods and very productive.

Lb., 25c. 5 Lbs., \$1.10. 100 Lbs., \$20.00.

MEDIUM AND LATE VARIETIES

HEROINE PEAS

HEROINE PEA.—A medium early, green, wrinkled Pea, and one of the best of recent introduction; large, curved, showy pods; an immense cropper; Peas of finest quality. Height, 2 to 2½ feet.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$20.00.

CHAMPION OF ENGLAND.—Height, 4 feet. An old favorite, rich flavored and very productive.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$20.00.

MELTING SUGAR (Edible Pods).—This variety is ahead of all other Sugar Peas, not only in size of pod and prolific bearing, but also for its delicious flavor. It grows to the height of 5 feet, bears a profusion of very large, broad handsome light green pods, which are so brittle that they snap without any strings.
Pound, 30c. 5 lbs., \$1.50.

TALL GRAY SUGAR (Edible Pods).—Cooked in the pods same as Snap Beans.
Pound, 30c. 5 lbs., \$1.50.

DWARF GRAY SUGAR (Edible Pods).—Quite a favorite.
Pound, 30c. 5 lbs., \$1.50.

TELEPHONE.—Height, 3 to 4 feet. Large wrinkled seeds; pods large and well filled.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$20.00.

TELEGRAPH, or LONG ISLAND MAMMOTH.—Resembles the Telephone in every respect, except they are a deeper shade of green. Pods are very attractive in appearance.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$20.00.

IMPROVED SUGAR MARROWFAT PEAS (Genuine Stock).—Height, 3½ feet. Grows a strong vine, bears in abundance large, filled pods. The truckers' favorite.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$18.00.

ADMIRAL DEWEY.—Here we have a most excellent Pea, with large, handsome pods. Peas of the highest quality. More dwarf than the Stratagem and about a week earlier in maturing, regular and uniform in growth; vines stocky, healthy and of vigorous growth; pods long, frequently containing 10 peas, of tender and delicious flavor. Don't fail to try it.
Pound, 25c. 5 lbs., \$1.10.

FRENCH CANNER.—Height, 3½ feet. The celebrated Pea used in France by the canners. It is wonderfully prolific, bearing an abundance of long pods, containing 7 to 9 peas of excellent flavor.
Pound, 25c. 5 lbs., \$1.10. 100 lbs., \$18.00.

IMPROVED SUGAR MARROWFAT PEAS.

HERBS

A well assorted selection of the various kinds of herbs should have a place in every garden. Their value in seasoning and flavoring is well known and appreciated. Sow in spring in shallow drills, one foot apart, and when well up thin out or transplant to a proper distance. Care should be taken to harvest on a dry day just before they fully blossom.

PEPPER OR CAPSICUM

Is cultivated mainly for pickles; used as a seasoning in many ways; sometimes medicinally. Sow seed early in hotbed, if possible; if not, select a warm place in the garden for seed bed; sow as soon as the soil is warm. Transplant when 3 or 4 inches high, in rows 18 inches apart.

LARGE BELL OR BULL NOSE.—Plant vigorous, compact, very productive, ripening its crop uniformly and early. Fruit large, with thick, mild flesh, of excellent quality for use in salads and pickles; color bright red when ripe. **Pkt., 5c. Oz., 50c. ¼ lb., \$1.50. Lb., \$6.00.**

RUBY KING.—An improved American variety often four to six inches in length and quite symmetrical in shape. It is very bright colored and the flesh is sweet and mild flavored. **Pkts., 5c. and 10c. Oz., 50c. ¼ lb., \$1.50. Lb., \$6.00.**

SWEET MOUNTAIN.—Plants very vigorous, of compact, upright growth. The fruit does not ripen until very late. It is very large and long, often eight inches or more in length by two in diameter; very smooth and handsome, being when fully mature of a rich red color. Flesh very thick, sweet and mildly flavored. **Pkts., 5c. and 10c. Oz., 50c. ¼ lb., \$1.50. Lb., \$6.00.**

CHINESE GIANT.—Double the size of Ruby King; the finest mild Red Pepper grown. It is very productive, having a magnificent appearance, which makes it sell readily. **Pkt., 10c. Oz., 60c. ¼ lb., \$2.00.**

LONG RED CAYENNE.—A well known variety, having a slender, twisted and pointed pod about four inches long, and when ripe, bright red in color. Extremely strong and pungent flesh. **Pkts., 5c. and 10c. Oz., 50c. ¼ lb., \$1.50.**

RED CHERRY.—Plant tall, bearing a profusion of round, bright red fruit which are very pungent when ripe. The plant, when in fruit, is very ornamental. **Pkts., 5c. and 10c. Oz., 50c.**

RED CHILLI.—Used in the manufacture of pepper sauce. The bright, rich red pods are about two inches long, one-third to one-half inch in diameter at the base, tapering to a sharp point and exceedingly pungent when ripe. **Pkts., 5c. and 10c. Oz., 50c.**

PUMPKIN

Plant in May, in hills 8 feet apart. Allot 10 seed to each hill, as bugs often destroy the young plants, but only allow 2 or 3 healthy plants to remain in each hill. They are usually planted in fields with corn or potatoes.

G. & T. CO.'S MARYLAND SWEET POTATO

This is the best table Pumpkin in cultivation. In shape and size it somewhat resembles the Cashaw, but much more beautiful in color, being a handsome green and white striped. The flesh is a rich yellow color, solid, fine grained, very thick; flavor delicious. **Pkt., 5c. Oz., 15c. ¼ lb., 40c. Lb., \$1.25.**

LARGE CHEESE, OR KENTUCKY FIELD.—A very large, flattened pumpkin, averaging about two feet through. When ripened the skin is a rich cream color. Flesh yellow and of fine quality. **Pkt., 5c. Oz., 15c. ¼ lb., 25c. Lb., \$1.00.**

TENNESSEE SWEET POTATO.—A splendid pie and cooking pumpkin. They grow pear-shaped, of medium size, slightly ribbed; skin is creamy white, lightly striped with green; flesh very thick, creamy white, dry and fine-grained, keeping well until late in the spring. When cooked resembles sweet potatoes, but much more delicious in taste. **Pkt., 5c. Oz., 15c. ¼ lb., 25c. Lb., \$1.00.**

CONNECTICUT FIELD

A fine, large, orange-colored variety used for field culture and stock feeding. The skin is smooth and ribbed and the flesh is brittle and sweet. **Oz., 15c. ¼ lb., 25c. Lb., \$1.00.**

YELLOW CASHAW, OR CROOKNECK.—Solid flesh, fine and sweet; keeps well. **Pkt., 5c. Oz., 15c. ¼ lb., 25c. Lb., \$1.00.**

SALSIFY OR VEGETABLE OYSTER

Sow in early spring in light, rich soil in drills 14 inches apart and thin the plants to six inches in the row. The roots will be ready for use in October and will sustain no injury by being left in the ground during the winter.

SANDWICH ISLAND MAMMOTH.—This new Salsify grows fully twice the size of the old sort, and is superior in quality. Invaluable to market gardeners. **Pkt., 5c. Oz., 15c. ¼ lb., 60c. Lb., \$2.25.**

LARGE WHITE.—The old well-known variety. **Pkts., 5c. and 10c. ¼ lb., 60c. Lb., \$2.25.**

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

G. & T. CO.'S
MARYLAND SWEET POTATO.

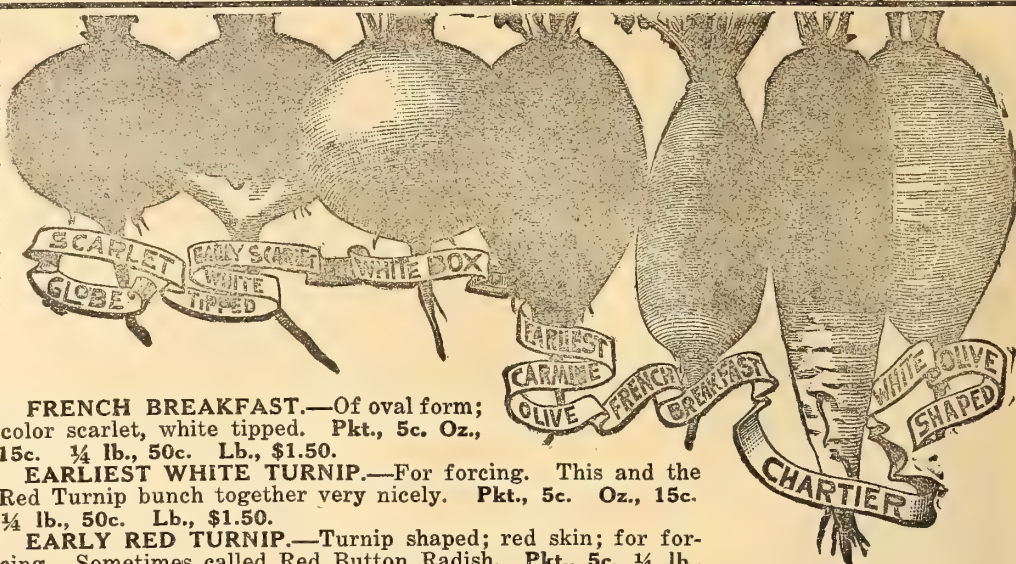

SALSIFY.

RADISH

ONE OUNCE
WILL SOW
100 FEET
OF DRILL

For an early supply sow in hotbed in February. For a successive supply sow from middle of March to September. Radishes thrive best in light, rich, sandy loam. The radish must make a rapid growth to be fit for use; it will then be crisp and tender and of a mild flavor. If it grows slowly, it will be hard, fibrous and disagreeably pungent.

EARLY SCARLET, OR PRUSSIAN GLOBE RADISH.—This is the very best forcing variety; is sown largely by market gardeners and truckers, and they are delighted with it. It is of a globular shape and brilliant, beautiful crimson color, short top, and will stand a large amount of heat without becoming pithy. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ Lb., 50c. Lb., \$1.50.

FRENCH BREAKFAST.—Of oval form; color scarlet, white tipped. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

EARLIEST WHITE TURNIP.—For forcing. This and the Red Turnip bunch together very nicely. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

EARLY RED TURNIP.—Turnip shaped; red skin; for forcing. Sometimes called Red Button Radish. Pkt., 5c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

SCARLET OLIVE-SHAPED RADISH.—A showy half-long variety of pretty shape and bunches beautifully. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

WHITE BOX.—Perfectly round, smooth skin, pure white, free from any sharpness or bitterness. A remarkably quick grower, with small top. For forcing, it is in every way superior. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

EARLY WHITE TIPPED SCARLET.—An excellent variety for forcing, with very short leaves; bright scarlet in color, with a white tip. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.25.

White
Strasburg
Radish.

SUMMER VARIETIES

WHITE STRASBURG.—This is becoming one of the most popular summer sorts; it is of handsome tapering shape, skin pure white; very tender. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

GIANT STUTTGART.—A splendid new variety, of excellent quality; withstands summer heat. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

CHARTIER.—A good variety for private or market garden purposes. Stands long before going to seed, and is tender and crisp. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.50.

DELICACY.—Resembles White Strasburg, being more evenly shaped and smaller topped; grows into full size and perfection during the hottest months.

GOLDEN GLOBE.—An excellent summer Radish; slow to run to seed; shape globular, bright yellow color and mild flavor.

Long Varieties

CINCINNATI MARKET NEW GLASS RADISH. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.25.

WHITE VIENNA, OR LADY FINGER.—This is unquestionably the finest long white Radish. Of most handsome shape, color a beautiful snow white. It is of very rapid growth, and remarkably crisp, brittle and tender; equally desirable for the market or home garden. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.25.

LONG SCARLET (Finest Grown).—Very attractive and sells readily. Owing to its handsome shape, brilliant color and fine qualities, it commands a higher price and more ready sale than the ordinary Long Scarlet as generally sold. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ lb., 50c. Lb., \$1.25.

RADISH--CONTINUED **WINTER VARIETIES**

WHITE CHINESE WINTER, OR CELESTIAL—This excellent variety is sold also as Chinese White Winter. The roots are long, cylindrical, with beautiful white skin and flesh, the whitest and usually the least pungent of the winter varieties. When fully mature the roots are six to nine inches long by about two and one-half to three and one-half inches in diameter. The flesh is compact and crisp. **Pkt., 5c., Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

CHINESE ROSE WINTER—Remarkably fine for winter use. The best of the winter sorts. **Pkt., 5c. Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

LONG BLACK SPANISH—A large winter variety; one of the hardiest, with dark green leaves, firm in texture, keeping until spring. **Pkt., 5c. Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

LONG WHITE SPANISH (Winter)—Fine keeping quality. **Pkt., 5c. Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

ROUND WHITE SPANISH—A good fall or winter variety. **Pkt., 5c. Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

ROUND BLACK SPANISH—A fine globe-shaped Radish; very popular with the Germans, known as Rettig; good quality. **Pkt., 5c. Oz., 15c. ¼ Lb., 50c. Lb., \$1.50.**

RHUBARB OR PIE PLANT

ONE OUNCE OF SEED TO 125 FEET OF DRILL.

CULTURE—Good plants are easily grown in any good garden soil. Sow seed thinly in shallow drills a foot apart, thin to 4 or 5 inches. Keep soil loose and free from weeds. The plants are liable to vary considerably. Pick out the strongest and best. In fall or spring following, transplant to the permanent bed, 4 feet apart each way, in deep, warm and very rich soil. The more manure the better stalks. For winter forcing take up two-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark. **Pkts., 5c. and 10c. Oz., 15c. ¼ Lb., 40c. Lb., \$1.25.**

RHUBARB ROOTS

15c. each. Doz., \$1.50.

Chinese Winter Radish.

Long Black Spanish Radish.

SPINACH

Bloomsdale—Savoy Spinach.

This is quite an important crop with market gardeners, and one easily managed. For summer use, sow early in spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil and manure liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use sow in August, and protect the plants through the winter by a thick covering of clean straw or some other similar light covering. Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose.

BLOOMSDALE SAVOY—The variety most generally used in the East and especially throughout the South for shipping. Leaves large, round and thick, very much savoyed and rich deep green. One of the earliest varieties. Seed round. **Pkt., 5c.; ¼ Lb., 25c.; Lb., 75c.**

G. & T. CO.'S EXTRA CURLED AMERICAN-GROWN BLOOMSDALE SAVOY SPINACH—This is grown especially for us, and is without exception the best type of Savoy Spinach in existence. It is beautifully curled and wrinkled, the leaves large, thick and heavy, produced in great numbers, and stands handling and transportation better than any other sort; in fact, we hardly think we could say too much about this valuable acquisition to the spinach family. Sold only in sealed bags. **Pkt., 5c.; ¼ Lb., 25c.; Lb., 75c.**

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

SPINACH--CONTINUED

LONG STANDING—Best for spring sowing, as it is very slow to seed. The leaves are large, round, unusually thick, curled and of dark green color. Pkt., 5c.; $\frac{1}{4}$ Lb., 25c.; Lb., \$1.00.

LARGE ROUND-LEAVED VIROFLAY—A new sort, with very large, thick leaves. Pkt., 5c.; $\frac{1}{4}$ lb., 25c.; lb., \$1.00.

VICTORIA SPINACH—This new spinach comes to us with the highest recommendations from the growers. The foliage is heavy, the broad, dark green leaves being of the true Savoy appearance and of the finest quality; but the most remarkable feature that will make it of special value, both for market and family gardens, is the fact that it is in prime condition from two weeks to three weeks after all other varieties of spinach have run to seed. Pkt., 5c.; $\frac{1}{4}$ lb., 25c.; lb., \$1.00.

Long Standing Spinach.

WRITE FOR SPECIAL PRICES IN QUANTITIES.

Early White Bush Scallop.

Squash

The Squashes are all quite tender, and therefore no progress can be made in starting them until the weather becomes somewhat warm and settled. Plant in hills five feet apart each way for the bush varieties, and eight feet for the running varieties; put eight seeds to the hill, but don't allow over three to stand.

EARLY WHITE BUSH SCALLOP—A desirable and marketable sort. Best known and most productive of all the summer sorts.

Pkt., 5c. Oz., 15c. $\frac{1}{4}$ Lb., 40c. Lb., \$1.25.

SUMMER CROOK NECK (Early)—Fine flavor; a desirable table sort. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ Lb., 40c. Lb., \$1.25.

WINTER CROOK NECK—Flesh red, fine flavor; largely grown for winter use. Pkt., 5c. Oz., 15c. $\frac{1}{4}$ Lb., 40c. Lb., \$1.25.

HUBBARD—The most popular winter squash. Fruit is oblong and pointed, heavily warted, dark green in color, with orange-colored flesh. Is remarkable for its keeping qualities.

Pkt., 5c.; Oz., 15c.; $\frac{1}{4}$ Lb., 40c.; Lb., \$1.25.

BOSTON MARROW

—A popular variety, with large, oval fruit. Skin bright reddish orange with light cream netting. Flesh orange. Fine grained and of excellent quality. This is the most popular variety for canning. The fruit makes a rich orange-red, and delicious flavored dish.

Pkt., 5c. Oz., 15c.
 $\frac{1}{4}$ Lb., 25c. Lb., 75c.

TOMATO

BONNY BEST
TAKEN FROM
PHOTOGRAPH.

ONE CLUSTER.

ONE-THIRD
NATURAL SIZE.

EXTRA EARLY RED

VARIETIES

early market. The usual method is to set one strong plant to a stake, using stakes five to seven feet in height, tying the plant up with wool or other strong, soft twine, pruning out quite freely as the vines advance in growth. By adopting this method the plants may be set much closer than in the ordinary way.

BONNY BEST TOMATO

As its name signifies, it is the best extra early tomato yet introduced. Is fully ten days earlier than Chalk's Early Jewel, and within a day or two, if not quite as early as Spark's Earliana. Truckers who tested it claim it is as early as Earliana.

It is a vigorous grower, very prolific, with dense foliage, which protects the fruits from hot sun when other varieties like the Earliana have scalded fruits. The fruit is even size, smooth, round, red, of delicious flavor, ripening to stem.

It does not have the green surface like the Earliana and other extra early varieties. Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25. Lb., \$5.00.

EARLY I. K. L. TOMATO.—Earliest, largest, most prolific. Pkt., 10c. ½ oz., 20c. Oz., 35c. ¼ lb., \$1.25. ½ lb., \$2.50. Lb., \$5.00.

For early fruit sow the seed in March or April, in the hotbed or in pots in a sunny exposure in the house. When the plants are about three or four inches high they should be set out four or five inches apart in another hotbed or cold frame or removed into small pots, allowing a single plant to a pot. Expose to the air as much as possible to harden, and about the middle of May set the plants in the open ground at a distance of four or five feet each way. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be had by sowing a few seeds in a shallow box or flower pot and placing in a sunny window in the house. Cultivate thoroughly as long as the vines will permit.

Tomatoes will admit of training to stakes or trellis of various kinds, and the fruit is very much improved both in appearance and quality. This mode of cultivation is now quite common among gardeners who grow for

ATLANTIC PRIZE (Select Stock).—An excellent extra early red Tomato, and while it does not run as regularly smooth as the Paragon, it ripens very evenly.

Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25. Lb., \$4.00.

CHALK'S EARLY JEWEL.—Deep-fruited and solid. The growth is very compact. Fruit of uniformly good size; very solid; brightest scarlet, ripening up to the stem without cracks or green core; sweet flavor.

Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25. Lb., \$5.00.

MAULE'S EARLIEST.—New; very fine; extra early; very prolific; fruits large size; excellent for shipping.

Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25.

NEW SUCCESS.—A magnificent new scarlet fruited Tomato of finest quality, handsome appearance, large size and great productiveness.

Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25. Lb., \$4.00.

EARLY RED VARIETIES

EXTRA EARLY RUBY

While not as early as the Sparks' Earliana by a week or ten days, it is far superior in quality, size, shape, flavor and productiveness. In color, ruby red, nearly globe-shaped; solid flesh throughout, and with very few seeds and free from acidity; it makes a splendid main crop variety; a great keeper and shipper. Pkts., 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25. Lb., \$5.00.

JOHN BAER.—New, early and prolific. Fine flavor and shape; quite as early as **Bonny Best**.

Pkts., 5c. and 10c. $\frac{1}{4}$ lb., \$2.00. Lb., \$6.00.

SPARKS' EARLIANA.—The earliest bright red Tomato; very large, smooth color, bright red; solid and excellent for slicing. The plants are of moderate growth, well set with fruits, nearly all of which ripen extremely early in the season. Grows in clusters; of medium size; smooth, solid, solid center, small seed cells, slightly acid.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25. Lb., \$5.00.

EXTRA EARLY PURPLE VARIETIES

BEAUTY.—For early market and shipping this cannot be excelled, because of its solidity and toughness of skin. Color is a rich, glossy crimson, with a slight tinge of purple. It is well known and very largely used by our gardeners.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.00. Lb., \$4.00.

DWARF CHAMPION.—Dwarf, upright growth; smooth purple fruit.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25. Lb., \$5.00.

PRIZETAKER.—Early; large; handsome; deep crimson; slight tinge of purple.

Pkts., 5c. and 10c. Oz., 30c. $\frac{1}{4}$ lb., 90c. Lb., \$3.00.

MEDIUM EARLY PURPLE VARIETIES

PRIZEWINNER.—Purple; early; prince of market Tomatoes; color resembles Beauty, but larger; solid; one of the best keepers and shippers; smooth; well adapted for late crop.

Pkt., 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.00. Lb., \$4.00.

PONDEROSA.—Remarkable for size; fruits heavy; deep red; flesh thick, solid and fine quality.

Pkt., 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

ACME.—Purple; early; medium; pink-purplish; slightly oval.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

CRIMSON CUSHION.—Resembles Ponderosa in shape and size; color deep red. Pkt., 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

BUCKEYE STATE.—Purple; productive, but not very solid; large, smooth.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

LORILLARD.—Best for greenhouse forcing; bright, glossy red; very smooth. Pkt., 10c.

SMALL FRUITED VARIETIES

PEAR-SHAPED RED.—Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

PEAR-SHAPED YELLOW.—Used for preserves and pickles.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

YELLOW PLUM.—Color bright yellow; excellent for preserving. Pkt., 5c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25.

MAIN CROP

Griffith & Turner Co.'s World's Fair

The great canner. The six great points of this great canner—solidity, symmetry, handsome, bright red, ripens uniform, free from rot. Its shipping and keeping qualities are unexcelled.

The planters now demand this great Tomato, notwithstanding the fact that there are many much-newer varieties. Yet it has been so successful that it is preferred above all others. The fruit is particularly solid and of fine flavor, good size, smooth, and certainly very attractive.

Pkts., 5c. and 10c. Oz., 35c. $\frac{1}{4}$ lb., \$1.25. Lb., \$4.00.

Main Crop Varieties

THE NEW STONE TOMATO.—Ripens for main crop; is very large and of bright scarlet color; very smooth, with occasionally a specimen very slightly octagon-shaped, ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed (as its name indicates). It is an excellent shipper; fine for canning; a good keeper; not subject to rot.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

"GREATER BALTIMORE" TOMATO.—Makes a fine crop. **Pkts., 10c. ½ oz., 15c. Oz., 30c. 2 oz., 60c. ¼ lb., \$1.15. Lb., \$4.50.**

LIVINGSTON'S FAVORITE.—Bright red, smooth Tomato of good size.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

PARAGON.—Well-known standard bright red Tomato.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

ROYAL RED.—New; resembles Favorite in form and color; good main crop variety.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

NEW QUEEN TOMATOES.—Fruit somewhat resembles Paragon in appearance. This sort is well known and a favorite among canners, but it is not as deep red in color nor as weighty and solid as our World's Fair.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

RED ROCK

One of the finest for canning, being extraordinarily solid, smooth and red. No other variety has any better qualities than the Red Rock. Of fine flavor, very meaty and wonderfully free from acid. A heavy producer and good shipper. We think it is the coming Tomato for main crop and canners' use. **Pkts., 5c. and 10c. Oz., 35c. ¼ lb., \$1.25. Lb., \$4.50.**

WISDOM.—Recently introduced. Medium, early; good cropper, fine size and flavor. Good for early or late planting.
Pkts., 5c. and 10c. Oz., 50c. ¼ lb., \$2.00. Lb., \$6.00.

MATCHLESS.—The color is rich red. The skin is so tough that it makes a splendid keeper and shipper, and is less liable to crack in wet weather than any other large Tomato. Unsurpassed for market or table; strong grower and very productive, bearing with undiminished vigor until frost. The fruit is free from core and the seed spaces comparative small.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

BRINTON'S BEST.—One of the leading sorts for second early and late use; the fruit is large, handsome and a splendid keeper. A great favorite with canners and truckers.
Pkts., 5c. and 10c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

KELLY RED TOMATO.—This splendid Red Tomato originated in Anne Arundel County, Md., and through its superior qualities it has become the Tomato most largely used in that section. It is large, meaty, an abundant yielder, and withstands unfavorable conditions remarkably well.
Pkts., 5c. and 10c. ½ Oz., 15c. Oz., 30c. ¼ lb., \$1.15. Lb., \$4.00.

TURNIP

Improved Purple or Red Top Globe Turnip.

This excellent table variety is globular in shape, of good size and very attractive appearance. The roots are large, purple or dark red above ground, white below. The flesh is white, fine grained and tender. The roots when in best condition for the table are about three inches in diameter, but can be grown much larger for stock feeding. This sort keeps well for so early a variety, and is one of the best for market use. It is also known as Red Top White Globe.

Pkt., 5c. $\frac{1}{4}$ Lb., 35c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

G. & T. Co.'s Improved Purple Top Rutabaga.

For early use, sow the small sorts as soon as the ground can be worked in the spring, in drills 14 inches apart, the Rutabagas 30 inches. As the seed is very fine, it should be covered but slightly, excepting in very dry weather. Select light, and if possible, new soil and manure with plaster and ashes or phosphates. Should the young plants be troubled with insects, a sprinkling of slug shot will be beneficial. For fall and winter use the early kinds should be sown, from the middle of July to the middle of August, and the Rutabagas from the middle of June to the first of July, using from one to one and a half pounds of seed to the acre.

Red or Purple Top Flat Strap-Leaved Turnip.

A very early strap-leaved variety, very extensively used for the table. The leaves are few, entire, upright in growth. The roots are flat, of medium size, purple or dark red above ground, white below. The flesh is white, fine grained and tender. Roots when in best condition for table use are about two and one-half inches in diameter, but can be grown much larger for stock feeding. This sort is also known as Early Red Top, Strap-Leaved. Pkt., 5c. $\frac{1}{4}$ Lb., 35c. $\frac{1}{2}$ Lb., 70c. 1 Lb., \$1.25.

YELLOW ABERDEEN, or SCOTCH YELLOW—This is a highly approved Cattle Turnip, attaining a large size. It is solid, nutritious, a good keeper, and in every respect reliable.

Pkt., 5c. $\frac{1}{4}$ Lb., 35c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

LARGE AMBER, or YELLOW GLOBE—Grows to a large size; flesh yellow, firm and fine-grained. Excellent for either table use or feeding stock. Pkt., 5c. $\frac{1}{4}$ Lb., 35c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

SEVEN TOP—For greens and salads. Used largely in the Southern States. Pkt., 5c. $\frac{1}{4}$ Lb., 50c. $\frac{1}{2}$ Lb., —, Lb., —.

EXTRA EARLY PURPLE TOP MILAN—The earliest and handsomest Flat Turnip in cultivation; none equal to it for spring sowing. Pkt., 5c. $\frac{1}{4}$ Lb., —, $\frac{1}{2}$ Lb., —, Lb., —.

WHITE FLAT (Strap Leaf)—Differs from Red Top only in color. Pkt., 5c. $\frac{1}{4}$ Lb., 40c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

EARLY WHITE EGG—A new variety of rapid growth; egg-shaped and white, as its name indicates. Pkt., 5c. $\frac{1}{4}$ Lb., 40c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

COW HORN (Large Croppers)—This variety is pure white, excepting a dash of green at the crown, and in shape is long, like the carrot. Oz., 15c. $\frac{1}{4}$ Lb., 40c. $\frac{1}{2}$ Lb., 70c. Lb., \$1.25.

SOUTHERN PRIZE—True strain of the favorite Turnip for greens in Virginia and the Carolinas. Valued also for its bulk. Oz., 15c. $\frac{1}{4}$ Lb., 40c. Lb., \$1.25.

RUTABAGAS OR SWEDES

The Swede Turnips, or Rutabagas, grow much larger in size, and are of greater value for stock feeding than ordinary turnips. Every farmer and stock-raiser should grow Rutabagas and Stock Beets for winter feeding.

GRIFFITH & TURNER CO.'S IMPROVED PURPLE TOP—Yellow-fleshed. A standard field variety for stock and fine for family use. This splendid Swede is the hardest, most productive and most nutritious variety in cultivation. Pkt., 5c. $\frac{1}{4}$ Lb., 50c. Lb., \$1.50.

PURPLE TOP RUTABAGAS—An old standard sort of good quality. Pkt., 5c. $\frac{1}{4}$ Lb., 50c. $\frac{1}{2}$ Lb., 75c. Lb., \$1.50.

G. & T. CO.'S WHITE ROCK—Though sometimes called a turnip, this is more like a rutabaga. The root is large, both skin and flesh very white, and is one of the best varieties we have for table use. An excellent keeper and a desirable sort for market gardeners. Pkt., 5c. $\frac{1}{4}$ Lb., 50c. $\frac{1}{2}$ Lb., 75c. Lb., \$1.50.

Extra Early Prize Potatoes.

G. & T. CO'S EXTRA EARLY PRIZE.—This potato is in all respects a very superior early sort. It proved to be early and productive; also found its eating qualities first class. We consider it the best early Potato on the market today.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

WHITE BLISS TRIUMPH, or PRIDE OF THE SOUTH.—Extra early round white; identical with the Red Bliss, only different in color. A very fine variety for early market or family garden.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

RED BLISS TRIUMPH.—This beautiful variety combines the wonderful productiveness of the Peerless with all the good qualities of the Early Rose; is much more productive and matures its crop at least a week in advance of the Early Rose.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

EARLY OHIO.—This is very early and productive, of fine quality and an excellent keeper.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

MAINE, or HOULTON EARLY ROSE.—The Early Rose led the list for over 30 years, and is today one of the best early market Potatoes. Our stock of this is grown on new land, near Houlton, Maine; is rugged and pure, and produces as good crops as those which made the Early Rose famous in its early years. Remember, that this stock is not to be confounded with the old run-out Rose grown in other sections.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

EARLY NORTHER.—This superb Potato originated at Caribou, Maine. It resembles the Early Rose in shape and color, matures earlier than the Rose, and is much more productive. Under our own observation the past season it yielded more than the Rose, matured earlier, and was in all respects superior.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

NEW YORK EARLY ROSE.—A leading variety for earliness, quality and productiveness.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

EARLY BOVEE.—One of the earliest varieties; good size, very smooth; uniform, perfect shape; eyes shallow; light skin and white flesh. Cooks dry and floury; of superb quality; a great yielder and healthy grower.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

CROWN JEWEL.—Very early and prolific; skin pinkish white. One of the best for early market. It is planted very largely in this vicinity and the South.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

BEAUTY OF HEBRON.—Very rapid and vigorous grower, ripening as early as Early Rose, which it resembles, but frequently exceeds in productiveness and excellence for table use, either baked or boiled.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

MARYLAND WHITE POTATOES

FOR LATE PLANTING

Fine white skin, shallow eyes, beautiful oblong shape, thick through, fine flavor, excellent cooker, heavy yielder. Will yield better than other late varieties. Ready in June to plant. Price—15 lbs. @ 7c. lb. 60 lbs. @ 6c. lb. From Cold Storage.

POTATOES

MAINE OR NORTHERN GROWN

All Potatoes Sold by Weight Only

A Bushel Consists of 60 Pounds.

The soil best suited to the Potato is a rich, sandy loam; but it seems to thrive in almost any soil or climate. The Potato being a gross feeder requires a liberal application of manure. If stable manure is to be used it should be well-rotted, and not allowed to come in contact with the tubers. On no other crop are the results from the use of phosphates so manifest as on the Potato. Almost invariably the tubers are smoother, brighter and freer from rust and the destructive influence of wire worms. **GRIFFITH & TURNER CO'S PLANT FOOD** is especially adapted for Potatoes, as it promotes growth and at the same time prevents disease. Plant as early in the spring as the ground can be thoroughly worked in rows three feet apart and one foot in the rows, covering in light, warm soil about four inches, and in cold, wet ground three inches deep; draw the earth to the plants as they advance in growth. The soil should be constantly stirred through the season to prevent the surface from baking.

IRISH COBBLER (A New Sort).—Very productive, matures early; shape chunky, eyes strong and deeply set, skin netted, flesh white, quality very superior. After years' ex-

Irish Cobbler Potatoes.

perience we find that it is a very superior variety. Don't fail to get it.

15 lbs. @ 6c. lb. 60 lbs. @ 3¼c. lb.

G. & T. CO'S BOUNTIFUL.—The finest middle crop variety yet introduced. Before putting it on the market we have given it a thorough test, and are convinced of its superior qualities. A heavy cropper, yielding large, smooth, handsome tubers.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

PROSPERITY.—A middle-crop variety, one of the handsomest large Potatoes ever produced. The yield is immense, and even under unfavorable circumstances can be relied on; flesh very white; cooks dry and mealy.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

RURAL NEW YORKER, No. 2.—A valuable variety of large size, very smooth and a great cropper; in quality unexcelled. This variety is yearly becoming more popular as the best late long keeper, and we recommend it highly.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

BURBANK.—This is an old and reliable variety, and is A No. 1 for a late, large-yielding, good-keeping Potato, and for table use, after January 1, is one of the best.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

NEW QUEEN.—A grand Potato of recent introduction, closely resembling Beauty of Hebron in appearance, color, size and shape, but is 7 to 10 days earlier and a heavy yielder. Our seed of this variety comes from Maine, where it originated, and is pure and true to name.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

GREEN MOUNTAIN.—A fine late sort.

15 lbs. @ 6c. lb. 60 lbs. @ 4c. lb.

SWEET POTATOES

CHOICE JERSEY SWEETS AT MARKET PRICES DURING SEASON. WRITE FOR QUOTATIONS.

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

Yellow Field Corn

CHESTNUT GROVE YELLOW CORN—This corn was grown on Chestnut Grove Farm, Baltimore county, and the average yield from the whole crop was 20 1-16 barrels to the acre. The ears are large, deep, medium-sized grain, and of beautiful color. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

G. & T. CO.'S MAMMOTH YELLOW CORN—The largest, most prolific yellow corn in existence; the ears attain an average length from 12 to 15 inches, and make a crop in 110 to 120 days, growing medium-sized fodder, very deep grain. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

NEW MARYLAND YELLOW DENT—The grains are unusually deep, ears large, stalks grow from 7 to 10 feet high does not exhaust soil so much, and

will stand drought better than a large stalk, and will yield 5 to 10 bushels per acre more than any other corn generally planted. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

IMPROVED EARLY LEAMING—Bred and tested for 10 years. Pedigree stock. An early selected variety of yellow corn; small grain, weighty and productive. Highly esteemed in Maryland and Pennsylvania. One of the earliest varieties of yellow corn in cultivation. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

G. & T. CO.'S IMPROVED GOLD-EN BEAUTY—A large, broad-grained yellow corn, with ears of perfect shape and small cob. The richness of color and the quality of grain make it a very superior variety. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

90-DAY YELLOW—This is an excellent quick-growing variety. May be planted after peas are taken off, and make a good crop. Largely used by truckers around Baltimore. Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-bus. lots, \$3.25 bus.

REID'S YELLOW DENT CORN—Matures in 100 to 105 days. Has a rich yellow color, very solid heavy ears from 8 to 12 inches long, with 16 to 18 rows of grain. The grains are deep on a small red cob. Fodder from 7 to 8½ feet high, and produces a great many stalks with two ears. A fine early corn. Qts., 20c. Peck, \$1.00. Bus., \$3.50.

MAMMOTH YELLOW ENSILAGE CORN—Especially adapted for ensilage, as it grows large fodder and blades; preferred by many to the white. Qt., 20c. Peck, \$1.00. Bus., \$3.50.

Maryland Yellow Dent Corn.

Improved Yellow Leaming.

Golden Beauty (Yellow).

GRIFFITH & TURNER CO.'S CHESTNUT GROVE YELLOW CORN

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

WHITE FIELD CORN

Boone County White Corn.

G. & T. CO.'S IMPROVED MARYLAND WHITE DENT CORN.—After years of careful selection we have secured this improved White Field Corn; grows good-sized ears and makes splendid meal. Produces better crops on average land than most any other variety. **Qt., 20c. Peck, \$1.00. Bus., \$3.50.**

BOONE COUNTY WHITE.—We believe this to be the best all around White Corn in existence. It is a heavy yielder; has large ears, deep grain, small cob and produces good-sized fodder, free from barren stalks. Matures in 110 to 115 days. **Price: Qt., 20c. Peck, \$1.00. Bus., \$3.50. 10-Bus. Lots, \$3.25 bus.**

SOUTHERN SNOWFLAKE.—A well-known and very popular corn through the South. Suitable for meal or feeding purposes; the best white corn for poor land. **Qt., 20c. Peck, \$1.00. Bus., \$3.50.**

90-DAY CORN (White with Red Cob).—This is an elegant corn for truckers and market gardeners, as it is good a seller as green corn. Is suitable for either early or late crop. **Qt., 20c. Peck, \$1.00. Bus., \$3.50.**

HICKORY KING WHITE CORN.—Produces very large, broad, flat, white dent grains, which are closely placed on a very slender cob. **Qt., 20c. Peck, \$1.00. Bus., \$3.50.**

WHITE ENSILAGE CORN.—Specially adapted for ensilage. **Bus., \$3.50.**

POPCORN POPPERS.—20c. each.

Maryland White Dent Corn.

JOHNSON COUNTY WHITE CORN.

A favorite white corn in the Western Corn Belt. Ears are a little longer than the Boone Co. White, but about same diameter. Good, deep grain on small, white cobs, and not quite so indented as the Boone Co. It will shell from six to seven bushels per barrel.

We recommend it as a fine general main crop sort. Will mature in about 120 days. Has abundant foliage, which makes it also valuable for ensilage purposes.

Qt., 20c. Peck, \$1.00. Bushel, \$3.50. 10-bushel lots and over, \$3.25.

SEED OATS

IMPROVED WHITE TARTAR.

The most remarkable Oats now under cultivation. Our customers say they will sow no others. These grand Oats outyield all others. The very best for all-round purposes. Greatest yielding variety in existence and rust-proof. Succeeds well on all soils. Straw is of golden yellow color, while the grains are white, with a slight golden cast. Withstands stormy weather. A measured bushel weighs from 36 to 42 lbs. Would highly recommend these Oats to all our customers. Change your seed this season. **Bushel of 32 lbs., \$2.00.**

WHITE SEED OATS

For spring sowing. 32 pounds to the bushel. Extra heavy fancy White Oats. Ask for prices.

WINTER TURF OATS

Perfectly hardy in the Southern and Middle States, standing the winter nearly as well as wheat. Yields, on good land, from 50 to 70 bushels to the acre, of fine, heavy grain weighing from 30 to 40 pounds to the measured bushel. Furnishes excellent fall, winter and early spring grazing, without injury to the grain crop. Write for prices first of August.

SEED WHEAT AND RYE

We can offer choice stocks of Seed Wheat and Rye, re-cleaned, and at reasonable prices. Write us August 1 for special prices for fall sowing.

SEED BUCKWHEAT

JAPANESE.—The best sort. The plants are large and vigorous, maturing their seed early and resisting drought and blight remarkably well, while the grain is much larger and at the same time has a thinner hull than the common or the Silver Hull. Owing to its branching character, only one-half the seed is required per acre, while the straw is much stiffer and stands up better. We recommend this especially for well-drained or sandy land and the dry climate of the Western plains. **Peck, 75c. Bushel, \$2.50.**

SILVER HULL.—Same price as above.

BARLEY

BEARDLESS FALL BARLEY.—A fall variety without beards. Ask for prices.

BEARDED FALL BARLEY.—A heavy yielder, much better than spring sown. Sow in September for best results. Ask for prices.

WRITE FOR PRICES ON FIELD SEEDS IN QUANTITY.

High-Grade Grass Seeds

TIMOTHY.

TIMOTHY (*Phleum pratense*).

This makes one of the most popular, nutritious and salable of hay grasses. It is best adapted for sowing on clay or heavy loams, low lands or in mountainous districts, although it will do well on any good stiff loamy soils, provided moisture is abundant. It does not succeed nearly as well, however, as Orchard. Tall Meadow Oat or Herd's Grass on soils of a sandy or light loamy texture, and is not of as much value for pasturage as other grasses. The stand of Timothy will also be injured if grazed or cut too closely. The yield of hay on good ground is from one and a half to three tons per acre. The best clover to sow with timothy is either the Sapping or Alsike, as they mature and ripen with timothy. **Pound, 15c. Peck, \$1.65. Bushel of 45 lbs., \$6.50.**

RED TOP, OR HERD'S GRASS

(*Agrostis vulgaris*).—This grass makes excellent pasturage and good crop of fine quality hay, and succeeds on a greater variety of soils than any other grass in general use, giving very good results on light soils and the very best results on heavier, moist or low ground soils. It is rather late in starting in the spring and matures its crop at the same time as Timothy. Is excellently adapted for seeding with Timothy for hay, and furnishes excellent pasturage afterwards. When it gets well established it will gradually supplant other grasses. The grades of seed usually sold are:

CHAFF RED TOP.—Seed in chaff. Sow 4 to 6 bushels to the acre, 10 lbs. to bushel. **Price, 50c. bus.**

UNHULLED RED TOP.—Seed in hull, but free of chaff and impurities. Sow 2 to 3 bushels to the acre; 14 lbs. to the bushel. **Price, lb., 15c.; bus., \$1.75; 100 lbs., 12c. lb.**

FANCY CLEANED RED TOP.—Hulled seed, free from all impurities. We would advise our customers to sow the Extra Cleaned Unhulled or Fancy Cleaned seed.

Fancy Cleaned Red Top.—Sow 12 to 15 lbs. to the acre. **Price, 20c. lb.; \$17.00 per 100 lbs.; bushel of 32 lbs., \$5.12.**

RHODE ISLAND BENT GRASS (*Agrostis canina*).—A very fine variety for lawns. **Lb., 60c.**

RED TOP GRASS.

SHEEP FESCUE (*Festuca ovina*).—It is a densely tufted perennial grass for dry, sandy and rocky soil where scarcely any other species will grow. It roots deeply, and forms a dense, short tuft, suitable for lawns and pleasure grounds where the soil is sandy. It affords wholesome food for all cattle, especially sheep. Specially recommended for pasturage mixtures. Sow about 30 pounds per acre. **Lb., 50c. Bushel of 12 lbs., \$5.00.**

ITALIAN RYE GRASS.—Is an annual, and should be sown every year at the rate of 50 pounds per acre. It can be sown during August, September or October. It should be mown as early as the blossoms appear, or the hay will not be so good, and it can be cut every month from early spring if the soil and weather are suitable. **Bus., 20 lb. Lb., 30c. 10 lbs., \$1.50. Per 100 lbs., \$13.00.**

ENGLISH RYE GRASS (*Lolium perenne*).—This makes a quick growth very early in the spring, and is adapted for cool, moist locations. 24 lbs. to the bushel; 60 lbs. to the acre. **Lb., 20c. Bushel, \$3.00.**

CRESTED DOG'S TAIL (*Cynosurus cristatus*).—Should enter in moderate quantity in permanent pasture mixtures, and in larger quantities for lawns, as it possesses in a marked degree all the desirable features of a good lawn grass. 21 lbs. to bushel. **Lb., 60c. 10 lbs., \$5.00.**

WOOD MEADOW (*Poa nemoralis*).—An early nutritive grass; thrives better under trees than other grasses. Is also an excellent pasture grass. **Lb., 75c. 14 lbs. to bushel.**

SWEET VERNAL (*Anthraxanthum odoratum*).—True perennial; emits an agreeable odor, which it imparts to the hay. **Lb., —.**

KENTUCKY BLUE GRASS.—It is rather sensitive to heat, but not so to cold weather, and on this account does its best in the fall, winter and spring. It grows slowly at first, forms a very compact turf, making a fine pasturage when once established. It is much the best, however, to combine other grasses with it for either lawn or pasturage. Sow in the spring or fall. **Fancy, triple-cleaned. Per lb., 30c. Bus. of 14 lbs., \$4.50.**

ORCHARD GRASS (*Dactylis glomerata*).—One of the best and most reliable grasses for the Middle and Southern States, either for hay or pasturage. It succeeds well on nearly all soils, but does best on upland, loamy or moderately stiff soils. It starts early in the spring and continues well into winter. It is of quick growth and relished by stock, especially when young, and bears close grazing. It makes excellent hay, and gives the very best results mixed and grown with Tall Meadow Oat Grass and Red Clover, as suggested under the head of Tall Meadow Oat Grass. It should be cut when in blossom, as the hay is injured if the seed is allowed to ripen. It can be sown in the spring or fall either with grain or alone. Sow 3 bushels per acre if sown alone, or with Red Clover, one and one-half bushels of Orchard and seven pounds of Clover are the quantities usually sown. **Price, 25c. lb. Bus. of 14 lbs., \$4.00.**

TALL MEADOW OAT GRASS (*Avena elatior*).—Most valuable for pastures on account of its early and luxuriant growth; it produces an abundant supply of foliage, which is relished by cattle, early and late. For hay it may be cut twice a year, and for green soiling it may be cut four or five times in favorable seasons. It is very hardy and withstands extreme drought and heat and cold. Height, 2 to 4 feet. 50 pounds to the acre. (10 pounds to bushel.) **Lb., 50c. 100 lbs., —.**

CREeping BENT GRASS (*Agrostis stolonifera*).—Excellent for lawns; succeeds well in all conditions; makes a low, velvety growth. **Lb., 60c. Bus. (20 lbs.), —.**

MEADOW FOXTAIL (*Alopecurus pratensis*).—Closely resembles Timothy in growth, but has a soft, feathery head. It is a valuable pasture grass by reason of its rapid growth. About 7 pounds to the bushel; 3 bushels to the acre. **Lb., 75c. Bushel, —.**

MEADOW FESCUE, RANDALL, or ENGLISH BLUE GRASS (*Festuca pratensis*).—This should be very much more largely used than at present. It makes a very good hay and pasturage grass, and is particularly valuable for fall and winter pasturage, as it remains green throughout the winter. It is very popular in Southwest Virginia, East Tennessee and the Mountainous districts of North Carolina, where it is very highly appreciated as a large-yielding, nutritious pasturage and hay grass. It succeeds well in nearly all sections of the South, and should be very largely used in pasturage and hay mixtures, being specially suitable for sowing with Red Top and Timothy for hay, or with these and Orchard and Tall Meadow Oat for permanent pasturage. Sow either in the spring or fall at the rate of 50 pounds to the acre. Thrives better under trees than other grasses. 22 lbs. to bus. **Lb., 25c. 100 lbs., —.**

AWNLESS BROME GRASS (*Bromus inermis*).—Comparatively a new grass in this country, but in Hungary (Europe), its principal home, it is the chief meadow grass of the sandy moorlands. It grows coarse, resembling Orchard Grass; prefers light, dry soil. It roots deeply, and stands protracted droughts well, and will thrive upon soils too poor and dry to grow anything else but broom sedge; hence is valuable for such situations, both for grazing and hay, and especially in mixtures with other grasses. It has, however, been talked up very much in the agricultural press, especially in the West, and is worthy of extended trial. Sow at the rate of from 35 to 40 pounds per acre when sown by itself, either in the spring or fall. **Lb., 40c. Bushel of 14 lbs., —.**

KENTUCKY BLUE GRASS.

ORCHARD GRASS.

GRASS MIXTURE FOR HAY AND PERMANENT PASTURES

Prepared especially to meet the demand for a mixture that will be desirable for cutting for Hay or to use for Pasture, and contains such grasses as are best adapted for these purposes. In ordering, please state whether you want a mixture for upland or low ground.

MIXTURE FOR UPLAND.—14 lbs. to the bushel, 3 bushels to the acre. Per bushel, \$3.50; 10 bushels for \$30.00.
MIXTURE FOR LOWLAND.—14 lbs. to the bushel, 3 bushels to the acre. Per bushel, \$3.50; 10 bushels for \$30.00.

GRASS AND CLOVER SEED MIXTURES, FOR MOWING FOR HAY, BUT CAN BE GRAZED

We have in the following mixtures combined grasses suitable for the various soils for which they are recommended. They are composed of grasses which will give an even growth for mowing for hay. We have also combined them so as to give a splendid pasture from early spring until late fall if desired. The different mixtures are prepared from seeds of the finest quality, and only those are used best adapted to the soils and situation for which they are intended.

MIXTURE No. 1.—For Moist Bottom Lands. Sow 25 lbs. to the acre. Price, **Lb., 25c.** 10 lbs. and over, 23c. per lb.
MIXTURE No. 2.—For Light, Dry, Gravelly or Sandy Soils. Sow 35 lbs. to the acre. Price, **Lb., 25c.** 10 lbs. and over, 23c. per lb.

CLOVERS

ALSIKE CLOVER.

CRIMSON CLOVER.

WHITE CLOVER.

RED CLOVER.

LUCERNE OR ALFALFA CLOVER.

RECOMMENDED RED CLOVER.—We take great pains to supply an extra quality of Red Clover at a reasonable price. Farmers should not sow a poor quality of Clover Seed. We have, however, cheaper grades for those who wish them. 45c. lb.

Ask for prices in large quantities.

ALSIKE OR SWEDISH CLOVER.—Hardest of all the Clovers, and on rich, moist soils yields an enormous quantity of hay or pasturage. Valuable for sowing with other Clovers or grasses, as it forms a thick bottom and increases the yield of hay. Sow, either fall or spring, 6 pounds per acre when used alone. **Lb., 38c.**

Ask for prices in quantity.

WHITE DUTCH CLOVER.—Thrives most everywhere. The best to sow with lawn grass and valuable to sow with blue grass for permanent pastures. 14 lb., 75c. 14 lb., 50c. 1 lb., 60c. By mail, lb., 65c. 10 lbs., by express, not prepaid, \$6.00.

WRITE FOR SPECIAL PRICES ON ABOVE.

LUCERNE OR ALFALFA CLOVER.—One of the most valuable among Clovers, resisting drought and remaining green when other sorts are dried up. Sow on rich, moist loam or sandy soil. Prepare the land thoroughly and sow, either fall or spring, 20 pounds to the acre. **Lb., 25c.**

Special prices in large quantities on application.

CRIMSON CLOVER (The Great Nitrogen Gatherer).—The best crop for hay, silage and green manuring—all winter and spring pasturage. For hay it must be cut before it comes into full bloom, as otherwise it may cause hair-balls to form in the animal's stomach. It is used on poor and rich land. It is seeded in this country in June, July, August, September and October, and will produce an enormous crop early in the following spring, suitable either for consumption as green food or for hay. 15 to 20 pounds should be sown to the acre, according to the quality of the ground. 30c. per lb. Write for prices in quantity.

Lawn Grass Seed

PREPARATION AND CARE OF LAWNS

THE ground should be thoroughly drained and well enriched before sowing. Work the soil until well pulverized, and have the surface as smooth as possible, so that the grass may present an even appearance. After sowing, cover seed lightly and follow with roller. The best results are obtained by using plenty of seed, four bushels to the acre being about the right quantity. One quart is sufficient for 300 square feet. Let the grass obtain a good start before cutting, and then it should be trimmed with a lawn-mower about every ten days. Old lawns may be improved and renewed by the application of fertilizers and seeding about half the quantity of seed required for new lawns. This should be done whenever they show any thin places.

GRIFFITH & TURNER CO'S EVERGREEN LAWN GRASS

This is a first-class mixture prepared by ourselves, and containing nothing but choice seeds—just the thing for tennis, croquet and ball grounds, remaining green and fresh during the hot summer months. Widely known and extensively used on the finest private and public grounds around Baltimore, Washington and elsewhere with the most satisfactory results. Nothing adds to the attractiveness of suburban homes more than a well-kept, closely-cut, velvety lawn; hence the importance of securing the best seeds. This we offer

in our selected Evergreen Lawn Mixture, containing different varieties that grow and flourish at different months of the year, so that a rich, green, velvety lawn is constantly maintained. It is adapted to the small grass plots of city homes. Pint, 10c. Quart, 20c.; by mail, 25c. $\frac{1}{2}$ -Peck, 65c. Peck, \$1.25. Bushel of 20 pounds, \$5.00. By freight or express not prepaid.

PARK LAWN GRASS

This mixture does not contain so much of the high-priced grasses as our Evergreen Lawn Grass, but it is superior to many of the cheap grades offered, and will make a very nice lawn. Qt., 20c. Peck, \$1.10. Bushel of 16 lbs., \$4.00.

GRIFFITH & TURNER CO'S GOLF LINK MIXTURE

There being a growing demand for a grass mixture suitable for golf and cricket grounds, we have made a study of the grasses best adapted to these purposes, and have them mixed in proper proportions to give desired results. Many of the public and private grounds around Baltimore and other places have been sown with our mixtures, and the grounds have won the admiration of thousands of visitors. It is highly essential that golf and cricket grounds should be mowed closer than ordinary lawns. 14 pounds to bushel. Bushel, \$5.00. 10 bushel lots, \$4.75 bushel.

SHADY NOOK GRASS

On nearly all lawns there are bare spots under the shade of trees. With this mixture the above can be easily corrected. It is a combination of grasses which are found growing in the woods in their natural state. Ground that has been densely shaded by trees is frequently "sour" and is apt to be covered with moss. In such cases apply slacked lime at the rate of one bushel per thousand square feet, but the moss should be first removed with a rake. Price: Lb., 35c. 5 lbs., \$1.65. Bushel of 20 lbs., \$6.00. Add 8c. for postage.

"TERRACE" SOD MIXTURE

A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out; that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, velvety green turf throughout the season. Qt., 35c. Peck, \$2.00. Bushel of 20 lbs., \$6.00.

WHITE DUTCH CLOVER (TRIFOLIUM REPENS)

The best variety for lawns, as it forms a close herbage and remains green throughout the season. It is also valuable when mixed with grass seeds for pasture. Sow in spring at the rate of 6 pounds per acre when sown alone; half the quantity when sown with other grasses. Pound, 60c. By mail, 65c. 10 pounds, by express, not prepaid, \$6.00.

UNITED STATES FOOD ADMINISTRATION LICENSE No. G 22972.

FORAGE AND SILO SEEDS

SHOULD BE SOWN IN THIS LATITUDE, NOT BEFORE MAY 15th, AS THE SEED WILL NOT STAND COOL, WET WEATHER.

COW PEAS

COW PEAS

The great soil enricher. Makes poor land rich and good land better. They also make good green forage for ensilage, and the best quality of Hay when cut and cured.

The sowing of **COW PEAS** is one of the cheapest as well as the best means of improving the soil. They can be turned down for green manuring, or, if allowed to ripen, cut Peas off and cure for hay; turn down roots, which will give as good results as when whole plant is used. For ensilage they are unsurpassed, being more nutritious than green corn, but when used for this purpose, would advise sowing Sugar Cane or Sorghum in connection with them. The two combined will make one of the very richest feeds. Ask for prices.

BLACK—This is the standard variety, and the one most largely grown in this immediate section. It is very prolific, makes a fine growth, both of vine and leaves, and a good yield of peas. It is a splendid land-improver, and most valuable as a forage crop, and makes an enormous yield of rich, nutritious feed.

WHIPPOORWILL—A favorite, early, upright-growing variety, more largely used and sold than any other kind. Has brown speckled seed, which are easily gathered. Makes a good growth of vine, which can be easily cut and cured as dry forage. We recommend this where an early variety of good growth and height is desired.

WONDERFUL, OR UNKNOWN—This makes an enormous and remarkable growth of vines, but requires the full growing season to make its crop. In yield and growth of vines it surpasses any of the varieties of Cow Peas, and it produces very largely of the shelled peas. This variety should be planted in May in order to come to full maturity.

NEW ERA—An early maturing variety which has proved very popular and satisfactory. It is upright growing, quick to mature, and remarkably prolific of peas. Rather small vine, which cures easily, making splendid dry forage. The seed are smaller in size than the ordinary cow-pea, so that it does not require as many to seed an acre; from three-fourths to one bushel per acre will give ample seeding. **PRICES ON APPLICATION.**

SORGHUM, OR SUGAR CANE

EARLY AMBER grows 10 to 12 feet high, and yields large crops of fodder, which is relished by all kinds of stock. It will produce two cuttings during the summer. Sow 3 or 4 quarts per acre in drills and cultivate same as corn. For hay, sow one bushel per acre broadcast. **Pound, 10c.**

EARLY ORANGE has a large, strong growth, but requires longer time to mature than the Early Amber. Very popular in the South, where there are long seasons. **Prices same as Early Amber.**

SOJA BEANS

The great drought-resisting forage crop; unsurpassed in nutritive value for feeding; also makes a splendid soil improver. Sow broadcast one-half bushel to the acre, or it may be planted in drills three feet apart and one foot between plants. Price on application.

MAMMOTH YELLOW SOJAS

The largest-growing and most popular of soja beans for forage purposes. A little later in maturity than other kinds, but makes larger yields, both of forage and seed. Especially valuable for the South.

SOJA BEANS

HOLLYBROOK EARLY SOJAS

Makes a quicker growth and matures their crop two to three weeks earlier than the Mammoth Yellow Soja. It makes a large yield, both of forage and peas, and the added advantage of its earliness makes it a most distinct and valuable acquisition. It is a sure cropper and a vigorous, quick-growing variety. Sown as a forage or hay crop, it is much easier to cure and handle, and makes even a more nutritious crop than cow-peas.

WILSON BLACK SOJAS

One of the best, in our opinion, for the Northern States, where a quick, early variety is desired. Average height on good land is 2½ to 3 feet. A very prolific variety, and requires about 90 days to be ready to cut for hay.

KAFFIR CORN

The heads contain small white seeds, which make an excellent flour. They are greedily eaten by horses and cattle, and make fine feed for poultry, either fed in the grain or ground and cooked. Use 4 to 5 lbs. to acre. **Price, Pound, 10c. Ten Pounds, —.**

EARLY AMBER CANE

GENUINE KAFFIR CORN

ASK FOR QUOTATIONS ON ABOVE.

GERMAN MILLET.

VETCHES OR TARES

SPRING VETCHES (*Vicia sativa*).—Closely associated with peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with oats for mowing and feeding to stock. Use 40 to 60 lbs. to the acre. Sow in spring while ground is cool and moist, or in early autumn. Pound, 15c. Peck of 15 Pounds.

WINTER VETCHES (*Vicia villiosa*).—Also called Sand Vetch or Hairy Vetch. Recommended for fall sowing with rye, as in many localities in the North it is hardy, remaining green all winter. A valuable food for stock in early spring. Use 30 to 50 lbs. per acre. Pound, 25c.

TEOSINTE

A most valuable and enormous-yielding cutting forage crop, but should be planted very early to succeed well. Good to use as green food, and also makes an excellent fodder. It branches as many as 50 stalks from one seed. Plant in May or June in rows 4 to 5 feet apart each way. Oz., 10c. 1/4 lb., 30c. Lb., \$1.00, postpaid.

FLAXSEED.—Lb., 20c. 3 lbs., 50c.

U. S. FOOD ADMINISTRATION LICENSE No. G 22972.

GERMAN MILLET

GERMAN MILLET.—A fine, quick-growing summer Hay crop. Produces splendid crops of fine nutritious hay. Grows quickly and easily cured. Should be sown thick, not less than one bushel per acre. Cut while in flower. Do not wait until seed becomes hard in head. If allowed to get too ripe stalks get hard and do not make as good quality of hay as when cut at proper time. It should be sown any time after middle of May up to first of August. Should not be sown too early, as seed will not germinate until soil and weather is warm. A crop will mature in seven to eight weeks in ordinary warm growing weather. Price, Lb., 10c. Peck, \$1.00. Ask for price by the bushel.

HUNGARIAN MILLET

HUNGARIAN MILLET is of the same family as German Millet, but is not used as extensively, as it requires stronger soil. However, it makes a very fine quality of hay, and like German Millet is fairly good substitute for Timothy. Hungarian Millet can be sown at the same time as German. Price, Lb., 10c. Peck, \$1.00. Ask for price by bushel.

CANADA FIELD PEAS

Sown in February, March or April, with a small quantity of oats, they make large yield of forage. Sow 1 to 1 1/2 bushels per acre broadcast with half a bushel of oats. Cut for hay before the peas mature.

Write for Special prices if a quantity is required.

BROOM CORN

50 Pounds to Bushel.

To grow Broom Corn successfully the ground should be rich and well prepared. Plant seeds in rows 3 feet apart by 18 inches. The plants should be cultivated as soon as they are out of the ground. Harvesting should be done when the seed is in a soft, milky condition.

IMPROVED EVERGREEN.—This is the favorite sort; has a fine brush, yields well and keeps green. Height, 8 to 9 feet. Lb., 25c., postpaid. 10 lbs. @ 20c. lb.

JAPANESE EARLY BROWN CORN (New).—Two weeks earlier than the ordinary variety.

Lb., 30c. 10-lb. lots @ 25c. lb.

RUSSIAN SUNFLOWER

Growing to double the size of the common sunflower and the yield of seed is twice as great. It is highly recommended for poultry—the best egg-producing food known. Lb., 15c.

DWARF ESSEX RAPE

It can be sown all through the season; being perfectly hardy, withstands the drought, and will produce a crop in any soil by sowing broadcast at the rate of 5 lbs. to the acre, or 2 to 3 lbs. in drills. It is unequaled as a pasture for sheep, and as a fattening food for all kinds of live stock it is without a rival. Lb., 18c.; by express, 10 lbs. and over, 17c. lb., not prepaid; \$16.00 per 100 lbs. If wanted by mail, add 8c. per lb. for postage.

FLOWER SEEDS

ORDER BY NUMBERS

GENERAL DIRECTIONS FOR CULTIVATION.

Hardy Flower Seeds should be sown in the open, after danger of frost is past, in well-worked and moist soil. Seeds of medium size, put at depth of one-quarter to one-half inch. Very fine seeds, press into the soil, and cover slightly with a little sand or sphagnum moss. If seed is not deep, water frequently. When up, transplant from two to twelve inches apart, according to variety of plants. Do not leave too thick, as the plants will be weak and spindling. Keep weeds out of the flower beds. Annuals may be planted in early spring, and bloom the first season only. Biennials bloom the second year from seed and then die. Perennials bloom the second year from seed, and plants live to bloom during successive years.

Varieties marked ("A") stand for Annuals. Marked ("B") Biennials. Marked ("P") Perennials.

1. AGERATUM—Mixed (A)—Feathery flowers borne in dense clusters, blooming nearly all summer, and useful for bouquets, borders or bedding. Mostly White and Blue blooms. Packet, 5c. each.

TOM THUMB ALYSSUM.

2. ALYSSUM, Sweet (A)—Small white flowers of delicate fragrance. Sow seed in open ground, very early in spring. Packet, 5c.

11. ALYSSUM (A) (Tom Thumb)—Of dwarf, compact habit, each plant covering a circle from 15 to 30 inches. It will bloom when small, and remain covered with bloom from spring to autumn. Packet, 5c.

20. AMARANTHUS, MIXED (A)—Showy blooming plants, with long racemes of curious-looking flowers and brilliant foliage; half-hardy annuals. Packet, 5c.

21. AMARANTHUS, TRI-COLOR (Joseph's Coat) (A)—Red, yellow and green foliage; 2 feet. Packet, 5c.

22. AMARANTHUS CAUDATUS (Love Lies Bleeding) (A)—Graceful and handsome flowers of blood-red hue. Packet, 5c.

24. ANTIRRHINUM, MIXED (P)—(Snapdragon)—Half-hardy, growing from 1½ to 3 ft.; oddly-shaped flowers on long spikes; easy culture. Packet, 5c.

ASTERS

Sow seed in March and April in cold-frame or boxes in the house, covering them ¼-inch deep, and when plants have three or four leaves, transplant about 18 inches apart each way into well-prepared beds.

25. CHINA (A)—Choice mixed varieties. Packet, 5c.

27. TRUFFAUT'S PERFECTION (A)—A very favorite class; thrifty, upright growers; flowers large, almost perfectly round, with incurved petals. The florist's preference; 1½ to 2 feet. Packet, 10c.

28. PRINCESS SNOWBALL (A)—The flowers are pure white, and are formed of short, thickly set imbricated petals, there being about 25 to 30 on a plant.

29. MIGNON (A)—A splendid new class of Asters. The plants are semi-dwarf, and bear in profusion flowers of a very double nature, the petals overlapping each other.

30. VICTORIA (A)—The most beautiful of all Asters, bearing flowers of all colors and shades; the colors include many extremely delicate and gorgeous shades. Very double and four inches across; height, 15 to 18 inches. Packet, 10c.

31. COMET (A)—This class of Asters has long, slender and curled petals, forming loose yet dense flowers of semi-globe shape, 3½ to 4½ inches in diameter, which resemble the Japanese Chrysanthemum. Packet, 10c.

32. DWARF CHRYSANTHEMUM FLOWERED (A)—Grow 9 inches high; surpass all the dwarf varieties in size of flowers.

33. SEMPLE'S BRANCHING, MIXED (A)—A choice strain of American-grown Asters, which has, by careful selection, been brought to a high degree of excellence. Packet, 10c.

33—SEMPLE'S BRANCHING.

34. SEMPLE'S BRANCHING (A) (White)—Very choice. Packet, 10c.

35. BACHELOR'S BUTTON, or BLUE BOTTLE (A)—Centaurea Cyanus—A very old favorite garden annual, with handsome flowers of various colors. It does best if sown in a hot-bed; half-hardy annuals; 2 feet. Packet, 5c.

40. DOUBLE BALSAMS, CAMELIA FLOWERED (A) (Lady Slipper)—One of the finest summer-blooming annuals, free bloomers and highly colored. By transplanting them once or twice, the flowers are apt to be more double. Pkt., 5c.

41. BALSAM, PERFECTION WHITE (A)—This resembles the mixed Balsams in shape, but the flowers are of a pure white. Packet, 10c.

CANDYTUFT—Almost as fragrant as Sweet Alyssum; very popular and useful as bedding plant or border work. Sow out of doors early in spring, where they are to bloom, and thin well when the plants grow about an inch; then sow again in July for fall flowers.

45. MIXED (A)—Packet, 5c.

46. WHITE (A)—Packet, 5c.

53. CALENDULA, DOUBLE (A)—Very profuse dwarf bushy annuals, blooming continuously and profusely until frost; of easy culture, and suitable for summer garden or for growing in pots in winter. Packet, 5c.

55. CANNA, MIXED (Extra Choice) (A)—The Cannas are desirable not only for the beauty of their spikes of flowers, but for their highly ornamental leaves. They make superb beds for the lawn. Soak the seeds thoroughly before planting, and keep in a warm spot. Very slow to germinate. Packet, 5c.

CANTERBURY BELLS—Beautiful hardy biennials, bearing a profusion of bell-shaped flowers of exquisite colors. Does best in a rich, light soil. Height, 2½ feet.

60. CANTERBURY BELLS, SINGLE MIXED (Campanula) (B)—Packet, 5c.

61. CANTERBURY BELLS, DOUBLE MIXED (B)—Packet, 5c.

FLOWER SEEDS THAT GROW

CALLIOPSIS.

88. **COWSLIP (P).**—Beautiful hardy spring flowers of different colors. **Packet, 10c.**

90. **CONVOLVULUS, TRI-COLOR MINOR (Dwarf Morning Glory) (A).**—A beautiful class of hardy annuals, affording a large, showy mass of flowers from July to October. **Packet, 5c.**

93. **COREOPSIS (Calliopsis) (P).**—Beautiful annuals, with large bright golden yellow flowers, varied with rich brown. Excellent for cutting and decoration. Height, 2 feet. **Packet, 5c.**

93a. **COREOPSIS LANCEOLATA (P).**—IMPROVED (California Sunbeams).—This is one of the finest of hardy plants, with large, showy, bright golden-yellow flowers, freely produced on long stalks, from June till frost; excellent for cutting; will thrive in almost any situation. **Packet, 5c.**

COSMOS

COSMOS. One of the very finest late summer and fall flowers; excellent cut flowers. The bushes grow tall, six to eight feet, and are loaded with large showy blossoms, in white, pink or crimson. Cosmos should be in every garden. Sow the seed early and transplant, or later in spring where it is to remain. Hardy annual.

94. **Early Flowering Dawn (A).**—White slightly tinted with pink. **Packet, 10c.**

95. **Mixed (A).**—**Packet, 5c. Oz., 25c.**

95a. **Pink (A).**—**Packet, 5c.**

95b. **White (A).**—**Packet, 5c.**

95c. **Crimson (A).**—**Packet, 5c.**

95d. **NEW MARGUERITE COSMOS (A).**—One of the prettiest and daintiest varieties imaginable. **Packet, 10c.**

68a. **CENTAUREA GYMNOCARPA.**—Fine Cut silver-gray foliage; 1½ feet. **Packet, 5c.**

68. **CENTAURA CANDIDISSIMA.**—Silver white; leaves broadly cut. **Packet, 5c.**

70. **CHRYSANTHEMUMS, SINGLE, MIXED (A).**—Showy and effective garden favorites extensively grown for cut flowers. The hardy annuals are summer flowering border plants; good for pot culture and quite distinct from the autumn flowering varieties. **Packet, 5c.**

71. **CHRYSANTHEMUMS FRUTESCENS (A).**—(The Marguerite, or Paris Daisy.)—It produces freely its white, star-like flowers under the most favorable conditions. **Packet, 10c.**

CINERARIA.—Seed should be sown in well-drained seed pans or shallow pots of light rich soil, giving the seed but a very slight covering. Place a piece of glass over the pot to retain moisture. When the plants have made their first pair of leaves they should be potted off into smaller pots. As fast as the pots are full of roots, shift into larger ones till the flowering size is reached.

75. **CINERARIA (Dusty Miller) (P).**—Fine for bedding, ribbon beds and margins; prized for their beautiful, downy, silvery foliage; half-hardy perennials; 2 feet. **Packet, 5c.**

76. **CINERARIA HYBRIDA (P).**—Large flowered prize varieties; very attractive, free blooming plants, producing large and brilliant flowers.

77. **CINERARIA HYBRIDA DWARF (P).**—Large flowered, dwarf prize varieties; splendid strain.

80. **CLARKIA (A).**—Hardy annual, of easy cultivation, graceful in habit and growth. Long stemmed flowers, resembling chrysanthemums, growing 1 foot high, from July to October. **Packet, 5c.**

85. **COCKSCOMBS (Celosia Cristata) (A).**—Very popular annuals of the easiest culture, highly ornamental for decoration of the greenhouse, drawing-room and garden. Half-hardy annuals. **Packet, 5c.**

86. **COCKSCOMBS, GLASGOW PRIZE (A).**—Immense, showy, dark crimson combs. **10c.**

COSMOS

CHOICE FLOWER SEEDS

DAHLIA.

One of our best autumnal flowering plants. Blooms until killed by frost; tuberous-rooted, half-hardy perennials, blooming the first year from seed if sown early.

100. SINGLE MIXED (A)—Large, showy flowers. **Packet, 5c.**

100a. CACTUS DAHLIA (A)—A most curious and desirable variety of many colors. **Packet, 5c.**

DAHLIA ROOTS AND PLANTS IN GREAT VARIETY—(See Plant Department for full description of the many kinds and prices.)

DAISY.

GAILLARDIA.

DEFIANCE
MIGNONETTE.

DAISY.

Well-known favorites, admirably adapted for edgings, borders and low beds, and it is also suited for growing in pots. Although they are perennials, they will flower the same season if seed is sown early in the house.

97. DAISY, MIXED (P)—**Packet, 10c.**

98. LONGFELLOW (P)—Large, double pink. **Packet, 10c.**

99. SNOWBALL (P)—Very double, pure white flowers. **Packet, 10c.**

103. FEVER-FEW (GOLDEN FEATHER) (Pyrethrum Aureum) (P)—A highly ornamental golden-yellow foliage plant, unexcelled for bedding. Hardy perennial; 1½ feet. **Packet, 5c.**

105. FORGET-ME-NOTS (Myosotis) (P)—Neat and beautiful little plants, with star-like flowers, succeeding best in a shady, moist situation; half-hardy perennials; blooming the first year from seed if sown early. **Packet, 5c.**

106. FOXGLOVE (DIGITALIS) (P)—A handsome and highly ornamental hardy perennial plant of stately growth; fine for shrubberies and other half-hardy places; 3 feet. **Packet, 5c.**

107. GERANIUM (New Zonale) (A)—A grand strain of Geraniums, containing all shades of colors. **Packet, 10c.**

108. GODETIA—Profuse-blooming annuals of beautiful colors; fine for bedding or pot culture. Hardy annuals. 1 foot. **Packet, 5c.**

109. GAILLARDIA (A)—Very attractive plants, producing a profusion of bloom the entire summer and autumn. Half-hardy annuals. **Packet, 5c.**

110. GILIA MIXED (A)—Very pretty dwarf plants, early, free blooming; fine for massing and rock work. Hardy annuals. **Packet, 5c.**

112. HELIOTROPE—A half-hardy perennial, growing 4 to 8 feet high. Small flowers, borne in graceful clusters, and very fragrant. Will bloom the first season from seed if sown early. **Packet, 5c.**

115. HOLLYHOCK, CHATERS SUPERB MIXED (P)—Perennial plants of stately growth. The blossoms are set as double and semi-double rosettes around the flower stalk in almost every color. Makes a charming hedge or background. **Packet, 5c.**

116. HOLLYHOCK, CHATERS DOUBLE WHITE (P)—**Packet, 10c.**

120. LARKSPUR (Delphinium) (A)—One of the most showy and useful plants, possessing almost every requisite for adornment of the garden. **Pkt., 5c.**

121. LARKSPUR EMPEROR (P)—Of symmetrical bushy habit, with a profusion of brilliant dark-blue, red-striped and tri-colored flowers. **Packet, 5c.**

LOBELIA.

A beautiful and popular flower, very desirable for pot culture, beds or hanging baskets because of its trailing habits. Grows easily, and does well in beds and rockeries. Bears a profusion of blue and white flowers.

122. MIXED VARIETIES (A)—**Packet, 5c.**

123. CRYSTAL PALACE COMPACTA (A)—Rich deep blue. The finest for bedding. **Packet, 10c.**

MIGNONETTE—The delightful fragrance of the Mignonette makes it a universal favorite. Sow seed in the fall for early blossoms in the spring. Valuable for potting, bedding or for border.

135. MIGNONETTE — SWEET (Reseda Odorata)—A well-known and universal garden favorite, and one that requires no extra instructions for growing. Hardy annuals. **Packet, 5c. Oz., 15c.**

136. MIGNONETTE—PYRAMIDAL—Large flowered. The largest flowered of all Mignonettes. Annual. **Packet, 5c.**

137. MACHET—True dwarf-growing variety; enormous spikes of beautiful, deep red-dish crimson flowers; height, 1 foot. **Per Packet, 10c.**

138. MIGNONETTE VICTORIA (A)—A splendid new, compact-growing variety of dense pyramidal, growing about six inches high. The flowers are of a brilliant red, and are suitable for pot or garden. **Packet, 10c.**

139. ALLEN'S DEFIANCE (A)—When grown under favorable conditions, and with proper care, spikes will not only be of remarkable size—from 12 to 15 inches long—but deliciously fragrant; much more so than any other variety. **Packet, 10c.**

140. GOLDEN MACHET MIGNONETTE (A)—Distinct new variety of the well-known Machet of the same compact and robust habit, but differing from the type by its massive spikes of golden-yellow blossoms. **Packet, 5c.**

HIGH-GRADE FLOWER SEEDS

125. **MARIGOLD, DOUBLE AFRICAN (A)**—A well-known free-flowering plant, of easy culture, with rich and beautiful double various-colored flowers. **Packet, 5c.**

126. **MARIGOLD, DOUBLE FRENCH (A)**—Of compact habit, with numerous bright, showy flowers. Very fine. **Packet, 5c.**

130. **MARVEL OF PERU, or FOUR O'CLOCK (Mirabilis Jalapa) (A)**—Very pretty annual of vigorous growth. The flowers are brilliant, singularly mixed and varied on the same plant. Two feet. **Packet, 5c.**

131. **MATTHIOLA BICORNIS (A)**—Flowers dull purplish-lilac, but well worth growing for the charming fragrance which it emits during the evening. **Packet, 5c.**

133. **MESEMBRYANTHEMUM CHRYSALINUM (Ice Plant) (A)**—Dwarf spreading plants of great beauty, blooming the entire summer, succeeding best in dry, sandy or loamy soil, and in a warm locality. Half-hardy annuals. **Packet, 5c.**

134. **MIMULUS**—The beautiful Monkey Flower. **Packet, 5c.**

NASTURTIUMS

Few plants are so useful or rich in color as the Nasturtiums. When well started, young plants should be transplanted or thinned out to stand six or more inches apart. Seed should be covered one inch in depth and, if at all dry, the soil should be firmly pressed above the seed, so as to enter closely the corrugations.

142. **DWARF MIXED**—The dwarf variety of Nasturtium is among the most useful and beautiful of annuals for bedding, massing, etc., owing to their compact growth, richness of color and profusion of bloom; mixed colors.

Packet, 5c. Oz., 15c.

143. **DWARF—AURORA**—Blush white and salmon, blotched with garnet.

144. **DWARF—BEAUTY**—Bright scarlet, striped with yellow.

145. **DWARF (Empress of India)**—Very dark foliage, with deep crimson flowers. **Packet, 5c.**

146. **DWARF (Golden King)**—Brilliant yellow, with dark foliage. **Packet, 5c.**

147. **DWARF (King of Tom Thumb)**—Brilliant yellow flowers, blotched with maroon; dark foliage.

Packet, 5c.

148. **DWARF (Ruby King)**—Light ruby red.

149. **DWARF (Cloth of Gold)**—Golden yellow foliage, light scarlet flowers.

150. **KING THEODORE—DWARF**—Scarlet maroon; black-brown foliage. **Packet, 5c.**

151. **TALL**—New foliage varieties; with white-marbled leaves. **Packet, 5c. Oz., 15c.**

310. **TALL MIXED**—Elegant, profuse, flowering plants, constantly growing in favor for verandas, trellis, etc. The seed pods can be gathered while green and tender for pickling. **Packet, 5c.; oz., 10c.**

153. **OXALIS**—Very pretty, herbaceous plants, with richly-colored blossoms. They thrive well in a mixture of loam and sand. Desirable for greenhouse decoration, rock work or baskets. Half-hardy perennial.

PANSIES-Annuals

Thrive best in a moist, shady location, and in rich, loamy soil. Seed should be sown in the autumn for early spring blossoms, or can be sown early in the year for good flowers late in the spring. The plants must be transplanted twice in order to get the largest flowers; once from the seed box to a chosen bed, and again to the open garden. This is important for large-size pansies; use manure liberally. The blossoms are usually larger in the spring and again in the fall, and while they bloom freely all summer, the blossoms are small during the hot months. While the plants carry over well with a little covering during the winter, it is best to plant new seed each year.

NASTURTIUM

155. **HEARTSEASE**—Mixed. An old but universally admired plant, producing an endless variety of color. They may be treated as annuals. **Packet, 5c.**

156. **GIANT TRIMARDEAU**—Remarkable for the extra large size of the flower and an endless variety of beautiful shades. **Packet, 10c.**

157. **G. & T. CO'S EXTRA MIXED**—This mixture, containing the finest blotched varieties, is grown and selected with special care, and has given the most satisfactory results to both florists and amateurs in the past. **Packet, 15c.**

158. **PANSY (Bugnot's Exhibition)**—A celebrated strain of extra large size, beautiful colors, handsome broad blotches, and finely pencilled with stripes of delicate hue. The ground colors are generally dark, which with light pencilling and blotches, make a magnificent flower. They are a small seeder.

PETUNIAS.

Favorite, half-hardy, succeeding well in any rich soil. For the brilliancy and variety of the colors, and the long duration of their blooming period, they are indispensable in any garden. Sow seed early in spring, scatter

thinly on an even surface, and barely cover the seed with sand. If intended for the open ground, prick out into a frame to be kept till planting-out time. If for pots, pot singly into small pots in strong rich soil mixed with sand, and shift as the plants grow larger.

FINE MIXED—Good mixture of small free-blooming colors. **Packet, 5c.**

166. SINGLE-FRINGED MIXED PETUNIA—Large flowers, four to five inches across, of every hue, each flower being beautifully fringed. **Pkt., 25c.**

167. DOUBLE PETUNIA—About 30 per cent. will produce double flowers. **Pkt., 25c.**

168. PETUNIA—Double-Fringed Mixed—The flowers of this sort being double, together with being fringed, are very beautiful. **Pkt., 25c.**

175. PHLOX DRUMMONDII (A)—A most brilliant and beautiful hardy annual, about 1 foot high, well adapted for bedding, making a dazzling show throughout the whole season. It succeeds well on almost any soil. **Packet, 5c.**

176. PHLOX DRUMMONDII—(Nana Compacta) (A)—Very fine mixed. This new strain is of dwarf, compact habit, and makes desirable pot plants; also excellent for ribbon lines and massing.

Packet, 10c.

RICINUS (Castor Bean).

RELIABLE **FLOWER SEEDS**

PINKS—(DIANTHUS).

Seed may be sown in the open ground in spring after danger of frost is past in the place where the plants are wanted to bloom. Use well-pulverized soil, preferably sandy loam. Make the rows one foot to 15 inches apart, and cover the seed with one-fourth inch of fine soil, firmly pressed down. When 2 inches high, thin 6 to 8 inches apart.

180. PINK CARNATION, or PICOTEE. (Choicest Double Mixed *Dianthus Caryophyllus*)—Carnation and Picotee Pinks are generally favorites for their delicious fragrance, richness of colors and profuse bloom. Perennial. **Pkt., 10c.**

181. PINK CARNATION (Riviera Market, or Gillaud)—A magnificent variety of colors and shades, which will thrive either in open ground or pots. **Packet, 25c.**

182. PINK CARNATION—MARGUERITE—These lovely, fragrant Carnations produce fine double flowers. From seed sown in the garden early in the spring, the plants begin to bloom in about four months. All colors mixed. The finest strain. **Per Packet, 10c.**

185. PINK—(CHINA OR INDIAN PINK)—Blossoms in clusters, flowers very double and bloom in a large range of bright colors. **Packet, 5c.**

188. PINK—ZEDZEWEI (P)—Beautiful double flowers in a great variety of colors, with fringed white edges. **Packet, 5c.**

200. POPPY-CARNATION (Papaver) (A)—A showy and easily cultivated hardy annual, with large brilliant colored flowers, growing freely in any garden soil. **Packet, 5c.**

201. POPPY—PEONY FLOWERED (A)—A magnificent species, large, showy, double globule flowers, resembling Peonies in shape. **Packet, 5c.**

202. SHIRLEY POPPY (A)—These beautiful Poppies are generally single or semi-double. The colors, extending from one extreme to the other, are so varied that scarcely two are alike, while many are striped and blotched. The blooms, if cut when young, will stand for two or three days. **Packet, 5c.**

203. TULIP POPPY (A)—A magnificent species. The plants attain a height of 14 to 16 inches, and produce from about 50 to 60 flowers of the brightest scarlet. **Packet, 5c.**

204. ICELAND POPPIES, MIXED (A)—Although hardy perennials, these Poppies bloom the first season from spring-sown seed. The fragrant, elegant, crushed satin-like flowers are produced in never-ceasing succession from the beginning of June to October. **Packet, 5c.**

205. POPPY—IRRESISTIBLE (A)—A rare and beautiful Poppy, with immense flowers. Color, an exquisite rose. **Packet, 5c.**

195. PORTULACA (Marian Rose) (A)—One of the finest hardy annual plants, of easy culture, thriving best in rather rich, light loam or sandy soil; the single-flowering varieties are large and brilliant, of the richest shades of color, and produced throughout the summer in great profusion; fine for massing in beds or edgings of rock work. **Pkt., 5c.**

196. DOUBLE PORTULACA (A)—**Packet, 10c.**

210. ENGLISH PRIMROSE (Primula Vulgaris) (P)—No collection of spring flowers is complete without a few of these charming little plants. A little covering in the late fall will protect them from the severe weather of winter, and the great number of flowers produced will more than repay you the extra trouble. They are not as generally grown as they should be. **Packet, 10c.**

211. CHINESE PRIMROSE (Primula Fringed) (A)—This variety is much prettier than the English, being fringed and of the most beautiful colors. They differ from each other like the double and single Petunias.

RICINUS (Castor Bean).

Stately, strong-growing plants, with very ornamental foliage, well adapted as center plants of groups of Cannas, Dahlias, etc. Moles are troublesome in many gardens, but they may be kept away by planting Castor Beans in the borders.

212. RICINUS, CAMBOGIENSIS (A)—Large leaves, dark bronzy-maroon; stalk and stem's nearly black; 5 feet. **Packet, 5c.**

212½. RICINUS ZANZIBARIENSIS, MIXED (A)—Their immense leaves and gigantic plants exceed all other varieties. **Packet, 5c.**

213. SCABIOSA—GRANDIFLORA (P)—An old-fashioned but most attractive flower. Its great abundance and long succession of richly colored, fragrant blossoms on long stems make it one of the most useful decorative plants of the garden. Seed may be sown in place as soon as ground can be worked; or, for earlier blooming, sow in hotbed early in spring and transplant one and one-half feet apart. Hardy annual; 12 to 18 inches high. **Packet, 10c.**

THE BEST FLOWER SEEDS

Salvia Splendens.

DIANTHUS BARBATUS.
("Sweet William.")

ZINNIAS.

215. SCARLET SAGE (*Salvia Splendens*) (A)—Tall, erect, green foliage. A favorite greenhouse and bedding plant, bearing long spikes of flowers in great profusion from July to October; half-hardy perennial, blooming the first year from seed. Three feet. **Packet, 5c. ¼ Oz., 45c.**

220. SENSITIVE PLANT (*Mimosa*)—Curious and interesting plants, with pinkish-white flowers; the leaves close in and droop when touched or shaken; tender annual. **Packet, 5c.**

230. TEN WEEKS STOCKS (*Gilliflower*)—A world-wide favorite, brilliant and varied in color, equally well-adapted for massing, bedding, edging or pot culture. Very profuse bloomers. Should be grown in rich soil. **Packet, 5c.**

231. STOCKS—SNOWFLAKE IMPROVED—A beautiful dwarf-growing variety; very large, double, snow-white flowers. **Packet, 10c.**

237. SWEET ROCKET (*Hesperis*) (A)—Very pleasing, early spring flowering, profuse blooming plants, with fragrant flowers, growing freely in any light, rich soil. **Packet, 5c.**

240. SWEET WILLIAM (*Dianthus Barbatus*) (P)—A well-known free flowering, popular favorite; the great improvements upon the old varieties made within the last few years have rendered it still more desirable. Hardy perennials. **Packet, 5c.**

243. SWEET VIOLET (A)—Deservedly much in demand, because of their profusion of bloom and delicate, sweet odor. **Packet, 10c.**

244. TORENIA (A)—Charming plants for pot-culture, vases or hanging baskets. They succeed well also in the open ground in summer, and are very attractive in beds or masses. **Packet, 5c.**

245. MAMMOTH VERBENA (A)—One of the most popular and useful bedding plants. Verbenas delight in sunny situation, rich soil and thorough cultivation. **Packet, 5c.**

VINCA (*Periwinkle*)—Very attractive bushy plants, with glossy green foliage, producing in abundance handsome round or salver shaped single flowers, suitable either for culture in pots or boxes or for summer bedding and borders.

250. VINCA ROSA (A)—Rose with dark eye. **Packet, 5c.**

251. VINCA ALBA (A)—White, with crimson eye. **Packet, 5c.**

255. WALLFLOWER, DOUBLE (A)—Well-known, deliciously fragrant plants with large spikes of double flowers, similar to the *Gilliflower*. Succeed in light, rich soil, in a moist atmosphere. Perennials. **Packet, 10c.**

ZINNIAS

Very showy plants, with large, double imbricated flowers, which, when fully expanded, might easily be mistaken for dwarf dahlias. There is much satisfaction in a bed of Zinnias, for when nearly every other flower has been killed by frost, this plant is still in full bloom more abundantly throughout the season. Sow the seed early in spring, in open ground, and transplant to one and one-half feet apart in good, rich soil. Half-hardy annual; about eighteen inches high.

258. ZINNIA ELEGANS (*Youth and Old Age*) (A)—This is one of the most brilliant of annuals, and has long been a general favorite. The flowers are large, finely formed, in great variety of colors, and continue to bloom the entire season. Half-hardy annuals. **Packet, 5c.**

259. ZINNIAS CURLED AND CRESTED (A)—New, odd and superb. Petals twisted, curled and crested into fantastic contortions and graceful forms. A magnificent variety of colors. **Packet, 5c.**

260. ZINNIA—DOUBLE POMPON (A)—Long, cone-shaped flowers, very fine. **Packet, 5c.**

261. ZINNIA—ZEBRA FLOWERED (A)—Double striped, profuse bearer of fine double flowers in many colors. **Packet, 5c.**

ZINNIA—CRIMSON—**Packet, 10c.**

ZINNIA—WHITE—**Packet, 10c.**

GENERAL LIST OF CLIMBERS

270. BALSAM APPLE (Momordica) (A)—Very curious trailing vines, with ornamental foliage; fruit golden yellow; when ripe, opens, showing the seeds and its brilliant carmine interior. **Packet, 5c.**

272. BALLOON VINE (Love in a Puff) (A)—A rapid growing plant; succeeds best in light soil and warm situation; flowers white; half-hardy annual. **Packet, 5c.**

275. CANARY BIRD FLOWER (Peregrinum) (A)—With yellow, canary-like flowers; very ornamental and beautiful foliage; half-hardy. **Packet, 5c.**

276. COBEA SCANDENS (P)—A beautiful, rapid-growing climber, with handsome foliage and large bell-shaped flowers; blue; half-hardy perennial; grows 20 to 30 feet high. **Packet, 10c.**

278. CYPRESS VINE, RED (Ipomea Quamoclit) (A)—One of our most popular vines, with very delicate fern-like foliage, and masses of beautiful, small, star-shaped flowers. Sow last of May; 15 feet. **Packet, 5c.**

279. CYPRESS VINE, WHITE (A)—Usually grown with the red, making a handsome effect. **Packet, 5c.**

282. MAURANDIA (Barclayana) (A)—These charming climbers cannot be too highly praised for their beautiful flowers and foliage. They are admirably adapted for hanging baskets, vases or trellis work. **Packet, 5c.**

GOURDS

These are desirable in many places where an immense amount of vine is wanted quickly. Most sorts are good for 20 to 30 feet in a season, and the blooms of some are quite striking and handsome. With many sorts the fruit is unique and ornamental and often useful. The small fancy gourds are excellent toys for children, while the larger gourds may be used as dippers, sugar troughs and bowls.

285. MIXED GOURD (Cucurbita) (A)—**Packet, 5c.**

286. NEST EGG GOURD (A)—White fruit, shaped like an egg. Used as a substitute for nest eggs. **Packet, 5c.**

DISHCLOTH GOURD—Many women prefer a dishcloth made of this Gourd to anything else, as it is always sweet and clean as long as any part of it is left. **Packet, 5c.**

288. DIPPER GOURD (A)—Makes an excellent dipper. **Packet, 5c.**

290. MOCK ORANGE (P)—Fruit shaped like an orange. **Packet, 5c.**

291. CALABASH OR PIPE GOURD—Odd-shaped fruit, which is used to an advantage in making pipes. **Packet, 5c.**

295. HEAVENLY BLUE IPOMEA (A)—The flowers are in large, airy clusters, and of that lovely hue so rarely seen. Flowers four to five inches across. **Packet, 5c.**

300. MORNING GLORY (Convolvulus Major)—One of the most free-flowering and rapidly-growing plants in cultivation, thriving in almost any situation. The beauty and delicacy of their brilliant flowers are unsurpassed; hardy annuals. **Packet, 5c.**

302. GIANT JAPANESE MORNING GLORY (See Cut)—This plant has been developed to such a state of perfection that it now produces flowers of immense size and almost endless variety of color and markings. Some of the flowers are brilliant red, or rich blue self-colored; others are equally brilliant, with broad margins of clear white. Not only are the flowers varied, but the foliage is equally so; some of it comes plain green, and part is mottled with white and shades of yellow or yellowish green. **Packet, 10c. Ounce, 20c.**

305. MOON FLOWER (Ipomoea Noctiflora)—Charming and popular blooming climbers; of rapid growth and showy effects; warm, rich soil, with a sunny exposure, suits them. **Packet, 5c.**

162. PASSION FLOWER (Southern Beauty)—A most interesting and well-known order of climbers, bearing singularly beautiful flowers.

320. SCARLET RUNNERS—Very handsome climbing Beans, with bright scarlet flowers.

Packet, 5c.

326. SMILAX—Charming climber for greenhouses or window gardens.

Packet, 5c.

Moon Flower

SWEET PEAS

CULTURE.

Sweet Peas should be sown in drills latter part of November for fall planting, or as early as possible in spring, in rich, friable soil. Prepare the bed thoroughly, working in a quantity of well-rotted manure, if it can be done, making a furrow 4 to 6 inches deep. In this sow the seed and cover 2 inches deep. As soon as the plants begin to show through, fill in the furrow. This will secure a deep planting without the bad effect of deep covering of the seed at first, and so enable the plant to bloom continuously through the heat of summer. As fast as the flowers come into full bloom or fade they should be cut off, for if the pods are allowed to form the plants will stop blooming.

377. G. & T. CO.'S EXTRA FINE, MIXED—Consists of the very choicest varieties mixed in the newest colors and shades. Packet, 5c.; oz., 10c.; ¼ lb., 25c.; ½ lb., 45c.; 1 lb., 75c. Postage, 6c. per lb. Extra.

378. ECKFORD'S FINE MIXED—One of the finest mixtures of the Eckford varieties. Packet, 5c.; oz., 10c.; ¼ lb., 25c.; ½ lb., 45c.; 1 lb., 75c. Postage, 6c. per lb. Extra.

379. SUPERB SPENCER MIXTURE—This mixture is made up from our carefully prepared formula. It contains practically all the true Spencer varieties introduced to date. Great attention is given to secure a beautiful light mixture, and yet include all shades, nicely balanced and proportioned. Per oz., 15c.; ¼ lb., 50c.; 1 lb., \$1.50.

Grandiflora Sweet Peas

Price: Per pkt., 5c.; oz., 10c.; ¼ lb., 25c.; ½ lb., 45c.; 1 lb., 75c. Postage, 6c. per lb. Extra.

- 350. **AGNES ECKFORD**—Beautiful soft, light pink.
- 351. **AMERICA**—Bright red and white striped.
- 352. **JEANNIE GORDON**—Standard bright rose; wings primrose, tinted with light rose.
- 353. **AUROREA**—White, with stripes and flakes of orange-pink.
- 354. **BLACK KNIGHT**—Glossy deep maroon, open form.
- 355. **BLANCHE BURPEE**—Pure white.
- 356. **BLANCHE FERRY**—Standard bright crimson-rose; wings white, tinged with pink.
- 357. **BOLTON'S PINK**—Orange or salmon-pink, veined with rose.
- 358. **LORD NELSON**—A darker strain of navy blue; very dark.
- 359. **COCCINEA**—Pure cerise; self-color.
- 360. **COUNTESS OF RADNOR**—Light mauve standard; lavender wings.
- 361. **DAINTY**—Pure white, edged with light pink and standard, and wings almost true white, with pink edges.
- 362. **DUKE OF WESTMINSTER**—Standard clear purple; wings violet.
- 363. **EMILY HENDERSON**—Pure white; a vigorous grower.
- 364. **HENRY ECKFORD**—Almost clear salmon; self-color; nearest approach to orange sweet peas.
- 365. **HELEN PIERCE**—Pure white; veined, mottled and marbled with bright blue.
- 366. **HON. MRS. E. KENYON**—Primrose; large semi-hooded form.
- 367. **ROMOLO PIAZZANI**—Rose-purple; large flowers of best type.
- 368. **KATHERINE TRACY**—Standard soft pink; wings lighter tone; almost self-color.
- 369. **KING EDWARD VII**—Bright red or crimson scarlet.
- 370. **LOTTIE ECKFORD**—White, shaded lilac and blue.
- 371. **LOVELY**—Standard, and wings deep pink, shading lighter at edges.
- 372. **MRS. COLLIER**—Rich primrose tint; large flowers and long stems.
- 373. **DOROTHY ECKFORD**—White; large bell-shaped flowers.
- 374. **PRIMA DONNA**—Fine pink; self-colored.
- 375. **QUEEN OF SPAIN**—Soft buff pink, with curled standards.
- 376. **SALOPIAN**—Bright red or crimson-scarlet.

Early and Winter Flowering Sweet Peas

This distinctive class of Sweet Peas is valued for earliness of bloom when grown out of doors, and for their winter flowering qualities when grown in greenhouses. They begin blooming according to the variety—in from 8 to 12 weeks from planting seed. Price, 15c. per oz.; ¼ lb., 50c.; 1 lb., \$1.50. Postage, 6c. per Pound Extra.

- 380. **BURPEE'S EARLIEST WHITE**—Very early; hooded form.
- 381. **CHRISTMAS PINK**—Pink and white.
- 382. **EARLIEST OF ALL**—Bright rose standard, with white wings.
- 383. **EX. EV. BLANCHE FERRY**—Pink and white.
- 384. **FLORENCE DENZER**—White.
- 385. **MRS. ALEX. WALLACE**—Pinkish lavender; very early.
- 386. **MRS. E. WILDE**—Rosy crimson.
- 387. **MRS. F. J. DOLANSKY**—Pink.
- 388. **MONT BLANC**—White; early; open form.
- 389. **WATCHUNG**—White.
- 390. **MRS. CHAS. H. TOTTY**—Lavender.
- 391. **LADY GRISEL HAMILTON**—Soft lavender, tinted with mauve in standard.

ADMIRATION—Bright rose-shrimp pink.

CLAIRE ALBAINE—Pure white color.

EMMANUEL ARENA—Deep rich dark velvety crimson.

FEUER—Brilliant crimson red.

GLOIRE DE ROUGE—Rich scarlet.

MRS. E. RAWSON—Scarlet flowers.

ROSALDA—Rich crimson pink.

SNOWDROP—Pure white.

THE SIRDAR—Intense scarlet.

TIFFIN—Rich glowing scarlet.

VICTOR GROSSET—Bright apricot-salmon.

Price, 10c. each; \$1.00 per dozen. By express, not prepaid.

Moon Vines

NOCTIFLORA—The standard white Moonvine.

LEARI (Blue Dawn Flower)
—Generally known as the Blue Moonflower.

10c. each; \$1.00 per doz.

MOON FLOWER.

Petunias

10c. each;
\$1.00 per
dozen.
By ex-
press,
not
prepaid.

When ordering by mail
add 4c. each for postage.

For outdoor decoration or house culture few plants equal the Petunia in effectiveness. They commence flowering early, and continue a sheet of bloom throughout the whole season until killed by frost; easily cultivated, only requiring a good soil and sunny position.

ADA—Purple, edged and striped white.
ARTUS—Deep rose pink.
GUEY—Lilac rose.
IRENE—Bright rose pink.
SNOWBALL—Pure white.

Coleus

10c. each; 75c. per doz.; \$4.00 per 100. By express, not prepaid.

ROB ROY—Dwarf; pinkish red, with crinkled edges.
TRAILING QUEEN—Running Coleus; small foliage; dwarf, yellow and pink centre, bordered maroon and green.
DUNERIA—A magnificent Coleus; various shades of crimson, having very large leaves; showy bedder, and stands sun well.
GOLDEN BEDDER—A favorite yellow bedder.
HERO—Model dark Coleus; leaves almost black, pointed and scalloped.
SPOTTED GEM—Green, blotched with crimson and maroon, with light yellow centre.
VERSCHAFFELTII—Standard crimson variety.

Scarlet Sage

CLARA BEDMAN, OR BONFIRE—Dwarf. The fire-like appearance of the flowers standing erect among the green foliage gives the plant a most gorgeous appearance. 10c. each; \$1.00 per dozen; \$6.00 per 100.

SALVIA SPLENDENS—Tall, erect, green foliage. The well-known Salvia. 10c. each; \$1.00 per dozen; \$6.00 per 100.

Salvia Splendens.

Yucca

A hardy evergreen plant, with long, narrow leaves that are bright green the whole year. The flowers are creamy white, bell-shaped, produced on long spikes 3 to 4 feet high. Fine, stately lawn plant.

FILAMENTOSA GLORIOSA (Adam's Needle).

Price, one-year old, 10c. each, postpaid. Extra large plants, 25c. each, by express, not prepaid.

Hardy Phlox Clumps

IN MIXED VARIETIES (NOT NAMED),
at 10c. each; \$1.00 per dozen. By express, not prepaid.

Peonies

One of the most popular hardy plants grown for lawn and garden decoration. Double crimson, double white, double rose. Price, 20c. each; 4 for 75c.; \$2.00 per dozen. Postage extra, 5c. each, if wanted by mail.

Bulbs **for** **Spring** **Planting**

CALADIUMS

ELEPHANT EAK.

The Caladium Esculentum is one of the handsomest of the ornamental-leaved plants. It will grow in any good garden soil. Plant where it will obtain plenty of water and an abundance of rich compost. Roots planted in the spring will make good growth in the summer, and in the fall store in a cellar. There is nothing so good as this Caladium for a grand bed of foliage in the garden.

FIRST SIZE BULBS (7 and 9 inches).—
Each, By mail, per dozen.

LARGE BULBS (9 and 11 inches).—Each,
By mail, per dozen.

EXTRA LARGE BULBS (11 inches and upwards).—Each, By mail, \$ per dozen.

Prices per dozen are by express, not prepaid.

TUBEROSES

One of the most fragrant and popular of the summer flowering bulbs. May be started early in hotbeds or pots, or planted in open ground after the first day of May.

EXCELSIOR PEARL. Double white; dwarf.
each. Dozen, By mail, per dozen.
Per 100.

MADEIRA **VINE ROOTS**

Madeira Vine is a popular and favorite tuberous rooted climber of rapid growth, with dense and beautiful foliage. It grows everywhere, but does better in warm, sunny locations. By mail, each 5c.; dozen, 50c.

GLADIOLUS.

GLADIOLUS

Gladiolus are the most attractive and useful for cut flowers of all summer-flowering bulbs. Use any good soil, hoe and loosen it to keep down the weeds, and with ordinary rainfalls they will flower by July 1. Plant at 10-day intervals for succession of blooms from July to October. In cutting Gladioli for the house, it is best to cut the spikes as soon as the first one or two lower flowers are open. The remainder will open in the house.

AMERICA—This is one of the finest Gladioli ever introduced, and ranks as the best sort for cutting, as well as all-around purposes. The color is a very beautiful soft pink, the coloring and texture resembling those of the Orchid. Each, 5c.; dozen, 50c.; 100, \$4.00.

AUGUSTA—A lovely and useful variety, pure white with blue anthers. 5c. each; 50c. per dozen; \$4.00 per 100.

EXTRA WHITE AND LIGHT VARIETIES—All first-class varieties, made up largely from best-named sorts. 5c. each; 50c. per dozen; \$3.50 per 100.

CHILDSEI MIXED—Extra large and fine. 40c. per dozen; \$3.00 per 100.

LEMOINE'S (Mixed)—Extra fine. 35c. per dozen; \$2.75 per 100.

WHITE AND LIGHT COLORS—Dozen, 30c.; \$2.25 per 100.

MIXED (All Colors)—Dozen, 25c.; \$1.50 per 100. If wanted by mail, add 10c. per dozen for postage.

NURSERY DEPARTMENT

Before planting fruit trees, the soil (excepting new ground) should be made mellow by repeated plowing. When trees are received the root should be covered with a blanket, sack or straw until they reach their destination; the bundle should then be opened, and the trees separated from the moss in which they are packed; if the roots have become dry, from too long exposure, straw should be spread on the ground, the trees laid upon it, then covered entirely, roots and tops, with straw, and the whole well watered. In this condition they should remain for forty-eight hours, when they will be found as fresh as when first found in the nursery. Where only a few trees are to be planted, and the soil has not been sub-soiled, or where trees are to be planted in sod, then the holes ought to be at least four feet wide and eighteen to twenty inches deep, the sub-soil thrown back, and the holes filled up to a proper depth to receive the tree with fine top soil.

APPLES

Price, Each \$ Per Dozen.

Should be planted thirty-five to forty feet apart, according to the nature of the soil and climate.

SUMMER APPLES.

AMERICAN SUMMER—Medium size, oblong, streaked and dotted red. Juicy and subacid. Last of July to August.

BENONI—Round, deep red with yellow flesh. Subacid. July.

EARLY HARVEST—Large, round and yellow; rich subacid flavor. June and July.

RED ASTRAKHAN—Large, deep crimson fruit; ripe and acid. July.

TETOPSKY—Russian variety and very hardy. Yellow, striped red; flesh white and acid. July.

YELLOW TRANSPARENT—Early and prolific; clear white skin, changing to yellow. July.

AUTUMN APPLES.

FALL PIPIN—Very large, yellowish green, ripening to rich yellow. Excellent for cooking and market. September to December.

GRAVENSTEIN—Large, round, striped with red; tender, juicy and productive. August.

MAIDEN'S BLUSH—Large and smooth, shaded red or blush on clear yellow; subacid; rapid growing and large cropper. August to October.

OLDENBURG—Very hardy and abundant bearer; golden yellow, streaked crimson; valuable for market. August.

RAMBO—One of the best; smooth skin, streaked dull yellowish; red, rich, spicy subacid flavor. October to January.

SMOKEHOUSE—Large fruited, striped red on yellow ground; subacid; productive and good for culinary purposes. September to December.

WINTER APPLES.

AMERICAN GOLDEN RUSSET (Sheepnose)—Dull yellow, with very thin russet; spicy flavor; productive. October to January.

BELLFLOWER—Pale yellow, sometimes, with blush; juicy and acid; succeeds best in mountain country. October to January.

BALDWIN—Yellow, striped red and orange; juicy and subacid; good bearer. October to January.

BENTLEY'S SWEET—Pale yellowish green, shaded red and brown spotted; sweet flavor, good bearer and keeper. January to May.

BEN DAVIS—Abundant bearer of large striped fruit; juicy and subacid. Late keeper.

GRIMES GOLDEN—Yellow subacid; spicy and rich fruit. January to March.

JONATHAN—Small, with yellow skin, almost covered red; fine flavor; popular everywhere. November to April.

LANKFORD'S SEEDLING—Hardy and annual bearer, having large striped fruit of good keeping qualities.

MAMMOTH BLACK TWIG—Seedling of Winesap, but superior; large deep red; subacid; early and abundant bearer. December to April.

NORTHERN SPY—Large, striped and somewhat covered with dark crimson; slightly subacid; best in mountain regions. November to February.

PARADISE WINTER SWEET—Large, with smooth skin; dull green, when picked, with brownish blush; juicy and sweet. November to February.

SEEK-NO-FURTHER—Medium to large, slightly russeted, with dull red stripes; rich and spicy. November to February.

STAYMAN'S WINESAP—Superior to old Winesap; large, bright red, very productive, adapting itself to different soils. Good marketing variety.

YORK IMPERIAL or JOHNSON'S FINE WINTER—Medium size, skin greenish yellow, nearly covered with bright red; tender flesh, crisp and juicy; good bearer and keeper. February to April.

CRAB APPLES

Plant eight to ten feet apart.

Price, Each \$ Per Dozen.

(By express, not prepaid.)

GENERAL GRANT—Large, dark red.

HEWES VIRGINIA CRAB—Famous cider apple; yellowish and juicy.

RED SIBERIAN CRAB—Small, with scarlet cheek on waxen yellow ground; good for preserving.

YELLOW SIBERIAN CRAB—Resembles Red, except color is rich yellow; ornamental tree as well as good for preserving fruit.

PEARS

Should be planted twenty to twenty-five feet apart.

BARTLETT (Summer)—Yellow, with soft blush, fine-grained, sweet and juicy; good bearer. July and August.

Price, 60c. Each; \$

KOONCE (Summer)—Handsome fruit, good bearer, frost-proof and free from blight. Price, 50c. Each.

KIEFER—Standard winter variety. Large and juicy. 40c. Each; \$

ANGOLEME (Autumn)—Very large, dull greenish yellow, streaked and spotted russet; flesh white, juicy and excellent flavor. September to November. Price, 50c.

SECKEL (Autumn)—Rich quality, hardy and productive. September and October. Price, 50c. Each.

FLEMISH BEAUTY (Autumn)—Large, skin pale yellow, mostly covered with patches of russet, changing to reddish brown; hardy and abundant; gather early and ripen in house. September. Price, 50c. Each.

LAWRENCE (Winter)—Large yellow covered with brown dots; rich flavor; best early winter pear; hardy and productive. November to December. Price, 50c. Each.

LINCOLN CORELESS (Winter)—No seed or core; late in season and good keeper; golden yellow mellow fruit, of rich flavor. Price, 50c. Each.

WINTER NELIS (Winter)—Medium size; dull russet; fine-grained, buttery and melting; rich aromatic flavor. November to December. Price, 50c. Each.

PEACHES

Should be planted sixteen to eighteen feet apart.

ALEXANDER—Early; flesh white and crimson skin; valuable for Southern market. July.

ARGYLE ELBERTA—Later than common Elberta; fruit finer color and better flavor; abundant producer.

BRANDYWINE—Yellow flesh; freestone. Last of August.

BUTLER'S LATE—Largest size; greenish white skin, with red cheek; very productive. First to middle of October.

KEER'S SMOCK—Larger than Smock and later; flesh firm and red next to seed; freestone. October 1st.

CARMAN—Large and round, with pale yellow skin, red blush on sunny side; white flesh, superior flavor. Middle of July.

CHAIR'S CHOICE—Large size; yellow, with red cheek; yellow flesh. Early September.

CHINESE CLING—Large fruit, with transparent cream-color skin, with marbling of red next to sun; creamy white flesh, juicy and rich flavor. Last of July.

CRAWFORD'S EARLY—Large, yellow and productive; flesh juicy and subacid; valuable for market; freestone. First of August.

CRAWFORD'S LATE—One of the best yellow Peaches for market; freestone. Middle of August.

HEATH CLING—Best of clingstone peaches, having luscious flavor, and keeping well after taken from tree; skin pale yellowish white, with tinge of red; flesh greenish white; juicy.

HEATH FREESTONE—Fruit large; skin white; juicy, with good flavor. Early September.

LEMON CLING—Lemon-shaped, light yellow color, ripening red in sun; firm yellow flesh, with subacid flavor; fine for preserving. Last of August.

LEMON FREE—Almost lemon-shaped and pale yellow when ripe; very hardy and exceedingly productive. September.

MOUNTAIN ROSE—A variety of great value for market; skin whitish, nearly covered with light and dark red; flesh white, slightly stained at stone; juicy and sweet; freestone.

OLDMIXON FREESTONE—Large, productive variety; yellowish white skin, with red cheek; white flesh, red at stone. Middle of August.

OLDMIXON CLINGSTONE—Yellowish white, dotted red; flesh pale white; melting and juicy. Middle of August.

SUSQUEHANNA—A great favorite; fruit of large size, having rich yellow skin, with red cheek; yellow flesh with rich flavor; freestone. August.

Price, Each \$ per Dozen.

NURSERY DEPARTMENT---Continued

CHERRIES.

Should be planted sixteen to twenty feet apart.
HEART AND BIGARREAU—Succeeding best in soil not too wet or damp.

BLACK TARTARIAN—Fruit large, sweet and productive. June.

BLACK HEART—Above medium size; tender, juicy and rich. June.

ELTON—One of the finest fruits; of pale yellow, blotched red, juicy and rich. May and June.

GOV. WOOD—Large, light yellow shaded red; juicy and sweet. June.

MERCER—The finest heart cherry; dark red and juicy; good bearer.

DUKE AND MORELLO—These varieties will bear more moisture than above, though not as vigorous and upright, forming low-spreading heads, with acid or subacid fruit.

DYHOUSE—Fruit early and subacid; bright red, darkening with sun; juicy.

ENGLISH MORELLO—Dark red, juicy and subacid. July.

EARLY RICHMOND—Red and juicy; acid flavor. Last of May. Productive.

MONTMORENCY—Large-fruited; of finest flavor, hardy and prolific.

Price, 60c. Each. By Express, not Prepaid.

PLUMS.

Should be planted fourteen to sixteen feet apart.
GERMAN PRUNE—Esteemed for drying and preserving; oval purple fruit, with firm green flesh; sweet, and separates from stone.

GREEN GAGE—Small yellowish-green; flesh pale green; juicy, sweet and rich; one of the best flavors, and separates from stone.

LOMBARD—Medium; skin delicate violet, dotted red; flesh deep yellow; juicy, hardy and productive.

SHROPSHIRE DAMSON—Large size, dark purple; esteemed for preserving. September.

ABUNDANCE (Japanese)—Lemon-yellow ground, over-spread with cherry; flesh yellow and juicy; subacid, with apricot flavor. August.

BURBANK (Japanese)—Large cherry-red, with slight lilac bloom; deep yellow flesh; very sweet. September 1st.

WILLARD—Earliest of all Japanese plums, and valuable for market; bright claret-red, with dots; white flesh; free-stone; early, and good keeper.

Price, 60c. Each. By Express, not Prepaid.

APRICOTS.

Apricots and nectarines should be planted twelve to fifteen feet apart. They will grow on any friable soil under good culture.

EARLY GOLDEN—Small, pale orange; flesh orange, juicy and sweet. Last of June.

HARRIS—Golden yellow; hardy and late bloomer; good bearer.

LARGE EARLY—Orange, with red cheek; sweet and juicy. Last of June.

60c. Each. By Express not Prepaid.

NECTARINES.

BOSTON—Large yellow, with red cheek.

ELRUGE—Greenish yellow, with red cheek.

PITMASON ORANGE—Rich orange-yellow, with brownish red cheek; yellow flesh, red at stone.

Price, 60c. Each. By Express, not Prepaid.

QUINCES.

Should be planted ten to twelve feet apart.
CHAMPION—Greenish yellow; large fruit.

MEECH'S PROLIFIC—Pale bright orange; large fruit; fragrant and good flavor.

ORANGE (Apple Quince)—Pale orange, ripening after mid-autumn; good keeper.

60c. Each. By Express not Prepaid.

GRAPES.

If planted for fastening to a trellis or arbor, should be twelve feet apart; if tied to stake, six feet apart.

Black. White. Red.

Concord. **Moore's Early.** **Niagara.** **Brighton.**

Worden. **Campbell's Early.** **Catawba.**

20c. each. 30c. each. By express not prepaid.

RASPBERRIES.

Should be planted four feet part each way.
CUTHBERT—Strong and vigorous. Large fruit; very productive. Red.

RASPBERRIES—(Continued).

GREGG—Large firm fruit, sweet and rich. Strong grower and ripens late. Black and juicy.

KANSAS (Black Cap)—Firm and of fine quality. Its canes are of strong growth, entirely hardy and prolific, with tough, healthy, clean foliage. Season about second early—later than Souhegan, but earlier than Gregg.

MILLER RED—Fruit size of Cuthbert; bright red; does not fade; core very small. ripens very early; heavy bearer; best shipper.

75c. per dozen. By express not prepaid.

BLACKBERRIES.

Require the same kind of soil and treatment as raspberries, except that they should be planted in rows eight feet wide and four feet apart in the row.

ELDORADO—Berries very large; jet black; sweet, melting; no hard core; splendid keeper and shipper.

\$1.00 per dozen.

WILSON, JR.—One of the best earlies.

EARLY HARVEST—Good quality and productive. Very early.

ERIE—Black. Ripens early and very hardy.

LUCRETIA (Dewberry)—As early as Early Harvest; entirely hardy, healthy strong grower and very productive.

\$1.00 per doz. By express not prepaid.

GOOSEBERRIES.

Should be planted the same distance apart as currants.

DOWNING—Seedling of Houghton. Large and juicy. Valuable for market.

HOUGHTON'S SEEDLING—Small fruit, but juicy and sweet. Valuable for market.

20c. Each.

INDUSTRY—Very large, excellent quality and an enormous bearer.

RED JACKET—Plant vigorous and healthy. Fruit rich dark red; oblong. Believed to be valuable.

35c. Each. By Express not Prepaid.

CURRANTS.

Currants should be planted on good soil, which must be kept rich and well worked in the garden, four feet apart.

CHERRY—Large red, fine variety and strong grower.

FAY'S PROLIFIC—Strong grower, wonderfully productive, and comes to bearing young; fruit large, bright red and good quality.

20c. Each.

VEGETABLE ROOTS.

ASPARAGUS ROOTS.

A saving of one to two years is effected by planting roots. A bed 12x40 feet, requiring about 100 roots, should give a sufficient supply for an ordinary family; 7260 roots will plant an acre. Select good, loamy soil, plow deep, put in good quantity of manure and 100 pounds of kainit to 1000 square feet of bed. Incorporate thoroughly, make a trench 8 inches deep, set plants 9 inches apart. In field culture rows are placed 4 feet apart.

Barr's Mammoth—Per 100, \$1.00. Per 1000, \$7.00.

Palmetto—Per 100, \$1.00. Per 1000, \$7.00.

Colossal—Per 100, \$1.00. Per 1000, \$7.50.

Mammoth White—Per 100, \$1.00. Per 1000, \$7.50.

JERUSALEM ARTICHOKE ROOTS.

Used for table and stock feeding. The tubers roasted or boiled, and served with butter, well seasoned, make a dish some think greater than potatoes. However, their greatest value is for hogs. Plant and cultivate like potatoes.

Peck, 75c. Bushel, \$2.50.

HORSE RADISH ROOTS.

The land should be rich, well manured, plowed deeply, harrowed and free from lumps. Plant in a roomy space by itself. Make rows 15 inches apart, set plants 12 inches from each other. Plant shoots about five inches long, making holes for same with a stick, and set them about two inches under the soil. Have the shoots cut squarely across the bottom, but cut slanting at the top, in order that one side may be a little longer than the other. Keep free from weeds for the first and second seasons, after which the Horse Radish will take care of itself. Doz., 20c. By Mail, 25c. Per 100, 75c. By Mail, 90c. Per 1000, \$6.00. By Express not Prepaid.

RHUBARB, OR PIE-PLANT.

This very desirable vegetable comes early in the spring. The large stems of the leaves are used for pie-making and stewing. A deep, rich soil is indispensable to secure large, heavy stalks. Plant in rows 4 feet apart, with the plants 3 feet distant. Set so that the crowns are about an inch below the surface. Top-dress annually in the fall with stable manure, and fork under in the spring.

15c. Each. By Mail, 20c. Doz., \$1.50. By Express not Prepaid.

NURSERY DEPARTMENT--Continued

CLIMBERS

AKEBIA QUINATA—A climbing plant from Japan, with fine foliage, and clusters of purplish fragrant flowers.

AMPELOPSIS QUINQUEFOLIA (Virginia Creeper)—A native vine of vigorous growth, with abundant foliage, turning rich crimson in autumn.

AMPELOPSIS VEITCHII—Japan introduction; rapid grower on walls, etc.; leaves small, turning to red in autumn.

CLEMATIS-FLAMMULA (European Sweet-Scented)—Rapid grower, hardy, bearing white fragrant blooms.

CLEMATIS-JACKMANI—As yet the best, bearing large, velvety, dark violet-purple blooms; strong and hardy.

CLEMATIS-PANICULATA—A hardy Japan variety, having pure white blooms, star-shaped and very fragrant; late bloomer.

CLEMATIS-SCARLET—Flowers brilliant scarlet, blooming in July.

HONEYSUCKLE—Useful for covering arbors, etc., in different varieties of color.

IVY—Hardy evergreen vine, succeeding best in cool, shady places; useful for covering walls, trees, etc.

JESSAMINE-Naked Flowering—Golden yellow flowers, which appear in spring before foliage.

JESSAMINE-Common White—Climber with fragrant white flowers.

JESSAMINE-Grandiflora—Blooms orange-red.

TRUMPET FLOWER—A rapid-growing plant, with large trumpet-shaped scarlet flowers.

WISTARIA (Chinese)—Rapid grower, having long racemes of pale blue flowers.

WISTARIA (Double Purple)—Flowers very double and deeper in color than above.

WISTARIA-White Flowering and Single—

SHRUBBERY

ALTHEA (Rose of Sharon)—Hardy flowering shrubs, in the following varieties of color: Purple, Light Red, White Tipped Pink, White, Lilac. Price,

BLEEDING HEART—Hardy plant, with heart-shaped pink flowers. Price,

CALYCANTHUS FLORIDUS (Sweet-Scented Shrub)—Well-known native bush, young wood of which has a strong aromatic odor. Luxuriant foliage, with rare chocolate-colored blossoms, delightfully fragrant. Blossoms in May and at intervals during summer. Price,

DEUTZIA, GRACILIS—Small pure white flowers, on slender branches; hardy. Price,

DEUTZIA, CRENATA (Double Flower)—Flowers white margined pink. Price,

FORSYTHIA (Golden Bell)—Golden yellow flowers in great profusion.

FORSYTHIA (Weeping)—Slender and drooping; yellow flowers. Price,

HYDRANGEA (Paniculata Grandiflora)—One of the finest shrubs, growing 8 to 10 ft. high, producing immense pyramidal panicles of white flowers.

HYDRANGEA (Otaksa)—From Japan; immense crusses of rose-colored flowers in June. Price,

JAPAN QUINCE—Produces bright scarlet flowers in early spring; hardy. Price,

JAPAN QUINCE (White Flowering)—Producing delicate white and pink flowers in early spring. Price,

LILAC—Pure white.

LILAC—Bluish-purple.

LILAC—Louis Van Houtte; large red flowers. Price each.

SPIREAS—Anthony Waterer; crimson, of dwarf growth also; excellent for pots.

SPIREA—Bright rose-colored, blooming all summer. Price each.

SPIREA—Blue; late bloomers.

SPIREA—White

SHRUBBERY—(Continued)

SPIREA—Plum-leaved, Bridal Wreath; pure white flowers.

SPIREA (Thunbergii)—Small white-flowering; desirable for pot culture. Price,

SNOWBALL (Cranberry Bush)—An old, well-known shrub, bearing large balls of pure white flowers; very decorative fruit, beginning to color in midsummer, and hangs on during winter.

SNOWBALL (Single)—White flowers and purple foliage in autumn.

SNOWBALL (Japanese)—Flowers in large globular heads, pure white.

SYRINGA (Mock Orange)—Hardy, with handsome foliage and white flowers, which somewhat resemble orange blossoms, being rather fragrant. June flowering.

HEDGE PLANTS

To secure a good hedge it is necessary to plant well. Dig a wide, deep trench, and work the soil thoroughly into the roots. Settle the ground firmly, so that each plant will be set as solidly as a post; then mulch heavily with some coarse material for a distance of one or two feet on either side, according to the size of the plants.

ARBOR-VITAE, American—One of the most desirable evergreen hedge-plants. Of a very attractive appearance. Although a fast grower, it can be kept trimmed to any height desired. Best adapted for screens or windbreaks.

PRIVET, California—Nothing in the way of a hedge-plant has attained in so short a time the popularity of the California Privet. While in this latitude it is deciduous, yet it retains its foliage until very late in the fall or early winter. The flower is creamy white and very fragrant. It is certainly a most desirable thornless, hardy hedge-plant, with beautiful dark green foliage. It can be kept at any desired height by frequent trimming, and grows well at the seashore.

California Privet, 2 ft.\$4.00 per 100;

California Privet, 18 to 23 in. 3.75 per 100;

California Privet, 12 to 17 in. 3.00 per 100;

STRAWBERRY PLANTS

The ground should be prepared the same as for other crops; if not already rich, make it so by manuring. Mark out the rows the desired width, and set plants ten to seventeen inches distant in the rows; if set twelve inches in rows four feet apart, an acre will require 10,890 plants; same as if set sixteen inches in rows three feet apart.

In early winter when the ground is frozen, cover the whole with long straw, which should be removed from the plant in the spring, but allowed to remain on the ground as a mulch, to keep the berries clean next summer. When strawberries are moved in the fall, they should be left until October or the first of November.

The blossoms of all varieties marked "S" are bi-sexual or perfect, those marked "P" are destitute of stamens and are termed pistillate or imperfect.

Imperfect varieties should have a row of perfect flowered sorts planted every third or fourth row to pollenize their blossoms. When imperfect blossoms are properly fertilized they are the most prolific.

BUBACH—Large and strong grower. Early.

CHESAPEAKE—Well recommended for all soils; good bearer (late).

MARYLAND—Medium Early. Used extensively in Anne Arundel County.

GANDY (S)—Strong plants, bright red in color and good late shipper. Succeeds best in heavy clay soil or bottom land.

GLEN MARY (S)—Dark red fruit, rich and juicy. Good firm shipper.

NICK OHMER (S)—Very productive, large glossy red. Superior flavor.

PRICE.—Any variety, strong, healthy layer plants, 25c per doz.; \$1.00 per 100; \$5.00 per 1000. By express not prepaid.

TENNESSEE PROLIFIC (S)—Large size, bright crimson fruit. Good shipper and earliar.

TUBBS (S)—Bright scarlet, medium to large fruit. Very productive.

SUPERIOR (S)—Large fruit of fine quality, specially for market.

STEVEN'S LATE (S)—Heavy yielder, having large bright red fruit.

KLONDYKE (S)—Good cropper and firm berry, making a fine shipper.

SHARPLES (S)—Large fruit, of bright scarlet color. Flesh firm, juicy and sweet. Medium to late.

WM. BELT—Good for home use, being a good bearer, with large berries.

FROST-PROOF CABBAGE PLANTS

WILL MATURE HEADS TWO TO THREE WEEKS EARLIER THAN YOUR HOME-GROWN PLANTS.

Varieties: Early Jersey Wakefield, Charleston Wakefield, Succession and Early Flat Dutch

These plants are grown in the open field during the fall and winter months, which causes them to make a slow, tough, hardy growth—so hardy that the outer leaves turn to a reddish brown. They can be shipped to distant points without danger of spoiling, and should be planted in the open ground from four to five weeks earlier than frame plants.

They will stand a temperature of 10 to 15 degrees above zero without injury. Will do very much better planted early, as they will take root and start to grow as soon as warm weather sets in.

Orders filled from January 1 until April 1. We do not advise planting later than this time.

The plants when received will be somewhat wilted and have a hard stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the crop results.

Prices by parcel post, postage paid, cts. per 100 plants to all places in the postal union, on lots for 100 to 400.

On larger quantities the prices are as follows:

GROUP 1—Georgia, Louisiana, Mississippi, North Carolina and South Carolina; 500 plants, \$ 1,000 or more at \$ per 1000, postpaid.

GROUP 2—Maryland, Virginia, West Virginia, Pennsylvania, Delaware, New Jersey, Ohio, Kentucky, Tennessee, Alabama, Arkansas, Florida, Missouri, 500

plants for \$ 1000 or more at \$ per 1,000 postpaid.

GROUP 3—Connecticut, Kansas, Illinois, Indiana, Iowa, Massachusetts, Michigan, New Hampshire, New York, Oklahoma, Rhode Island, Texas, Vermont and Wisconsin; 500 plants for \$ 1,000 plants or more at \$ per 1,000, postpaid.

GROUP 4—Arizona, Colorado, Minnesota, Nebraska, New Mexico, North Dakota, South Dakota, Utah and Wyoming; 500 plants for \$ 1,000 or more at \$ per 1,000, postpaid.

GROUP 5—All States not listed, also Canada, Cuba and Mexico; 500 plants for \$ 1,000 or more at \$ per 1,000 postpaid.

Prices by express, F. O. B. growing station, buyer paying charges: 500 for \$ In lots of 1,000 to 4,000 at \$ per 1,000. 5,000 to 8,000 at \$ per 1,000. In lots of 10,000 or over at \$ per 1,000.

Plants are Packed for parcel post shipment either 100, 200, 300, 400, 500 or 1,000 plants to package. For express shipment 500 to 1,000 plants to package. Order in these quantities. They weigh 15 to 20 pounds per thousand plants packed for shipment.

TERMS, CASH WITH ORDER, PLEASE. No plant shipped C. O. D. We advise that you have all shipments of two thousand plants or less sent by parcel post.

BOOKS

ON HORTICULTURE, AGRICULTURE AND KINDRED SUBJECTS

The pleasure in gardening, or any other pursuit, is doubled with aid of a good book. Those offered by us are all the latest and brightest opinions on the different subjects.

"FARMERS' CYCLOPEDIA OF LIVE STOCK."

A compendium of the science, economics and practice of stock raising, dairying and poultry farming, comprising the origin, anatomy, physiology, breeding, feeding, diseases, management, marketing and slaughtering of farm stock and the utilization of animal products. Many superb illustrations. A very valuable reference book. By Earley Vernon Wilcox, Ph. D., Clarence Beaman Smith, M. S. Color plates and illustrations.

Cloth, handsome and durable, gold stamping.....\$4.50
Half Morocco, with cloth sides and leather corners..... 5.50

AGRICULTURE AND FARMING.

FARMERS' CYCLOPEDIA OF AGRICULTURE. By Messrs. Wilcox and Smith, Experiment Station Editors in U. S. Dept. of Agriculture. 6000 topics. 700 pages. 500 illustrations. Cloth bound..... 3.50
Half Morocco..... 4.50

THE BOOK OF ALFALFA. F. D. Coburn. This is by far the most authoritative, complete and valuable work on this forage crop ever published..... 2.00

ALFALFA. By F. D. Coburn. Its growth, use and feeding value..... .60

BOOK OF WHEAT (new). By P. T. Döndlinger. A complete study of everything pertaining to wheat. New, authoritative and up to date..... 2.00

CLOVERS AND HOW TO GROW THEM. By Thos. Shaw. The only book published which treats on the growth, cultivation and treatment of clovers in all parts of the U. S. and Canada... 1.25

THE BOOK OF CORN. By Herbert Myrick, assisted by specialists. A complete treatise upon the culture, uses and marketing of maize..... 1.50

FARM ACCOUNTS SIMPLIFIED. By D. H. Otis. A simplified system of farm accounts that requires no posting. Sufficiently itemized to determine the cost of production..... 1.50

FORAGE AND FIBER CROPS IN AMERICA. By Thos. F. Hunt. Treating fully timothy, Kentucky blue grass, red clover, alfalfa, cowpeas, cotton, etc..... 1.75

FARM GRASSES OF THE U. S. By W. J. Spillman, Agrostologist of the U. S. Department of Agriculture..... 1.25

HOW FARMERS COOPERATE AND DOUBLE PROFITS. By C. Poe. A practical guide book to the whole big subject of co-operation. As full of information as an egg is of meat.... 1.50

TOBACCO LEAF. By Killebrew and Myrick. Issued 1897. Approved methods of culture, harvesting, curing, packing, selling and manufacturing. Every process in field, barn and factory made plain..... 2.00

TEN ACRES ENOUGH. A practical experience showing how a very small farm may be made to keep a very large family... 1.00

BARN PLANS AND OUTBUILDINGS. Ideas, suggestions, plans for barns, granaries, smoke, ice, poultry, dog, bird houses, etc.; rootpits, etc..... 1.25

LANDSCAPE GARDENING. By F. A. Waugh. A treatise on the general principles of governing outdoor art. Every paragraph is short, giving perfect clearness to the discussion at all points. Illustrated. 152 pages. 5x7 inches. Cloth. Net..... .75

THE YOUNG FARMER: SOME THINGS HE SHOULD KNOW. By Dr. Thomas F. Hunt. To the beginner who desires thorough and reliable information the work cannot be too highly recommended. Illustrated. 280 pages. 5x7 inches. Net..... 1.50

DAIRYING AND DAIRY FARMING.

FIRST LESSONS IN DAIRYING. By H. E. Van Norman. This book is just the thing for everyday dairymen and should be in the hands of every farmer in the country..... .60

PRACTICAL DAIRY BACTERIOLOGY. By H. W. Conn. The latest, most complete and up-to-date work on the subject..... 1.25

PROFITABLE DAIRYING. By C. L. Peck. A practical guide to successful dairy management..... .75

BUSINESS OF DAIRYING. By C. B. Lane. Meets the needs of the average dairy farmer, and if carefully followed will lead to successful dairying..... 1.25

VEGETABLE FORCING. By R. L. Watts. Exceedingly valuable to all practical growers whether producing for commercial purposes or for the home table. Net..... 2.00

SIMPLEX INCOME SYSTEM SOLVES FARMERS' PROBLEMS.

This is a Simplex Income System especially designed to meet the requirements of the farmer—one that will enable you to keep an accurate record of every transaction you make during the year which is necessary to record as a part of your business.

You—your wife or your child can keep this system and with the aid of the Free Legal and Accounting Departments your Income Tax Report will be easily and accurately compiled. Don't delay—start now—be ready when the time comes.

Price, \$5.00. Advisory and Accounting Service Free.

We will prepare your Income Report free if you use a Simplex Income System.

Due to the fact that many found it necessary to consult Public Accountants and Attorneys in order to be sure that their Income Tax Report was made and filed according to the rules and regulations, thereby creating quite an expense and wasting considerable of their time, we have opened a Free Consultation and Advisory Service Department.

All users of the *Simplex Income System* will be given free advice on any question that may arise regarding their Income Account, regardless of whether it is a legal or an accounting question on which they wish information. The only condition whatsoever regarding this service is that in cases where you apply for advice you are to enclose a stamped envelope for reply.

We issue a certificate of service with every *Simplex Income System* sold. Be sure you get the "Simplex" and our Free Service.

RITTER & HORNEY, Inc., Publishers.

SWEET CORN CULTURE. By A. E. Wilkinson. Varieties, methods of culture, commercial growing and processes of drying and canning are completely covered. Will appeal to the small farmer and commercial grower..... .75

TOMATO CULTURE. By Will W. Tracy. The most complete account of tomato culture in all its phases that has ever been gotten together. Illustrated. 150 pages. 5x7 inches. Cloth..... .60

FRUIT CULTURE.

AMERICAN FRUIT CULTURIST. By J. J. Thomas. 20th edition; just revised and enlarged. A handbook of everything pertaining to fruit culture..... 2.50

BEGINNERS' GUIDE TO FRUIT GROWING. By F. A. Waugh. A simple statement of the practices of propagation, planting, culture, etc..... .75

THE NUT CULTURIST. By A. S. Fuller. Propagation, cultivation, marketing of nut-bearing trees and shrubs..... 1.50

THE APPLE ORCHARD. By F. A. Waugh. This work serves as a manual for the novice as well as a book of reference for all those of more experience. Every detail connected with the successful cultivation of the apple is explained..... 1.25

PRINCIPLES AND PRACTICE OF PRUNING. By M. G. Kains. Prepared to meet the needs of practical and amateur growers. Lavishly illustrated by 300 actual photographs of specimens showing good and bad practice. Net..... 2.00

SPECIAL BOOKS.

SUCCESS WITH HENS. By Robert Joos. This is a reliable guide to poultry-raising that thoroughly covers the subject by an expert. It is clear, practical and up-to-date. The fifty-five chapters give full directions for the hatching and brooding of chickens, incubation, feeding and housing, increasing the egg supply, cure of diseases, the marketing of eggs and fowls and everything pertaining to the care of hens. Nothing is given but the best methods and only those which have been proved by the experience of successful poultry keepers. The small and large poultryman, the beginner and the experienced, will find this book indispensable. It will reduce losses and increase profits. Some of the Chapters: Method to Be Used; Starting in Spring; Starting in Fall; Early Hatching; Early Fertility; Late Hatching; Convenient Equipment; Artificial Incubation; Development of Chicks; Feeding the Growing Stock; Building Up a Laying Strain; Winter Egg Production; Why Hens Don't Lay; Marketing and Grading Eggs; Fattening—Killing—Marketing; Causes of Disease. Cloth. 234 pages..... 1.00

MAKING THE FARM PAY. By C. C. Bowsfield. This very important book tells how to get the biggest returns from the soil and make farm life more attractive and successful. Farming opportunities, the marketing of produce, the raising of vegetables, fruit and poultry, dairy products, and all phases of agriculture are discussed by an expert. It is the most helpful book on farming ever published. The book is packed with new, practical money-making ideas. 314 pages. Cloth..... 1.00

The highest praise ever given a farm book. *Making the Farm Pay*, by C. C. Bowsfield, has been received with more enthusiasm than any book published this year on any subject. The critics and farm experts have been unanimous in endorsing the book. Read the following commendations: "An admirable text-book because it is the farmer's best friend. It will make any farmer make his farm pay."—*The Journal of Education, Boston*. "The most helpful farm book ever published."—*Life and Health*. "A book that every city man ought to read and by which every country man would profit."—*New York American*.

Inoculate your Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches, and all other legume crops with

Mulford Cultures

FOR LEGUMES

SMALL COST

LARGE RETURNS

EASY TO USE

NO LABOR EXPENSE

Uninoculated ALFALFA Inoculated Photographed on same scale. Plant on left not inoculated—Plant on right inoculated with **Mulford Culture** for Alfalfa. All other conditions identical. **The Contrast Speaks for Itself**

MULFORD CULTURES contain pure, tested strains of active, vigorous nitrogen-fixing bacteria, for inoculating seeds of legumes or soil. Enormous numbers of these very valuable and desirable bacteria are thus available to you in every package of Mulford Culture and may readily be applied to your seed. The sealed bottle insures purity.

Increase Your Crops Improve Your Soil

LEGUMES OFFER THE BEST-KNOWN MEANS of maintaining soil fertility and rejuvenating overcropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

THE U. S. DEPARTMENT OF AGRICULTURE and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

MULFORD CULTURES ARE SCIENTIFICALLY PREPARED and tested by experts, in the biological laboratories of H. K. Mulford Co., Philadelphia, U. S. A., with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.

Why buy expensive commercial nitrates when you can grow legume crops and thus increase your yield and at the same time increase the nitrates and enrich and renovate your soil, by Nature's own method?

FREE DESCRIPTIVE LITERATURE SENT UPON REQUEST.

RAT-SNAP!

No Danger in Handling—But Do Not Eat!

A FEW POINTERS ABOUT RAT SNAP.

By a newly scientific discovery there is **NO SMELL** after rats and mice eat **Rat-Snap**. By the most careful study of the habits and tastes of rats and mice, **Rat-Snap** is so prepared that rats and mice crave it. It is a dessert for them—the last they eat. They leave all other foods for it, while in the cases of home prepared mixtures they will not touch them at all.

Rat-Snap is made of the strongest poisons known and the ingredients carefully prepared to make them the most attractive food for **Rats and Mice**.

Rat-Snap acts quickly and will kill two dozen rats or mice. No annoyance or trouble of mixing.

No soiling of dishes.

Rat-Snap never spoils—is always good.

Rat-Snap may be dropped in holes or along cellar walls—in fact, all out-of-the-way places. In linen closets without soiling anything.

Keep away from chickens and stock. When used around chickens, ducks, etc., place in holes and cover with a stone. Packages, 15c. and 25c.

RAX SCIENTIFIC RATS AND MICE DESTROYER

Rax is a bacteriological preparation, containing Pure Cultures of an active Virus, which has a deadly effect on **Mice, Rats and Field Mice**, but is harmless to all other animals.

Thus **Rax** is not a poison and may be used without the precaution necessary in handling other rat exterminators.

Rats and Mice having eaten the bait prepared with **Rax** become gradually sick and die within ten to fourteen days. While infected they communicate the virus to other rats and mice coming in contact with them or their haunts. They never die inside the buildings, as they become very feverish and seek the open to get fresh air and water.

Rax has no equal as a destroyer of **Rats and Mice**. Directions with every package. Price, 50c.

THE "CLIMAX" RAT TRAP

The size of this trap makes it the ideal for house use. It is strong and will stand rough use. The patent door eliminates all danger from the caged rats. Size—17 inches long, 9 1/2 inches wide, 7 inches high. No. 17—Coppered wire; nine sheet-steel flanged ribs.

Price, 75 cents.

THE CHALK PLANT STAND

A BOON TO FLOWER LOVERS

A GARDEN IN YOUR HOUSE OR ON YOUR PORCH.

By loosening one bolt, it can be knocked down flat. The Chalk Patented Flower Stand is a practical invention by a practical man. An invention inspired by his needing something which he could not buy—HE MADE IT.

The illustrations show the Chalk Plant Stand set up with drip pan in position. The stand is designed with a view to strength, holding capacity, convenience and to having a stand that will give the plants light and air, and on which they may be freely watered either in the house or on the porch. As a result the problem of having house plants of luxuriant growth is simplified.

The Chalk Plant Stand is also valuable to florists, as it is just the thing for displaying plants in stores and on market stalls.

PRICE\$10.00.

The Chalk Flower Stand Ready for Use.

MASTICA

Mastica.—For glazing greenhouses, sashes, new and old. It is elastic, adhesive and easily applied. It is not affected by dampness, heat or cold. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or machine on the outside of sash, as it makes it perfectly tight and saves the expense of relaying the glass.

Parcel post weight, 2 pounds.
Price.....50c.

LEVER BUCKET SPRAY PUMPS

Fig. 632.

Fig. 632 represents the Myers Lever Bucket Spray Pump, made of brass, and fitted with brass ball valves and patented agitator. The cylinder is 1 inch in diameter with solid plunger. The air chamber is fifty per cent larger than the ordinary bucket spray pump, has malleable iron foot rest and malleable lever. This pump can be operated with one-half the power of the ordinary bucket spray pump, owing to the advantage of the lever handle. This pump can also be used as a barrel spray pump the head having two holes in for bolting same to the barrel.

We recommend a Bordeaux Spray Nozzle for whitewashing and painting, if you desire the Vermorel Nozzle instead of the Bordeaux, please specify.

Fig. 632, No. R 324 Lever Bucket Spray Pump, with agitator, complete with hose, Bordeaux, coarse spray and solid stream nozzle, List Price, \$9.00. Our Special Price, \$7.50.

No. R 324A Lever Bucket Spray Pump, with agitator, complete with hose, Bordeaux, coarse spray and solid stream nozzle and eight foot pipe extension List, List Price, \$9.75. Our Special Price, \$8.00.

No. R 324B Lever Bucket Spray Pump, with agitator complete with hose, Bordeaux coarse spray and solid stream nozzle and eight foot pipe extension with stopcock. List Price, \$11.00. Our Special Price, \$9.25.

LITTLE GIANT BRASS SPRAY PUMP AND FIRE EXTINGUISHER WITH AGITATOR

Fig. 639.

Fig. 639 Spray Pump is constructed entirely of brass. They are so arranged that the labor of pumping is all on the downward stroke of the piston and nothing on the up. The effect of this operation while pumping is to hold the pump down. The foot rest steadies the pump, holding it in proper position. It is provided with a large air chamber and has brass ball valves and detachable hose: the nozzle throws a continuous spray, and is not affected by the movement of the plunger. Will throw a solid stream fifty feet, and is of unusual value in spraying trees, washing windows and buggies, extinguishing fires, spraying flowers and etc.

No. 327½, Fig. 639. Bucket Brass Spray Pump, complete with hose and combination fine, coarse spray and solid stream nozzle, Factory List Price, \$6.38. Our Special Price, \$5.35.

No. 328, Fig. 639. Bucket Brass Spray Pump, complete with hose and combination fine, coarse spray and solid stream nozzle, and an eight-foot pipe extension. Factory List Price, \$7.13. Our Special Price, \$6.00.

THE MYERS WHITEWASH, COLD WATER PAINTING MACHINE AND GENERAL PURPOSE SPRAYER NO. 329

This General Purpose Sprayer with patent Double Agitator is a most complete and serviceable outfit. The tank is made of heavy galvanized iron with a wide bottom so as to set steady in operation. The cover is removable, is held securely in place by two thumb nuts, one on each side, which holds the cover tight and prevents spilling or splashing of the liquid. Holds 7 gallons.

This is an excellent outfit for whitewashing chicken houses, fences and outbuildings. For spraying trees, shrubbery, plants and in fact anything where a small sprayer can be used. This outfit will be found just the thing.

The pump used in this outfit is the same as the No. 324 Sprayer as shown under Fig. 632, fitted with Bordeaux nozzle, brass ball valves, and has jet and dasher agitator.

Complete with Hose, Nozzle, Agitator and Extension Rod.

List Price, \$16.50. Our Special Price, \$13.75.

THE LEVER KNAPSACK SPRAY PUMP

Fig. 547.—No. 330 Galvanized.

Tank holds 5 gallons, is fitted with lid, and strainer, which can be removed. This Pump has lever, large air chamber, ball valves, solid plunger and agitator. Fitted with 5 feet ½-inch hose, pipe extension and Bordeaux spray nozzle; can be graduated from a fine mist to a solid stream, or shut off entirely.

Factory List Price, \$15.00; Our Special Price, \$12.50.

THE PERFECT KNAPSACK SPRAY PUMP

Fig. 547.—No. 331. Copper.

Is the same as No. 330, except tank is constructed entirely of copper. Complete with hose, stop-cock, pipe extension and Bordeaux nozzle.

Factory List Price, \$24.00; Our Special Price, \$20.00.

FOR SPRAYING MATERIALS, SEE PAGES 93 TO 97.

ALWAYS ORDER BY FIGURE AND NUMBER WHERE GIVEN

AUTO SPRAY No. 1

Weight empty, 7 lbs.
Weight loaded, 39 lbs.
Weight shipping, 15 lbs.
A Self-Operating or Automatic Sprayer.

The Auto-Spray No. 1 is one of the best on the market. It is very strong and practical. When properly charged contains three gallons of solution and one gallon of compressed air. Ten to twelve strokes of the plunger will compress the air and two pumpings will empty the entire contents.

All parts which come in contact with solution are made of brass, and the handle and other parts are made of malleable iron.

Length of cylinder, 21 inches; diameter of cylinder, 7 inches; capacity, about 4 gallons; weight, empty, 7 pounds.

Auto-Spray No. 1C — Galvanized Reservoir, Stop Cock. Our Special Price, \$7.00.

AUTO SPRAY No. 40B

Capacity, 8 gallons.
Net eight, 33 pounds.
Shipping weight, 45 pounds.

The Auto-Spray No. 40 B is especially adapted for spraying whitewash, cold-water paint, as well as for spraying trees, garden vegetables, vines and plants.

Correctly designed on mechanical principles, with every unnecessary part eliminated.

The machine is equipped with 8-foot high-grade spray hose, 8-foot iron extension rod, lever shut-off and latest pattern Vermorel Nozzle.

Auto-Spray No. 40B, with 8-gallon galvanized tank equipped as described above.

Our Special Price.....\$18.50

AUTO SPRAY No. 40D

The Auto-Spray No. 40D is mounted on a steel truck, with a 20-inch steel wheel with a broad tire, and is especially adapted for garden, lawn and vineyard work.

The tank is made of heavy galvanized steel with a broad, flat bottom, which rests firmly on the ground while in operation.

Plunger Brass 1½ inches in diameter, 3 to 4½-inch stroke as desired. The plunger operating in connection with the air chamber ensures greater reserve capacity than is usually found in this size machine. Plunger style pump. Graphite packing adjustable from the outside by tightening two bolts. Brass ball valves. Suction pipe fitted with brass strainer. Mechanical agitator operated from the handle.

The top casting on tank has broad flange, which prevents the solution from slopping over.

Equipped with 8 ft. ¾ heavy spray hose, 8 ft. iron extension, lever shut-off and latest pattern Vermorel nozzle.

Repair list, with formula for mixing whitewash and cold-water paint, with each machine.

Price, complete with 12-gallon galvanized-steel tank, \$26.50.

GRITCO-D SPRAY PUMP

This is one of the most convenient outfits for general use. As an all-round utility sprayer it cannot be beaten. It is particularly adapted for both the garden and greenhouse, also for orchard use, as well as for spraying live stock. It is a splendid whitewashing outfit.

SPECIFICATIONS.

Has 1¾ brass cylinder, brass ball valves and seat, brass plunger and special plunger packing, twin paddle agitators, 24-gallon

wood tank with hinged wood top. Metal wheels, 24 in. in diameter, with 2-in. tires. Strong iron axle. Hub-to-hub measurement, 33 in.

Six feet ½-in. discharge hose and Bordeaux nozzle. Shipping weight, 120 lbs. **Price, complete as described, \$30.00.**

“PERFECTION” SPRAYER

Built on the best lines, of high-grade material.

The tanks are made of heavier metal than has ever been used in sprayers of this kind, are lock seamed at the corners to convex heads of metal two gauges heavier than the sides

The pump is 1¾-inch seamless brass tubing with a brass valve, and is sealed into the top of the tank with heavy threads following the construction used in the best makes of fire extinguishers.

The hose is attached to the sprayer at an angle so that it will not kink and become broken

The hose is equipped with a special automatic shut-off nozzle.

All sprayers tested to 60 pounds before leaving factory.

Weight, 9 pounds empty.

**Galvanized Steel \$7.50

GOULD'S "Fruitall" Spray Pump

All Working Parts Bronze.

The Fruitall Sprayer is first-class in every respect. While the simplicity of its design allows it to be sold at a very reasonable price, and although lighter in weight and smaller in capacity than the "Pomona," we offer it as a thoroughly serviceable sprayer. The sprayer is held in place in the barrel by an adjustable clamp at

the top fitting over the end of a stave, and an anchor at the bottom of the barrel. The plunger is packed from the outside, so it is not necessary to take the entire pump apart to repack.

Plunger, 2 inches diameter; stroke, 4 inches.

Gould's Pomona Spray Pump

Plunger—Diameter, 2½ inches; stroke, adjustable to 3, 4, 5 inches; discharge, ½-inch hose.

Outside Packed Plungers. No Leather Packings.

For small orchards of a few acres; a good barrel sprayer that will meet every requirement. The factory has devoted much time to the study of practical barrel sprayers, and it is with the utmost confidence we list the "Pomona" as first in our complete line. All of the working parts are solid bronze.

The pump has a steel air chamber, extending from top of pump to valve chamber, making it easy to get up sufficient pressure to continue spraying for some time after pumping has stopped. It is equipped with a long adjustable handle. The pump may be placed in any length barrel, as the barrel plate is adjustable. The agitator is simple, but very effective.

Gould's Admiral and Vice-Admiral Spray Pumps

Diameter Cylinder, 2½ inches; Suction Hose, 1 in.; Discharge Hose, ½ in.

Double-acting and of sufficient capacity to supply four leads of hose or two leads each of two, three or four nozzles.

Have a removable brass lining, which can be quickly withdrawn by removing cylinder head. The brass piston rod is outside guided, making a perfectly straight thrust through the stuffing box. The bronze valves and bronze seats easily reached for examination. Air chamber is large. There are two discharge openings fitted for ½-inch hose.

GOULD'S "STURDY"

Duplex Power SPRAYER, with Worm Gear for Direct Connection to Engine Shaft

THE "STURDY"

Fig. 1631

1631—With Flexible Coupling.

The Gould's new "Sturdy" is a high-grade, two-cylinder, single-acting power spray pump, provided with a worm gear so it can be coupled directly to the engine shaft. No jack or extra gearing is necessary.

The gear ratio is 8½ to 1, and the pump is, therefore, suitable for direct connection to engines with speeds of 400 to 600 revolutions per minute. At 50 revolutions per minute the pump has a capacity of 3.40 gallons per minute; at 60 revolutions, 4 gallons, and at 75 revolutions, 5 gallons per minute. It is good for pressures up to 250 pounds. The plungers are heavy drawn brass tubing, outside packed. They are 2 inches in diameter, with a stroke of 2½ inches. The connecting rods are malleable iron. The shaft is steel, and a steel ball thrust bearing is provided to take up the end thrust. The valves and bevel seats are cast bronze. The suction is for 1-inch pipe or hose and the discharges are for ¾- or ½-in. hose.

All gears are completely enclosed, thus reducing danger of breakage and preventing wear from foreign particles. The air chamber is large, enabling a uniform high pressure to be maintained, and is cored to allow the driving shaft to extend through far enough to operate an agitator. The agitator can be either direct connected or driven by chain and sprocket. The crank pins are extended through the connecting rods to allow for operating a reciprocating agitator. A special flexible coupling is furnished with the pump for connection to the engine. This allows the pump to be operated even when it is not in perfect alignment with the engine shaft. The cylinders and valve boxes are cast separate, making replacements easy whenever repairs are necessary. The valve box covers are held in place by a single bolt, making the valves easily accessible. A drain plug is located at the base to permit the pump to be cleaned out occasionally, and to be drained when not in use. The pump is very compact; the width over all is 14½ inches; the height 19¾ inches, and the length to the end of the shaft is 18½ inches.

DOUBLE-ACTING SPRAY PUMP MOUNTED ON SKIDS

The general construction of this Spray Pump Outfit cannot be too highly commended. This desirable outfit meets the demand for a pump that can be used in a wagon or cart. It cannot upset. One of the most desirable outfits on the market.

Outfit A—Pump, complete, 50-gal. barrel mounted on skids, with pressure gauge; one 15-ft. lead $\frac{1}{2}$ -in. discharge hose, 8-ft. pipe extension with lever shut-off, spray nozzle and mechanical agitator.

Price, \$53.00.

Outfit B—Pump, complete, 50-gal. barrel mounted on skids, with pressure gauge; two 15-ft. leads of $\frac{1}{2}$ -in. discharge hose, 8-ft. pipe extension with lever shut-off, spray nozzles and mechanical agitator.

Price\$60.00

BRASS BARRELL SPRAY PUMP

Cylinder Valves, Valve Seats and Discharges, All Brass.

The above prices include Paddle Agitator.

ROTARY AGITATOR

Made for Spray Tanks, either chain or belt-driven.

This Rotary Agitator is made similar to propellers used to drive motor boats, consisting of a steel shaft running lengthwise of the tank, fitted with two rotary blades, which drive the mixture in opposite directions, thus causing a thorough agitation of the material.

Fig. 1598 illustrates the Agitator as made to be driven by sprocket chain direct from the engine.....\$13.50

Fig. 1558 illustrates the Agitator as made to be driven by means of a belt\$13.50

SPRAYING TANK

We are having our Spray Tanks made of $1\frac{1}{2}$ -inch clear pine, which has proven to be the best material for this purpose. The tanks are gripped with steel rods.

Style No. 2—Weight, 175 lbs.; capacity, 150 gallons; dimensions, 4 feet long, 3 feet wide, 2 feet 6 inches high.

Price, complete with Bolsters, \$20.00.

Other sizes quoted on application.

GOULD'S FIELD CROP SPRAYER

Used in connection with any Hand or Power Spray Pumps

The best and cheapest crop sprayer on the market. Easily attached to tail-board of a wagon, and when not in use can be folded into small space. It is made to spray four or six rows, any distance apart, up to 44 inches, or cover a space $14\frac{1}{2}$ or 22 feet in width. Connection allows sprayer to be easily raised or lowered; spray to be thrown forward, backward, up or down.

Figure 1322.

Complete with four "Mistry, Jr." Nozzles and coupling for connecting to discharge hose of any barrel or power sprayer. List Price, \$28.00; Our Special Price, \$17.50.

Same, with 6 "Mistry, Jr." Nozzles. List Price, \$35.20; Our Special Price, \$22.00.

Connection which clamps to wagon. It is adjustable to any height.

This illustration shows the crop-spraying attachment attached to a wagon. The above prices do not include the sprayer.

AUTO-SPRAY No. 39

ONE HORSE

FOUR ROW FIELD SPRAYER

CAPACITY 50 GALLONS

The Auto-Spray No. 39 is the result of our 13 years of careful study and experience in manufacturing traction sprayers. It was designed to meet the requirements of the most particular growers of field crops, nursery stock, grapes, etc.

We guarantee this machine with 4 nozzles, large aperture, .081 inches in diameter, to maintain a pressure of not less than 150 lbs., or with 8 nozzles, holes in apertures .059 inches in diameter, a pressure of 100 lbs. or better.

The pump on the Auto-Spray No. 39 is driven by a short chain directly connected from the axle and is geared so that there is little draft from the operation of pumping.

By a convenient clutch arrangement this pump may be thrown out of gear with the wheels so that the machine may be drawn without working the pump and this also enables the operator to manipulate the pump with the hand lever while spraying trees.

IN DETAIL

Axle—Cold rolled steel, 1¾-inch diameter. Tracks two rows. Wheels adjustable on the axle for various widths.

Wheels—4 feet diameter, 3-inch tire.

Pump—Double cylinder. Plunger style. Brass plungers, 2½-inch diameter.

Packing—Graphite composition, packed from the outside. Adjustable without withdrawing the plunger by simply screwing two nuts over the gland.

Valves—Brass check. Broad brass seats. Set in pump manifold. Can be easily ground or replaced.

Agitator—Revolving twin paddles.

Tank—50-gallon, new barrel, or as ordered. An extra charge will be made for 100-gallon tank.

Air Chamber—Large capacity, tested under high pressure.

Nozzles—Non-Clog Junior Nozzles or as specified. Nozzles on field attachment adjustable to correspond with track.

For barrel, 1 horse; for 100-gallon tank 2 horses are advisable.

Spray Boom may be raised or lowered on the two uprights. Each machine has a perfect valve control and is equipped ready for going to work.

SHIPPING WEIGHT—700 lbs.

Auto-Spray No. 39A—Complete for 4 rows, 4 nozzles, iron piping, 50-gallon barrel, spray boom A..... **\$156.00**

Fig. 409

GRIFFITH & TURNER POWER SPRAYER

The Best that Can be Built

This outfit consists of our Fig. 1631 "Sturdy" Power Sprayer, described on page 83, and a 150-gallon tank of 1½-inch clear cypress, mounted on 4-inch steel channels. The Fig. 1631 spray pump is fitted with our special flexible coupling so that it can be direct-connected to any of the small farm engines. The pump is mounted on a ¼-inch steel plate platform which is sufficiently large to accommodate the engine.

The cypress tank is built of tongued and grooved staves which are rounded both inside and out. The top of the tank is fitted with angle iron corners. The tank has an agitator of the propeller type which is operated by chain and sprocket from the pump shaft.

The engine cab is mounted on an angle iron frame and has sliding doors which can be pulled forward to enclose the engine.

The outfit is furnished without engine, so that in case the fruit grower already has an engine he can utilize it in connection with this outfit. Where an engine is wanted with the outfit we can furnish same, and would be pleased to quote prices. Engine can be connected up and disconnected by inexperienced help.

Overall length of rig is 8 feet. Tank is 4 feet in length with height of 30 inches.

Outfit	Description	Weight Lbs.	Our Special Price	Outfit	Description	Weight Lbs.	Our Special Price

MISTRY JR. NOZZLE THE BEST NOZZLE YET.

The Misty Jr. Nozzle is made in both Aluminum and Brass with hardened tool steel disks in discharge cap. The steel disks can be inserted without the least trouble.

This nozzle has been tested under all conditions, and found to give entire satisfaction. It produces a perfect mist and covers a wide area. **This nozzle is in our opinion the best that can be had.** Brass, with extra steel disk.....\$1.00 Aluminum, with extra steel disk.... 1.00

Can also supply these nozzles with 45-degree angle. Same prices as above.

Extra Steel Disks for Mistry, Jr., Nozzle 5c.
 Extra Caps for Mistry, Jr., Nozzle 30c.

No. 65 "VAPOR" BOTTLE SPRAYER

MADE ENTIRELY OF BRASS WITH BRASS VALVES.

The "Vapor" Sprayer consists of a seamless brass tube, working inside of an outer brass tube. The valves are of brass with no parts to wear out. It is made to fit any ordinary bottle, such as is found in every household, and is attached by simply setting in the bottle, as you would a cork; in fact the outer tube is provided with a cork, as shown in the illustration, which fits the opening of the bottle snug, making the Sprayer rigid.

The Sprayer is operated with great ease, with the finger through the loop-hole as shown, and throws a most powerful spray, as fine as a mist; in fact as fine as the steam coming from a tea-kettle.

It is adapted for all kinds of spraying purposes, and cannot be excelled for spraying disinfectants in hospitals, schools, county buildings, etc., for spraying tobacco plants, cigar wrappers, plants about the house, flower beds, shrubbery, also for disinfecting stables, poultry houses, and for sprinkling clothes, in fact for a variety of purposes.

The nozzle is adjustable for fine or coarse spray. The Sprayer being made entirely of brass, there are no parts to rust out if used with strong solutions.

The "Vapor" Sprayer is nicely nickel plated, making it attractive, and is easily operated by man, woman or child.

OUR SPECIAL PRICE \$1.50 (post-paid to any address).

SPRAY PUMP ACCESSORIES

BORDEAUX NOZZLE

The Bordeaux Nozzle can be readily changed from a solid stream to a mist-like, fan-shaped spray. Should there be any clogging of the nozzles with the spray material, it is easily remedied by turning the handle.

An excellent nozzle for white-washing.

HOSE COUPLING

Fig. 504.

These Hose Couplings are made from brass, thoroughly machined, and are in perfect shape. The $\frac{3}{4}$ -inch are made from spun brass, and are very light and neat, assuring a large flow of water, as the opening is not reduced.

RUBBER HOSE

GARDEN HOSE

Our brands of Hose are all made up to our order, experience having taught us that High-Grade Hose is the cheaper. Low-Grade Hose will not give satisfaction.

These brands of Hose are guaranteed to be as represented, and have given our trade satisfaction for years.

Per Ft.

ORIOLE. —5-ply, $\frac{3}{4}$ -in., in 25 and 50-foot lengths (75 lbs. pressure).....	\$0.18
GRIFFITH & TURNER CO.'S EXTRA. —3-ply, $\frac{3}{4}$ -in., in 25 and 50-foot lengths (80 pounds pressure).....	.21
GRIFFITH. —6-ply, $\frac{3}{4}$ -in., in 25 and 50-foot lengths (125 pounds pressure).....	.22
CREST. —4-ply, $\frac{3}{4}$ -in., in 25 and 50-foot lengths (125 pounds pressure).....	.23
$\frac{3}{4}$ Hose comes in 25 and 50-foot lengths, coupled. We cannot cut other lengths.	

MOULDED GARDEN HOSE

GRITCO CONTINUOUS LENGTH STEAMLESS HOSE

The construction of this Hose is entirely different from regular Hose. Over a seamless tube of high-grade rubber is braided two plies of tightly twisted cotton yarn.

Between each ply is placed a distinct layer of high-grade rubber.

The Hose is protected by a cover made of rubber specially compounded. It is vulcanized in patented moulds under very high pressure.

This Hose is manufactured in continuous lengths up to five hundred feet.

$\frac{3}{4}$ -inch, per ft., not coupled, 24c.; coupled, 25c.

HOSE FOR SPRAY PUMPS

We do not recommend a cheap Hose for spray work. Large sprayers handling a high pressure should use our No. 2, $\frac{1}{2}$ -inch spray hose. This Hose is made especially for this work. It is extra strong and is wire wound, adding to its strength, and insuring long life, as the wire also protects it from rough usage.

The No. 1, $\frac{1}{2}$ -inch Spray Hose will be found satisfactory for the various hand pumps.

Spray hose is made especially for spray pumps, being so constructed that spraying solutions have the least possible effect on them.

WHEELBARROW
LEAF-RACK
ATTACHMENT

Can be attached to any style or size wheelbarrow with removable sides. Most convenient for gathering leaves, cut grass and rubbish. One of these attachments should be in use on every small suburban place, as well as the larger estates. Capacity, 10 bushels; made of galvanized wire, bolted to a wooden base. List Price, \$10.00; Our Special Price, \$6.00

BALTIMORE
LAWN
AND STREET
SPRINKLER

LIST, \$200.00
RETAIL, \$120.00

Parks, Cemeteries and Country Places having a considerable amount of Roadway, Walks and Lawns will find that the Baltimore Lawn and Street Sprinkler will greatly improve their condition. For this purpose our Sprinkler will meet every requirement. It may also be used for carrying water and other purposes.

It is a substantial and well-made Sprinkler in every respect. Driver can operate it from the seat.

Capacity About 160 Gallons.

BALTIMORE PUSH CART

For the merchant, printer, farmer, etc., to have one of these carts on his premises it will be found a most useful vehicle. There are so many purposes for which they can be employed—carrying bundles, printers' forms, farmers' tools and light implements, etc. It is never out of place, and always ready to pick up at short notice. They are nicely finished; higher wheels, better ironed and altogether superior to anything of its kind on the market. There is now an immense demand for these carts, but notwithstanding we have placed the price low.

TRIUMPH CART No. 2

The great convenience of a three wheel cart will be appreciated, when you realize that the weight is all upon the ground and none on the party pushing it. This cart is especially designed for convenience. It is nicely made, the body is finished in green nicely striped and varnished, the gear is finished in red.

It is just the thing for printers, grocery stores, factories, and in fact its many uses would be hard to enumerate.

The frame work is made from hard wood, bolted together, the bodies are large, giving ample room for a large load. In the construction of Triumph carts we use on each corner of the box a hard wood post to support side panels, all other bracing being of steel. Both side panels are bound with steel at top and bottom, and each end panel has steel band at top.

No. 2 TRIUMPH

Box 22 x 42 x 9 1/2 inches. Capacity 600 lbs.
30-inch wheels 3/16-inch spokes Weight 103 lbs.
Our Special Price.....\$16.75

TRIUMPH CART No. 3TG3

Triumph Cart No. 3TG3 is built to meet the demand for a high-grade cart at a reasonable price.

The bottom is a substantial framework of hard wood, side and end sills bolted at all four corners, two extra hardwood center sills, full length, giving added support to floor and front wheel brackets.

The gear equipment including Springs, Axles and Wheels are of sufficient strength and rigidity to stand the wear and tear so often placed upon a hand vehicle. The springs are fastened at one end while the opposite end is allowed to play back and forth in two steel spring slides. The axle is made of very hard steel. Front wheel is supported by two wheel brackets of one piece forged construction and further supported by two extra steel braces which extend fourteen inches back on the center sills, and the whole fastened with six bolts. Wheels are of the very best construction with solid malleable iron hubs and electrically welded rims.

No. 3TG3

Box 24 x 42 x 10 1/2 inches

EXPORT CART No. 1

This cart is built especially for country use, where there are not any pavements, and a three wheel cart is not necessary. In the construction it is just as high-grade as other carts listed and will be found a very useful addition on every place. The running gear is made of steel, the wheels are of the bicycle pattern, steel spokes, electrically welded tires and malleable hub, this construction gives the greatest strength.

The springs are so constructed and arranged as to carry the load in a way that makes the cart easy to push.

Body is finished in green, nicely striped and varnished. The gear is finished in red.

No. 1 Export

BUTLER STEEL HAND CART

THE BEST GENERAL UTILITY CART BUILT

Every farm, orchard, dairy, and stock barn can use it to the best advantage. Fills the bill admirably for use on golf courses, large lawns, in the factory and for light delivery purposes. A number of large cities use the Butler Hand Cart for street cleaning purposes, by equipping it with a large can or bag holder.

The "Butler" is the original low platform cart, and used more extensively than all others. The one-piece steel frame, and the patented solid steel axle extending entirely under the body give strength and solidity to the cart. Will carry a weight of 500 lbs.

SPECIFICATIONS

WHEELS—Steel, 36 inches high with removable boxings, electric welded spokes. WIDTH—Between wheels, 32 inches; from out to out hub, 40 inches. AXLE AND FRAME PARTS Steel. Will easily sustain a load of 500 lbs. Axle one piece entirely under platform. Bottom of cart 6 inches above ground. PLATFORM—Hard wood 27x31 inches. SIDE BOARDS—Hard wood, instantly removable. PAINTING—Body Red, neatly striped; wheels green. Our Special Price, \$16.00.

It will pay you to use this insecticide in green-houses and on potted plants.

This insecticide destroys insects in poultry-houses and homes.

LEMON OIL COMPANY'S STANDARD

Soluble

INSECTICIDE in Water

NO DISAGREEABLE ODOR.

Guaranteed by the Lemon Oil Company under the Insecticide Act of 1910. Serial No. 321.

NO POISON

THIS INSECTICIDE

is death to pests—is safe to plants—is harmless to user—is low in price—is free from disagreeable odor.

We recommend Lemon Oil Co.'s Standard Insecticide. It is used by the most prominent florists and seedsmen to destroy Scale, Mealy Bug, Rust, Aphis, Caterpillar, etc., on Palms, Rose Bushes, Rubber Plants, Ferns, etc. It leaves no disagreeable odor on blooms or foliage—advantages over the vile-smelling soaps and powders—especially for indoor use. Being Poisonless, it is not dangerous to use.

This will be found an excellent wash for dogs and other animals; it relieves Mange, destroys Lice and other insects, and gives the coat a beautiful glossy appearance. Contains no poison to injure the animal, and being liquid, gets through the hair to the hide.

It will destroy Lice and other insects in poultry houses.

It will also kill Roaches, Ants and other insects that infest houses.

DIRECTIONS FOR USE:

For Mealy Bug.— $\frac{1}{2}$ pint Standard Insecticide to 4 to 6 quarts of luke-warm water or 1 tablespoonful to 2 cups of luke-warm water. When dipping for this insect the plants should remain in the liquid from 10 to 15 seconds and kept in continual motion. When syringing use the finest sprayer and apply the liquid with force.

For Brown and White Scale on Palms, Rubber Plants, etc.— $\frac{1}{2}$ pint Standard Insecticide to 4 quarts warm water or 1 tablespoonful to 2 cups warm water, applying with sprayer or sponge.

For Thrip, Red Spider, Caterpillar, Black and Green Fly.— $\frac{1}{2}$ pint Standard Insecticide to 2 or 3 gallons water or 1 tablespoonful to 3 or 4 cups water. Either spray or dip.

For Destroying Mites.— $\frac{1}{2}$ pint Standard Insecticide to 4 or 6 quarts of water. Water the plants with the liquid 2 or 3 times at intervals of 6 days.

For Destroying Ants.— $\frac{1}{2}$ pint Standard Insecticide to 1 gallon water. Well water their nests and runs several times in the course of a few days.

For Destroying Fleas, Insects, Relieving Mange and Skin Diseases on Dogs and Other Animals.—1 tablespoonful of Standard Insecticide to 1 cup warm water; rub well into the hide, letting lather remain a few minutes.

For Destroying Lice and Other Insects in Poultry Houses.—1 part Standard Insecticide to 10 parts water.

For Destroying Roaches, Ants and Other Insects in Houses.—1 part Standard Insecticide to 5 parts water.

POISON

KIL-WEED

POISON

NOT TO BE USED ON LAWNS

A SCIENTIFIC WEED DESTROYER. FREE FROM ODOR.

By Analysis it Has Been Found There is no Stronger Weed Killer on the Market.

An unsurpassed preparation for the removal of grass, weeds, vines and bushes from paths, roadways, gutters, streets and any other place from which it is desired to remove any and all vegetable growths, thus destroying the breeding ground for mosquitoes. The work can be done in a speedy, thorough, economical and easy manner. The material has no bad effect on the ground, neither does it injure or discolor the brick, stone or marble curbing.

No more digging and disfiguring of paths and roadways. Saves expense of several men. KIL-WEED not only kills weeds, but destroys seed germs and roots of plants. Can be used with an ordinary sprinkling can. One gallon KIL-WEED will make 30 to 35 gallons treating liquid when mixed with water. One man with a sprinkling can in one hour can do as much or more than six men could in one-half day, and do the work better.

Judgment should be exercised in using KIL-WEED, as it is impossible to give full directions to suit every case. If the weeds are large and strong the solution should be made stronger than for ordinary grass and weeds. They should be cut down so that the solution can reach the roots.

Bluestone (or Copper Sulphate)

The Bluestone market fluctuates, and we are therefore unable to put prices in catalogue. Will name best possible prices on application.

ALL PRICES IN CATALOG SUBJECT TO CHANGE WITHOUT NOTICE.

LIME-SULPHUR SOLUTION

The universally accepted spray material for dormant use is lime sulphur solution. Chemically made lime sulphur solution has now almost entirely supplanted the home-made solution because it is better.

This material combines the great fungicidal properties of sulphur with the scale remedy, and is specially recommended for peach and plum trees which need the combined treatment in the fall and spring. In spraying this material care should be exercised to avoid getting it in the eyes, and gloves should be worn to protect the hands.

Lime-Sulphur Solution is used both as an insecticide and a fungicide. As an insecticide it is used principally against scale insects, especially the San Jose Scale. For scale insects it is applied while the trees are dormant and is diluted with 8 or 9 parts of water. As a fungicide it is used chiefly for the control of apple scab, 1½ gallons to 50 gallons of water. Lime-Sulphur may be used in combination with arsenate of lead and tobacco extracts. Paris Green should not be used with Lime-Sulphur.

PRICES:

B. T. S.

This is a trade name or designation for a definite chemical combination of sulphur with the mineral barium, instead of the mineral lime. In this combination practically all the sulphur is available as an insecticide and fungicide in its most active form.

By the use of barium in the place of lime it is not only possible to obtain the highest efficiency of the sulphur, but also to obtain a dry crystalline product that reduces the bulk in shipping about 75%, thus saving freight and reducing losses from leakage and waste.

Results of Spraying with B. T. S.—Experiments prove it to be equal to lime-sulphur solution, both as an insecticide and as a fungicide.

Directions. For dormant spraying to control scale, etc., use 12 pounds to 50 gallons of water. For growing period spraying on apples to control scab, etc., use 1½ to 2 pounds to 50 gallons of water.

Persian Insect Powder or Buhach

Price: ¼-pound, 30c. Pound \$1.00

DRY—Blow on with a bellows or gun.

SOLUTION—Dissolve one ounce to three gallons of water, and apply with syringe or pump.

KEROSENE EMULSION (Liquid)

Kerosene Emulsion is an efficient contact insecticide, especially valuable against plant lice and similar soft-bodied insects. It may be used for practically all the sucking insects, where it is necessary to use a contact killer. It is especially effective for Woolly Aphis on apples. For this spraying, considerable pressure on the pump should be maintained. For the root-infesting form, soak the ground around the trees after first removing the soil to the depth of two or three inches. After having applied the solution, replace the dirt.

Directions—One part Kerosene Emulsion to from four to fifteen parts of water.

ARSENATE OF LEAD

Arsenate of Lead is an arsenical poison for use against insects that chew and for such insects as the fruit-flies that lap and suck up sweetened liquids. It has also been shown to have considerable fungicidal value both when used alone or used in combination with lime-sulphur.

Arsenate of Lead is prepared in two forms: paste and powder. When the powdered form is used, only half the quantity by weight is required. Both the paste and powdered form can be used in liquid sprays. The powdered form is also used for dusting.

The principal insects for which Arsenate of Lead is used are: apple-maggot, brown-tail moth, bud-moth, cankerworm, codling moth, fruit-tree leaf-roller, gipsy moth, tent caterpillar, pear slug, curculio, etc. **Directions:** 2 to 3 lbs. paste to 50 gallons of water.

Paste Form.

100-lb. pkg., per lb.....	43c.

ARSENITE OF ZINC (Powder)

Arsenite of Zinc.—This is a combination of arsenic with zinc to form a quick acting, adhesive insecticide for use on potatoes and some other truck crops. It is much more adhesive and less caustic than Paris Green and kills quicker than Arsenate of Lead.

The great advantages of Arsenite of Zinc are:

First—It kills the bugs so quickly they do not have a chance to cause serious injury to vines.

Second—It sticks to the vines so that it is not necessary to respray after every rain.

Third—It can be used at sufficient strength to insure results without burning or injuring the vines.

DIRECTIONS:

First—Apply as soon as eggs begin to hatch. For spraying use at rate of two pounds to the acre—this may require one or two pounds or more of the powder to fifty gallons of water depending upon the quantity of liquid distributed per acre by the spraying outfit. The spray tank should be partly filled with water and the powder sifted in slowly while the agitator is running.

Second—Make second application ten days to two weeks later in order to cover new growth.

Third—Make third application ten days to two weeks after second.

1-lb. pkg., per lb.....	60c.	25-lb. pkg., per lb.....	48c.

ATOMIC SULPHUR

This is pure sulphur treated by a special process to convert it into a very finely divided state in the form of paste, so it can be readily diluted with water and applied as a spray to coat fruit and foliage with a thin film of sulphur to prevent germination of fungous spores.

It is recommended for the control of scab on peaches, brown rot on peaches, plums and cherries and cedar rust on apples. **Directions:** 5 to 7 lbs. to 50 gallons of water.

1-lb. pkg., per lb.....	25c.	50-lb. pkg., per lb.....	14c.

(Bordeaux Arsenate of Lead (Paste)

This is a combination of Bordeaux Mixture and Arsenate of Lead, and is especially recommended for all spraying operations where it is desired to combine an insecticide for eating insects and a fungicide treatment in one spraying.

This combination is specially recommended where it is desired to include the Bordeaux treatment with the spraying for codling moth, also used for scab, cankerworm, case-bearer, bud-moth and for general use on garden vegetables and grape vines to kill leaf-eating insects and control fungous diseases. **Directions:** 6 to 8 pounds to 50 gallons water.

1-lb. pkg., per lb.....	32c.	50-lb. pkg., per lb.....	22c.
5-lb. pkg., per lb.....	30c.	100-lb. pkg., per lb.....	21c.
10-lb. pkg., per lb.....	27c.	300-lb. pkg., per lb.....	20c.
25-lb. pkg., per lb.....	25c.		

Bordeaux Arsenite of Zinc (Paste)

This is a combination of Bordeaux Mixture and Arsenite of Zinc. This combination makes a quick-acting poison for spraying where an insecticide is needed in combination with a fungicide. It is especially recommended for potato and tomato spraying. It is quick in action, very adhesive and will not burn the plant. **Directions:** 6 to 8 pounds to 50 gallons of water.

1-lb. pkg., per lb.....	40c.	50-lb. pkg., per lb.....	30c.
5-lb. pkg., per lb.....	36c.	100-lb. pkg., per lb.....	28c.
10-lb. pkg., per lb.....	35c.	300-lb. pkg., per lb.....	27c.
25-lb. pkg., per lb.....	31c.		

BORDEAUX MIXTURE (Paste)

Bordeaux Mixture is a combination of copper sulphate and lime. It is a standard fungicide and may be used in combination with insecticides. Its use is indispensable in the control of black rot of grapes and the blight of potatoes. It is also used for apple-scab, bitter-rot, cedar rust, leaf spot and downy mildew. **Directions:** 8 to 10 pounds to 50 gallons of water.

1-lb. pkg., per lb.....	35c.	50-lb. pkg., per lb.....	24c.
5-lb. pkg., per lb.....	30c.	100-lb. pkg., per lb.....	23c.
10-lb. pkg., per lb.....	27c.	Barrels, 300 lbs., per lb.	20c.
25-lb. pkg., per lb.....	25c.		

BORDEAUX MIXTURE (Powder)

This powder is used for the same purposes as the paste, and can be used either for dusting or in solution for spraying. It is especially recommended for potatoes and tomatoes.

1-lb. pkg., per lb.....	45c.	5-lb. pkg., per lb.....	40c.
-------------------------	------	-------------------------	------

Larger sizes quoted on application.

BORDEAUX MIXTURE AND PARIS GREEN (Powder)

A combination of Bordeaux Mixture and Paris Green. A very quick-acting poison for use on potatoes and tomatoes, as well as other crops. It not only kills the bugs but at the same time defends against blight. It can either be used as a spray or for dusting.

“SCALECIDE”

EVERY FRUIT GROWER KNOWS AS THE GREAT SCALE KILLER

but many have not yet learned of
its greater value in the control of

FUNGIOUS DISEASES

THE YEARLY APPLICATION OF “SCALECIDE” WITH FUNGICIDE

as a dormant or scale spray, either fall or early spring, will destroy the blight cankers that produce twig or fire blight.

Will stop the progress of collar rot or blight and the wounds will start to heal.

Will control all forms of scale—San Jose Scale, Lecanium or Terrapin Scale, Oyster Shell and Scurfy Scale—Pear Psylla, Leaf Roller, Bud Moth, Case-bearer, and Aphid, as well as fungous troubles controllable by a dormant spray.

In fact, do everything that any other dormant spray or combination of sprays will do, and—**COSTS NO MORE**

1-quart can	\$.60	10-gallon can	\$11.00
1-gallon can	1.45	30-gallon barrel	27.00
5-gallon can	6.45	50-gallon barrel	39.50

“CORONA DRY”

PATENT ARSENATE OF LEAD.

One pound of “Corona Dry” will do the work of three pounds of Paste Arsenate and do it better.

But economy is not everything. Efficiency is more important. What would it mean to you to have a spray mixture of standard strength and be absolutely sure that all of one spraying or of many sprayings was absolutely the same strength? Evaporation, difficulty of perfect mixing, make this impossible with a paste arsenate. You can have a standard efficiency if you use Corona Dry.

REMEMBER, “CORONA DRY” MEANS NO GUESSWORK, BUT A STANDARDIZED SPRAY IN WHICH THE MIXTURE IS ALWAYS THE SAME STRENGTH AND EFFICIENCY.

“BLACK LEAF 40”

Nicotine Sulphate—40% Nicotine

This is the insecticide that is so highly recommended by Experiment Stations. It destroys Aphis (plant lice), Thrips, Leaf-hoppers on all tree, bush and vine fruits, vegetables, field crops, flowers and shrubs; also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects—all without injury to foliage.

May be combined with other sprays. Highly concentrated. Soluble in water—easy to mix—does not clog nozzles.

You can not go wrong by ordering “Black Leaf 40” for sucking insects.

PRICES:

1 oz.—\$0.25—makes 6 gallons spray	
½ lb.—0.75— “ 40 to 120 gals. spray

INSECTICIDES—Continued

"PYROX"

**Kills Insects
Prevents Fungus
and Diseases**

Apple growers swear by PYROX chiefly because they find it brings better fruit and more of it. But there are other advantages that appeal to you, too.

PYROX doesn't wash off—it sticks through the heaviest storm—and you know how often fungus diseases get their start in rainy weather. PYROX is easy to handle—a smooth, creamy paste that's all ready to use when simply mixed with cold water. Goes further because you can spray it in a fine fog, covering the surface with a thin film of complete protection. PYROX saves both labor and money.

PYROX MEANS PRIZE POTATOES

Insure your potato crop against potato bugs, flea beetles and blight by spraying—in time—with PYROX, 1 pound to 5 gallons of water. Then you are safe against pest-losses. You will get bigger potatoes and more of them, too, for PYROX stimulates the plant, giving the leaves that rich, green color which means maximum starch formation. And more starch means more and heavier tubers. Nineteen years of use by this country's best potato growers have proved that, without PYROX, you can't get the greatest returns from your soil, no matter how carefully you prepare and fertilize it. PYROX is the cheapest spray to use, too—the increased yield and quality soon pay for it besides giving you a good profit.

FOR OTHER VEGETABLES.

Growers of tomatoes, sweet potatoes, eggplant, cabbage and other vegetables find that PYROX is as invaluable a profit-builder for them as for potato growers. And for the same reasons. PYROX safeguards the plants against chewing insects, prevents rots and blights and nourishes the leaves—the lungs of the plant. Better crops and better-selling vegetables are the natural result.

NICO-FUME

Nico-Fume is a Tobacco Paper insecticide for fumigating greenhouses. Extensively used by prominent florists. **Very easy to apply.** Prices: 24 sheets, 85c.; 144 sheets, \$4.00, and 288 sheets, \$7.50. Directions on each package.

NIKOTEEN

Is the most powerful known insecticide and will be found more economical and convenient than weak tobacco extracts. Price: Pint cans, \$1.50; 5-pint cans, \$7.00.

VAPORIZING PANS (for above)\$.60
IRONS60
3 PANS, 3 IRONS and 1 HOOK3.50

APHIS PUNK (Nikoteen)

Especially designed for use in private places and in houses without convenient furnaces for heating irons necessary for vaporizing Nikoteen or Tobacco Extract. It is very effective as an insecticide. The Punk is lighted with a match and allowed to burn, which is done without flaming, at the same time giving off dense white fumes of Nikoteen that kill aphids and thrip very effectively. Per box, 60c.; per 12 boxes, \$6.50.

TOBACCO SOAP

Sulpho-Tobacco Soap is a powerful agent for the destruction of all bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Destroys cabbage-, squash- and potato-bugs, currant worms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit trees and vines.

3-oz. cake makes 1½ gallons prepared solution, 10c. Mailed, postpaid, for 13c.
8-oz. cake makes 4 gallons prepared solution, 20c. Mailed, postpaid, for 25c.

10-lb. cake makes 80 gallons prepared solution. By express, \$3.00.

TOBACCO STEMS

Indispensable for fumigating greenhouses and conservatories for the destruction of green and black aphids and other insects.

Dampen thoroughly a few hours before using, place about a half-pound over a handful of shavings in a fumigator, and light. 50-pound bale, 5c. pound.

TOBACCO DUST

For green and black aphids, fleas, beetles, etc. Splendid fertilizer and preventative for insects in the ground and around roots. For insects on plants apply with powder duster or bellows. For worms or grubs in the soil, apply liberally to the surface and rake in, or strew thickly in the drills before planting.

Price: 5 pounds, 30c.; 20 pounds, \$1.00; 100 pounds, \$4.50.

FUMIGATORS

Made from heavy galvanized iron. In demand for fumigating greenhouses with tobacco stems and tobacco dust. If the greenhouse is larger than the capacity of one of the fumigators, one should be placed at either end of the house. Being made from heavy galvanized iron, there is not any danger from fire.

No. 2—Height, 16 inches. For a house 12x40 feet. Price.....\$3.75

No. 3—Height, 20 inches. For a house 15x100 feet. Price.....4.50

SPRAY CALENDAR

WHAT TO SPRAY	FOR WHAT TO SPRAY	WITH WHAT TO SPRAY	WHEN TO SPRAY			REMARKS AND CAUTION
			First Spraying	Second Spraying	Third Spraying	
Apple	Codling Moth	Arsenates in Bordeaux or arsenate of lead 3 lbs. to 50 gals.	As soon as blossoms fall	7 to 10 days later	30 days later	Later spraying if made should be made with diluted solutions
	San Jose Scale	Lime-Sulphur	Late in fall, late in winter or early in spring			Use Lime-Sulphur only when trees are dormant
	Scab	Bordeaux Mixture	Just before blossoms open	Within a week after blossoms have dropped.	Same 7 to 10 days later	The spray just before blossoms open is very essential for scab
	Woolly Aphis	Kerosene Emulsion	When trees are in full leaf	In fall		Don't use strong emulsion when trees are in full leaf
Asparagus	Asparagus rust	Bordeaux	After cutting crop	10 days later	10 days later	Repeat 3 to 4 times. Burn rusted brush in the fall.
Bean	Anthracnose	Bordeaux	On 2 or 3-inch plants	10 days later	After blossoms	
Cabbage and Cauliflower...	Cabbage Worm	Pyrethrum	With first appearance of worms	Whenever worms are observed	Same	1 oz. to 30 gals. of water
Cherry	Rot	Bordeaux	Before blossoming	After blossoming drop on fruit	Two weeks later on fruit	When fruit is large
	Curculio	Arsenate of lead	Before blossoming	As blossoms dry up	One week later	Avoid strong solutions. Do not use other arsenicals than arsenate of lead
Cucumber	Cucumber Beetle	Arsenate of lead in Bordeaux	Soon as plants appear	Week later	Week after second	Week after fourth
Currant	San Jose Scale	Lime-Sulphur	As with apple	In spring as with apple		
	Worm	White Hellebore	When worms first appear	Repeat in 3 or 4 days	Repeat as second	Look for worms on under side of leaves first
Gooseberry	Mildew	Bordeaux	Before blossoms open	After blossoming	Two weeks later	
	Worm	White Hellebore	As on Currants			
Grape	Anthracnose	Bordeaux	Just before buds open	Just before blossoming	Just after fruit has set	
	Downy and Powdery Mildew and Rot	Bordeaux	Just before blossoming	Just after fruit has set	7 to 10 days later	Follow by two or three sprayings
Peach	Leaf Curl	Bordeaux	In fall or spring	As buds are opening	Just after calyx drops	
	Rot and Scab	Bordeaux	As buds are swelling	Just after calyxes drop	2 to 3 weeks later	Destroy all mummies
	Bud Moth	Arsenates in Bordeaux	With opening of buds			Use only half usual amount of poison
	San Jose Scale	Lime-Sulphur	In late fall or early spring			
Pear	Scab	Bordeaux	When leaves are half grown	After blossoms drop		
	Codling Moth	Arsenates in Bordeaux	As with Apple	Same as first		See Apple
	San Jose Scale	Lime-Sulphur	In fall or early spring			
Plum	Rot	Bordeaux	As buds are swelling	Just after calyx drops	3 or 4 weeks later	Repeat every 7 or 10 days
	Curculio	Arsenate of lead in Bordeaux	With starting of buds	Just after calyx drops	5 days later	Destroy all mummies
Potato	San Jose Scale	Lime-Sulphur	In late fall or early spring			Jar, gather and destroy curculios and stung plums
	Early Blight	Bordeaux	When plants are 6 inches high	Two weeks later	Two weeks later	
	Scab	Soak seed in Arsenites alone or in Bordeaux	Corrosive sublimate	Solution (2 oz.) As for first	In 16 gallons	90 minutes
	Colorado Beetle	Bordeaux	When beetles or young appear			Arsenate of lead. 3 lbs. to 50 gals. of water for Colorado Beetle alone
Quince	Fruit and Leaf Spot	Bordeaux	Just before blossoms open	After blossoms drop	Two weeks later	
Raspberry and Blackberry...	San Jose Scale	Lime-Sulphur	In late fall or early spring			
	Anthracnose	Bordeaux	Before leaves open	Bord. on canes 6 inches high	Repeat second 1 week later	Keep spray from leaves on bearing canes
Rose	Leaf Spot	Bordeaux	With first appearance of fungus	2 or 3 weeks later	Repeat if necessary	
	Slug	Arsenites in Bordeaux or Hellebore	On appearance of slugs	Repeat if necessary		
Strawberry	Leaf Spot	Bordeaux	On new growth	2 or 3 weeks later		
Tomato	Anthracnose	Bordeaux	Soon after fruit begins to set	Three weeks later	Three weeks later	

HEALTHY HENS AND LOTS OF EGGS

Health begets health. Good layers produce good layers. "Like mother, like chick." These are sound poultry principles. You may expect vigorous, laying, paying birds when you give them

PRATT'S POULTRY REGULATOR

daily. It contains just those elements needed to keep poultry in perfect health. Both a tonic and digestive. Prevents common poultry ailments. Produces growth, gives increased vitality, and hastens maturity. Makes pullets early and constant layers.

25-lb. pail or bag, \$3.00; 12-lb. pail, \$1.75; packages, 60c., 30c.

Raise Every Livable Chick

After a good hatch, keep the record good by raising every livable chick. For the first three weeks, and even longer, you will find that the greatest success follows.

PRATT'S BABY CHICK FOOD.

It makes baby chicks live. Makes bone and muscle. Brings along the weak ones. Prevents white diarrhoea, leg weakness, "pasting up" and other digestive troubles. Costs only a cent a chick for three weeks.

Bags—100 lbs., \$8.50; 50 lbs., \$4.50; 14 lbs., \$1.50.

Packages—60c., 30c. and 15c.

A guaranteed remedy for Roup, Colds, Canker, Catarrh and similar poultry diseases is

PRATT'S ROUP REMEDY

Pills or Powder: \$1.00, 50c., 25c.

Contains remedies which are quickly absorbed, purify the blood and reduce fever. Pills are convenient for individual

treatment. Many poultrymen use this remedy the year round as an effective preventive.

To protect your chicks from white diarrhoea, the most destructive of all chick diseases, it is only necessary to give

PRATT'S WHITE DIARRHOEA REMEDY

50c. and 25c.,

in the drinking water from the first drink. This remedy has saved many dollars worth of chicks to poultry raisers. You can depend on it.

Get rid of lice on your poultry, in nests, dustbaths, incubators and elsewhere in a day's time by using

PRATT'S POWDERED LICE KILLER

30c. and 60c.

Effective, non-poisonous, non-irritating. May be used wherever a powder is suitable. A splendid deodorizer. Will kill lice on horses, cattle, dogs or cats.

EVERY PRATT REMEDY IS GUARANTEED TO SATISFY OR MONEY REFUNDED.

DR. HESS **POULTRY AND STOCK PREPARATIONS**

PRESCRIPTIONS OF DR. HESS (M. D., D. V. S.)

DR. HESS POULTRY PAN-A-CE-A

makes poultry healthy; makes hens lay; not a stimulant, but a tonic, that tones up the dormant egg organs, brings back the scratch and cackle, and compels each hen to put her share of eggs in the market basket.

It also contains internal antiseptics that counteract disease; insures a healthy, singing poultry flock. Cost but a trifle—a penny's worth enough for 30 hens per day. 1½ lbs., 30c.; 5 lbs., 75c.; 12 lbs., \$1.50; 25-lb. pail, \$3.00.

GUARANTEED.

DR. HESS STOCK TONIC

Formula printed on every package.

Every ingredient indorsed by the U. S. Dispensatory and other high medical authorities. It aids digestion, makes stock healthy, and expels worms. Helps stock convert more ration into milk, flesh, blood and muscle. Every pound backed by the Dr. Hess & Clark unqualified guarantee. Prices: Packages, 30c. and 60c.; 12-lb. pkg., \$1.25; 25-lb. pail, \$2.25; 100 lbs., \$7.50.

Dr. Hess Worm Powder

For Horses, Sheep, Cattle and Hogs. It is highly concentrated, and is an effective vermifuge. Dr. Hess' own prescription that proved effective in his practice. Price, 1½ lbs., 50c. GUARANTEED.

Dr. Hess Healing Powder

The modern Gall Cure. Cures Galls, Cuts, Wounds, Ulcers, Grease Heel. Antiseptic and soothing. Heals everything it touches by forming a coating, cleaning and closing up wounds. Comes in sifting-top cans. Price: 4-oz., 25c.; 10-oz., 50c.

ABSOLUTELY GUARANTEED.

DR. HESS ROUP REMEDY

For Roup, Diphtheria, Chicken Pox and all Catarrhal Diseases. It has these distinctive features: It is antiseptic, slightly astringent, non-irritating and healing. 4-oz. cans, 25c.; 10-oz. cans, 50c. GUARANTEED.

Instant Louse Killer

Kills Lice on Poultry, Horses, Cattle, Sheep Ticks, Bugs on Cucumber, Squash and Melon Vines; Cabbage Worms, Slugs on Rose Bushes, etc. Sold in sifting-top cans—look for the word "Instant" before buying. Price: 1 lb., 30c.; 2½ lbs., 60c. GUARANTEED.

Dr. Hess Dip and Disinfectant

Non-poisonous and non-irritating and guaranteed to be absolutely uniform in strength at all times. One gallon of Dip makes from 70 to 100 gallons effective solution. Spray it on roosts. Sprinkle it over the runs and in all cracks and crevices. Spray it on cattle and horses. Makes a splendid dip for hogs and sheep. It's a sure parasite and disease germ destroyer. Purifies stables, troughs, sinks, drains. GUARANTEED.

1 Qt., 60c.; ½-Gal., \$1.00; 1 Gal., \$1.50.

Dr. Hess Fly Chaser

Drives flies away. One application lasts six hours. Prevents milk slump. Keeps cattle and horses contented during the fly season. Most humane idea of the age. Its use during summer months will insure good profits. GUARANTEED.

1 Gal., \$1.25.

Dr. Hess Heave Powders

A dependable preparation for relieving horses of heaves, chronic coughs, asthma, bronchitis, etc.; with careful diet, the frequent use of this valuable preparation will afford permanent relief in the majority of cases. Price, 1½-lb. package, 50c.

Dr. Hess Colic Remedy

A reliable preparation for the treatment of Spasmodic and Flatulent Colic, Gripes, Acute or Chronic Indigestion, Impaction of the Stomach, Bowel Inflammation, etc.

Price, \$1.00. GUARANTEED.

Dr. Hess Distemper Remedy

A reliable preparation for Distemper, Acute Colds, Fever and Cough. Price, 50c. GUARANTEED.

You Money Back If Not Satisfied

Conkey's POULTRY REMEDIES

Conkey's Roup Remedy

Known to every poultryman. A wonderful remedy that quickly reduces the swelling and brings the bird back to normal. Given in the drinking water.

Packages, 30c., 60c., \$1.20. Sent postpaid.

Conkey's White Diarrhea Remedy

To be given to young chicks from the first drink until they are three weeks old. Aids wonderfully in preventing the development of this dread disease. Also desirable at intervals for the grown birds and especially so at mating time.

Packages, 30c. and 60c.
Sent postpaid.

Conkey's Cholera Remedy

For indigestion and so-called cholera in growing and grown birds. Given in drinking water quickly overcomes the diseased, feverish condition.

Packages, 30c. & 60c. By mail, 35c. & 65c.

SAL-VET

The Great
Worm Destroyer.

The Great
Live Stock Conditioner.

SAL-VET is a medicated salt—a safe, simple, inexpensive remedy which gives stock the medicines they need along with the salt they crave. It requires no dosing, no drenching, no starving. It goes into the stomach and intestines and loosens the leach-like hold these blood-sucking parasites have on the tender linings. It drives the robbers out—without bother or trouble to you. Your animals eat SAL-VET in place of common salt and thus doctor themselves.

PROTECT YOUR HERD AGAINST DISEASE.

Don't pay the frightful price of worm neglect. Don't wait until cholera breaks out in your neighborhood. Fortify your stock against disease. Get rid of the blood-sucking, disease-breeding worms now. Put every animal on your farm in a healthy worm-free condition so they can get more good of what they eat—gain faster—make you more money.

A SINGLE WORM-INFESTED HOG IN YOUR HERD IS A CONTINUAL MENACE TO YOUR HOG PROFITS.

It is the worm-infested, half-starved animals that spread the deadly worm curse over your farm. They are disease-breeders and disease-carriers of the worst kind. Helpless themselves to resist contagion, they let down the bars to the cholera scourge and death stalks through your herd. They are the danger spots in every herd.

name and address.

HEN-E-TA BONE CO.

NEWARK, N.J. 10DEPT. FLEMINGTON, W.VA.

contain about 30 per cent. PURE BONE ASH, which means 600 pounds of Bone Ash in every ton of "Hen-e-ta" Bone Clusters. "Hen-e-ta" is made in four grades: Fine, No. 1; Medium, No. 2; Coarse, No. 3; Super-fine, No. 4. No. 4 in 100-lb. sacks only.

"Hen-e-ta" is entirely digestible; while oyster shells are almost entirely indigestible. Oyster shells are discarded after their sharp edges are worn smooth; "Hen-e-ta" is never discarded; it is dissolved.

Every 100 hens will need 100 lbs. "Hen-e-ta" per month, and should have it the year round; or 1 lb. "Hen-e-ta" per average fowl per month. The cost of this amounts to nothing, when compared with the results obtainable and the saving of other materials. All sizes are same price.

Prices: 10 lbs., 50c.; 25 lbs., \$1.00; 50 lbs., \$2.00; 100 lbs., \$3.00. Special price in ton lots.

"HEN-O-LA" DRY MASH

Is the ONLY MASH on the Market To-day That is

"Within Itself" a

COMPLETE BALANCED RATION FOR POULTRY.

It contains the five nutrients from wholesome sources, and in the right proportions to meet the requirements of fowls.

The Five Nutrients are protein, fat, carbo-hydrates, phosphorus and lime. We derive the first three from sound ground grains only; the last two from "Hen-e-ta." It takes 4.6 lbs. of carbo-hydrates to digest one pound of protein, and it takes about one pound of phosphate of lime (bone ash) to assimilate two pounds of protein, after the protein has been digested by the carbo-hydrates. In the absence of phosphates no assimilation can take place, and your profits come from assimilated food and not from digested food.

Price: \$4.50 per 100 lbs.

Little Giant Stock and Poultry Food

Good for Cattle, Sheep, Horses, Swine and Poultry.

Composed of sterilized meat-meal, sterilized bone-flour, sterilized ground-blood, C. P. charcoal, imported French gentian root, imported African foenugreek seed, imported Spanish licorice root, imported German fennel seed.

GUARANTEED ANALYSIS: Protein, 22 to 28 per cent.; fat, 9 to 12 per cent.; phosphorus, 4 to 5 per cent.; calcic phosphate, 22 to 24 per cent.

PRICES: 5-lb. pail, \$1.00; 10-lb. pail, \$1.50; 25-lb. pail, \$3.00. Special price in larger quantities.

Granulated Milk for Poultry

For years poultrymen have been looking for a substitute for animal meal and beef scrap, on account of the offensive odor of the latter, and the uncertainty of keeping it sweet or wholesome during the warm weather. At last the desired object has been accomplished by perfecting a process of granulating a milk product, obtained at the Milk Sugar factories of the United States.

"It is simply concentrated skim milk, but is even much more desirable, because it is in a dry form, and can be fed in any desired quantity. Analysis shows it to contain above 45 per cent. protein, about 15 per cent. of which is clear albumen, also 15 to 20 per cent. fat, the balance being ash, lime, etc. It is one of the richest protein foods known, and cannot fail to be admirably adapted to poultry uses. The cost is about the same as beef scrap."

It will increase your egg production from 30 to 40 per cent. over Beef Scrap and will keep indefinitely in any climate. Just the thing to keep fowls bright and active. 1 lb., 15c.; 25 lbs., \$1.75; 100-lb. bag, \$6.00.

MILK PROTEIN MASH

This Poultry Mash is made of Granulated Milk thoroughly mixed in a well-balanced proportion with the best of grain, seeds, alfalfa, etc. It has double the value of almost any other mash food now on the market.

5 lbs., 40c.; 50 lbs., \$3.00; 100-lb. bag, \$5.50.

LEE'S EGG MAKER

AND CHICK GROWER

LEE'S EGG MAKER is the biggest value for the money ever offered to the poultry raiser. Being highly concentrated, only a small amount per day is required. It must not, therefore, be compared with foods that require fully twice as much per feed and from two to three feeds per day.

2½-pound package \$.35
25-pound pail 3.50

LEE'S GERMOZONE

(IN TABLETS
OR LIQUID.)

For roup, cholera and other poultry diseases; also skin, scalp and mucous surfaces. Specific for eruptions, inflammations, discharges, sores, wounds, etc. GERMOZONE IS A GREAT REMEDY. Directions with every package. Price, per package, 75c.; per bottle, 75c.

LEE'S LICE KILLER

Is easily applied to roost poles and about the poultry-house, and kills all vermin, mites, bedbugs, etc., that have their lodging in the cracks and crevices.

Price: Quart, 50c. ½ Gal., 75c. Gal., \$1.25.

LEE'S LICE POWDER SPREAD

Is intended especially for use on setting hens and little chicks. Is also of great value for insects on plants and vegetables, and for general use about household. Price, 20-ounce package.....30c.

SUCCULENTA TABLETS

SUCCULENTA TABLETS do away with all the bother, the time and labor of feeding your chickens green sprouted oats, cabbage, beets, roots and all other green food.

SAVE ONE-HALF THE COST.

Greatest discovery ever made in the poultry industry; simply dissolve a tablet in the drinking water; fowls drink it with a relish.

Via parcel post direct to you:

HARDING'S SUCCESSFUL ROUP CURE

For Roup, Colds, Canker, etc. One of the best remedies on the market.

Price: 25c., 50c. and \$1.00.

HARDING'S SCALY LEG CURE

A penetrating antiseptic liquid, easily and quickly applied. Harmless to feathers. An excellent leg polish for the show room. Useful in dressing flesh wounds and sores.

Price 25c.

BLATCHFORD'S PIG MEAL

The safety route from piggery to porkage. All "baby" pigs should be weaned on this strengthening tissue-builder. They will grow continuously and rapidly, developing bone and size without taking on surplus fat.

100 pounds makes 100 gallons of milk-substitute.

25-pound sacks \$1.50
50-pound sacks 2.75
100-pound sacks 5.50

BLATCHFORD'S LAMB FOOD

A Baby Food for Baby Lambs. Because it fully substitutes the ewe's milk for motherless lambs. It carries all lambs in a thriving condition safely and rapidly from weaning time to the early market.

25-pound bag \$1.50
50-pound bag 2.75
100-pound bag 5.50

HIGH GRADE HEN FEED

**THE BALANCED RATION FOR LAYING HENS.
ALL GRAIN; NO GRIT OR SHELLS.**

This feed is formulated from pure, sweet grains. Only those grains are used that are of known value for producing eggs. This is the feed for the poultryman who feeds for profit. 5 lbs., 30c. 10 lbs., 50c. 100-lb. sacks, \$4.75. Special price in larger quantity.

HIGH GRADE CHICK FEED

**"THE FEED THAT IS ALL FEED."
ALL GRAIN; NO GRIT OR SHELLS.**

This feed is absolutely pure and unadulterated, containing no offal or injurious ingredients, such as rice hulls, ground straw or cobs, etc. It will not hurt or scour chicks.

5 lbs., 30c. 10 lbs., 60c. 100-lb. sacks, \$5.00.

PULLET or DEVELOPING FOOD

The demand for a food for developing young chickens has increased with the demand for young chickens for market. This food will develop a large marketable chicken in the least possible time. Just the mixture to make them grow quickly.

5 lbs., 35c. 10 lbs., 60c. 100-lb. sacks, \$5.00.

MASH FEED TO MAKE HENS LAY

This is a complete mash, containing ground grain, alfalfa meal, meat meal, and everything necessary for producing a large egg yield. Mix with hot water, and it is ready to feed.

5 lbs., 30c. 25 lbs., \$1.25. 100-lb. sacks, \$4.50.

BLATCHFORD'S FILL THE BASKET EGG MASH

The excess nutriment taken by the hen from Blatchford's "Fill the Basket" Egg Mash causes the development of eggs so that she has to lay during the winter, while the ordinary unbalanced rations tend to produce fat hens, but lean profits.

Blatchford's "Fill the Basket" Egg Mash is made up of Blatchford's Calf Meal, the complete milk-equal, combined with the best quality meat and fish scraps and alfalfa and grain meals. This makes a perfect, balanced egg-producing mash, consisting of protein, 19 per cent.; fat, 4 per cent.; fiber, 10 per cent.

25-pound bags\$1.25
100-pound bags 4.75

PURITY PIGEON FEED

The mixture contains a great variety of grain and seeds properly balanced under the direction of a successful man who has had years of study and experience with pigeons. No grit. No shell. 1 lb., 10c. 10 lbs., 80c. Per 100-lb. sack, \$6.50.

G. & T. CO'S HIGH GRADE PURE BEEF SCRAP

50 TO 55 PER CENT. PROTEIN.

This Beef Scrap is the highest possible grade, and is made from Pure Beef Trimmings and cracklings, and has no pork or other materials to cheapen same. It is fully guaranteed as to quality and will keep indefinitely. Price: 5 lbs., 50c. 100-lb. bag, \$6.50. Special prices in ton lots.

ALFALFA MEAL

This is a green feed all the year round. Everyone knows that alfalfa is fast supplanting clover. It is very high in protein, and furnishes the chicks a growing food which, at the same time, has a medicinal value. 5 lbs., 25c. 50 lbs., \$1.50. Per 100-lb. sack, \$3.00.

GRANULATED CHARCOAL

A little ground charcoal mixed with the soft feed in the morning, once or twice a week, is an excellent corrective for the fowls, and keeps them healthy. We carry three sizes, one for grown fowls, one for small chicks, and pulverized. 5 lbs., 50c. 25 lbs., \$2.50. 50-lb. sack, \$4.50. 100 lbs., \$6.00.

DARLINGS MEAT CRISPS

A clean, wholesome High Protein (75 per cent. guaranteed) Meat Product. Although Darling's Meat Crisps is a little higher in price than the ordinary product, the greatly increased feeding value (due to the High Protein content), and the clean, sweet character of this feed make it more profitable to feed. Each hen laying only one extra egg a month will more than make good the difference, and you are building a healthy, prolific flock.

3-pound package\$.50
6½-pound package75

AVICOL

FOR PREVENTION - FOR CURE White Diarrhoea and Chicken Cholera can be cured and prevented by **AVICOL.**

STOP THE LOSSES!

You practical poultry breeders, who have had actual experience with these two diseases, realize how much money they have cost you.

Authorities may differ about the causes—but they don't differ about the results. When once in your flock, unless checked at once, you stand to lose heavily.

AVICOL SAVES THE CHICKS—Avicol has a specific and selective action on the germs causing Cholera and White Diarrhoea. It knocks the germs and gives the chick a chance.

Prices: Per Bottle25c., 50c.

HACKETT'S GAPE CURE

CURE FOR

Chicken Gapes

No drugging; simply confine the chicks and dust the Powder over them; they inhale it; kills both worm and germ; treat the whole brood at once in less than five minutes.

Package, 35c. Postage on single package, 5c. extra.

BONE MEAL FOR POULTRY

This is exactly the same as the Cracked Bone described below, only it is ground much finer. 5 lbs., 50. 10 lbs., 75c. 50 lbs., \$3.00. 100-lb. sack, \$5.00.

CRACKED BONE FOR POULTRY

This article is manufactured from fresh, clean bones, and is perfectly pure and sweet. No chemicals whatever are applied to them in the course of manufacture. Should be fed to the poultry daily, like grain or any other feed. An excellent bone and egg producer, keeping the fowls strong on their legs and largely increasing their laying qualities. Especially valuable for young and growing chicks. We carry two sizes, No. 1 for grown fowls, and 2 for young chicks. 5 lbs., 50c. 10 lbs., 75c. 50 lbs., \$3.00. 100-lb. sack, \$5.50.

CRUSHED OYSTER SHELLS

It aids digestion as well as supplying lime. Experiments have proved that hens supplied with oyster shells lay more eggs. We carry two sizes in stock, No. 2 for grown fowls, and No. 3 for young chicks. 5 lbs., 25c. 100 lbs., \$1.25. 500 lbs., \$6.00. Special prices in larger quantities.

MICA QUARTZ GRIT

(Poultry, Pigeon and Chick Sizes.)

Grit is as essential for poultry as food, as without it they cannot digest the food. Poultry will starve to death with full crop for no other reason than they have no teeth with which to grind the food into proper consistency. Grit should be mixed with the food and fed in hoppers or boxes, about one part of grit to fifteen or twenty parts of food. 5 lbs., 25c. 100-lb. sacks, \$1.25.

HORSE AND CATTLE REMEDIES

BY USING
KOW-KURE
THE GREAT COW MEDICINE

the milk. It is a medicine for cows only. Prices, small size, 60c.; large size, \$1.20.

BAG BALM

For all diseases of the cow's udder and teats there is no remedy so quick and certain in its curative powers as **BAG BALM**. It is a soothing, penetrating ointment, especially adapted for all those serious and annoying troubles known as caked bag, cow pox, chapped, cracked and sore teats, bunches, chafing and inflammation of all kinds. **BAG BALM** penetrates through the skin and inner tissues at once, reaching the glands, where it reduces the inflammation, breaks up the bunches and spreads its cooling, softening effect to all the affected parts. This remedy has met with unequalled success, and is found on the most progressive dairy farms in the country. Price.....60c.

AMERICAN HORSE TONIC

This tonic is a specific for horses, an actual medicine that goes to the root of all horse ailments and removes the cause of the trouble. A few doses will send a dull, listless horse on its way rejoicing.

Its curative power is wonderful. **AMERICAN HORSE TONIC** is the best remedy known for worms, stoppage of water, all bowel complaints, inflammation of the lungs, recent founders, distemper, coughs, colds and swelling of the glands of the throat. Small size, 30c.; large size.....60c.

HORSE COMFORT

The Most Remarkable Remedy Ever Compounded for Healing Cuts and Open Sores of Every Kind. **HORSE COMFORT** is a liquid preparation which is unequalled in its power to quickly cure all kinds of open sores or abrasions of the skin. It is used by simply wetting the sore spot. No bandages or filthy rags, no rubbing or heating it in. Simply wet the spot and the cure begins. Price, per bottle, 30c. and 60c.

"ANTIKOL" HOG CHOLERA

Antikol is specifically designed to prevent and treat Hog Cholera. It cannot be a benefit except in cases where a disease is due to germs introduced into the intestinal tract. It is fatal to the hog cholera germ, and yet absolutely harmless to the hog when used in accordance with directions.

Price, \$1.50.

DR. LESURE'S VETERINARY REMEDIES

COLIC DROPS—For the treatment of Colic, Cramps, Spasmodic, or Flatulent, Stoppage of Water, Black Water, Indigestion and Scours. Price.....\$1.25 per package.

FEVER DROPS—For the treatment of Lung Fever, Pneumonia, Pleurisy, Inflammation of Bowels, and all troubles of an inflammatory nature. Put up in two sizes, 65c. and \$1.25. The large size contains three times as much as the small.

COUGH AND TONIC DROPS—For the treatment of Coughs, Colds, Distemper, and all troubles affecting the throat and lungs; also a fine tonic and water regulator. Put up in two sizes, 65c. and \$1.25. The large size contains three times as much as the small.

RENOVATOR POWDER—For Bad Blood, Indigestion, Loss of Appetite, and a general run-down condition in Horses and Cattle; tends to prevent Colic and Intestinal Troubles if given occasionally. Not a **FOOD**, but a strictly high-class medicine. Price, 65c. and \$1.25 per package. Large size contains two and one-half times as much as the small.

WORM ANNIHILATOR—For the annihilation of all kinds of Worms that infest the horse; is perfectly safe to give at all times, for it is also a very fine tonic. Price, 65c. per package.

ELECTRIC HOOF OINTMENT is especially used to grow and soften the horse's feet, for Contraction, Quarter Cracks, Brittleness, Tenderness, and all ailments of the feet. It is very healing and is fine for scratches or sores of any kind. Price, 65c. per box.

ALL-HEALING BALM (LINIMENT)—For all kinds of sores and wounds, either new or old. Remedy for Harness Galls, Cuts, Scratches, Thrush, and all sores and soreness. Price, 65c. per bottle.

LESURE'S SPECIAL LINIMENT—For nerve, muscle, bone and sinew. Stops pain instantly, reduces swelling, removes soreness and lameness from any cause whatever. Price, 65c. per bottle.

LESURE'S LINIMENT—A penetrator and strong stimulant; adapted to deep-seated lameness, where you want to produce external irritation, as it will blister if thoroughly rubbed in; and, reduced with water, it makes the finest and cheapest wash for turf purposes. Price, 65c. per bottle.

GALL REMEDY—For Saddle Galls, Collar Boils, Cuts, Mud Scalds, Scratches, Rope Burns, etc., upon horses and cattle. Price, 35c. and 65c. per box.

DR. LESURE'S FAMILY LINIMENT—For Rheumatism, Neuralgia, Sciatica, and all deep-seated pains and lameness. Price, 35c. per bottle.

ANTISEPTIC HEALING POWDER—For Old Sores and Ulcers, and all sorts of sores that will not yield to liquids and salves. Price, 65c. per can.

DR. DANIELS' VETERINARY REMEDIES

These remedies are all compounded from the best ingredients for the purpose intended. Each is a bona fide prescription of an eminent veterinarian.

You can save the cost many times over by having a stock of these remedies on hand; a 60c. package will many times save a very valuable animal.

100-lb. bag	5.00

BLATCHFORD'S CALF MEAL

THE BEST WAY TO RAISE A CALF WITH LITTLE OR NO MILK

Feeding Directions—For very young calves, let the calf run with the cow for three days, then feed it the mother's milk from a bucket for two days more—three pints of milk three times a day. In this way it gets all of the cow's first milk (colostrum), and this will clean the bowels and start the digestive organs of the calf properly. After the fifth day from birth, take two tablespoonfuls of Blatchford's Calf Meal, add hot water and stir this into a thick paste, free from lumps. Then add one quart of whole milk and one quart of separator milk, stir thoroughly and feed blood-warm. This amount should be fed three times a day. Continue this, gradually substituting separator milk for the whole milk. Full feeding directions for young and old calves are printed on a card and will be found in every bag. These directions will serve as a general guide. Calves vary so much in size, strength and digestive capacity that much must be left to the discretion of the feeder. We have discontinued the publication of a minutely detailed feeding table, having found that it is apt to be too rigidly followed. Even some of the higher authorities connected with the agricultural work in this country make this error. The objects to be attained in feeding calves are rapid growth, health and quality. To obtain these calves require Blatchford's Calf Meal; clean housing; clean feeding utensils; plenty of sunlight; regularity in time of feeding; and, above all, not to be overfed. Overfeeding causes acidity of the stomach—bloating or pot-gut—a dull, lazy condition instead of energy and playfulness. Don't overfeed! Darkness and gloom beget disease, destroy cheerfulness and materially lessen growth. Therefore it is important that calves be placed in well-lighted stalls.

DOUBLED FARM PROFITS.

Maturing or weaning all your calves rapidly on Blatchford's Calf Meal, at a cost of about one-fifth of what you get for your milk, then selling all the milk at a good profit, should appeal to you and to every wide-awake farmer as a good, profitable proposition. These profits, both ways, need not be guessed at; they are discernible at a glance. Another source of profit that heretofore has been overlooked by most farmers is the raising of the fall and winter calf on this same milk-substitute. Many farmers and dairymen have taken up winter dairying, reaping the extra big profits on milk and cream during the winter months, but often the calf has been immediately "murdered." Calves raised during the winter give you veal during the term of high prices and are just as easily raised then as during the summer. Fall "freshening" is greatly to be desired. With the help of the silo or an abundance of alfalfa hay the winter feeding keeps up the milk supply until the new grass comes in the spring. The new pastures stimulate the milk-flow and keep it up through the summer. The winter milk prices more than offset the cost. When you stop to consider that this complete milk substitute costs you less than skim milk and is far better for calf-raising—made expressly for the calf—you will get some idea of its high efficiency. It is made from several kinds of whole grains and seeds, and includes oil, sugar and albuminous compounds, pure locust-bean meal and pure flaxseed ground, with the oil left in. You cannot begin to get the results from any other method of calf-raising that you can get from feeding Blatchford's Calf Meal, the complete milk equal.

Prices: 25-lb. bag, \$1.50; 50-lb. bag, \$2.75; 100-lb. \$5.50.

DISINFECTANT—DEODORANT—ANTISEPTIC

LABORATORY TESTS SHOWING THE POWER OF B-K TO KILL VARIOUS KINDS OF DISEASE GERMS.

TYPHOID TEST.—Dilution used: One part B-K to 1,500 parts water. Killed *Bacillus typhosus* at once.

STREPTOCOCCUS TEST.—Dilution used: One part B-K to 700 parts water. Killed *Streptococcus* at once.

DYSENTERIAE TEST.—Dilution used: One part B-K to 1,000 parts water. Killed *Bacillus dysenteriae* at once.

COLON BACILLUS TEST.—Dilution used: One part B-K to 1,200 parts water. Killed *B. coli* at once.

STRENGTH OF B-K COMPARED WITH OTHER DISINFECTANTS.

The tests below show B-K to be many times more effective than Carbolic Acid, Formalin, Cresol, etc., in the destruction of such germs as Typhoid, Streptococcus, Dysenteriae, etc., even when B-K is used much diluted. It is much stronger than Cresol which is one of the strongest of the many coal-tar derivatives, and therefore, the superiority of B-K as a disinfectant is obvious both as to efficiency in results and low cost to use.

TESTS.

Organism used: *B. coli*.

Time of action: two minutes.

B-K Dilution: 1 part to 1,800 parts water. Germs Killed.

Phenol (Carbolic Acid)—Dilution: 1 part to 80 parts water. Germs not killed.

Formalin—Dilution: 1 part to 125 parts water. Germs not killed.

Cresol—Dilution: 1 part to 200 parts water. Germs not killed.

Phenol, Formalin and Cresol did not kill the germs, though exposed for two minutes. B-K did kill them because it is many times stronger. Yet, the others are poisons, while B-K is not a poison.

SO-BOS-SO COW-EASE

TRADE KILFLY MARK

**MORE MILK!
MORE MONEY!**

Cows will give 15 to 20 per cent. more milk if protected from the torture of flies with So-Bos-So Kilfly. Kills flies and all insects; protects horses as well as cows. Perfectly harmless to man and beast. Rapidly applied with Child's Electric Sprayer, 30 to 50 cows sprayed in a few minutes. A true antiseptic; keeps stables, chicken houses, pig pens in a perfectly sanitary condition.

What is more trying to the patience than to milk a cow when she is continually stepping back and forth and lashing

her tail under the irritation of a lot of flies? A moment's work with a Sprayer and a little So-Bos-So Kilfly, and all is quiet and serene. From 30 to 50 cows can be sprayed in a few moments.

Put up in One-Gallon Cans.

Each Can Bears the Trade-Mark Seal.

Price—1 gallon\$1.50
Sprayer for applying So-Bos-So, 60c.

RELIEVES CATTLE AND HORSES FROM FLIES

A liquid preparation carefully compounded from effective materials. It is of the right consistency for applying with a sprayer, and it will not gum the hair or blister the skin.

Every dairyman and every owner of livestock should use Cow-Ease during the summer season. Its use is a humane act, and it also saves money for the stock owner, as a herd of milch cows that are sprayed regularly through the summer months will yield on the average from 10 to 20 per cent. more milk than they would if Cow-Ease was not applied.

In the case of horses: a mettlesome horse will lose flesh in fly time, whereas if he is sprayed lightly with Cow-Ease before driving, he will keep in good condition. Spray interior of stable and stall and see the flies go.

A Sure Preventive for Lice, Ticks and Vermin.

A light application of Cow-Ease will relieve cattle from lice, also prevent tick—the cause of Texas Fever.

Cow-Ease is an excellent article for spraying the interior of hen houses, also roosts and dropping board; it will prevent head lice and fleas and keep the house in a sanitary condition.

In sultry weather a herd of milch cows should be sprayed twice a day. Only a very small quantity is required. If possible spray in the morning and at night before milking.

Prices:

Qt., 50c.; ½-gal., 85c.; gal., \$1.50; 5-gal. can, \$7.00.
Sprayer for applying Cow-Ease, 60c.

**WHY
Should You Use**

Avenarius
CARBOLINEUM
REG. U.S. PAT. OFF.

**BECAUSE
It Doubles the Life
of Your Timber**

Nurserymen and seedsmen will realize its labor and money-saving value when they can save from rotting thousands and tens of thousands of labels, stakes and posts, likewise hotbed frames and greenhouse timber.

YOU CAN MAKE IT PAY

Hundreds of dollars annually in economizing on the maintenance of wooden buildings and fences. Every beam, sill, joist and floor plank in your storage sheds, stables, feed and seed bins can be made to span the lifetime of at least two that are not treated. Always keep a supply on hand at the farm for odd-and-end repair work. Used once a year in poultry houses, makes lice and mites disappear as if by magic. Try it. Prove it.

Prices per gallon: 1 gal., \$1.50; 5 gals., \$1.30; 10 gals., \$1.25.

GRADE 1 CREOSOTE OIL

Grade One Liquid Creosote Oil is coal-tar creosote refined sufficiently to give the maximum efficiency to the convenient and inexpensive Brush and Open Tank methods of treatment. Briefly, Grade One Liquid Creosote Oil is superior to the commercial coal-tar creosote for use by the small consumer, because

- It is liquid.
 - It is free from water.
 - It has low evaporation loss.
 - It has high specific gravity.
 - It has low viscosity, and, being liquid, penetrates readily and deeply into the wood.
 - It has increased antiseptic and decay-preventing qualities.
 - It is a clean oil and imparts a pleasing, dark-brown color to the wood.
 - It is uniform, standardized material.

5-Gal. Can 3.50

KILL-GERM DIP and DISINFECTANT

These goods represent the highest attainment in Dip Manufacture.

A Saponified combination of Cresylic Acid and Coal Tar Creosotes, which readily forms a milky emulsion in water.

An official dip of great efficiency for the killing of Lice, Ticks, Scab and other Parasites and disease germs which infest the bodies and pens of Hogs, Sheep and Cattle.

One of the most powerful Disinfectants and Germicides ever produced. A powerful Antiseptic and Purifier. For sanitary purification of dwellings and tenement - houses, sinks, closets, stables, public schools, railway stations, hospitals, workshops, hotels, etc., it is unequalled.

PRAIRIE STATE INCUBATORS

THESE MACHINES ALL BEAR THE INSURANCE UNDERWRITERS' LABEL

THE PRAIRIE STATE SAND TRAY INCUBATOR No. 0 and No. 1

For this new season we will offer a full line of incubators meeting every existing condition, all embodying the well-known Prairie State principle, all equipped with the sand-tray method of supplying humidity, and with the Prairie State Patented Eddy-current Heat Distributor, giving uniform heat distribution even in a two-thousand egg machine—a feat never before accomplished without tray-raising or lowering devices.

Prairie State Incubators contain many exclusive patented features found in no other machine. The Sand Tray models have the best reputation ever made by any incubator for high hatching results—for large chicks of extreme hardiness. Remember, profit comes from the "Chicks that Live."

THE PRAIRIE STATE SAND TRAY

with nursery—our standard for the past eight years. It is offered now in a further improved condition, fitted with our latest type fool-proof heater, and provided with a wire chick tray substituted for the burlap formerly used, which, resting just above the sand tray, permits this tray to remain throughout the hatch, thereby retaining uniform humidity until completion.

Universal Hover.

PRAIRIE STATE UNIVERSAL HOVER

It may be attached to any form of outdoor brooder, two feet or more in height, to any size or form of colony house, shed, coop, piano, dry goods or organ box. It also enables those who wish to build their own brooders to get the best brooding device possible in an economical manner. It fills that want, felt by everyone who raises poultry, for something they can use anywhere, any time, and do the work well.

The hover is twenty-two inches in diameter, the top of which is wood, lined with strawboard, a 4-inch rim extending downward, to which is attached six inches of felt curtains. The hover stands on three iron feet, but is not stationary, and may be raised and moved instantly, if desired.

A thermometer is provided, which may be read from the outside without disturbing any part of the brooder.

UNIVERSAL HOVER.—Price for hover, with lamp case, smoke conductors, lamp and thermometer, \$9.00.

When used indoors alone, lamp case and smoke conductors are not required. Hover and lamp, \$8.00.

Hover regulator, \$1.25 extra.

THE PRAIRIE STATE PORTABLE HOVER

The **Prairie State Portable Hover** embraces in principle and construction all those original and successful features which at once established the high reputation of the **Prairie State Universal Hover**. It is a **Universal Hover** so modified as to bring the lamp case to the floor level without sacrificing safety, economy of oil consumption, or ventilation, and involving attached lamp case and all-steel construction. It is a **Portable Hover** built along lines different from all others. Contrary to general practice in building **Portable Hovers**.

Prairie State Portable Hover, 100-chick size.....\$18.00

Prairie State Jr. Portable Hover, 60 to 100-chick size....\$11.00

THE COMBINATION COLONY BROODERS

This **Brooder House** is constructed of tongued and grooved boards. The brooder is full size in all dimensions, 3 feet wide, 6 feet long and 3 feet high in front and 2 feet in rear, with tin roof. The interior is divided by a movable partition into two compartments—the nursery room and the exercising room or sun parlor. The nursery is double walled, top and sides, with dead-air space and paper insulation between the board partitions, securing warmth and uniform insulation. A strong point in the nursery is the circular hover without obstructions of any kind, such as hot drums or domes, leaving every inch of inside space available for the chicks. It is open all around. No cold corners or hot spots to crowd into. A glass door in front, 22 inches wide, furnishes light and access to the chicks. A movable board under the door brings the opening level with the floor of nursery and permits easy cleaning of the apartment.

No. 2—208 pounds.....	27.50
No. 3—300 pounds.....	30.00

THE PRAIRIE STATE STOVE BROODER

The **Prairie State Stove Brooder** is built solidly of cast iron throughout. This stove is not mounted upon legs. We have learned not to use them because they afford a space under the stove where chicks may huddle and be burned to death. Therefore, the base of our stove rests squarely upon the floor. Bolted to it is a cylindrical cast iron ash pit of ample capacity, fitted with a solid door having non-heating handle and containing no opening through which hot ash or sparks may fly. This door has no function in the regulation of drafts, and need never be opened except to remove ashes. The entire volume of fresh air required for proper combustion passes, subject to action of the regulator, through a cast iron air inlet elbow bolted to the top of the ash pit in such position as to admit air on the grate level. A one-piece jointless fire box rests upon and is bolted to the ash pit casting. It is made of a high-grade foundry iron of chemical content, such as will withstand intense heat through prolonged firing, and with such capacity as to insure maintenance of the fire through long periods. A free flow of fresh air has constant access to the entire fire pot from the bottom as it enters through the air inlet elbow. The top section of the stove, surmounting its fire box and bolted to it, involves in its assembly a cast iron valve seat which makes air tight contact when the upper regulator valve rests upon it. Four angle brackets bolted integral with the top plate to this section, two on each side of chimney opening, serve to support two parallel angle steel bearing bars, upon which rests the galvanized steel canopy or deflector forming the hover proper. Extending to the right of the chimney opening, and securely bolted to the top plate, is a solid cast iron bearer or bracket, from which is suspended the entire regulator. The capacity of the **Prairie State Stove** is as great as that of any stove upon the market today. That is, it will give heat sufficient to brood as many as one thousand to fifteen hundred chicks, doing it economically and safely. The canopy deflector of the **Prairie State Stove Brooder** is made of galvanized sheet steel, and in two sections, hinged together on a line with the center of the stove. The regulator with which we equip the **Prairie State Stove Brooder** is automatic, sensitive, positive, triple acting, and of exclusive **Prairie State** design. It is of the wafer thermostat type, fastened to a bar extending downward from the regulator support, wafer being placed at a level which has been carefully determined as best for indicating exact floor temperature required.

QUEEN INCUBATORS

STOP HATCHING WEAK CHICKS WITH CHEAP INCUBATORS!

Queen No. 2—135-Egg Size

A Queen costs but little more, and the extra chicks that live and grow soon pay the difference.

Remember, it is not how many chicks you HATCH that counts, but how many you RAISE. Chicks that hatch out weak and wobbly, and live but a few days, mean nothing to you but trouble and loss. They make one sick of the poultry business.

Most of the chicks you lose in the first few weeks die because they did not have, when hatched, enough strength or vitality for a good start. Queen Incubators are famous the country over for big hatches of strong, healthy chicks that live and grow.

No. 3 Queen—180-Egg Capacity

PROPER INSULATION

The Queen is doubly insulated. First we use double walls of California Redwood, forming a dead air space. Second, corrugated strawboard is used between the wooden walls. Proper insulation adds considerable expense to the manufacturing cost. However, it is an absolute requirement of a good Incubator.

QUEEN HOT WATER HEATING

The Queen System of hot water heating prevents the drying-out tendencies found in hot air incubators and provides a soft, uniform heat over every part of the egg chamber—a heat that is most natural for the hatching eggs. The circulation of water through the radiator prevents any moisture being added or taken away from the eggs. When it becomes necessary to remove the lamp, the hot water circulating through the radiator maintains an even heat within the egg chamber without the slightest variation.

No. 1 Baby Queen—85-Egg Capacity

BUILT OF CALIFORNIA REDWOOD

The Queen is the only Incubator that carries out the double redwood wall construction all around, and provides a double wall front, in the way of two separate doors. The outer door is a solid panel of Redwood that is hinged entirely independent of the inner door and is fastened with a sash lock that draws it tight, thus making the loss of heat impossible.

The inner door is also of redwood construction, containing a panel of glass the full length and height of the egg chamber.

Redwood does not absorb the odor from the hatching eggs. Cheaper woods, and pasteboard lining in iron and tin machines, retain the odors, to weaken and kill the hatching chick.

Queen Incubators are not cheap, but they are cheap in the long run. They will be turning out good hatches years after the cheap machines have been junked.

ASK FOR FREE CATALOG

QUEEN BROODERS

This damper regulates your check draft and the direct draft to your fire.

The Queen Colony Brooder is a new and improved design of brooder stove. It is made of highest quality iron castings that will wear and last indefinitely.

There are no drafts on the smoke pipe of the Queen. The check rests on top of the stove and opens outward when fire is too warm, thus giving a gentle inflow of air to retard the heat. While the opening of the draft to increase the fire is located at the top of the stove, it opens into the fire at the base through an opening extending down the side to the bottom. This feeds the draft into the fire from underneath with no opening below the hover.

As will be seen from the illustration, the check and draft lids are cast together and operated together. Thus, when the fire is too hot, the wafer expands and closes the draft and opens the check, both at the same time. When it is too cool the wafer contracts and closes the check and opens the draft. This keeps an even heat all the time, both night and day, in cold weather or warm, and does it automatically. You don't have to pay any attention to it whatsoever. Just set the regulator for the proper temperature at the start of the season—it will do the rest.

SUPERIOR QUEEN GRATE

The grate in the Queen stove is the rocker type and strikes the fire at four points. This is far superior to any draw center or shaker grate, because it cleans the fire thoroughly, and by striking at four points will break up and remove all clinkers.

COLLAPSIBLE HOVER

The hover used on Queen stoves is collapsible and made of four pieces of galvanized iron. This hover comes knocked down, with holes punched and stove bolts attached, ready for putting together. By being collapsible, it enables you to save room when storing, and lessens the danger of damage, when not in use.

BURNS ANY KIND OF FUEL

The Queen stove burns any kind of fuel with equally satisfactory results. We recommend chestnut sizes in all kinds of fuel and hard coal, soft coal, coke, charcoal, or briquettes burn equally well. Of course, hard coal will not cause the pipe to become dirty as quickly as the others, but it will give no better heat.

No. 1—600-Chick size, \$19.00

No. 2—1200-Chick size, \$23.50

QUEEN INDOOR LAMP-HEATED BROODER

Queen Indoor Brooders are made of the same selected, high-grade lumber that is used to construct the outdoor brooders, and painted with two coats of paint. One-inch lum-

ber is used throughout, corner joints and floor edges are mortised and lock nailed. The floor is tongued and grooved and driven up, being held rigidly in place by the framework which forms a band around the floor.

The lamp is encased in a sheet iron box directly under the heater drum. The heat from the lamp enters into the tight drum, from which it is distributed through the radiating surface into the brooding chamber. The escape pipes, protected by a windshield on the outside, to prevent the gases and air being blown back into the brooder.

The floor within the brooder slopes slightly upward from the front, the highest part of the slope coming under the heating drum. In this way fresh air is provided from the lamp, which is in a separate compartment and does not rob the brooder chambers of the fresh air needed for the chicks.

The floor space is divided into two compartments like in outdoor lamp-heated brooder, partitioned off by a heavy felt slitted curtain, which is removable, therefore allowing the chicks to select their own temperature. Two doors are provided at the top, one of which is glass, in order to admit light. Opening these doors makes easy the way to thoroughly clean the brooder.

WATER GLASS

Put up expressly for packing away eggs, when they are plentiful and cheap. During the summer months especially eggs are much cheaper than they are in the winter time. With this preparation you can pack them away, and have a supply of fresh eggs all winter. One gallon of this solution is sufficient to mix with enough water to pack away fifty dozen eggs. Use 1 part Water Glass to 9 parts of water.

At a cost of only one cent a dozen, you will be able to save anywhere from fifteen to thirty cents on the dozen, and have the satisfaction of having your own eggs.

PRICE:

- 1-quart can\$.50
- 1-gallon can 1.00
- 5-gallon can 4.00

QUEEN OUTDOOR LAMP-HEATED BROODER

Queen Outdoor Lamp-Heated Brooders are designed to raise the chicks in all kinds of weather at any time of the year with insurance for success. They can be relied upon to give the little chicks the protection they need both day and night.

The Brooder is constructed of one-inch, high-grade, thoroughly seasoned lumber with mortised corners that are bound with galvanized iron and covered with two coats of paint. The heating system gives an abundance of heat, while the ventilation system provides an abundance of good, fresh air. All the gases and fumes from the lamp are discharged from the drum through pipes to the outside of the brooder, the outlets being provided with wind guards. All parts of the heater are made of heavily galvanized steel and can be removed, without tools, to be cleaned.

The brooder has two floors of tongued and grooved material. Under the heating drum the floor is cut away and a galvanized pan substituted which can be filled with earth or sand and, being removable, is easily cleaned. The upper floor is divided into two compartments, the brooding room and the sun parlor, and is divided by a heavy felt curtain slit so that the chicks can easily pass through. The sun room is lighted with panels of glass, set in a hinged frame, so that in bad weather a place in which the chicks can exercise, eat, and scratch in safety is assured.

KEROSENE OIL

FOR INCUBATORS AND BROODERS

One of the most difficult things for a poultryman to secure is a good grade of oil to use in incubators and brooders.

We have had so many complaints from this cause that we have deemed it expedient to put up a high-grade oil to assist them in this trouble. You will not be able to appreciate the difference till you have tried a can of this oil.

Put up in five gallon shipping cans.

Price.....\$2.25

EXPRESS AND PARCEL POST PACKAGES

PARCEL POST EGG BOXES

Eggs need protection. This shipping package is so constructed that the eggs are separated by a thickness of corrugated board and the entire contents are surrounded by a double wall of air-cushioned corrugated board. Absolute protection is therefore assured, as the box possesses sufficient strength and durability to stand the usual rough handling in transit. Their extreme light weight, when compared with other packages, will, in many cases, save the postage for an extra pound. Fold flat for shipment.

Eggs—For shipment in zones each Egg must be wrapped with cotton, excelsior, newspapers, tissue paper or material of a similar nature when shipped in our boxes and box so wrapped that nothing can escape from the package. Any commercial wrapping paper is acceptable.

Eggs—For LOCAL DELIVERY our boxes are all right without additional wrapping inside or outside.

Boxes holding 1 doz.....	\$1.35 doz.
Boxes holding 2 doz.....	1.80 doz.
Boxes holding 3 doz.....	2.25 doz.
Boxes holding 4 doz.....	3.00 doz.
Boxes holding 5 doz.....	3.60 doz.

ANDERSON EGG BOX

For Fancy Eggs for Hatching.

The Anderson Egg Box is made of corrugated paper and has double-faced corrugated paper partitions like the Eyrie, to protect each individual egg. The ability of the Anderson Egg Box to fold flat enables us to ship them in a knocked down condition, third-class freight. They take but little room in storage and are very easy to set up. By sealing the box with gummed strips which we furnish, pilfering or substitution of common eggs for fancy eggs while in transit is eliminated.

Diamond Safe Delivery Egg Carrier

**A BROKEN EGG IS A
WASTED EGG THAT SOME-
BODY MUST PAY FOR.**

An egg saved from breakage is as valuable as another egg produced.

The producer cannot afford to lose the value of broken eggs—and the consumer cannot afford to pay for broken eggs.

Each egg is wrapped in tissue furnished with each Diamond Egg Carrier—then placed in the die cut compartments as above.

Postmasters, Producers and Consumers have given the Diamond Safe Delivery Egg Carrier every possible test and find it perfectly designed for the protection of eggs in transit.

The package is thoroughly rigid and will stand all the strains and handling of transit not only once, but the same Diamond Egg Carrier can be used over and over again for months.

Eggs have been shipped from Carey, Ohio, to Moscow, Russia, without a crack—more than half-way around the world by ship and rail in a Diamond Safe Delivery Egg Carrier.

If you were to cut away a portion of a packed Diamond Egg Carrier you would find each egg suspended and protected on every side—cushioned against jars and rough handling.

Eagle Egg Boxes, three rows for 12 eggs, per 100..... 1.20

METAL EGG CRATES FOR PARCEL POST

Solve the problem of shipping eggs safely by Parcel Post. They are made for continued use, being strongly constructed but light in weight.

All crates are provided with built-in shock absorbers to give a cushion for the eggs. Fillers to hold the eggs are made for long life.

Metal Egg Crates do not require outside wrapping for mailing. A short string only is needed for tying "pin" which holds lid securely closed.

Buy your eggs direct from the producer, "strictly fresh," delivered to your door by Parcel Post. The total cost, including postage, will be less than from your grocer.

This "Safety First" egg carrier will pay for itself in a few shipments by eliminating the loss in breakage so frequent when shipped in the short-life paper cartons. It will prove itself to be a profitable investment.

Postage is no more than for other egg carriers.

Thompson, Jr., No. 7, Root Cutter

THE THOMPSON, JR., No. 7 ROOT CUTTER is especially adapted to the use of the poultryman or farmer having a small flock of chickens or a couple of cows. It is so constructed that it will cut roots and vegetables in small pieces, and in this way produce an excellent feed. It will cut one bushel of roots in about five minutes. In cutting the roots the feed value is greatly increased, as in many cases the roots, if fed whole, have little or no value.

This cutter is made from first-class lumber, nicely painted and striped. The knives are made from the best tool steel, and are firmly bolted to the grinding plate, which also acts as a balance wheel. Weight, 50 lbs.

PRICE, \$6.50.

The Ideal Automatic Feeder and Exerciser

It is necessary for poultry to have proper exercise, especially in winter time, when they are penned up, and cannot get out on the run. The Egg Yield will greatly reduce if they do not get this exercise. This feeder is designed for this purpose, and at the same time it assures you that the chickens are getting just the amount of feed needed, without any being wasted.

This feeder is made so that it can be hung from the ceiling, or any suitable place. It will scatter the grain farther than any automatic feeder, and also gives the poultry all the floor space. Simply fill the hopper with any kind of grain you wish to feed, and adjust it to feed any amount you like. Will feed any kind of grain or mixture of grain.

It is the Greatest Labor Saver and Exerciser on the Market.

It will pay for itself in six months in saving of feed, and will increase your egg yield 25 to 40 per cent.

Coates Automatic Feeder and Exerciser

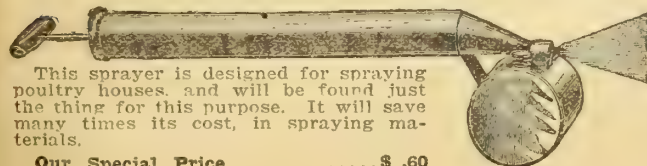

Insures Larger Profit to Poultrymen.

These feeders are made of galvanized iron, and will last a lifetime. They are perfectly constructed, and never fail to give satisfaction. Rats and mice cannot get at the food in these feeders. They require no floor space, being suspended from the ceiling. Hens eat from all sides. Exercise means larger egg production, and at the same time keeps flock healthy.

- No. 2—Cylinder-shaped, for hens, capacity 10 qts.....\$2.00
- No. 3—Square-shaped, for hens, capacity 20 qts..... 3.50

TIN CAN SPRAYERS

This sprayer is designed for spraying poultry houses, and will be found just the thing for this purpose. It will save many times its cost, in spraying materials.

Our Special Price.....\$.60

ECONOMY OATS SPROUTER

Its use means sure increase in your production of eggs.

SPRING FOOD CONDITIONS SECURED IN MIDWINTER.

The feeding of sprouted oats is no longer an experiment. Experience has proven time and again its value as a food for stimulating egg production. Oats sprouted in the right manner, furnish food most nearly akin to the fresh, green growth of Springtime, the prolific laying time of the year. By feeding sprouted oats through the winter, egg production can be kept up to a much larger degree than otherwise.

THE ECONOMY OATS SPROUTER employs the natural process for sprouting. It has a natural drainage, and is effective and economical to the highest degree. You want more production from your chickens. Get and use an **ECONOMY OAT SPROUTER**, and you will increase your production many per cent. Contains five Sprouting Pans and one Drip Pan 16x17 inches. Will not rust. Lasts a lifetime.

- No. 1
- Inches 35x18x18
- Price, each..... **\$7.50**

The Norwich Automatic Exerciser and Feeder

The machine consists of a hopper of sufficient size to carry a week's supply of grain for a flock of corresponding number. Has adjusting valve feed working in conjunction with an agitator disc.

The Feeder is operated by the birds, the feed being deflected in a circle some distance from the feeder keeps the birds in constant exercise.

Being mounted on legs, it can be used either in the house or out of doors.

- No. 2—14-qt. hopper, 15 lbs., 3.90
- No. 3—20-qt. hopper, 20 lbs., 4.90

6 IN 1 EXERCISER and FEEDER

This Feeder and Exerciser fills all the wants of the poultryman.

It is a combination of six feeders in one. With one of them in your poultry plant you can feel sure your chickens are receiving all the food and exercise they require. The compartments for dry mash, meat, oyster shell, grit and charcoal are so arranged that the materials flow readily into outside compartments within easy reach of the chickens on the perch. The body of the 6 in 1 can be lifted from the legs and placed on the floor, in which position it makes a perfect chick feeder.

- Price, 20-qt.
- Price, 40-qt.

NESCO CONE-SHAPED DRINKING FOUNTAIN.

This fountain is made from sheet iron heavily galvanized after it is made, this assures long life, as there cannot be any exposed parts where the galvanizing is peeled off. It is so constructed that the chickens cannot get on top of it or knock it over.

Grey Granite Keystone Fountains

The construction of this fountain has made it the favorite, and it is now considered the most practical, convenient and best made on the market.

Drugs are now commonly used in the drinking water for Poultry to prevent diseases. Drugs cannot be used in galvanized vessels on account of the chemical action on the metal, and it has been necessary to have extra drinking vessels in order to use them.

By using our **GREY GRANITE KEYSTONE FOUNTAIN** you can use drugs in them whenever you desire and they will not affect the finish or metal.

HOME CANNING BOILER **A CANNING FACTORY** **IN EVERY HOME**

Home Canning Boiler, \$18.00

The instructions are so simple that any one with ordinary intelligence and a little precaution can put up canned goods, preserves, jellies and marmalades in as good shape as the finest equipped factory.

The complete outfit consists of boiler, steam gauge, safety valve and crate. Weight, 80 lbs. For persons preferring to use tin cans, a soldering outfit can be furnished at an extra cost of \$18.00, and consists of gasoline blast furnace, two round capping irons and two tipping coppers.

Will successfully can fruits and vegetables in either tin cans or quart glass jars. Pork and beans, which are so difficult to bake in an ordinary oven, can be very nicely put up in this boiler. About 20 pints can be put up at once, and enough pork and beans for the entire year made in a day. The same applies to tomatoes, corn, asparagus, beans, etc., as well as family preserves, which can be put up with or without sugar, as desired.

The boiler will hold 24 tin cans or 14 Mason quart jars at one loading. The work can be done on an ordinary cook stove or range. With every boiler is sent a complete set of instructions and recipes for putting up the ordinary fruits and vegetables. These are the regular canning factory recipes and not the ordinary cook-book style.

HORSE RADISH GRATER

Table Pattern.

The Grater shown is very useful for grating Horse Radish and similar substances. It is made with steel pins or perforated Tin Cylinder. The Coconut Grater is very similar in construction to the Horse Radish Grater, but with cylinders arranged for finer work.

The Foot Power Horse Radish Grater is mounted on a frame and furnished with Treadle and Balance Wheel which gives additional power and steadiness in running. A crank is also furnished for operating it by hand.

With tin clad cylinder for Horse Radish.	Price.....	\$12.00
With steel pin cylinder for Horse Radish.	Price.....	14.00
With steel pin cylinder for Coconut.	Price.....	15.00
With steel pin cylinder for Horse Radish, with legs, balance wheel, treadle and crank.	Price.....	22.50

SLIDING KRAUT CUTTER

Sliding Kraut Cutter With Two, Three or Four Knives.

These Kraut Cutters are constructed on the same principle, but are a decided improvement on the old style machines. Each knife is independent of the other and can be quickly adjusted to cut fine or coarse at will.

In the old style kraut cutters the knives could rarely be adjusted just right, and if they were, they probably refused to stay. These Cutters are made of heavy hardwood and are fitted with a hardwood box which runs in grooves. Knife perfect, being controlled with ¼-inch round-head stove bolts.

1898 TURNTABLE APPLE PARER

A strong, rapid durable machine. Pares very close at both ends of the apple. When passing the end of the fork the knife recedes, leaving ample room for placing the apple on the fork. Does not core or slice. Push-off is automatic. Price, each, \$1.25

White Mountain Parer and Corer 1.00

COOK STOVE FRUIT DRIER

To meet the demand for a small Drier, suitable for use on any ordinary room, kitchen, cook or gasoline stove, we offer the U. S. Drier. It is a very simple, economical, efficient and convenient arrangement, and for farmers use just what is wanted, a durable drier at a reasonable price.

Thousands of housekeepers will have frequent use for just such an article as this, for making quantities of dried fruit, berries and vegetables for their own use or for sale. It is the most satisfactory and profitable investment you could make. A lady can easily lift it off the stove as it weighs but about twenty pounds. It has interchangeable galvanized wire-cloth trays which will not rust or discolor the fruit, etc., and will last for years. It is made from iron, except tray frames and supports. Its capacity is ample for domestic use, being greater than some machines which sell for \$15 to \$20.

Dimensions, 26 in. high, and takes up space on stove, 21 x 15 inches.

THE UNIVERSAL MEAT CHOPPER

The Universal is the most perfect meat chopper on the market. The feed screw is so constructed that it feeds the meat to the knives without mashing it. The knives work against the plate giving a good clean cut, producing the best grade of chopped meat. The grinders are made in three numbers. The No. 331 has a plate that fastens to the table, as shown in illustration. The No. 333 has an arm that clamps to the table, similar to the No. 1 shown below. The No. 304 has a plate like the No. 331. These grinders are all heavily tinned and will not rust.

No. 331	\$4.25

UNIVERSAL ALL STEEL LARD AND FRUIT PRESS AND SAUSAGE STUFFER

This machine is made of steel and is by far the most durable press on the market. The construction is so that it comes apart and can be easily cleaned, you do not have to handle the whole machine. It is easily and quickly changed from a lard press to a sausage stuffer. Also easily changed to a fruit or berry press. All attachments come with it.

This Machine is an unexcelled Lard Press, an equally good Sausage Stuffer, and is also extensively used for pressing the juices from fruit for making jelly, etc. The "Universal Steel Press" has many advantages over the old style cast-iron press. It is unbreak-

able, rigid and strong, and is more easily handled because it is lighter.

No. 44—4 quarts.....	\$12.00
No. 66—6 quarts.....	13.50
No. 88—8 quarts.....	14.50

CHERRY SEEDERS

Weight
4 lbs.

These cherry seeders are so constructed that they can be adjusted for different size cherries. They work very rapidly and do not tear up the fruit.

The No. 2 Seeder is made as shown in the illustration, having a long clamp arm that attaches to the table by means of a clamp screw. This arrangement gives ample room to place a dish under the seeder to receive the seeded cherries, as there is nothing in the way.

The No. 1 Seeder has four legs which screw to the table. Some users prefer this type.

We can hardly conceive of a person sitting down and seeding cherries by hand when they could buy a good seeder at the price we are selling them.

Each seeder is nicely finished and japanned.

Price No. 1.....	\$1.00
Price No. 2.....	1.00

G. & T. BOILER AND FEED COOKER

Heavy cold rolled steel furnace; extra large feed door; wrought iron handles, firmly riveted on. Kettles smooth, heavy cast iron. Door, frame and flue collar cast iron. Never buckles or warps from heat; designed to set on ground or brick foundation; especially adapted for cooking feed, rendering lard, making soap, scalding hogs, poultry, etc. Cast iron flues are constructed inside, thus retaining heat and economizing fuel. We always ship furnace for wood fuel unless otherwise specified. Also used for lime and sulphur.

THE NEW SHARPLES

Suction Feed Tubular Cream Separator

Purdue University officials estimated recently, after an extensive investigation, that the farmers of the United States were probably losing \$100,000,000 per year in butter fat by turning their cream separators at improper speed. Another test made by a company which manufactures speed indicators for cream separators and other purposes showed that out of 40,000 men and boys who tried to operate cream separators at proper speed, 95 per cent. failed to do so. The combined losses of all cream separator users operating their machines at random would average \$104 per separator annually. The importance, therefore, of the new **Sharples Suction-feed Tubular Cream Separator** may readily be appreciated when it is said that this new machine eliminates every one of the undesirable weakness heretofore found in cream separators as a class. This new suction-feed separator skims just as clean at 35 turns per minute or at 55 as it does at the normal speed of 45 turns. The only difference that speed of operation makes is to increase the capacity of the separator. When time presses, the operator of a new Sharples can speed up the new Sharples to 55 or 60 turns and he immediately has a separator of one-third greater capacity than he paid for, and which will do the work in one-third less time. The new Sharples not only separates thoroughly, but it also produces cream of uniform density at every speed. These three features are of prime importance, both to the dairyman who keeps three cows and the one who keeps 300. 28 new features in all. The entire construction of this new Sharples machine has been extremely simplified. It is convenient and durable. The Tubular bowl is suspended by means of a flexible steel spindle from a single bearing. A hardened steel cone holds the

weight of the bowl while it revolves on the balls. No parts slide. It is therefore almost frictionless. Heat or cold cannot cause expansion or contraction. The bearing of the new Sharples is at top. The Tubular bowl hangs from this bearing naturally. The three-piece bowl is light, steel tube, hollow throughout, and contains neither discs or other inside parts. It is therefore easy to clean and keep clean. In the new Sharples the bowl is driven by strong, simple, direct, self-oiling gears enclosed in a case to protect them from dust and grit. The gears run in a spray of oil constantly. There are no oil cups, oil holes or drip shelves on the Sharples. Gumming is impossible. The heavy, one-piece frame has neither shelves nor legs to work loose or snap off. The supply can is the largest used on any make of separator. It is pressed from a single sheet of steel, tinned to prevent rusting and so low that a 40-quart can can readily be emptied into it without lifting. In the hand separators the Tubular bowl makes 16,000 revolutions per minute. The best of the disc machines make as high as 8,000; none makes more. The reduced diameter of the Tubular makes possible a higher speed bowl, which in turn increases the centrifugal or skimming force. In the Tubular bowl the skimming is done by centrifugal force alone. There are no discs inside it. Where the skimming is done with the assistance of discs, the wear and tear from constant daily use reduce the skimming efficiency of the machine. Whereas the bearings of the Tubular bowl polish from use and run more freely. The double centrifugal force generated in the Tubular bowl skims out the last trace of butter fat. When cows have been long in lactation the globules of fat are smaller and consequently much greater force is necessary to bring about complete separation.

PULLEY—EXTRA WHEN EQUIPPED AT FACTORY, \$3.00. ORDERED SEPARATELY, \$5.00.

SHARPLES SPEED GOVERNOR PULLEY

The Sharples Governor Pulley can be attached to a Sharples Separator in an instant—it clamps to the base of the separator, one screw is tightened and no holes need to be drilled. From this Governor Pulley a round belt runs to a small grooved pulley on the worm gear shaft.

You can belt direct from a gas engine, an electric motor, or a line shaft to the Governor Pulley. It prevents any jerks from the gas engine getting through to the gearing of the separator. Variations in the speed of the engine are taken care of by the governor weights and shoes in the pulley, so that the separator always runs at an even and proper speed.

A starting and stopping handle is provided on the **Sharples Governor Pulley**, which is pushed in or pulled out to start and stop the separator—the engine or line shaft can be running while separator bowl is at a standstill. Price, \$18.00.

STEAM TURBINE TUBULAR DAIRY SEPARATORS

Just a jet of steam, not much larger than would go through a straw, drives it to full speed.

An armload of wood or a bucket of coal will furnish the needed fuel for the smaller machines for an hour's run.

DRIVEN DIRECT FROM THE BOILER. MADE IN TWO SIZES.

No.	Capacity.	Price.
5.	500 pounds per hour.....	\$125.00
10.	1,000 pounds per hour.....	175.00

For Separator Boiler, see page 117.

G. T. CO.'S PERFECTION SEPARATOR OIL

This Oil is put up expressly for the use of separators, and we recommend it to users of all hand machines, it being a light oil and having a very low cold test.

1-quart can	\$0.40

1-gallon can	1.00
5-gallon can	4.00

separator. The power can be instantly applied or shut off the separator—the engine or line shaft can be running while separator bowl is at a standstill. Price, \$18.00.

SHARPLES MILKER

IN the five years, during which Sharples Milkers have been at work in some of the best of the country's large and small dairies, they have attained a reputation for 98 per cent. satisfactory service. But, despite the fact that the Sharples Milker is now milking upwards of a quarter million cows, there are still a number of dairymen who are unacquainted with the merits of this wonderfully successful machine.

In a dairy where a two-unit Sharples Milker is installed, the saving of one man's salary can almost always be immediately effected, which, taken in the rough, averages \$25 per month, or \$300 per year. The additional savings in time and in board taken in conjunction with other profits accruing from the use of the Milker, should approximate half as much more, or \$450 in all.

When a Sharples Milker is installed, it is soon found that the same number of men are not needed to do the chores and odd jobs which fill in the gap between the morning and evening milking periods. Men otherwise unnecessary are sometimes kept on the payroll as milkers because the milking cannot be done without their help.

Using this two-unit Sharples Milker, one man can milk a twenty-cow herd in one hour. This feature of the Sharples Milker, namely, fast milking, which is made possible by the quick and entire relief of the "upward squeeze," has two big advantages. It gets the job done quickly and it tends to make the cow give more milk.

EXTRA UNITS.

It frequently occurs that after a two-unit outfit has been installed, that the user decides to add another unit. In doing this it is not necessary to make any changes. All that is necessary is to order another milking unit and go right ahead just the same as previously.

This unit comprises pail, pail lid, pulsator and teat cups.

A COMPLETE TWO UNIT OUTFIT CONSISTING OF PUMP, AIR TANKS, TWO MILKING UNITS INSTALLED COMPLETE IN YOUR BARN WRITE FOR PRICES

This outfit complete includes Pump Air Tanks, Two Complete Milking Units, with up to 200 feet of pipe and fixtures for a complete job. Installation by an expert, and expert's time for proper instruction after the milker is installed. For a barn taking not over 200 feet of piping.

F. O. B. West Chester, Pa.

The New five-inch single cylinder pumping equipment just gotten out places a Sharples Milker within the reach of everyone. Heretofore the Milker reached maximum efficiency in dairies of 15 or more cows. But the new pump makes it possible to achieve the same splendid results in dairies of 10 to 25 cows. It also makes a tremendous difference in the cost of an outfit, as you can now purchase a regular, standard, one-man machine of two units, big enough for a herd of 25 cows, yet cheap enough for a herd of 10 cows, installed ready for use at the total cost of

Write for Prices.

Installations are made under the superintendence of Sharples Mechanical Experts, who stay on the ground long enough to thoroughly instruct purchasers in the care and method of operating the machine.

TO PROSPECTIVE PURCHASERS

If you are considering the purchase of a Mechanical Milker, we would be pleased to make arrangements to take you to inspect several outfits that have been in operation for from one to two years. These outfits are about eight miles out from the city, and if you will notify us in advance we will make arrangements to take you out. The parties using these outfits milk about four o'clock and it would be better to leave the store about three o'clock. This would give time to get on the ground so you could see the Milker in operation.

These machines are operated by the owners, from whom you will be able to get first-hand information. They will be glad to answer any question you may ask in reference to the adaptability of the machine or the condition of the cows after the machine has been used through the entire milking period.

THE BOSS CREAM SEPARATOR

The Boss Cream Separator consists of a water vessel containing one or more milk vessels fastened together with our Patent Can Attachment.

The Water Vessel is made of the very best quality of 26 gauge galvanized iron and is provided with a large water faucet at the bottom and overflow pipe at the top.

The Milk Vessel is made of the best grade 3XXX 4AAAA Charcoal Tin Plate. It is oblong and deep with a sloping bottom, milk and cream will drain off rapidly. All seams are carefully soldered both on the inside and outside, and there is no chance whatever for milk to lodge and sour. All

milk vessels are coated with Aluminum which is the best rust preventative known.

	Height.	Width.	Weight.	
2½ gal. milk vessel.....	18 in.	13 in.	14 lb.	\$5.50
4 gal. milk vessel.....	20 in.	15 in.	17 lb.	6.60
6 gal. milk vessel.....	22 in.	17 in.	20 lb.	7.70
8 gal. milk vessel.....	24 in.	18 in.	22 lb.	8.80
10 gal. milk vessel.....	28 in.	18 in.	24 lb.	10.50

THE TWIN BOSS

The Twin Boss is especially adapted for farmers and dairymen who get more than 10 gallons of milk at a milking. A milk vessel that holds more than 10 gallons is hard to handle and will not produce as good results as smaller ones.

We would also recommend The Twin Boss to those who prefer a Separator with two milk vessels, so that one can be used in the morning and the other in the evening. This method has many advantages over the Separator with the single milk vessel.

No.	Height	L'gth	Width	Weight	
22 two 2½ gal. milk vessels..	18 in.	24 in.	13 in.	27 lbs.	\$11.00

28 two 8 gal. milk vessels..	24 in.	30 in.	18 in.	41 lbs.	14.85
30 two 10 gal. milk vessels..	28 in.	30 in.	18 in.	46 lbs.	16.50

THE TRIPLE BOSS

Too much can hardly be said in favor of the Triple Boss. It is fast getting to be our best seller and from all indications is the machine of the future. With two milk vessels, one for the morning's and one for the evening's milk, a cream can to keep the cream in the best condition for making first-class butter and room

enough back of the cream, can to set another vessel, in which to keep the butter during hot weather, it is certainly all that one can desire in the line of a Cream Separator.

THE BOSS

VENTILATING AND AERATING CREAM SEPARATOR

In the Boss Dilutors or Water Mixers the milk and water is mixed together or in other words the water is poured right into the milk so as to chill it instantly and cause the cream to raise in about one hour.

In ordering a separator of this kind be sure and order one that will hold twice the amount of milk that you wish to put into it so as to make allowance for water.

Sizes	Prices

3.....	5 milkers	10.50
4.....	8 milkers	13.00

Extra sizes on special orders. Prices include double cheesecloth strainer and spring pins.

ROOT SANITARY COOLER

Corrugated cylinders retard the flow and cause a more thorough cooling. These corrugations are just sufficient to retard the flow and make cleaning easy. Sediment on the inside of cylinders that in ordinary coolers reduce the efficiency, can be removed, as cylinders can be taken out and scrubbed as often as necessary to keep them clean.

The cylinders are made of special drawn copper tubing, heavily tinned, fitted with strong brass ends, the supporting racks also water columns and hangers, are made of the best grey iron castings, covered with a thick coat of galvanizing. All parts with which the milk comes in contact are copper heavily tinned.

All coolers are shipped

complete with wall brackets unless ordered otherwise.

ASEPTIC MILKING TUBES

For Cows with Sore Teats.

Insert one in the teat and the milk will flow.

Plain Tube, 35c.

Self Retaining Tube, 35c.

MINNETONNA HOME CREAMERY

**CHURNS
THE BUTTER
AND
WORKS IT.**

The Minnetonna process of churning is the most efficient method of agitating the cream during churning yet discovered. It works on the same principle that is used in some of the most modern and approved big creamery churns.

Style No. 3 hand-power plant; churning capacity, 12 to 15 gallons; working capacity, up to 25 pounds butter.

The style No. 3 is a very good size for dairy farmers wanting to make butter once or twice a week by hand, and having from five to fifteen cows.

No. 3-A Minnetonna Home Creamery; hand and power. Churning capacity, with barrel half full, 12 gallons. Working capacity, 3 to 20 pounds. Can be belted to your gasoline engine. Pulley, 8 x 2 1/4 inches. Speed, 200 R. P. M. Floor space required, 2 ft., 8 in. x 2 ft., 7 in. Shipping weight, 210 pounds.

It Works the Butter Properly and Quickly

Cross section view of Minnetonna Home Creamery, showing how the butter is worked between two rolls.

Here is another feature wherein the Minnetonna is way ahead of the old-fashioned farm churn. The working is done in the barrel after the churning is finished. The butterfat particles are all gathered together and thoroughly worked between the main roll in the center of the barrel and the small idle roll at the end of the basket. The main roll revolves when the working gear is thrown into place. The whole job is done with a few revolutions of the barrel.

	Factory Number	Churning Capacity With Drum Half Full	Butter Working Capacity	Shipping Weight	Style	Price
Minnetonna Home Creamery	No. 3 A	12 Gallons	3 to 20 lbs.	195 lbs.	Hand Operated	\$33.75
	No. 3 A	12 Gallons	3 to 20 lbs.	210 lbs.	Hand and Power	\$39.75
	No. 2 C	20 Gallons	5 to 40 lbs.	250 lbs	Hand and Power	\$44.75

CEDAR CYLINDER CHURN

There are a number of Cylinder Churns on the market sold at a lower price, but they are made of pine or other inferior wood, while these are all of selected cedar, free of knots.

THE STURGES STEEL CHURN **Sanitary—Easy to Clean.**

They are steel (not a piece of wood about them). The Churns are mounted upon a strong welded steel base, so that with ordinary care they will last a lifetime. Being steel, they will not absorb moisture, so cannot become soaked. The inside is all smoothly and heavily tinned, so they can be easily cleaned, and there is no place for microbes to lodge. No seams to open up nor hoops to drop off in the sun.

No. 1—5-gal. Churns, 1/2 to 2 1/2 gal.....	\$7.50 each
No. 2—7-gal. Churns, 1 to 3 1/2 gal.....	9.00 each
No. 3—10-gal. Churns, 1 to 5 gal.....	10.00 each

Reid's Self-Gauging Butter Printer

Prints butter very neatly and quickly. Weighs into pounds or half pounds as desired. Does it in one-quarter the time it can be done by hand, making prints of uniform weight. Moulds are square.

Feed Tube Rubbers, for all size Sharples Hand Machines, each **10c.**; per dozen, **\$1.00**.

"SNOW-BALL" FREEZER

Has three motions. The can revolves from right to left, the outer beater from left to right, the two wood scrapers removing the frozen cream from the sides with the unfrozen cream in the center, and throws all back to the side to be again frozen

and removed by the scrapers. The continuous action of the can and two beaters moving in opposite directions keep the cream ever changing position, producing in about three minutes a very smooth, well-beaten, velvety cream. Virginia white cedar, bound with electric welded wire hoops. Fitted with new cross bar lock and reinforced cross bar.

Sizes	2-qt.	3-qt.	4-qt.	6-qt.	8-qt.
Retail Prices	\$4.50	\$5.40	\$6.25	\$8.00	\$10.40

The "FROST KING" Steel Frame Freezer Single-Motion

Is a single-motion freezer, and is accordingly sold at a lower price than our other makes. It is, however, of exactly the same high-grade construction. The mechanism is very easy to operate, and the can being of the narrow-model type makes the freezing very rapid. The operation of this freezer is extremely simple.

The wood scrapers on the dasher press automatically against the sides of the revolving can. These remove the frozen cream and throw it to the centre where the spoons on the beater mix it with the cream still unfrozen and return the whole to the sides to be refrozen. The "Frost King" Steel Frame freezer will produce a rich and evenly frozen ice-cream in about three minutes.

FAIRBANKS SINGLE BOTTLE CREAM TEST SCALE

No. 10612 Cream Test Scale, Capacity 18 grams, Pan 2 1/4 inches diameter, fitted with Agate Bearings for permanent accuracy. Bottle is balanced by sliding poise with balance nut and the cream by hanging poise placed on notched graduations to allow 3, 4 1/2, 9 and 18 grams for weight of sample. Balance is easily given by pointed beam and indicator plate with five graduations on each side. Scale fitted with leveling screws and two levels. Finish—Nickle-plated and Aluminum paint. Price, —.

Sensitive and accurate to 1/2 gram (one drop of cream or less).

SULPHURIC ACID FOR TESTING

9-Pound Bottles\$2.25
Larger quantities, price on application.

KEYSTONE DEHORNING CLIPPER

The practice of dehorning cattle is coming more into vogue. It is a mercy to the animals. Prevents goring. The blades on the Keystone are made of best steel. No twisting motion or second cut on horn. Parts are all interchangeable, and can be replaced. It is approved by veterinary surgeons and leading dairymen. The horns must go, and they cannot go too soon.

Clipper with leader and rope, extra blades and screw, fully warranted. List Price, \$19.20. Our Special Price, \$15.75. Clipper alone, List Price, \$16.00. Our Special Price, \$13.50.

KEYSTONE CALF FEEDER

A simple device, based on natural laws, for feeding calves without teaching them to drink. The food is sucked through a rubber nipple and is mixed with the saliva and the digestive juices in a natural way. This feeder will prevent scours. It will make the calves fat and healthy. Used by more than 30 agricultural colleges. Price, \$1.50.

THE BANNER ROOT CUTTER

Simple in construction. Easy to operate. Has a self-feeder. Separates dirt from cut feed. Cuts with a clean cut. Does not crush, grind or tear the feed.

THE No. 20—FOR HAND USE.
Has a capacity of 30 to 50 bushels per hour. Weight, 120 lbs. Retail price, \$13.50.

Special Discount for Cash.

No. 25—FOR HAND OR POWER.
This is a new style machine.

It can be used by hand or light power. Is very strong and durable. Capacity 30 to 60 bushels per hour.

Weight, 100 lbs.

Price with crank.....\$15.00

Price with pulley and crank..... 17.00

Supplied with crank also for hand use. Capacity by hand, 30 to 50 bushels per hour. Weight, 150 lbs. Capacity by power, 2 to 3 bushels per minute. Our Retail Price, \$24.00.

No. 35—BANNER ROOT CUTTER.

Heavy construction for hand or power, weight, complete, 185 pounds; capacity of hopper about 3 bushels.

This is a cylinder type cutter and is made strong to stand power. The hopper is large and deep. The Cutting Drum to which the knives are attached is strong and will not break or wear out. It is positive feed as the roots lay on top of the Cutting Drum. It has 30 gouge-shaped knives.

Price complete, with Pulley and Crank.....\$24.00

No. 31—BANNER ROOT CUTTER.

Made entirely of iron and steel. A positive feed, it must cut the roots, can't get away from the knives. It has 19 gouge-shaped knives, fastened from the inside with two bolts to cast iron cone-shaped drum. They project 3/4 of an inch, and every time the drum turns around once, the knives hit and cut the roots 19 times. The drum is driven by gear wheels, making it an easy running Root Cutter, with good capacity. The hopper is 24 inches in diameter at the top, 11 inches at the bottom and 16 inches deep.

Price, complete.....\$20.00

RICE'S CALF WEANERS

Also Prevents Cows from Sucking Themselves.

These Refrigerators are constructed with an inside case of odorless and tasteless lumber, matched and clamped together, well nailed and glued, and fastened to hardwood cleats, making it a thoroughly air-tight strong cabinet in itself. The outside case is of solid hardwood lumber, and is nailed and glued to the cleats which bind the inside case, thus making it one of the strongest and most durable Refrigerators ever built.

The ice rack is made of galvanized steel bars, welded together. The strongest and most common sense ice rack made. The shelves are of genuine steel wire, woven on a heavy steel wire frame and heavily tinned.

They are finished in three coats of best quality of filler and waterproof varnish, giving them a gloss finish that looks well and that will wear. The inside construction is neat and sanitary, containing many features covered by patents. These add much to the convenience of the user.

LAWN MOWER REPAIRING AND SHARPENING

SEND in your **LAWN MOWERS** early for sharpening and repairing. This department, in season, is run to its full capacity, and in consequence we are compelled to adopt the policy of "first come first served." We wish to urge upon our friends the necessity for complying with the above request. If they do no one need have to wait while the grass is growing. **Look over your machine during the winter** (this applies to other kinds of machinery as well as Lawn Mowers), and **see what repairs are needed. Do not wait until spring work is crowding you.** We employ efficient mechanics to do our machine repairing, and turn out jobs in the best possible manner and as expeditiously as the quality of the work will admit. To properly sharpen a Lawn Mower requires someone who thoroughly understands his business, and even though it may be properly sharpened, unless it is adjusted to a hair it will not cut. After we turn out a machine it should be severely let alone, and if it does not cut send it back to us, and do not attempt to adjust it yourself. There is no mower that leaves our shop that is not adjusted to cut tissue paper, and if it does not do the work satisfactorily it is owing to hard usage before reaching its destination. The cheap machines that are flooding the market are made of cheap material and will wear only a short while, and can rarely be repaired at all.

BALTIMORE HORSE LAWN MOWER

The Baltimore Horse Lawn Mower is made of best material; most satisfactory adjustment of knives; strong and durable; open castor wheels which do not press down the grass; heavy roller, which is a necessity to keep the lawn in good order; simplest and strongest machine in construction on the market, and most economical as far as repairs are concerned.

It is made with shafts and seat, and also with draft rod. For hilly lawns, we recommend shafts and seat, but for level lawns with many trees and shrubbery, we recommend the draft rod, as it enables the driver to work the machine close to them. See it work, and you will be convinced that it is the most practical machine made.

THE SHAWNEE TRIPLE MOWER

"SULKY"
MODEL 1918

The Shawnee Mower is the first of its kind—the pioneer gang mower of the world.

It combines the work of three mowers in one.

In its complete form it has a cutting width of over seven feet.

As a "sulky" a cutting width of only thirty inches.

With cutters raised and under pressure of the "spring" it supersedes the ordinary hay cutting machine on the "rough."

This triple combination possessed by **The Shawnee Triple** alone is a striking and entirely novel development in lawn mower construction.

It has been rigidly tested for six years.

It is used by the leading golf clubs and on the finest lawns in America.

Its draft is the easiest of any horse drawn mower in use.

The "spring" holds the cutters closely to the ground and is the only known method of stopping the jumping of these cutters along the surface.

All the gears are steel and malleable iron, machine cut.

No breakages ever occur.

splash lubrication.

All the gears and journals have ball bearings running in oil in dust-proof housings—

Its fundamental principles of construction, including the "spring," are protected in foreign countries and the United States by Worthington patents owned by this Company.

A descriptive circular showing that it is the most economical grass cutter, owing to its durability, speed of operation and applicability to the triple uses and the conditions above mentioned, will be promptly furnished upon request.

 Pony Mower.

"ELECTRIC" **LAWN TRIMMER**

Necessary for every well-kept lawn

Trims grass as fast as the operator walks. Does away with grass shears. Saves time and back aches. Clips grass of any height and weeds of ordinary growth. It will quickly clip rough edges on a lawn, and make it the pride of the neighborhood. Works under shrubbery, close to walls, trims edges of walks and around trees where a lawn mower cannot be used. It will cut the grass on banks or terraces because of its light weight and easy operation. Overcomes a heretofore hard and laborious task, and makes lawn trimming a pleasure, because it is so easy.

The **"ELECTRIC"** has been thoroughly tested, and gives complete satisfaction.

PRICE. \$2.00

HORSE LAWN BOOTS

Fastened firmly to hoof instead of around ankle, giving free action to horse's feet. Rolling toe prevents cutting of turf. Width inside, No. 2, 5½ inches; No. 4, 6½ inches; No. 6, 7 inches—the right sizes for Nos. 2, 4 and 6 horseshoes. No. 0 Mule and No. 1 Pony. Special sizes to order. Width inside, 4 inches; 4½ inches. Factory List Price, \$19.00. Our

Fuller & Johnson Motor Lawn Mower

A BETTER LAWN AT LOWER COST.

The problem of keeping the lawn in an attractive condition is one which confronts all superintendents of parks and cemeteries and owners of private estates.

On any acreage at all the hand mower is out of the question, while the horse-drawn mower injures the turf and requires the use of the hand mower for trimming, besides entailing the maintenance of the horse.

The cutting cost embraces three factors: investment in the mower and interest; up-keep, not including interest; expense of labor.

The aim is to maintain lawns in an unbroken surface with an underlying texture that will insure an even growth.

The Fuller & Johnson Motor Lawn Mower represents a moderate investment, the interest on which is small. It will cut five acres a day at a cost of a gallon of gasoline, a pint of lubricating oil and the wage of an intelligent day laborer. The up-keep amounts to little if the mower is kept oiled, cleaned and sheltered from the inclemencies of the weather. It will cut open acreage without ridges or marring the turf; it will cut close to walls, trees and other obstacles; it will negotiate hills of 35 per cent. grade on its own power; it will cut low and spongy spots evenly and without leaving a trail to spoil the continuity of the surface.

The Fuller & Johnson Motor Lawn Mower therefore combines power cutting capacity with the flexibility of a light hand mower. It does a finished job in one operation.

Unit-built, it is perfectly balanced and is the one practical motor-driven lawn mower. In view of the scarcity of day labor, it is the economical solution of all lawn cutting problems. It will replace two men out of three and will pay for itself in a single season. **Send for Illustrated Catalogue.**

The Fuller & Johnson Motor Lawn Mower consists of a light and powerful gasoline motor mounted on the frame of a traction roller and arranged to propel a 25-inch lawn mower unit.

Motor: The motor is a single-cylinder 4-cycle vertical motor having 3-inch bore and 3-inch stroke, running 1200 R. P. M. The speed of the motor is controlled by a governor.

Lawn Mower Unit: The lawn mower unit consists of a cutting reel 25 inches long and 6½ inches in diameter carried in liberal bronze bearings in a light rigid frame. This frame is carried on two caster wheels and a long wooden roller. The lawn mower unit is attached to the main frame of the machine in the most flexible manner, so that the mower may follow the inequalities of the surface of the ground closely.

PRICE.....\$295.00

WATER BALLAST LAWN MOWER

No-Tip attachment holds handle upright when not in use.

This roller can be filled with water to any desired weight. It can thus be regulated to suit soft turf, firm lawns or driveway, tennis court, etc. It can be emptied for storing away, making it light and easy to handle. The drum is high carbon steel with all seams electric welded. Edges are rounded back to prevent cutting of lawns, courts, etc.

The axle is mounted on roller bearings, making the roller run very easily.

CRITCO-D DOUBLE GANG PULVERIZER **WITH POLE**

Showing
 One-Piece
 Wheel.

This machine is built sufficiently heavy to do a very thorough job of pul-
 verizing.

The wheels are cast in one piece semi-steel, and mounted on 1 1/4-inch steel
 axles. The frames are 2 1/2-inch carbon steel angles.

This gives the weight in the machine, which is better and more convenient
 than having to add it in weight boxes.

The back row of wheels splits the ridges left by the front wheels, thus
 crushing every lump. This splitting action also stirs the surface to leave a fine
 mulch.

Field Showing Work of Double
 Gang Pulverizer.

FOLDING CHAIR

This Folding Chair is made of the best material, and fills a real want. It allows the automobilist to increase the capacity of his car without crowding, and is an ideal chair for motorboats. It can be folded sufficiently small to be carried under the seat of an automobile or stored under the bow of a motorboat.

No. 106—Japanned Art—List Price, \$4.80.
Our Special Price, \$3.00.

Third Seat

A Third Seat allows 3 people to ride comfortably in any carriage. It is also very useful about the house as a stool or child's seat. Being made of selected material, it is strong and durable. It is simple in construction, and cannot get out of order.

List Price, 96c.; Our Special Price, 60c.

REMOVABLE STEEL CLOTHES-LINE POST

Made of 1 1/4-in. special high-grade angle steel which makes them very strong. These posts are provided with a separate socket or base, which is driven into the ground, and this base is furnished with a drive cap. The posts are set into the base, and can be readily lifted out when not in use. This is a great convenience, as it enables a lawn-mower to be pushed over the base, and saves the trouble of trimming around the posts with hand shears. The posts are more slightly than wood posts, and practically everlasting.

Complete with base.....	List Price, \$4.00
Complete with base, Our Special Price, \$2.50

No. 1 Dryer carries 110 ft. line.....	\$7.00
No. 2 Dryer carries 150 ft. line.....	7.50

CYCLONE ORNAMENTAL GALVANIZED LAWN FENCE

The Style F Cyclone Lawn Fence is considered by us the most attractive and most practical pattern made by the factory and we catalogue this style exclusively. The manufacturers make a number of other styles, special circulars of which we are pleased to send you on application. The characteristic features of Cyclone Fence are the careful uniformity of weaving, the full-gauge wires which are used, the extra deep crimping of picket wires, which adds greatly to the beauty and strength of fence, the secure manner in which these pickets are locked in the double cable wires and the general strength of the whole fabric. The wire is carefully selected, and all of these features count for the extra lasting qualities of Cyclone Fence. With every full roll of Cyclone Fence, a fence stretcher is furnished gratis. The lawn, the yard and the home standpoint, a wire fence is far more desirable than the old style board fence.

Style F Cyclone Fence is made of No. 9 heavily galvanized wire spacing between uprights at the bottom, being 1½ in., and at the top 2½ in.; the cables are of heavily galvanized wire, spaced about six inches apart, except the two at top, which are spaced 2½ in. apart; furnished regularly in rolls of 10 rods, or 165 feet. Any length cut to order.

Prices of Cyclone Fencing.

Height	List Price.	Our Price.
24 in.	18c.	11½c.
30 in.	20c.	16c.
36 in.	22c.	17½c.
42 in.	24c.	19½c.
48 in.	28c.	22½c.

These prices are for the fence fabric only, and do not include posts. For prices of complete fence see below.

This Illustrates Style F Cyclone Fence Erected on Wooden Posts.

CYCLONE IMPERIAL COMPLETE FENCE

The Imperial is our leading and most popular style of fencing. It is a combination of simplicity and artistic beauty—a rich-looking dignified, handsome design, suitable for any home. Has two-inch tubular corner posts, and line posts are made of two 1½-inch tubes placed one-half inch apart, allowing fabric pass between. Rail is 1½ in. in diameter, top cable has four-strand heavily galvanized braided wire, frame work is painted, or can be furnished galvanized at an additional cost.

Height.	Our Price.
30-in.	69c.
36-in.	74c.
42-in.	78c.
48-in.	85c.

The above prices include fence fabric, painted posts and top rail, and top braid. If gates are wanted, do not deduct from fence for gateway but add \$2.00 net on account of walk gate, and \$4.00 net on account of drive gate.

Imperial Complete Lawn Fence.

CYCLONE TRELLIS

Train your flowers on this trellis, which is an attractive and practical trellis at a few cents per foot. Cyclone Trellis is made of strong, durable, galvanized wire, which will keep its shape, and last almost indefinitely. Easily put up and cut to any length desired.

18 in. width. List Price, per ft., 8c. Our Price, 7c.

24 in. width. List Price, per ft., 10c. Our Price, 9c.

Cyclone Trellis.

COLONIAL COMPLETE FENCE

This is also a very popular fence, as the illustration shows. No top braid is used, and top finished of fabric extends above rail. Prices of Colonial Fence same as Imperial Complete Fence.

PERFECTION FLOWER BED GUARD

Perfection Flower-Bed Guard and Lawn Border.

This flower-bed guard is 18 in. high. Has 4 cables which are made of two No. 12½ wires. Has No. 12 crimped uprights. All heavy galvanized pickets project for insertion in ground. Requires no posts. Can be cut to length to any bed. Provides protection against dogs and chickens. List Price, per foot, 13c. Our Price, 11c.

CYCLONE ORNAMENTAL GATES

STYLE F

The frames are made of high-grade heavy steel piping, and are regularly finished in black paint, although galvanized frames can be furnished at an additional cost. Black-painted frames are always supplied unless otherwise specified. Filling of these gates is the regular Style F—Cyclone Fabric, described on opposite page, and as shown by illustrations, the gates have ornamental scroll tops. In giving the dimensions of gates, state first the height and then the width. The width of Cyclone Gate means the distance between the posts. The factory makes proper allowance for hinges and latch.

Cyclone Style F Double Drive Gate.

ECLIPSE GATES

THE ECLIPSE WALK

GATES are built of high-grade material in a substantial manner, and are covered with a diamond mesh fabric, tightly woven of galvanized wire. The character of the fabric is such that each gate acts as a truss, thoroughly bracing the gate on all sides and making it sag-proof.

U. S. AND AMERICAN FIELD FENCES

The manufacturers of these fences are constantly keeping abreast with the times. With their wonderful facilities they are able to offer the farmer more value in design than can be obtained elsewhere for the money. The styles shown here are carefully selected, based on our wide experience in these lines. Heavy wires and improved galvanizing methods all tend to make these fences more durable. With the exception of the close-mesh hog fences, we are listing the improved U. S. style of fence. The features of the U. S. Fence are full gauge, hard, tough, springy steel wire. The stay of the U. S. Fence is one continuous wire from top to bottom, and is locked to the strand wires with a simple lock or knot, which grips the strand tight and will not allow slipping. The tension curve of the U. S. Fence is placed within the lock or knot. It is a real curve, mechanically formed. It is designed especially for great elasticity to take care of contraction and expansion due to hot and cold weather.

The styles of U. S. Fence mentioned here meet the popular needs. Spacing is all for ordinary farm purposes. We show the exact sizes of wire used. No. 9 Top and Bottom and No. 11 Stays and Intermediate. Furnished in 10- and 20-rod rolls.

HEAVIER AND LIGHTER WEIGHT FENCES.

We can furnish any of the above fences made of all No. 9 wire where an extra heavy fence is desired. Of course, this increases the price, but a great many practical people consider it the most economical fence in the long run. In regard to the lighter fences, will state that we find we sometimes are put in competition with manufacturers who seek for trade on a basis of price alone, who make fencing out of wire much lighter than our standard specifications. To compete with such manufacturers we are prepared to furnish U. S. fence lighter than the standard fences mentioned above, but we do not recommend the lighter weight. Information and prices in regard to heavier and lighter fences will be cheerfully given on application.

AMERICAN CLOSE-MESH HOG FENCE.

Where a very close fence is wanted for hogs, we recommend this style. It is made with No. 10 top and bottom wires, No. 12 intermediate wires and No. 13 stay wires. It also makes an excellent barnyard fence, as the spacing of the lower wires is close enough to turn small stock and poultry, with the exception of the smallest chickens.

American Close-Mesh Hog Fence erected on American Steel Fence Posts. Cheaper than wood posts and more durable. Send for catalog.

U. S. POULTRY AND GARDEN FENCE

The illustration at the right shows the U. S. Poultry and Garden Fence, and we also show below the illustration size of wires used in its construction. The U. S. Poultry Fence is built of the same grade of wire as is used in the U. S. Field Fence, but of lighter gauge and the same excellent wrap is used. It is an ideal fence against poultry and small animals. The spacing is graduated from 1½ inches at the bottom to 5 inches at the top, as shown by the illustration and the distance between the stays or uprights is 6 inches. We carry this fence in stock in the styles mentioned below. It is very extensively used as a protection for poultry yards, gardens and orchards. It meets the requirements; therefore it is a great favorite. Furnished regularly in rolls containing 10 rods or 165 lineal feet.

1635	6	35	16	9.2	.81	.65

On page 142 we show a line of lighter weight and very closely spaced poultry fences. Don't worry about your fence posts. Buy the American steel posts shown on page 143.

BANNER POULTRY FENCE

KING OF STAPLE FENCES.

Barb Wire, Ribbon Wire, Twisted Two-Strand Wire, Plain Galvanized and Annealed Wire, Panel Wire.
Prices on Application.

THE "NEVERSLIP" STRETCHER

The Neverslip Stretcher has no teeth to cut or injure wire. Simple and strong in construction. Has hickory handle and malleable jaw. One man operates it, and both hands are left free to drive staple. Price without staple puller, \$1.00; with staple puller, \$1.25.

See page 143 for American Galvanized Fence Posts.

Size of Wire.

Banner Fence meets the demand for a closely woven fence heavier than the light poultry nettings. The spacing between the six line wires at bottom of fence is only 1½ inches and gradually increased to 3½ inches at top, so the essential feature of a satisfactory poultry fence—closeness of mesh—is well taken care of in this fencing. The upright wires or stays run continuously across the fence and lock firmly around the intersecting line wires in a loop knot, forming a smooth, solid joint without any sharp, rough edges. Top and bottom wires No. 15; all other wires No. 17 gauge, hard steel, thoroughly galvanized. While designed especially to meet the urgent and growing demand for a thoroughly good poultry fence, the close mesh of the fabric, together with the wide range of heights, makes Banner Fence particularly desirable for enclosing not only Poultry and Rabbit yards, but for all other places where it is desirable to exclude the smaller and lighter destructive animals.

PAGE UTILITY FABRIC

Used for
CORN CRIBS,
CAGES,
CHICKEN PENS,
FRUIT BINS,
ROOT BINS,
STORE ROOM PARTITIONS,
TENNIS COURTS,
TREE GUARDS,
WINDOW GUARDS,
SCREENS FOR BALL PARKS,

and an unlimited number of other places where a close mesh and extra strong fabric is desired.

Have you ever realized the large number of uses that a close mesh, heavy wire fabric would be put to if you only had it on hand when you wanted something of this kind **right away**?

Portable Corn Crib are very convenient, and in some sections are a necessity. No fabric ever made equals our Utility for this purpose. **It goes up like a board** and is so well made that it can be used over and over again, year after year.

As a suggestion for round portable cribs, we give the following dimensions:

Fifty feet 48-in. Utility Fabric makes a crib 15 feet in diameter. Capacity 400 bushels.

For permanent cribs this fabric insures the best possible ventilation, saves time and expense in placing on frame-work, costs less than the old methods and will last longer.

Note specifications and price above.

Seventy-five feet Utility Fabric used one section above another will make a crib 12 ft. in diam., 8 ft. high. Capacity 400 bus.

SPECIFICATIONS

Mesh.—1½ x 2¼ in.

Wires.—No. 12½ longitudinals.

—No. 11 crimped transverse.

Rolls.—Standard, 200 lineal feet.

Width.—Standard, 48 inches.

Special widths will be made from 3 feet to 4 feet on orders of sufficient size to pay for loom changes.

PRICE.....6½ cents per sq. ft.

CYCLONE TREE GUARDS

Made 6 feet high of heavy galvanized wire, in 9, 12 and 15-inch diameters. Ready for setting up by claspings the hooked ends. Furnished with spiral spring, which attaches to tree and prevents rubbing or bruising of the bark. Protects without shading or otherwise injuring the tree.

"Cottage" Lawn and Garden Fence

This fence is also used extensively by our leading parks and athletic associations for baseball and tennis backstops. Made of heavy steel wire of extra high quality and of the size shown by the illustration. Size of mesh is also shown by the illustration. The three-strand rope selvages contribute much to the strength of the fabric and give it a finished appearance. After being woven the fencing is given a heavy coating of pure zinc by special process to make it rust-proof for many years. This fence meets all the requirements of a perfect fence, being strong enough to turn large animals, close enough to turn most poultry, and is practically non-climbable. It is neat and durable. Put up in rolls of 165 lineal feet.

CHAIN LINK FACTORY FENCE

We are offering an improved Factory Fence with chain link woven wire fabric. This type of fence has become very popular where an effective protective fence is desired. The usual fabric is 2-inch mesh, No. 9 gauge wire which can be furnished with either plain barbed top, or with the barb finish and three extra strands of four-point barbed wire above, as shown in illustration. The end and corner posts are 2½ inches; line posts 2½ inches and gate posts 4 inches outside diameter. The wire used in fabric is a special basic steel galvanized wire and the fabric is attached to the post by an improved method which does not necessitate drilling posts. The bands are all wrought iron, no castings used. The bracing for end and corner posts is of superior character designed on scientific lines. The result is an extra good fence, and we will be pleased to furnish blue prints and photographs showing the detail of this fence construction and submit special estimate on any factory fencing job desired.

GALVANIZED STEEL FENCE POSTS

CHEAPER THAN WOOD, AND MORE DURABLE—GALVANIZED INSIDE AND OUT.

These posts are neat, strong, durable and easy to erect. They will give you much more and better service than can be expected of wood posts because all being alike in size and quality of material, you get benefit of every post in the fence from year to year, while wood posts rot and decay. The line posts are strong enough to hold up any wire fencing, and furnish all necessary resistance. The end and corner posts are so strong that they will maintain any wire fence made. They are made of high quality steel, heavily coated with zinc, inside and out. They are adapted to all conditions, and should be used wherever a good wire fence is desired, no matter how heavy the wire. To prove the durability of these posts, we point to the fact that they have been in service since 1898 in every section of the United States, and reliable reports indicate that the oldest posts are today apparently as good as when set.

BURNING THE FENCE LINE.—It is simply impossible to clean up farms while the fence lines are growing a crop of weeds every year, distributing their seeds in all directions and forming a sure and safe haven and breeding place for all sorts of insect pests. Burning the fence line is the logical solution, and if you use American Steel Fence Posts you can burn the fence line at your pleasure.

Is constructed entirely of steel, except cross handle bar, and is equipped with shovel, calf-tongue, weeder, cultivator and mould-board.

Price, \$6.25.

No. 2 is similar to No. 1 above, except handles are wood, curved plow-handle style.

Price, \$6.25.

Packed weight, 28 lbs.
Height of wheel, 24 ins.

FIVE-TOOTH WEEDER ATTACHMENT.

Can be attached to any of the Garden Plows.

Price, \$1.10 each.

NEW PERFECT INDEX

New Model Seed Drill

The Seeder Adjustment in the New Model is accomplished by use of a slide with a pear-shaped opening passing under the bottom of seed reservoir. The names of principal seeds are plainly shown on index. The flow of seed can be instantly stopped by a swinging cut-off. This cut-off prevents all loss of seed. Our Special Price, \$15.50.

EUREKA SEEDER

Have You a Hot-Bed?

It is the only machine suited to sow in a hot-bed. Sows up close to the sides in very straight rows. Sows the smallest packet of seeds as well as a large bulk. Price, \$1.50.

IRON AGE SINGLE WHEEL HOE

Is a steady, strong, light and easy-running tool, with attachments as shown in cut.

No. 320-R.
Price, \$9.00.

No. 320. No Rakes.....\$9.00

IRON AGE DOUBLE WHEEL HOE

No. 301-R. As shown in cut. Our Special Price, \$13.00.

Cahoon's Broadcast Seed Sower

For sowing Clover, Timothy, Millet, Oats, Wheat, Hemp, Barley, Rye, Rice, Buckwheat, etc. Standard Seeder of the World—A Model for Accuracy and Durability—Malleable Iron Frame—Steel Hopper and Gate—Eras Discharger.

The breadth of the cast will be according to the weight of the seed. Wheat and Rye, 30 to 36 feet. Oats, 21 to 25 feet. Barley, 27 to 33 feet. Clover, Millet, Hungarian Seed, 20 to 24 feet. Hemp, 27 to 30 feet. Timothy, 15 to 18 feet.

OUR SPECIAL PRICE, \$4.50. Parcel Post Weight, 8 lbs. Wisconsin Seeder\$4.00

The Original Improved Cyclone

Although this machine has been much improved and simplified in recent years, yet the same general principles which characterized it when sold from \$10.00 to \$12.00 each are still retained. It differs materially and very advantageously from all other Sowers in having a slope feedboard with an oblong hopper which terminates in a metal edge, on which edge oscillates a feed plate which does not allow the seed to become clogged, but makes a positive force feed

and insures a uniform flow and even distribution of seed. Anyone desiring a convenient, practical and an all-round first-class grain and grass seeder, a good, large sower that will meet the most exacting demands, we cannot recommend the CYCLONE too highly.

PRICE, \$2.00. Parcel Post Weight, 6 lbs.

GRASS SEEDS AND FORAGE PLANTS, See Pages 44 to 48.

Meeker Smoothing Disc Harrow

Steel Disc. A perfect Harrow and Land Roller Combined.

The frame measures 6 feet 8 inches by 6 feet, and has four sets of rollers, having 58 discs, 8 inches diameter on them. The discs grind all the lumps so fine that the seed must come up, leveling and leaving the land fine and smooth, and doing its work far better than the rake. Price, \$45.00. Special Discount for Cash.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

THOMPSON'S CLOVER AND GRASS SEEDER

Sows 14 to 16 Feet Wide, Any Amount Desired Per Acre. Will Sow 20 to 25 Acres Per Day.

This Grass Seeder is simple, without gearing, cams or intricate machinery. It cannot get out of order.

Perfection feed is attained in making it absolutely positive, yet a non-leaking carrier, when thrown out of connection. The quantity of seed to the acre is accurately shown by the index plate.

It is strong, yet weighs but 40 pounds.

No. 1—Complete Clover and Grass Seeder, the most popular style. 14-foot. \$9.50. 16-foot. \$10.00.

No. 5—Complete Seeder, with Double Hopper, sows Red Top, Orchard Grass, Blue Grass, Lawn Grass, as well as Clover. 14-foot. \$12.00.

MANILA ROPE FEEDER.

GRITCO No. 9 LAWN GRASS SEEDER.

Made especially for handling Lawn Grass Mixtures. These mixtures are generally composed of different kind of grasses, and the regular seeder will not handle them.

No. 9.....\$13.50

THOMPSON'S ROYAL CLOVER AND GRASS SEEDER

These Seeders are similar to the Thompson above, except they have Chain Feed.

No. 11—14 ft., single hopper.....\$9.50
No. 11—16 ft., single hopper.....10.00
No. 12—14 ft., double hopper.....12.00

LIGHTNING SEED SOWER

Cheap, durable, weighs only 12 oz. Simple; no repairs.

Will Sow 60 Acres per Day of Clover, Timothy, Millet, Alfalfa, Flax, etc.

Will spread seed evenly from 30 to 40 feet. Method of sowing is by swinging tube in horizontal position from right to left which closely resembles the old method by hand. Gives control over seed on a circle of 8 feet before it leaves the tube and the wind has no chance to blow seed into bunches before it strikes the ground.

PRICE, \$1.00.

Parcel Post Wt., 1 lb.

THE A NO. 1 COBBLER'S OUTFIT

This Cobbler's Outfit should be in every home. Do your own shoe repairing. It is expensive to have a cobbler repair them. Each set includes the following: 1 Stand for Lasts, 1 Extra Large Last, 1 Medium Last, 1 Small Last, 1 Shoe Knife, 1 Hammer Head, 1 Hammer Handle, 1 Sewing Awl, 1 Sewing Awl Handle, 1 Harness Awl, 1 Harness Awl Handle, 1 Peg Awl, 1 Peg Awl Handle, 1 Pkg. 4-8 Clinch Nails, 1 Pkg. 5-8 Clinch Nails, 1 Pkg. 2 oz. Shoe Tacks, 1 Pkg. 5-8 Heel Nails, 1 Pkg. (6) Shoe Needles, 1 Ball Shoe Wax, 1 Ball Shoe Thread, 1 Copy Directions.

Price, per set.....85c.

Parcel Post Weight, 7 lbs.

83 STEEL BEAM SERIES

The No. 83 Series is not so old as other members of the Oliver family, but their success has long since been assured, and they have become some of our most popular plows. There is no field in which they cannot be put to work with a feeling of confidence. The superior turning qualities of the mouldboard, the keen pointed, high share and the firm construction make them especially adaptable to sandy, gravelly or stony soils. They are capable of a clean, straight furrow, and are always at the will of the plowman.

The chilled landsides, which are straight, are of double flange style.

OLIVER NO. 1 GANG PLOW

The beams are landed at an angle to the furrow to provide a center draft. This construction distributes the strain evenly along both beams and entitles the plow to the merited and distinguishing name of "The Center Draft Gang Plow." It gives a natural draft and makes effective every ounce of mental in the beams.

The same good reasoning prevailed over other features of the plow. It was realized that constant passing of gritty soil over the plow bottom would necessarily wear, but to overcome this to a great degree the plow bottom has been prepared with shapes that offer a minimum amount of resistance. It plows a uniform depth in uneven ground.

Is raised or lowered with little or no exertion. Is adapted to any soil and every condition of plowing.

Turns to the right or left while plow bottoms are in ground. Can be handled as easily as a wagon. Is light in draft and perfect in work. In opening land a square and level furrow is turned.

Wheels are large and the plow runs steadier in consequence. Is fitted with dust and sand-proof boxes and caps. Plows two to ten inches in depth as desired at will of operator.

No. 1—Gang Plow, Steel or Chilled Mouldboard, Chilled Shares, Combined Rolling Coulter and Jointer, Weed Hooks, Four-horse Evener and tongue. Our Special Price, \$125.00.

No. 1—Gang Plow, same as above, but with Jointers only. Our Special Price, \$120.00.

CHATTANOOGA SULKY PLOW

Nos. 45-46-95 and 96.

The plow is light and very attractive and is so easily handled that either an old man or a boy can operate it. The seat is low, which makes it very convenient to get off and on the plow without danger.

The plow is very short, which enables it to penetrate the ground very quickly when out of the ground. This is an excellent feature in rough land. The plow is so short and easily handled that satisfactory plowing can be done in small fields; in fact, any kind of plowing can be as satisfactorily done as with a walking plow.

Why walk and plow when one can ride and do more and better work without increasing the draft on the team? The extra weight of the operator is carried by the wheels and rolling landside. The rolling landside is fitted with scrapers for keeping it clean. It works with less friction than can possibly be accomplished with a drag landside. The extra weight of the operator is an advantage in hard ground.

The levers are always in convenient reach of the operator, and on right hand plows are all operated by the right hand, and on the left hand plows by the left hand. We recommend right hand plows on this account.

A balance spring is attached to the landside axle, which adds greatly to the comfort of the operator when going over uneven ground.

The wheels are so constructed as to use hard oil or grease and have removable boxes and dust proof caps.

The front furrow wheel can be adjusted to suit any width of furrow.

The usual equipment, such as jointers, rolling coulters, or rolling coulter and jointer combined and weed hooks are furnished as desired.

With Chilled Bottom, 3-Horse Hitch and Weed Hook. No Tongue.

	List Price.	Our Special Price.
With Rolling Coulter and Jointer combined	\$80.00	\$75.00
With Rolling Coulter only...	77.00	72.00

OLIVER SULKY PLOW No. 11

Light, durable and effective. Simple and novel device for turning. Plows the most difficult soils and does it well. Can be used with or without tongues. Depth easily regulated. Turns square corners without lifting out of the ground. Made in both right and left hand.

No. 11—Sulky Plow, Steel or Chilled Mouldboard, Chilled Share, Rolling Coulter and Jointer combined, Weed Hook, less Tongue and Neck Yoke. Our Special Price, \$75.00.

No. 11—Sulky Plow, same as above, but with Jointer only. Our Special Price, \$72.50.

Oliver Reversible Sulky Plow No. 23

This reversible sulky plow is more easy to manipulate than any other on the market and more convenient and safe for the operator in hillside work. By means of the power lift, operated by a foot trip when riding, or a hand latch when walking, this "horse lift," which is brought into play by simply pressing forward slightly on the foot trip, the operator's work is diminished by fully one-half.

Sulky with Chilled Shares, Jointers and 2- or 3-Horse Hitch. Our Special Price, \$100.00.

CHATTANOOGA CHILLED PLOWS

Points of Merit: 1st. Low front, similar to Steel Pattern Plows; will not collect trash.

2d. Handle not bolted to mould, but to standard and brace that is attached to beam, thus preventing breakage of many moulds.

3d. Brace or rod between landside and mould, giving additional strength where it is most needed, making plow absolutely rigid.

4th. Special bolts which will not turn and can be readily taken out. All the base bolts are alike and interchangeable; only one kind necessary to keep on hand.

5th. Points are fastened on with two bolts; never fails; gives satisfaction.

STEEL BEAM LOW FRONT

Cut represents two and three-horse plow.

THE CHATTANOOGA-HANCOCK DISC PLOWS

SINGLE DISC PLOW

24-inch Disc

\$80.00

Weight,
600 lbs.

It handles more cubic inches of soil with less draft than any other plow made; it turns under stalks, trash and weeds completely; it breaks up "hard pan" and pulverizes the soil. It leaves the ground at bottom of furrow porous and natural; it prepares the soil to withstand either a wet or dry season; it insures better crops than any other method of plowing.

It is so simple in design, so few in parts and so perfect in construction that anyone can operate it.

It is not a sod plow; it is a pulverizer. You cannot pulverize sod. Everywhere else it is all right.

Single Disc, with double and triple trees, price.....\$80.00

Double Disc, double and triple trees, price.....100.00

DOUBLE DISC PLOW

24-inch Disc

\$100.00

Weight,
725 lbs.

What is said about the single disc pertains to the double. It is only a matter of number of horses. If 100 pounds be added to the draft of the single it will cover the double. It will be seen the difference in draft is comparatively slight.

We guarantee our Disc Plow to do good work, not only in hard, dry and sticky ground, but to do good work in any fallow ground, either clean or trashy; in short, to be good anywhere, at any time, except turf land.

**WEIGHT,
1200 LBS.**

CHATTANOOGA REVERSIBLE DISC PLOW

20-inch
Disc

\$60.00

Weight,
450 lbs.

The "Chattanooga" is the only successful Reversible Disc Plow built. On steep hillside, where a team can walk and draw a plow, it works perfectly. The combination of features in **The Chattanooga Reversible** makes it the most valuable of all **Disc Plows**. It can be used right or left hand, plowing around the land, or **Reversible**, throwing furrows all one way. Will plow between terraces **without leaving a water-furrow**.

Will do good work, not only in hard, dry and sticky ground, but will do good work in any fallow ground, either clean or trashy, on hillsides or level land; in short, it will work anywhere, at any time, when plowing can be done, except in sod land. We warrant against breakage for twelve months caused by defects in material or workmanship. Price, **\$60.00**.

TWIN DISC REVERSIBLE PLOW

2-horse
20-inch
Discs

\$75.00

Weight,
560 lbs.

It is an accepted fact today that the **Reversible Disc Plow** is the most practical, general purpose plow for level and rolling land or hillsides—the conditions found on nearly every farm.

Twin Disc Reversible Plow combines the two essential features that interest plowmen—**Simplicity and Economy**.

In reversing the plow remains stationary; the team turns the tongue and operator. The discs are raised and lowered with the center lever. **This is Simplicity.**

Twin Disc Plow costs no more than **Reversible Disc Plow** with only one Disc. **This is Economy.**

Same as above, except with 24-inch Discs, 3-horse, **\$100.00**

THE SPALDING DEEP TILLING MACHINE

Endorsed by agricultural authorities. It is the only mechanical means for mixing the top and bottom soils together, thoroughly pulverizing the two soils. The front disc cuts from four to eight inches, and turns the trash over into the bottom of the furrow. The rear disc follows in the furrow of the front disc and cuts from six to nine inches deeper. In this operation the soils become thoroughly mixed. The **Spalding Deep Tilling Machine** makes but one furrow at a time, although two discs are employed in its construction, one disc cutting deeper than the other. In other words, the machine cuts two furrows deep at a single operation. The machine can be adjusted to cut a furrow to a depth of from eight to sixteen inches deep, and make an excellent seed bed.

Write for prices and special circular.

O. K. Champion Potato Planter No. 25

Has a seed-dropping device consisting of the endless-cup system, one which is recognized as the most accurate. The seed

is picked up and deposited on a dial plate, which is equipped with pockets for the reception of the seed pieces, where any correction necessary can be made, insuring absolutely one piece to every hill. Tests have proven that this machine will plant absolutely 100 per cent. correct. The cups are

adjustable and permit perfect planting for large or small pieces. The distances of dropping are 12, 15 and 18 inches.

The hopper is of steel construction, fitted with a sliding bottom, which causes a steady feed, and a guard permits the cups to single out the seed pieces, no matter what the shape may be. Two shoes are used for making the furrow. The first opens the trench for the reception of the fertilizer. The second opens it deeper, spreading a thin coat of dirt over the fertilizer so as not to allow same to come directly in contact with the potatoes. The discs are 14 inches.

The seat at the rear enables the operator to be in position where he can oversee the entire work and gives him access to the levers, one of which raises or lowers the shoe and discs; the other throws the seed feed in or out of gear. Whenever regular sized pieces and a steady team are used it is not always necessary to use two men on this planter. The driver can operate it from the rear seat.

This machine can also be converted into an automatic planter. This planter embodies all requisites necessary to make it a durable machine, and in construction it is very simple.

Weights with fertilizer attachment about 350 pounds.

List Price \$205.00
Our Special Price 120.00

Acme Tubular Hand Potato Planter

THE LIGHTEST TUBULAR PLANTER MADE.

Its spring-closed jaws are especially designed to enter the soil easily, yet open wide enough to drop the largest seed. The dropping lever or dump is adjustable for any depth of planting. The conveyor tube is galvanized iron.

Our Special Price, \$2.00; List Price, \$3.00.

Directions for Using.—Walk erect, plunge planter into the soil, press forward as you withdraw it; seed is left in moist soil, not dry, as is usually the case when seed is dropped by one man and left to be covered by another.

"Acme" Hand Potato Planter

This is similar to the above, except it is not tubular, but a stick planter. We do not carry these in stock, but can furnish them direct from the factory. Same directions for working apply on this as on the "Peerless."

Our Special Price, \$1.25; List Price, \$2.00.

CHATANOOGA POTATO DIGGER

The Chattanooga Potato Digger is built for service. The standard is made of malleable iron 6½ inches wide at the narrowest part. This assures strength.

It is so designed that it lifts the potatoes out and places them on top of the ground, making picking up very easy.

The shovel is made from chilled cast iron, polished, and the digger fingers of wrought iron.

The plow is made with either wood or steel beam. We can also furnish subsoil point or double mouldboards to make either a subsoil plow or middle burster.

THE GEM SEED POTATO CUTTER

The construction of the Gem Seed Potato Cutter is very simple, and is built for accuracy as well as convenience. It is strong and durable; the knives are of good quality steel and are fitted to grooves in frame, making them easy to remove if necessary. It will cut any size potato in pieces uniform in size, thereby insuring more accurate planting when power planter is used. Size, 24 inches long, 8 inches wide. Weight, 8 pounds. List Price, \$7.00. Our Special Price, \$4.00.

O. K. CHAMPION POTATO DIGGER

List Price \$212.50

Our Special Price \$125.50

Weight 580 Lbs.

Catalogue.
Send for Special

The O. K. Champion Digger with its many superior features commends itself to the careful buyer. It has stood the test of years and has many times proven to be the victor in the potato field over all competitors. Its construction embodies all the essential features which make it absolutely reliable. It is built with a

view to simpleness, doing away with all unnecessary wearing parts, which accounts for its easy draught. Two horses will do the work with ease. There is no chain drive to cause friction and wear; only two gear wheels are employed on the entire machine.

The shovel is 20 inches wide, scooping up that width of ground and potatoes, depositing them on the elevator separating apron, whose links are alternately raised and lowered. These run over a sprocket agitator, which keeps the apron continuously agitated up and down, causing the separation to be done with the least possible power requirements and giving the machine a good separating capacity. The potatoes then fall upon the rear shaking fork rower thoroughly cleaning any remaining dirt from the potatoes, and depositing them in a row of about 12 inches behind the machine.

O. K. Champion Potato Cutter

Cuts potatoes in exact sizes that are best suited to plant with any power planter. To cut by hand means all shapes, both large and small. Will cut five to seven bushels per hour. No power planter can plant correctly unless the tubers are cut an exact size. Planting large sized seed insures a better stand because there is more nourishment furnished the young plant than can be had from small seed. Many times it has been noticed that many potatoes will be up three or four inches before others break through the surface, and frequently they never show themselves, which failure is placed to bad seed, when really it is owing to too small seed.

List Price, \$12.50; Our Special Price, \$8.00.

ALL PRICES IN CATALOG SUBJECT TO CHANGE WITHOUT NOTICE.

“GRITCO” ONE-HORSE COMBINED CORN and COTTON DRILL No. 4

The “Gritco” No. 4 Combined Corn and Cotton Drills are sure to satisfy the operator, because these Drills are sure droppers, accurate spacers, very simple, easy to operate and especially strong and durable.

The illustrations give a very good idea of the Runner “Gritco” No. 4 Drills, which can be had with or without force feed and fertilizer attachment.

A special cotton sowin. device is furnished for this Drill, which handles cotton seed very accurately, being easily attached by removing the cast ring bolt to the bottom of the hopper, the corn plate and cap, and substituting the ring and plate for cotton seed. This gives a combination drill of unusual merit, since the buyer has the advantage of being enabled to use any of our special seed plates listed for the “Gritco” No. 4 Corn Planter.

Can furnish the No. 4 Planters in either Edge or Flat Drop.

“Gritco” Combined Disc Corn and Cotton Drill No. 5

**Planter with
Fertilizer Attachment
showing turn over
Fertilizer Hopper.**

Double Discs are used to open the furrow. Discs are mounted upon chilled journals, which are attached to the tube that receives the seed. The convex sides of the discs press open the furrow as the Drill is moved forward, making a seed bed as perfect as could be desired. The seed, after dropping from the plate in full view, is conducted down through the cast spout or tube and deposited between the discs at the bottom of furrow. Every seed is in plain view of the operator until it reaches the bottom of the trench. The operation of the discs in opening up the furrow is very satisfactory.

The device for sowing cotton seed with the “Gritco” Combined Corn and Cotton Drill No. 5 is interchangeable in the hopper with the regular corn dropping mechanism, making a combination drill of unquestioned merit. There is ample provision, by means of projecting lugs and wrought standards, for thoroughly agitating the seed in the hopper, thus assuring proper filling of the cells.

Plain Planter	\$17.50
Planter with Fertilizer Attachment.....	21.90
Cotton Sowing Device.....	3.75

“GRITCO” SINGLE ROW CORN PLANTERS

“Gritco” No. 1 Single Row Corn Planter

**WITH
CONCAVE WHEEL
AND RUNNER**

The frame is constructed of heavy steel, and we furnish it with a corn hopper of sheet iron as illustrated. The corn hopper being in the rear permits the operator to always see whether the corn is dropping properly in the row.

It is chain driven. Fertilizer feed is a positive force feed, and is giving the best satisfaction. Front wheel is adjustable to regulate depth of planting.

The fertilizer feed will sow from twenty to four hundred and fifty pounds per acre.

We furnish the planter with four rings or dropping dies. Two with small holes, and two with large holes, for dropping one or two grains to a hill.

Five chain wheels are furnished with the Planter, so as to suit all kinds of planting.

Without Fertilizer Attachment, Our Special Price, \$22.50.

With Fertilizer Attachment, Our Special Price, \$25.25.

MODERN ONE-HORSE DRILL FIVE DISKS

Just the thing for the Farmer, Truck Farmer and Gardener. Cups are fitted for sowing peas, beans, ensilage, corn and grass beet seed, as well as wheat, rye, flax and oats.

With the disks set 7 inches apart, the distance between outside disks is only 28 inches (or 8 inches apart is 32 inches), so that the drill will safely pass between corn rows 36 inches or wider apart.

DUST PROOF COAL ASH SIFTER AND CAN

You can almost literally realize that pleasure.

Fill the rotating sifter part with ashes.

Turn the crank a few times, and presto! the ashes are in the bottom—good coal saved in the sifter. No magic, but feels just like it.

No dust, no waste.

Here you get a bank that really makes money for you all winter long.

Rotating sifter easily removed. Can and cover included to make complete and efficient outfit.

PRICE.....\$5.00

BICKFORD and HUFFMAN FARMERS' FAVORITE GRAIN and FERTILIZER DRILL

WRITE FOR PRICES.

Both the grain and fertilizer are positive force feeds, and will sow with absolute regularity any kind of grain, or fertilizer in good condition. The grass seeder is also a force feed, and can be used either in front or rear of the hoes; also quantity can be changed to any amount necessary. It is fastened on the frame, and very low down, thus preventing the wind from blowing the seed away before reaching the ground. The fertilizer feed can be stopped or started at any time while the drill is in motion, which makes it convenient in case the operator does not wish to sow fertilizer while going over the ground.

The Shaker Board hangs from the bottom of the hopper, and broadcasts the lime evenly.
 The Wind Break hangs from the shaker board, free to swing in any direction if an obstruction is met, and prevents wind sweeping under the machine and carrying the lime away.

The rapid increase in the use of lime demands a machine to apply these materials which is moderate in cost and accurate in its distribution.

This distributor is designed for broadcasting lime and ashes, and it will distribute in drills or rows when supplied with an extra feed plate especially punched according to the width of the row.

The amount of lime this machine will sow to the acre depends somewhat on its weight per bushel, as well as its condition, but the 13 notches of feed opening average to spread from 250 lbs. per acre at the lowest notch to 3550 lbs. at the highest notch.

Special features make this distributor lead all machines of its kind and work where others fail.

The Agitator, or beater, in bottom of the hopper revolves only when the load is being spread. It does not turn constantly.

Revolving Prongs with 3½-inch spaces placed directly over the feed openings make a forced feed that is most satisfactory.

The Feed Plate is of short sections of cast iron, and the slide plate directly beneath it is of steel, separated from the feed plate by liners.

Hand Shaker (at the driver's right hand) is used only when lime is damp or does not fall freely into the agitator. It helps even spreading, which is a great feature.

NEW IDEA MANURE SPREADER

THE NEW IDEA

Front Wheels, 28 Inches; Hind Wheels, 40 Inches.

Weight, 1740 Pounds.

Is the only high-class spreader on the market to-day, because it combines all the features necessary to make a good spreader. There are plenty of manure unloaders on the market, but the **NEW IDEA** is the only **PULVERIZER** and **SPREADER**. No gears to wear out and break, and no unnecessary noise, as a chain, when oiled occasionally runs practically noiseless. Competitors will tell you that they gain power by the use of gear wheels. Any authority on power will tell you that the more direct you can drive a machine, the less power it will consume.

When the load is off, the chain is raised off the large sprocket wheel, and there is no wear in driving to and from the field. This cut also shows the reach or coupling used, which makes it impossible to strain the bed—a very common occurrence on other machines.

The range of feed can be instantly changed whilst the machine is in operation by shifting the lever on the right side of the machine, and can be stopped entirely. As the feed and drive work independently of each other, if you get to a place where you do not wish to spread, keep your machine running and merely shut off the feed.

When the manure leaves the two cylinders it drops on the rapidly rotating distributor at the rear end, which, through its speed and its obliquely set paddles, breaks up any bunches that might pass over, and spreads the manure out in a wide and even spread, fully the width of the wheel tracks. Even, not thick in the center and thin on the edges.

Spreading the width of the track makes it unnecessary to drive over the spread manure with the New Idea, a necessity with all others. This feature alone is worth the price of the machine, and when once seen in operation will convince the most skeptical buyer.

The Conveyor of the New Idea is made out of two strands of No. 77 malleable chain, fastened to heavy channel steel bars, and is endless, and runs over a solid bottom, something similar to the bottom of a wagon box. It lasts a lifetime with ordinary care.

Traction lugs are furnished with each machine. This is another New Idea device. Very efficient and easy to remove when not needed. The rear wheels have square holes punched in them, and lug bolts are inserted and clamped tight with a nut.

BOTH WHEELS DRIVE.

The rear axle revolves in long journals, and is fitted with ratchets on each end, which engage in the notches in the hub of the rear wheels. Very simple and durable.

OUR SPECIAL FERTILIZER DISTRIBUTOR

This cut shows Our Special Fertilizer Distributor, which has become very popular. It has a positive force feed, and will sow all kinds of fertilizer. It is made of the best material, and is practical.

Our Special Price, \$22.00.

The Stimpson Steel Pitless Wagon Scale is High Grade in every particular and has many exclusive improvements not found in any other type of Pitless Wagon Scales. We have adopted the direct steel lever construction which embodies many of the valuable features of the Stimpson High-Grade Pit Wagon Scale with the improvements and advantages of a Pitless Scale.

This Scale is provided with combination three-bar solid brass beam, carefully graduated to full capacity of scale, thus requiring no loose weights to get lost or out of seal.

STIMPSON STEEL PITLESS WAGON SCALE

The ends of the frame are each made from a heavy steel channel beam connected by tubular steel cross-pieces, secured at each corner by a strong bracket bolted to channel beam with three bolts and lock nut on tubular steel cross-piece which passes through bracket, thus making a very strong corner connection.

The corner brackets also support and hold in place the heavy hardened loops that support the steel levers, thus providing a very strong support for each lever on which the I Beams and platform with load are carried.

The levers are held in the heavy hardened loops by best tempered tool steel pivots and the Steel I Beams are also held in place by hardened bearing feet supported on levers by best tempered tool steel pivots, each one being secured in beam by hard friction steels which pass through beam preventing the loop from chafing or binding against beam. The beam pivot loops are carefully tempered. The beam is equipped with a balance ball to balance off the weight of the platform as it may vary from accumulation of ice, snow, etc., and also has a counterpoise for greater variations in weight.

The Beam Box is of selected one-inch tongued and grooved lumber, painted with two coats of best lead paint, with a heavy 1½-inch molded top. It is secured by steel braces to the front tubular steel cross-piece, and in addition to this is provided with heavy angle flanges, same being fastened by bolts or screws to short posts or cement foundation. Beam Box Door is provided with heavy wrought hinges and flat key lock.

No. 122—Steel Pitless Wagon Scale, 8 ft. x 14 ft., capacity 5 Tons.....\$135.00
No. 124—Semi-Steel Pitless Wagon Scale, 8 ft. x 14 ft., capacity 5 Tons..... 120.00

OTHER SIZES ON APPLICATION.

PORTABLE SCALES CYCLO PLATFORM SCALE

Cyclo Ball-Bearing Swivel Wheel Portable Scales are constructed with two swivel or castor wheels at the front or beam end of frame, combined with two stationary wheels at the rear end of frame. This Scale is fitted with hardened, self-adjusting lever bearing loops and platform bearing feet. The beam and crescent-shaped sliding poise of solid brass, highly polished. All pivots are of best tool steel, carefully tempered and ground to a knife's edge. Each Scale is sealed to U. S. Standard weights, and is carefully packed.

SIMPLEX PLATFORM SCALE

This is the best cheap grade Portable Platform Scale on the market. It is intended for use where a Scale is only used occasionally, and is not subject to hard usage. The iron parts are finished in black japan, and the wood parts are painted blue, and are well finished.

The beam is carefully graduated and made of solid brass, with brass sliding poise. The lever and beam pivots are of steel drawn to a knife edge, and are supported in hardened bearing loops.

Each Scale is sealed to U. S. Standard weights, and is carefully packed.

PERFECTION CORN GRADER

NO ONE WHO PLANTS CORN CAN AFFORD TO BE WITHOUT A CORN GRADER.

over by the Experiment Stations and farmers.

DOUBLE SCREEN,

List Price, \$30.00 Dozen. Our Special Price, \$2.00 Each.

Every farmer now knows his seed corn should be graded. No planter will drop right with ungraded seed.

Graded seed insures perfect dropping, stronger plants, and increases the yield 5 to 15 bushels per acre. This has been proved over and by thousands of

BALTIMORE PEA AND FERTILIZER DRILL

The agitator is new style, being of steel in the form of two knife-shaped arms sweeping around under the mass of the fertilizer and throwing it upon the revolving disk below.

A shut-off has lately been added,

whereby the waste fertilizer is stopped when turning at ends of rows. As shown in cut, loops are bolted to frame for the purpose of attaching a horse. Excellent for sowing fodder corn or ensilage. List Price, \$20.00; Our Special Price, \$12.00.

GRITCO HAND CORN PLANTER

In the Gritco there is no chance of cracking the corn, beans or other delicate seed, because of the Chinese bristle brush cut-off. No casting about the planter. The stamped steel slide is formed on a segment of the circle, whose center is the pivot of the blades. Means are provided to plant pumpkin seed at the same time with the corn. Slide quickly adjusted for different sized seeds. Galvanized iron hopper, smooth, polished hardwood handle.

List, each, \$4.00. Retail each, \$3.00.

ACME ROTARY AUTOMATIC HAND CORN PLANTER

ITS ROTARY SLIDE has a motion two ways—back and forth. It prevents skips. No matter how short the stroke, the pocket is pushed into the corn and back into the conveyor tube.

This motion is positive. It breaks up all bridging and fills the pocket uniformly—it counts the kernels for each drop. List, each,

\$5.00. Retail, each, \$3.25.

AMERICAN HAND CORN PLANTERS

Are fitted with Sheffield's famous patent adjustable seed disc and spring brass cut-off. The disc revolves similar to disc used in horse planters, and is one of the best finished and most accurate dropping discs ever used in corn planters of any description. List,

each, \$7.00. Retail, each, \$4.50.

CHECK-ROWER WIRE

For All the Leading Planters.

Carry in stock the following sizes: 3 ft., 3 ft. 2 ins., 3 ft. 4 ins., 3 ft. 6 ins., 3 ft. 8 ins., 3 ft. 10 ins. and 4 ft.

The above comes in 10, 20, 40 and 80-rod rolls. Per Rod, List, 12c.; Retail, 7c.

Improved Kettle Range

This Kettle Range is made to accommodate any kettle a farmer may happen to have. Any copper or iron kettle up to 40-gallon capacity can be used.

The largest opening, when all the rings are off, is 25 inches, and the smallest is 12 inches.

The outside of the firebox is made of heavy steel plates and lined inside with cast-iron firebacks on all sides. The size of the firebox is 12 inches wide and 24 inches long and supplied with grate and ash pit, and has ash pan so that ashes can be removed without use of shovel. Pipe opening for 6-inch pipe. Weight, 200 lbs.

List Price,

\$50.00

Our Special Price, \$30.00

JANESVILLE CORN PLANTER / SHAFT DRIVE

The Janesville Planter is made adjustable in width 3 feet to 4 feet. This corn planter was developed so as to retain a high average per cent. of number of kernels that one desired to plant in a hill, and can be instantly changed from 2, 3 or 4 kernels.

1. Convertible drop—edge or flat. This feature was devised to meet the condition where a farmer on occasion may not care to take the time to select his seed corn.

2. Automatic throw-off to wire simplifies the operation of machine.

3. Automatic distribution of wire on reel—another labor- and time-saving feature.

4. Gear drive planters with adjustable drop.

A steel chain is attached to raising lever in such way that it can be made automatic in the operation, or set so that operator releases wire at his will.

Through the improved construction it is possible for operator to change from hill drop to drill drop without leaving his seat, or even without stopping team. A combined foot drop and drill drop attachment is placed to rocker shaft, which enables operator, by simply pressing this lever by the center, to lock valves in planter opening, and throw clutch into gear so it will run continuously and, of course, drill. When used as a foot drop simply do not press the lever down so far.

Valves on Janesville Planter are so placed that there is no possibility of mixing the hills. Upper valve is located so close to seed plate that it cannot get out of time, and lower valve is so constructed that it can free itself readily from dirt or trash that may get into it. The valve movement ensures your being always in check whether you drive fast or slow, and rows will be straight. The force feed takes care of increased momentum in fast driving. Change from edge drop to flat drop is effected by simply altering seed plates. Change from hilling to drilling is made by throwing clutch in gear with lever. Lastly, without stopping team, 2, 3 or 4 kernels may be dropped to a hill by operating small hand lever within easy reach. A rod running from rear axle to front frame throws machine out of gear when raised at ends to turn around.

Showing the Shaft Drive and Quick Change on the No. 7 Planter, to plant 2, 3 or 4 grains in a hill without changing the plates. This great convenience saves time, and allows you to plant the different number of grains in different portions of the field without stopping.

WEEDERS AND ATTACHMENTS

By the use of Weeders much time and labor are saved and better crops grown. These weeders or shallow cultivators, as they are sometimes called, can be worked in dry or wet weather. They will not cut the roots of the crop, but cultivate just deep enough to retain the moisture where it is most needed. Use a weeder early and often, and you will be surprised at the results. It is a good policy to use the weeder after a heavy rain, when the ground has been beaten down, to avoid the forming of a hard crust which retards the growth and development of the crops.

BIG JANESVILLE CULTIVATOR

This Cultivator is built to meet the demand for an adjustable arch, pivot axle cultivator. It is the quickest dodger in crooked corn of any cultivator of its class.

This machine can be successfully operated by any youth able to drive in a corn field.

On side hills, heavy soil or crooked rows this machine is especially recommended on account of its extreme ease in operation.

The wheels are 42 inches high with 2½-inch concave tires. Weight about 475 pounds.

6-Shovel Pin Hoe.....\$65.75 6-Shovel Spring Hoe...\$72.25
8-Shovel Pin Hoe..... 67.25 8-Shovel Spring Hoe... 76.25

The above are equipped with 3-inch shovels only.

JANESVILLE DISK CULTIVATOR

**Simplicity, strength
easy adjustment, perfect
sensitiveness. Is
strong, positive and
effective.**

Steel wheels; removable dustproof box; disk gangs heavy construction; chilled wearing boxes in the yoke; light draft; angle of the disks and the tilt of the frame accomplished by levers. The

one machine that is imitated by other Disk Cultivator manufacturers.

A hand lever, operated without leaving the seat, sets the gangs at any desired cutting angle and enables the driver to throw as much dirt to the plants as he desires.

You can run it up close to the young plant without cutting off or wounding the lateral roots.

The Janesville cuts and buries trash, vines, stalks, and kills the weeds.

Price, with Pivot Axle.....\$76.25

16-in. disks and thimble for attachment to gangs, pair.. 6.35

LITTLE JANESVILLE CULTIVATOR

In the construction of this Cultivator one of the most important things is to get an implement to use in all widths of rows.

The adjustment is such it is possible to cultivate the growing crops planted in rows as close as 24 inches. Being a low wheel, and the shovel gangs extending out back of the wheel, one is able to narrow the frame so as to set the wheels down to a distance of 36 inches and out to 48 inches.

The extension shovel gangs are made of two bars of high carbon steel, with a series of holes placed in the side, so as to locate the shovel standards, at different points, and enable one to use the same gang bars in using 2, 3, or 4 shovels on a side, as one may desire.

The wheels are 32 inches in diameter with 2½-inch concave tires, and are very strongly constructed. Weight about 475 lbs.

6-Shovel Pin Hoe.....\$62.00 6-Shovel Spring Hoe...\$69.00
8-Shovel Pin Hoe..... 64.00 8-Shovel Spring Hoe... 72.50

The above are equipped with 3-inch shovels only.

JANESVILLE BALANCE FRAME WALKING CULTIVATOR

The Janesville Balance Frame Cultivator is a well-braced, well-balanced, strongly constructed machine.

It is the practical efficiency of Janesville Cultivators in all kinds of work that, above all, recommend them to the farmer.

The gang may be slipped in or out on the front axle sleeve, and this permits the gangs to be placed as close or as far away from the rows as desired. Weight about 300 lbs.

4-Shovel Pin Hoe.....\$37.75 4-Shovel Spring Hoe...\$42.00
6-Shovel Pin Hoe..... 39.50 6-Shovel Spring Hoe... 45.75
8-Shovel Pin Hoe..... 40.75

The above are equipped with 3-inch shovels only.

OLIVER RIDING CULTIVATOR

Nos. 15 and 26.

The No. 26 is well constructed of steel and malleable parts, and it has all the adjustments necessary to perform the required work. When you look at the machine you will agree with us that it will do the work well, and it is amply strong to stand up under the work.

The No. 15 has a balance frame and the horse lift. The tread of the wheels can be narrowed down for cultivating rows that are planted close together, and can be widened out to give more room for steering the gangs and wheels when the rows are crooked or out of check. The frame does not project over the wheels when the wheels are set for narrow track. There is ample clearance of the arch. The No. 15 has pole adjustment up and down, so that the frame is always level, regardless of the size of the team. The Pivot axles are equipped with ball-bearings, which makes this cultivator easy to operate. The No. 15 is equipped with three levers for operating the gangs. The long lever raises and lowers both gangs. The two short levers are used to regulate the depth of each gang, or raising the gangs independently to free the shovels of trash or pass over an obstruction. The short lever directly in front of the operator is used to widen or narrow the gangs.

	List Price.	Our Special Price.

POTATO DIGGER

This is a tool that has won great favor with the potato growers everywhere. It is an easy-running tool, and one that saves a great deal of time. It throws all of the potatoes out of the ground without cutting, and leaves them clean and whole on top of the ground. Has extra heavy steel beam, with high arch to prevent clogging. Long adjustable handles. Double gauge wheel following the furrow on either side of the hill, and adjustable gauge wheel running on the solid ground in the rear.

No. Z-1—Digger with Double Front Gauge Wheel.....	\$18.00
No. Z-2—Digger with Single Front Gauge Wheel.....	16.00

OLIVER WALKING CULTIVATOR No. 14

There are many walking cultivators on the market whose combined merits would, if embodied in a single machine, no doubt result in a fine implement, but it is left for the Oliver No. 14 to present the majority of existing advantages besides offering some entirely new features. The axles are continuous, and by virtue of the solid clamp and solid brace fastening below, the Oliver is the most rigid and strongest machine of the kind ever offered. Compare this construction with others where braces terminate in loose eyes around the axle, or when upper ends of axles are held in loose sockets with set screws. The tongue is perfectly balanced, the wheels are strong, fitted with 2-inch tires and dust-proof hubs. The hitch is short, and this is the only cultivator with eveners behind the point on pole where arch braces fasten. The spring lift is adjustable up and down on the arches.

	List Price.	Our Special Price.
No. 14-C—6-Shovel Pin Hoe, wt. 280 lbs..	\$63.50	\$37.50
No. 14-L—8-Shovel Pin Hoe, wt. 264 lbs..	65.00	38.50

GRITCO WALKING CULTIVATOR

The gangs, as will be seen, are made of three pieces of 1½x7-16-inch Bessemer Steel. This Cultivator is furnished with double springs, enabling the operator to take off the entire weight of the gangs so that the weight of the gangs themselves will alone be the weight for the forcing of the shovels into the ground, or, on the contrary, you could put so much weight on the gangs as to almost make a Turn Plow out of the Cultivator, depending, of course, upon the condition of the soil.

This Cultivator is furnished with four, six or eight shovels. With each Cultivator we send two 1¾-inch bull tongues, one pair of hilling shovels, or forrowing-out shovels, as may be desired. We furnish it in Pin or Spring Hoe and Spring Trip, although we could furnish the Spring Trip Attachment at any time should you desire a change from Pin to Spring Hoe.

No. 11.
Steel Frame.
Price, \$55.00.

GRITCO CORN HARVESTER

No. 1.
Wood Frame.
Price, \$52.50.

Automatic Knife Guard gives absolute protection to operators. Simple, thoroughly effective, never fails to work instantly. Mechanism extremely simple. Front lever is connected with a plate of steel under the wing which projects beyond all parts of knife. While at work operator holds down with his foot the lever which draws the guard in.

The Wings are independent of each other; quickly raised to pass obstructions. Knives are best grade tempered steel, making an upward shear cut.

The Frame is 28 inches wide; extreme width at widest point of knives, 63 inches; adapting machine to widest or narrowest rows. Frame can be raised or lowered at both front and rear.

Safety Shafts turn freely in any direction and provided with a stop which prevents horse from turning further than necessary. Seats are independent, each one being quickly raised or lowered.

MASTER'S RAPID PLANT SETTER

All kinds of Plants, such as Cabbage, Tobacco, Tomatoes, Cauliflower, Strawberries, Sweet Potatoes, Sugar Beets, etc.. The only Hand Mechanical Plant Setter on the market; is built on scientific principles throughout. Its conical jaws are made of heavy sheet steel and the main body or water reservoir and plant tube of heavy tinned plate. The water valve is of brass with rubber packing. The valve rod and trip spring are of steel wire; thumb button and other fittings are also of brass. The machine is well put together with rivets and solder and should last for years.

Price, each, \$5.00.

GRITCO-S Furrower and Marker

Strong, light and durable. A half-dozen tools in one. Runs steadily and cannot be choked. Adjustable throughout. Broad runners of wrought T-angle iron with rib to prevent sliding on side hill. Revolving discs or furrows, with chilled hub and steel axle.

Price, \$30.00.

Neck Yoke and Whiffle Trees, \$4.00.

GRITCO STALK CUTTER

7-Blade, single row.....\$70.00
9-Blade, single row.....72.50

Practically an all-steel frame machine, making it neat of construction and giving it ample strength. The wheels are all steel, with removable bon and 2-inch tire. The lever is within easy reach of the operator and is connected with pressure spring

which connects with the cylinder or knife heads, and with which can be produced an even pressure at all times on the knives.

NISCO TRANSPLANTER

A Transplanter of unusual merit, that will set the plants right. Adjustable to every condition Write for special catalog. PRICE.....\$90.00

THE GRITCO MARKER

The Marker will open rows from 2 to 6½ feet. By the use of the lever they can be opened any depth desired.

The Marker is light draft and easily controlled. It can be used for laying of rows, listing or covering. The Marker is equipped with marker pole, doubletrees and neckyoke.

Price.....

CUTAWAY DOUBLE ACTION HARROW
REGULAR

The great efficiency of Cutaway (Clark) Double Action Harrows is due more to the rigid main frame than to any other feature. All four gangs are attached to this one rigid main frame. Observe their positions in relation to one another. The rear disks cannot slue from side to side, following the course of least resistance, but cut just midway between the fore disks. Every particle of soil to the full depth to which the disks run is thoroughly stirred. Note how compactly the machine is built; how uniformly the weight is distributed; how excessively strong it is throughout. The Cutaway (Clark) is the original double action harrow. Its popularity spread because of its unequalled efficiency, and its efficiency is mostly due to the rigid main frame. There are substitutes, but at best they are only substitutes. Whenever there is any flexibility between the gangs the real efficiency is lost. The rigid main frame is vital.

Cutaway
(CLARK)

DISK HARROWS

CUTAWAY DOUBLE ACTION
ENGINE HARROW

The mechanical detail of this machine is shown in the illustration opposite. All four gangs are attached to the one rigid main frame. This construction is all-important—vital. Only by the rigid main frame can a double action engine harrow be made to do such work as to justify its existence. The gangs are held rigidly. They cannot shift and slue about, but work in correct relation to one another at all times. The fore disks throw the soil out, and the rear disks cut just midway between the fore disks and throw the soil back, so that all is thoroughly stirred and left level. In the center is an extra disk which cuts out the middle. Observe in the illustration opposite how excessively strong this harrow is built throughout. The frame is of heavy angle iron, stoutly braced with angles. Draft rods extend between the frame and axles, so that the strain from the pull is uniformly distributed. The hitch is adjustable to any engine, and a perfect line of draft can always be maintained. The gangs are easily set at any angle desired. There is a size for almost every engine, and by hitching in multiples practically any sized outfit can be rigged. Sizes and specification are given in table.

LIGHT TRACTION
HARROWS.

CUTAWAY BUSH AND BOG PLOW

On many farms are fields lying out as waste, simply because their owners do not know how cheaply and quickly they may be put under cultivation. The old, expensive, hand-labor method is no longer necessary. Much work that could be done heretofore only by slow, tedious and hard labor with an axe, bush-knife and shovel can now be done with the Cutaway (Clark) Bush and Bog Plow.

As is shown in the illustration opposite, this machine is a big, heavy disk plow or harrow. It weighs 660 pounds. It is equipped with extra heavy 24-inch disks of standard Cutaway (Clark) quality, forged sharp. The bearings are dust-proof, oil-soaked hardwood, perfectly lubricated.

No. of Disks.	Diam. of Disks.	Width of cut.	Hitch.	Wt.	Price.
8	24 in.	5 ft.	4 H.	680	\$120.75
8	20 in.	4½ ft.	2 H.	440	79.85

Additional for above, fitted with fore truck, less long tongue and neck yoke, \$7.75.

Cutaway
(CLARK)

DISK HARROW

Cutaway Single Action Harrow-Regular

The CUTAWAY (CLARK) Single Action Harrow was built up to a standard measured by actual field conditions of the most severe type. Observe in the illustrations opposite that the head is built directly on top of the gangs. Note the tongue, seat, braces and levers are all fastened to it, thereby making the disks carry the entire weight of the machine. This construction gives such a perfect balance that there is practically no weight on the horses' necks and makes the use of the tongue truck optional with the user. Without a tongue truck the hitch is placed back close to the machine and the draft is the very minimum.

The CUTAWAY (CLARK) Single Action Harrow is reversible; that is, the gangs can be swung end for end, so that the soil may be thrown either out or in. To reverse, it is only necessary to pull the cotter pins that hold the lever links, drop the links, swing the gangs around and reattach links.

Instead of having a heavy truss construction forward of the gangs with the line of draft at a considerable angle upward, the CUTAWAY (CLARK) Single Action Harrow is built on top of the gangs and the line of draft is practically horizontal. Instead of power being wasted in lifting the harrow out of the ground, it is all utilized in pulling the harrow in a horizontal direction and allows the machine to "take the ground."

Size.	No. of Disks.	Diam. of Disks.	Width of Cut.	Hitch.	Wgt.	Price.
A-4	8	16-in.	4-ft.	2-h.	250	\$46.15
A-5	10	16-in.	5-ft.	3-h.	275	53.80
A-6	12	16-in.	6-ft.	4-h.	305	60.55
A-7	14	16-in.	7-ft.	4-h.	435	70.25

CUTAWAY SINGLE ACTION HARROW-EXTENSION

Orchard tillage should be intensive. It is common knowledge that no crop responds to thorough tillage more profitably than large fruits. It is, therefore, natural that the orchardists should demand CUTAWAY (CLARK) harrows especially built for their peculiar needs.

The CUTAWAY (CLARK) Single Action Harrow-Extension is the same machine as the CUTAWAY (CLARK) Single Action Harrow-Regular, except that the head is longer so as to spread the gangs out beyond the team and under the branches of the trees. The head is built on top of the gangs. To it are attached the tongue, braces, seat and levers. Thus the entire weight of the machine is on top of the gangs and is carried entirely by the disks.

Size.	No. of Disks.	Diam. of Disks.	Width of Cut.	Hitch.	Wgt.	Price.
A-4	8	16-in.	6-ft.	2-h.	265	\$48.70
A-5	10	16-in.	7-ft.	3-h.	295	56.40
A-6	12	16-in.	8-ft.	4-h.	320	64.95

Cutaway Single Action Harrow with Tongue Truck

This harrow is the same as the Cutaway Single Acting Harrow, except it is provided with a tongue truck, and in this instance the harrow is furnished without long tongue and neck yoke.

Four essentials of a good tongue truck are: first, an axle joint, which allows either wheel to rise up and run over clods, stones and other obstacles without affecting the even, regular draft of the harrow; second, adjustable tongue attachment, which makes it possible to attach the tongue truck to a harrow of any height; third, adjustable hitch attachment, which makes it possible to set the hitch to suit the size of any team; fourth, dust-proof, oil-soaked hardwood bearings. Each of these essentials are found perfectly worked out in the CUTAWAY (CLARK) Harrow Tongue Truck. The prices are for complete harrows.

Size.	No. of Disks.	Diam. of Disks.	Width of Cut.	Hitch.	Wgt.	Price.

The "Gritco" Runner Spring Tooth Lever Harrow

15 TOOTH,
258 LBS.

17 TOOTH,
276 LBS.

15 TOOTH, \$29.00
17 TOOTH, \$31.50

An All-Steel, Low-Down Lever Spring Tooth Harrow with Renewable Steel Runners. 15 or 17 Teeth. Two Sections. The Frame is made of special "T" Steel forged in one piece.

Renewable Steel Shoes are bolted onto the underside of the frame to take the wear, so that no wear comes on the frame itself. These shoes can be renewed at a slight expense, making the harrow practically indestructible.

The Teeth are made from the best Open Hearth Steel, finely tempered in oil and fully warranted, and can be instantly raised or lowered by means of the levers. As the point of the tooth wears, same can be lowered by adjustment on the tooth bars.

The Shape of the harrow is correct to make it run steadily and smoothly and permit the teeth always to work at a uniform depth; teeth can be easily raised or lowered, to transport from field.

Construction is simple. It is durable and does not require a man and wrench to keep it in working order.

Gritco Lever Wheel Harrow

285 LBS.
15 TOOTH,

17 TOOTH,
300 LBS.

15 TOOTH.....\$36.00

17 TOOTH.....\$38.25

The Main Frame is constructed entirely of double "I" steel of high carbon. The frame surrounds the teeth, and there are no projecting parts to engage obstruction. Cross Bars are 1 1/4-inch structural tubing, and have no holes drilled through them; compression clamps instead of bolts being used for fastenings.

The Arrangement of Teeth.—The front bar carries four, middle bar six, and rear bar seven teeth in the 17-tooth machine. Best arrangement possible.

Teeth are of regulation size, 1 3/4 inches wide, 1/4-inch thick, are made of best quality of spring steel and fully guaranteed against imperfection.

Tooth Holders.—By our method of constructing tooth holders, or clamps, teeth may be readily adjusted and kept in line.

The Carrying Wheels are constructed with broad rims and the bearing surfaces are chilled. The Lever Racks are strong and durable, being made of malleable iron. It is painted with a heavy coat of green paint.

Gritco Alfalfa Harrow

The above illustration shows a harrow specially designed to cultivate alfalfa fields. The teeth, being made of spring steel, provide the necessary relief to allow the round, long points to dodge around the crown of the plant without injury to it. The depth of cultivation is regulated by the levers.

This harrow has all the improvements found on the Gritco Runner Harrow. It runs steady and smoothly. In transporting from field to field the teeth are raised by the levers.

Made in one size only.

When taken in full sets, special price.

Made in 25 and 30-tooth sections, and with 1/2-in. or 5/8-in. teeth.

Style E

GRITCO GUARDED FRAME LEVER HARROW

The U-bars, channels, oscillating bars and teeth are made of high carbon steel. The channels, being placed at the ends of the U-bars, prevent them from catching on obstructions, as is frequently the case with the open-end harrow. Strong and well made, but carrying no superfluous weight. Corner braces, oscillating castings and lever castings of malleable iron.

GRITCO GUARDED FRAME HARROW WITH RELIEF SPRINGS

This shows how the relief spring allows the tooth to yield to obstructions.

Spike-Tooth Harrow. Notice the relief springs on the adjusting bars, also the headed teeth.

Style W

Frame is I-beam, steel, and is much stronger than the ordinary material used on other makes. The triangular tooth has three sharp edges to be used in succession. A valuable feature of the triangular tooth is that the two edges not in use are sharpened by contact with the soil. Tooth-holder is simply perfect. It surrounds both the tooth and the bar, the pressure being supplied by a recessed nut and bolt.

Notice that the tooth bars do not project beyond the frame, thus enabling the harrow to brush up against obstructions without injury.

This Harrow is similar to the Baltimore Double Hinge Harrow, noted above, only it is made in one section instead of two. It is designed to be used with one horse. We furnish this Harrow with 30 teeth, which cuts 4 feet 6 inches wide, and with 25 teeth, cutting 3 feet 8 inches wide.

THE BUTTS REVERSIBLE HARROW TOOTH POINTS.

The double point is equivalent to two new teeth, having the holder besides.

Can be used on all Spring Harrow Teeth. List Price, 45c. Price, each, 28c.

SYRACUSE REVERSIBLE HARROW TOOTH POINTS.
List Price, 32c. Retail Price, 20c.

OLIVER TRACTOR PLOWS

No. 78

The Oliver No. 78 Tractor Plow is the plow which has become so popular with the tractor manufacturers because of the quality work that it does.

Plowing is the most important and hardest work done on the farm. It is usually done at a time when adverse conditions are met with. In the Spring the horses are not in condition and in the Fall the ground is hard and dry. By means of the tractor plow all of this trouble is eliminated.

In most cases sod or stubble fields should be plowed in the Fall and allowed to lie fallow throughout the winter. This method puts the soil in good condition for the seed bed in early Spring. Because of the fact that plowing is hard, weather hot and other adverse conditions, a farmer who has no tractor plow will usually slight this important work.

Oliver Tractor Plows provide a means of doing this work in a very easy and satisfactory manner and with a minimum amount of effort.

Oliver Tractor Plows are designed to do the same quality work that has made Oliver horse plows so famous. They are easy to operate, plow an even depth at the ends of the field and in all conditions will do the kind of work that the farmer wishes.

Good Work of Oliver Tractor Plows

Oliver Tractor Plows scour even under adverse conditions. They turn a smooth furrow, and provide a compact seed bed that is free from air spaces. A wide range of close adjustments enables the operator to turn a furrow of the exact depth desired. When opening the field the bottoms can be adjusted to turn a dead furrow no higher than the rest of the field.

The Oliver No. 78 Tractor Plow is a power lift plow, having features which are found only in this plow. The No. 78 can be changed from a two to a three-bottom plow easily and quickly. When plowing conditions are hard and the tractor power limited this plow can be used with two bottoms. Under favorable conditions the third bottom can be added and maximum results obtained from the available horse power.

The levers of Oliver tractor plows are within easy reach of the operator on the tractor seat. When used with a standard light tractor they make a perfect one-man outfit.

Even Depth Plowing

A stop device on the land wheel axle controls the plowing depth. By setting the lever at the depth desired the stop will keep the plow working at that depth at all times. The bottoms cannot penetrate deeper. This is of special advantage particularly when plowing for the sowing of Fall crops because the even depth assures a better condition of the seed bed. It is an advantage from the tractor standpoint because it keeps the plow from digging in where the soil is soft which would have a tendency to stall the tractor.

No. 78—Two-Bottom Plow \$135.00

No. 78—Three-Bottom Plow 245.00

No. 78.—THREE-BOTTOM FLOW.

No. 78.—TWO-BOTTOM FLOW.

GRITCO PULVERIZING HARROW

This Pulverizing Harrow will pulverize either light or heavy soil, and do it better than other harrows. The action of the blades is to pulverize the soil and at the same time put the ground in a smooth condition, thus producing an ideal seed bed.

It produces the work of a disk and spike tooth harrow. It can be adjusted by the use of the lever to any desired depth, and will not drag out the filth, but cut it up underneath where it will rot and improve the soil.

It is the lightest weight and lightest draft harrow on the market.

No. 6—12-Blade Riding Harrow \$21.25

Coulters or Blades85

CUTAWAY EVER HANDY HARROW

The Cutaway (Clark) Ever Handy Harrow is primarily a one-horse machine, but has combination pole and shafts, and is easily converted from a one to a two-horse harrow or vice versa. A medium or even small horse will pull it, although for cultivating rowed crops two horses are used. It is reversible. To reverse, simply pull the cotter pins holding the two lever links, drop the links, swing the gangs around and reattach the lever links. This feature permits the user to throw the soil to or from the row, to throw up or tear down beds, or to cultivate to or from trees, vines, etc.

CELEBRATED APPLETON CORN HUSKER

This Husker will do the work. It is no experiment. It is superior to all others. We will be pleased to send anyone names of representative farmers who are using the Appleton Husker and will testify in its favor. We know that most Huskers have failed to give satisfaction. The Appleton Husker never fails to measure up to the expectation of purchaser. Write for interesting Husker Catalogue.

We guarantee that under the same conditions the Appleton Husker will do more and better work than any other Corn Husker on market; that it is simpler and requires less power. It is easier and safer to feed.

MONARCH SEMI-STEEL STUMP PULLERS

Monarch Stump Pullers embody in their construction special features which make them the strongest and most efficient machines for such work. The heavy solid one-piece main frame, the grooved drum, the drum clutch, the high-grade cable and other features place the Monarch Stump Pullers in a class to themselves. Special catalogue fully describing these features mailed free on application.

If interested in Stump Pullers, write for our catalogue of the Monarch line, which is very complete and useful; also let us know how much stumpy land you have, the kind of soil, the kind and size of stumps, how close to the ground they are cut, and whether they are green or dead. This information will enable us to recommend the equipment most suitable for your work.

No. 3—Semi-Steel One-Horse Stump Puller, equipped with 50 feet of $\frac{3}{4}$ -inch pull cable and 8 feet of $\frac{3}{4}$ -inch anchor cable. For ordinary stumps. Weight, 450 pounds. Our Price, \$97.75. With 75 feet of pull cable. Our Price, \$108.88.

No. 4—Monarch Semi-Steel Stump Puller, 75 feet $\frac{3}{4}$ -inch pull cable, 10 feet $\frac{3}{4}$ -inch anchor cable. Weight, 675 pounds. Our Price, \$120.75. Extra cable (to make pull cable any length you want), per foot, —.

No. 4—Cam Take-Up, with 10 feet $\frac{3}{4}$ -inch cable and steel cable hook. Weight, 50 pounds.....\$31.63

No. 4—Double Power Pulley, 12 feet 1-inch cable and steel cable hook. Weight, 65 pounds.....\$40.25

No. 5—Monarch Semi-Steel Stump Puller, 75 feet $\frac{3}{4}$ -inch pull cable, 12 feet $\frac{3}{4}$ -inch anchor cable. Weight, 875 pounds, \$169.63 Extra cable (to make pull cable any length you want), per foot, —.

No. 5—Cam Take-Up, 12 feet $\frac{3}{4}$ -inch cable and steel cable hook. Weight, 70 pounds.....\$40.25

No. 5—Double Power Pulley, 15 feet 1 $\frac{1}{2}$ -inch cable and steel cable hook. Weight, 95 pounds.....\$53.25

No. 6—Monarch Semi-Steel Stump Puller, 75 feet 7-inch pull cable, 12 feet 1-inch anchor cable. Weight, 1075 pounds, \$208.50 Extra cable (to make pull cable any length you want), per foot, —.

No. 6—Cam Take-Up, 12 feet 1-inch cable and steel cable hook. Weight, 80 pounds.....\$50.35

Empire Iron Frame Power Grindstone

THE EMPIRE BALL-BEARING POWER GRINDSTONE

Designed to meet the needs of the farmer who desires a grindstone to be operated by a gasoline engine, the Empire not only possesses the needed strength and staunchness to withstand the strenuous service of every day use, but is of light weight and easily handled. The frame and trough of the Empire are cast iron and should last a lifetime. It has detachable steel shaft, 6 inch pulley and hardened steel annular ball bearings of the finest quality.

The **EMPIRE** is equipped with genuine Berea Stone, 24 inches in diameter and 2 inches to 3½ inches thick. This is the most efficient and best grit produced for general use and especially for farm tools.

Weight complete, about 225 pounds.

Price, complete\$20.00

Farmers' Special Power Grindstone

WOOD FRAME

Recognizing a demand for a high grade power grindstone for the farm at a popular price, we offer the Farmer's Special, a wood frame power grindstone especially designed to meet this demand.

In addition to the regular equipment for a power grindstone we furnish a foot treadle with ball bearings on the crank and a handle crank, either for use in case of emergency.

Frame shipped knocked down; stone crated.

Weight complete, about 175 pounds.

Price, complete\$17.00

Harvest King Power Grindstone

The frame is constructed of heavy angle steel strongly braced. It is equipped with high-grade selected Grindstone 24 in. by 2 in., furnished with 12-in. pulley with 2½-in. face, and heavy steel roller bearings, drip cup and hand cranks.

The frame is shipped folded complete, stone crated, to save freight. Weighs about 125 lbs.

Price, regular, which includes 24 in. x 2 in. Stone, 12 in. x 2½ in. Pulley, Hand Crank and Drip Cup\$15.00

"BEST MADE" Sickle and Tool Grinder

In putting out these new machines we are at once placing farm sickle grinders in the class of strictly high-grade machines.

These grinders can be attached to a bench or a mower wheel. The No. 255 has a swivel arrangement that the tool grinder can be turned to an upright position.

No. 265.—Double-faced medium and fine tool-sharpening wheel, 5x1½ inches in size, beveled sickle-sharpening wheel and special improved Tool and Chisel Guide. Weight, boxed, 22 lbs. Price.....\$9.00

No. 264—This grinder is built on the same general principles as No. 265, but does not allow the frame to swivel to the upright position for tool sharpening, nor does it have the double-faced sharpening wheel. The tool-sharpening wheel is 4¼x1¾ inches in size. Weight, boxed, 23 lbs. Price.....\$8.75

No. 82-C SICKLE AND TOOL GRINDER

The No. 82C Grinder is a simple, compact and serviceable hand-power sickle and tool grinder especially suited to farm work. It can be clamped either to a mower wheel or to a bench. The tool wheel is 4¼x1½ inches.

TOOL GRINDERS

No. 2C—Kitchen Grinder, with smooth stone for sharpening knives.....\$2.00

No. 4C or 94—It is equipped with a 4x¾ in. Grinding Wheel, and is intended for a Household Grinder. Weighs 6 lbs. boxed. Price.....\$3.50

No. 95C—It is equipped with a 5x¾ in. Grinding Wheel, and will be found a very handy tool for mechanics. Weighs 7 lbs. boxed. Price.....\$4.75

No. 96C—It is equipped with a 6x1 in. Grinding Wheel. Weighs 11 lbs. boxed. Price.....\$7.00

No. 17X—It is equipped with a 7x1 in. Grinding Wheel, and will be found a very useful Grinder, doing the work very rapidly. Weighs 15 lbs. boxed. Price...\$12.40

NO. 309-C POWER BENCH GRINDER

The large number of gasoline engines now being used have created a demand for a dependable power grinder. To meet this demand we offer this grinder, which is constructed along the best mechanical lines. It can be bolted to any bench and its heavy design makes it the ideal grinder for power of any sort. It is equipped with two sharpening wheels of Light Dimo-Grit, 7 inches in diameter and 1½ inches wide, one medium grit and the other coarse, and two universally adjustable tool rests. Weight, boxed, 32 pounds.
Price.....\$14.00

Walter A. Wood NEW CENTURY GRAIN BINDER

PRICE:
6-FT. BINDER,
\$230.00,
7-FT. BINDER,
235.00.

Write for
Special
Cata-
logue.

Rigid main frame of heavy angle steel. Strong double-truss joint between main frame and platform. Great 36-inch all-steel drive wheel. "Z"-shaped finger bar. Low elevators with easy slope. Unusually deep elevator; greater capacity for heavy crops. Steep-pitched binder deck. Relief roller between elevators and deck. Automatic tighteners on all aprons. Three under-packers, assuring perfect work in short grain. Revolving discharge-arms, making perfect separation. Improved spring dropboard. Improved compression device. Unequaled knottor, grasper and tension. Binder driven from the rear.

Keystone Tongue Support

FOR HARVESTING MACHINERY AND DISK HARROWS.

This Tongue Support is simple and light in weight. The springs are made of best 3/8-inch spring steel. The coils are 4 1/2 inches in diameter, and have arms extending 12 inches. The wheel is 11 1/2 inches high, with 2 3/4-inch tread, thus assuring a light draft. No holes need to be bored in the tongue to fasten this support, thus allowing the tongue all its strength. Price, \$5.00.

BLOCKI WINDROWERS AND

PEA HARVESTERS

Use the Blocki Windrower for harvesting the seed crops of red, alsyke, mammoth and alfalfa clovers. Sometimes also used for harvesting flax, buckwheat, and even short tangled grain. Is an excellent tool to harvest cow peas, beans, etc. Can be readily attached to any mower and gives the best satisfaction. The guards are strong, being made of malleable iron; the rods retain their shape because they are made out of the right kind of steel.

Blocki Pea Harvester No. 7X consists of 7 Guards, 7 Rods and Divider.

Blocki Pea Harvester No. 8X consists of 8 Guards, 8 Rods and Divider.

Blocki Pea Harvester No. 9X consists of 9 Guards, 9 Rods, and Divider.

LORD BALTIMORE SIDE-DELIVERY RAKE

Bean, Timothy and Clover Hay Rake; Gear Drive; Roller Bearings.

Gathers the hay on the ground, and delivers it at one end of the machine in a continuous windrow. It is an all-gear drive machine; heavy, strong and powerful all the way through. List Price, \$180.00; Our Special Price, \$110.00.

LORD BALTIMORE HAY LOADER

Has been carefully designed and embodies all of the up-to-date improvements.

By means of a simple adjustment, provided on each axle box, the rake bars can be raised or lowered to meet various conditions of the soil and the hay. This adjustment makes it unnecessary for the hitches on loader to be changed.

The rake bars are open construction, so that every part is visible.

The Lord Baltimore Hay Loader will certainly meet the wants of every farmer that desires a machine which is free of all complicated and intricate parts. Wheels, 46 inches diameter. Weight, 1213 lbs.

No. 1, with Steel Wheels, List Price, \$212.00. Our Special Price, \$125.00.

List Price, 70c. Our Price, 45c.
Special Prices in Quantities.

TEDDER FORKS

Always on hand, stock of forks for leading styles of hay tedders.

When ordering tedder forks, always state name of tedder, year it was made, if possible, and whether fork is in one or two pieces.

THE MODERN LEADER ALL STEEL BALER

This baler is a device that is so low in initial cost that the material which it conserves pays for it in a short time. It bales all kinds of material, such as paper, scrap, pasteboard boxes, excelsior, cloth clippings, old rags, tobacco stems, tin and galvanized scrap in can factories, steel shavings in machine shops, etc.

The great and increasing demand for all kinds of waste material of every description has put you in a position to change this waste into cash.

This device is so simple that anyone can easily operate it. It is compact and occupies a very small space—30x30 in. The machine stands 5 feet high, and is constructed entirely of highest quality steel. It is indestructible, and will last forever. The size of the bale which it makes is 20x24x30 inches, and weighs about 150 pounds.

The Modern Leader has an open top similar to any waste-basket. The plunger is raised when not being used, so that the baler can be filled without litter.

Send in your order today, and begin at once to stop up the money leaks in your waste material.

THE FAMOUS ADMIRAL RACK AND PINION HAY PRESS

WITH PULLEY FOR BELT DRIVE OR WITH 6 H. P. ENGINE, GEAR DRIVE

Admiral Belt Presses are built either for belting to separate power or for mounting a six- or seven-horsepower engine on the same trucks. The details of construction are identical with the Admiral Motor Press, which is in use all over the United States and Canada. The weights are 14x18—3300 lbs.; 17x22—3750 lbs. In ordering the Admiral Belt Presses do not neglect to advise us of the diameter of your engine pulley and the speed of the engine. **Price of Belt Power Press without engine, 14x18, \$400.00; 17x22, \$440.00.**

"THE ADMIRAL BELT PRESS."

"THE ADMIRAL MOTOR PRESS"

"The Admiral Motor Press" is a marvel of effective simplicity. Few parts, but those very strong. The close coupling, wheelbase, 10 feet 2 inches; low-feed opening, 42 inches; light weight, 4500 lbs. in the 14x18, 4950 in the 17x22, including a 6-horsepower gasoline engine, makes it an ideal rig for any kind of baling. The machinery is covered, out of the way. The Admiral movement, by which the leverage constantly increases as the hay is compressing, is the secret of the wonderful capacity and service of this famous hay press. Write for special Admiral folder, which explains the details fully.

Price, with 6 H. P. engine:

14x18, with Engine	\$600.00
17x22, with Engine	640.00
14x18, arranged for Engine, but without Engine.....	425.00
17x22, arranged for Engine, but without Engine.....	465.00

THE ADMIRAL 3-STROKE TWO-HORSE HAY PRESS

THE CELEBRATED TWO-MAN PRESS HAS SELF FEEDER AND CONDENSING PACKER

The Admiral two-man horsepower hay press was the first three-stroke, self-feed hay press. Foot-feeding is dangerous and expensive. Admiral two-man hay balers save the most expensive labor on the press, the feeder. Three feeds to the round mean an extra feed to every round of the team, and make the draft easier and steadier on the horse. The 26-inch feed opening, with three feeds, gives you 78 inches of feed opening to every round of the teams. The construction is all steel and heavy cast. All small castings are malleable. Admiral Hay Presses built in the nineties are still baling hay. Built in standard sizes, the weights are respectively: 14x18, 3000 lbs.; 17x22, 3400 lbs. The Admiral Two-Man Press is equipped with tongue, neck-yoke, double trees, hay tray, forks, division boards and lifting jacks. An Admiral will keep that idle team of yours busy. **Price, 14x18, \$300.00; 17x22, \$327.50.**

We regret that lack of space makes it impossible for us to properly illustrate this press here. We therefore request particularly that anyone interested in a two-horse sweep power press, write for special illustrated booklet.

THE LITTLE ADMIRAL HAY PRESS

The Three-Stroke Fork Feed Little Admiral is intended for the farmer who has comparatively small acreage, and yet wants to do his own baling. It is the only three-stroke, one-horse hay press on the market. The short crank enables one horse to make as heavy bales as desired. It is all-steel, and built only in the 14x18 size, and weighs 2140 lbs. This press has met with wonderful success throughout the South, where a baler of this kind is in demand, on account of its big capacity, steady construction and light weight. Three feeds of 22 inches each give 66 inches of feed opening to every round of the horse. If you have as little as 50 tons to bale, it will pay you to own a Little Admiral. **Price, \$200.00.**

WE WILL AIM TO CARRY ON HAND IN OUR BALTIMORE WAREHOUSES SUFFICIENT ADMIRAL HAY PRESSES TO FILL ALL ORDERS PROMPTLY. FREIGHT FROM FACTORY IS ADDED WHEN SHIPPED FROM BALTO. STOCK.

RAPID-FIRE HAY PRESS

In this press the end of Pitman extends far past end of drive arm; wedge and roller are on the opposite side of Pitman. The forward stroke begins by the drive arm pushing against roller on opposite side, thus pushing plunger rapidly forward at the beginning of stroke and while hay is still loose in box. The drive arm takes up the stroke just as the hay is becoming compact. With the one-horse Rapid Fire Press you get two \$3-inch strokes to one round of horse.

One-Horse Rapid Fire All-Steel Press, Mounted..... \$175.00
One-Horse Rapid Fire Press, not Mounted..... 100.00

BALING TIES

Prices on Application.

Cross Heads

Measure around the bale and add three inches to get the proper length. We carry 8½ and 9-ft. Cross Heads and 9 and 9½-ft. Single Loop. Can furnish any other stock size or style.

CROSS HEAD BALE TIES.—9-ft., No. 14, \$3.60. 8½-ft., No. 15, \$3.00.

SINGLE LOOP BALE TIES.—9-ft., No. 14, \$2.70. 9½-ft., No. 14, \$2.85. 8½-ft., No. 15, \$2.25.

A bundle contains 250 ties.

ANNEALED BALING WIRE.—Nos. 11, 12, 13, 14 and 16 always on hand at lowest market prices on application. Special prices in quantity to Threshermen and Balers.

OWEN'S BEAN AND PEA THRESHER

STRONG AND EFFICIENT. (No. 4).

It will thresh all varieties of beans and peas directly from the vines as taken from the field, without splitting the grain, and at the same time shred the vines, the same as the larger size threshers. We wish to make one exception to the above, and that is in cow peas, where the vines grow very rank and heavy. You will readily see that, on account of its size, the No. 4 could not possibly be expected to handle these like one of our larger threshers, but where the vines do not grow too large and where care is exercised in feeding, it does very good work, indeed. We have shipped a great many of the No. 4 threshers to all parts of the South, and they are giving excellent satisfaction, especially with those who simply wish to save the seed and do not care for a large capacity. Capacity, 10 bushels per hour. One to three horse-power.

The No. 4 will also thresh buckwheat. Weight, 400 pounds. Price, \$125.00.

16x20 DOUBLE CYLINDER.

The machine will thresh all kinds of peas and beans, no matter what kind or variety you grow, even cow peas and soy beans, directly from the vines without splitting the seed.

The 16x20 will produce the seed in the cleanest possible manner, because of the large separating space and strong blast that we have equipped all Owens Threshers with, thus demanding the highest market prices. This machine will also thresh buckwheat, kaffir corn, cane and sorghum. Many customers successfully thresh small grain, such as wheat, oats, barley, millet, etc., but extras are necessary to give the proper speed. If you want a large capacity, useful machine that will quickly pay for itself and afterwards be a source of great profit. Capacity, 14 to 20 bushels per hour. Four horse-power. Weight, 750 pounds. Elevator extra. Price, \$200.00.

THE

No. 9 ROYAL PEA HULLER

New model No. 9, with heavy bearings, wooden frame and box; malleable iron cylinder and concave sections. Teeth do not break. Heavy fly-wheel and two cranks. Patent revolving screen, which insures absolutely clean peas and carries the refuse through a separate outlet. Reversible hopper to allow use of machine for cleaning wheat or other small grain. Cleans and threshes the peas thoroughly without breaking them. Shipping weight, 260 pounds. Can be furnished for operation by power by substituting a pulley and heavier shaft for one of the cranks at an additional net cost of \$2.50. Cow Peas intended for seed should be allowed to get more mature. These will unavoidably lose most of the leaves, but will still be good feed after the Peas are picked and threshed.

A very successful method of handling this crop is to pick the pods and thresh the Peas, turning the vines under, thus making the Cow Pea a profitable money producer (they always bring good prices) and at the same time a soil saver. It comes nearer solving the problem of "eating your cake and having it, too" than any other proposition on the farm. The price of Seed Peas in some seasons have ranged as high as \$4.00 per bushel, and it is therefore an object for every farmer to save his own seed (and sell them, too), which can best be accomplished by the use of a ROYAL PEA HULLER.

THE ROYAL PEA HULLER will save a larger per cent. of all the Peas than any other known method. The ownership of a Royal Pea Huller represents an outlay so small in comparison to the benefits, that no successful farmer will be without one.

Special and exclusive features to be had only with these machines are covered by patent, and cannot be had in any other make.

Capacity, 8 to 15 bushels Dry Peas per hour. Price, \$55.00.

No. 9 Royal Pea Huller.

MARYLAND LEVER CUTTER

Strong, Cheap and Durable.

Knife, 11-inch. Wt., 55 lbs.
Retail.....\$6.00

CYLINDER TYPE HAND CUTTERS

No. 11 $\frac{1}{4}$ —"ONE-KNIFE."—Ratchet feeding device, which can be adjusted to cut from $\frac{1}{4}$ inch to 2 inches; has wooden side springs for feeding rolls, large heavy flywheel, long reach crank, bab-bitted bearings, hardwood frame, securely bolted. A strong, easily-operated box for cutting hay and fodder; has one knife, 11 $\frac{1}{4}$ inches long, with a chilled shear plate, ground to an edge. **Our Special Price, \$20.50.**

No. 11 $\frac{1}{2}$ —"TWO-KNIFE."—The feeding rolls on this cutter are operated by means of cog wheels and sprockets. The feed is constant and uniform, and the cutter has large capacity. The feed rolls are equipped with coil tension springs; the cutter has large heavy flywheel, large crank, chilled shear bar and hardwood frame; length of cut, $\frac{1}{4}$ inch, $\frac{1}{2}$ inch and 1 inch. Special gears for cutting $\frac{1}{2}$ inch can be furnished on order. **Our Special Price, \$26.50.**

THE BALTIMORE PONY CUTTER

Adapted to cutting hay, straw and corn fodder, and is suitable for persons keeping from one to four or five animals. Weight, K. D., packed for shipment, 160 pounds.

One-knife, 11 $\frac{1}{4}$ inches long.....**Retail, \$20.50**

Ross No. 10 Knife on Fly Wheel Type of Cutter for Hand and Power

In the No. 10 Ross Cutter we are offering a very convenient machine for cutting corn fodder, hay, etc., either by hand or by power. It will be noted in addition to having a crank for hand use, it is equipped with pulley, so that it can be belted to small gasoline engine or horse power. It can be adjusted to cut $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$ or 1 inch. It has two 11 $\frac{1}{2}$ -inch knives. All bearings are bab-bitted. The frame is of hardwood and strongly constructed. Weight, 300 pounds. **Retail, \$38.50.**

ROSS STANDARD HAY AND FODDER CUTTERS

The excellence of the Ross Fodder Cutters is well known. They are the result of over 50 years' experience in manufacturing this class of machinery. They are built strong and durable, possess valuable features for convenience and efficiency, and are neatly finished. The manufacturers aim to construct a line of cutters which will not only do the work, but do it so well that the buyer is sure to be pleased in every way. On account of lack of space, we cannot give a full description of the exclusive patented features possessed by the Ross Cutters, but will be pleased to mail to anyone interested in the purchase of a cutter a special catalogue of the Ross line. Will mention briefly here that some of these features are: Very efficient feeding rolls, which are positive, and which are provided with a knuckle-joint arrangement to allow the rollers to read ily adjust themselves to uneven feeding of the machine without binding or causing friction; a special comb bar for keeping the spiked roller clear; a four-sided reversible steel cutting plate; an improved type of safety flywheel; a practical and convenient knife adjustments; a special starting and stop lever, and the Ross folding feed table.

CARRIERS FOR ROSS CUTTERS

We list below two styles of carriers which can be furnished with Ross Cutters—the angle and straight carrier and the swivel carrier. These are illustrated and fully described in the Ross special catalogue.

ROSS SHREDDERS

Ross machines can be furnished with either knife or shredder cylinder, as listed below.

Size	Knives Inches	Capacity per Hour on 1-Inch Cut		Power Required H. P.	Weight Pounds	Price with Either Cutter or Shredder		Price of 12-Foot Angle and Straight Carrier		Price of 12-Foot Swivel Carrier		Extra Carrier per Foot Over 12-Foot

PRICES ON APPLICATION.

ROSS IMPROVED ENSILAGE CUTTER WITH TRAVELING FEED TABLE AND ALL STEEL BLOWER

The illustration represents the Ross line of Silo Fillers especially designed for heavy work, such as large Plantations or by Threshermen for jobbing work.

Low Down, so that feeder stands on the ground instead of up on machine. Distance from ground to top of traveling table only 3 feet 9 inches. The most desirable machine made for convenience of the Feeder.

Adjustable Bearings for Blower Shaft. The merits of the adjustable bearing are known to all practical operators of machinery. No excuse whatever for the Ross Blower Bearings heating or running hard or consuming extra power.

Blower Casing, with Swivel and Tilting Rings. Combination Toothed and Fluted Feed Rollers with Comb Bar Attachment. Steel Shear Bar with Four Cutting Edges. This feature is accountable for the class of work turned out by the Ross. **Start, Stop and Reverse Lever.** This arrangement saves many a break and prevents delays of various natures. **Traveling Feed Table.** Folds up for convenience in moving from place to place and when storing away. **Steel Cutting Cylinder.** This is a point that must not be overlooked. If saving of time and repairs is worth anything, the **ROSS SILO FILLER** is worth double the price of any other. **Steel Blower.** No manufacturer likes to hear of their "Cast Iron" Blowers exploding on large size cylinder type Silo Fillers, but it will occur as long as it is made of Cast Iron. If our example was followed, and the Blower made of **SOLID STEEL**, like **THE ROSS**, the welfare of Silo users would then be taken care of. **Capacity, Durability, Simplicity in Construction and Quality of Work** have been the principal objects in the construction of **Ross Silo Fillers**. If these claims are not convincing, order the **ROSS SILO FILLER** and give it a trial. The results will be far more convincing than our claims.

ROSS IMPROVED ENSILAGE CUTTER WITH TRAVELING FEED TABLE AND BLOWER No. 12 and 14

The Nos. 12 and 14 Ross Silo Fillers are intended for the user who has small power ranging from 8 to 12 Horse Gasoline, and who from experience possibly, prefers this style of Silo Filler. The Ross Nos. 12 and 14 have all the important features that the larger Ross Machines have, as shown above, except the following:

Cutting Apparatus—The knife hubs are cast iron, the same as other makes of machines of this size. This is due to the fact that the work for which they are intended, and the power used to operate them, does not require this extra strength.

Blowing Apparatus—The disc to which the fans are attached is cast iron. The blowing fans are "Steel" boiler plate. With the exception of the disc being cast iron, the balance of the blowing apparatus is the same as on the larger machines. Guaranteed in every respect.

Blower Casing is cast iron in two parts securely bolted together. Equipped with new style pipe connection, including the swivel and tilting rings. This important feature is the same as used on the larger machines.

Traveling Feed Table—The same design is used on all Ross Silo Fillers.

Stop, Start and Reverse Lever exactly the same as used on larger Ross Silo Fillers. This device controls the Feed Rolls and Traveling Feed Table.

Method of Driving Blower and Cutter—We use the reliable 3-pulley drive. This has proven to be the most practical method in connection with the new Idler or Belt Tightener.

Low Down and Folding Traveling Table—The Folding Feature is valuable and convenient in many ways. Built low down means the feeder stands on the ground to feed machine, instead of getting up on the machine.

Size.	Knives.	Capacity per Hour on 1-Inch Cut. Ensilage.	Power Required.	Weight.	Cutter with Traveling Feed Table and Blower with 30 ft. Pipe and Elbow. Price with Truck.	Price, without Truck.	Extra Blower Pipe, per foot.	Two Shredder Blades, Extra.

ROSS No. 30, No. 40, No. 50 and No. 60 CUTTERS and BLOWERS

The knives on flywheel type of Ross Silo Filling Machines with Blower have made a home for themselves with all their users. This is due to the fact that they possess the required strength and features to enable them to accomplish the work of filling silos in a way that brings comment from all. Realizing the fact that users of this class of goods expect more and more each year in the line of quality and quantity of work, they possess features fully described in the special catalogue, which we will be pleased to mail, namely: Four-sided reversible steel cutting plate, positive tension to the feeding rolls, special knife adjustment, self-aligning and adjustable main shaft bearings and roller shaft bearings, extra bearings for main shaft, special balanced main frame, etc.

"JUNIOR" DOUBLE CAGE HAND CIDER MILL

This is a small double cage mill of good capacity, and will work in a very satisfactory manner. It is made of hardwood, and, having specially constructed grinders, gives good results. Capacity, 2 to 4 barrels of ciders per day. Weight, 220 lbs.

List Price\$45.00
Our Special Price..... 27.00

"MEDIUM" DOUBLE CAGE HAND CIDER MILL

Is a good size for family use. It is built with iron beam and heavy gearing, and is perfectly adjustable for all sizes of apples. Capacity, 6 to 8 barrels of cider per day. Weight, 240 lbs.

List Price\$50.00
Our Special Price..... 30.00

BALTIMORE SPECIAL CIDER AND WINE MILL

Weight, 140 lbs.
Similar to the wine and cider mill described, only it is larger and will take larger apples, and, being a geared mill, will do much more rapid work.

List Price\$32.00
Our Special Price..... 20.00

Removable Basket Handles

Easily and quickly adjusted. Saves fruit and time. Baskets carried without mashing fruit.

List Price, dozen.....\$4.80
Our Special Price, ea. .25

"Senior" Hand and Power Cider Mill

SENIOR.
They have Adjustable Rollers and Feed Regulator and Double Crank. In these Mills the lower rollers are cast with alternate rims and grooves interlocking to draw in the apples. Fruit is mashed between the smooth segments, thoroughly breaking all the cells so that cider is entirely extracted in press. Balance wheels are heavy and mill can be run by power. The mills are very strong. They are made of best material, nicely finished, and are easy to operate. Capacity, 6 to 12 barrels of cider per day. Weight, 390 lbs. List Price, \$67.50; Our Special Price, \$41.75.

THE BALTIMORE SHELLERS

**ONE HOLE.
No. 3.**

Separates corn and cob. Fan will clean corn for market. Corn discharged beneath Sheller, cobs at end. Easily adjusted for large or small ears. Capacity, 125 bushels a day. 130 pounds.

Plain, List Price, \$27.50;
Our Special Price, \$16.50;
With Fan, List Price, \$32.00;
Our Special Price, \$19.50.

**No. 4.
ONE HOLE.**

Screens corn; side delivery; light running; strong, steel shafts. Capacity, 125 bushels a day. 130 pounds.

Plain, List Price, \$27.50;
Our Special Price, \$16.50.

**No. 20 Double
Spout**

Hand and power, with shaker belt and flywheel. Capacity, 200 bushels per day. Capacity by power, 500 to 600 bushels. No. 18 similar to No. 20, but without shaker and with screen at bottom to take out dust or dirt.

No. 20, with shaker, List Price, \$57.50; Our Special Price, \$35.00.

No. 18, without shaker, List Price, \$53.50; Our Special Price, \$33.00.

**No. 5.
ONE HOLE**

Capacity, 125 bushels per day; single spout; left hand. Corn and cobs separated. 130 pounds.

List Price, \$26.50; Our Special Price, \$16.00.

**No. 2
Single
Hole**

Weight, 150 lbs.

Cleans the corn thoroughly. Heavy fly-wheel. Wrought spokes.

Capacity, 125 bushels per day. Without basket holder. List Price, \$33.50; Our Special Price, \$21.00.

Basket Holder, extra, List Price, \$3.00.

Our Special Price, \$2.00.

Feed table, extra, List Price, \$4.00; Our Special Price, \$2.50.

**Red
Chief
Corn
Sheller**

This sheller is guaranteed to do good work. It is heavy in construction, with patent oval-shaped teeth, which are so arranged to shell more rapidly and avoid injuring the grain, thus making it safe for shelling seed corn. Adjusts itself to any size ear.

List Price, each, \$4.40; Our Special Price, each, \$2.75.

Weight, 12 lbs.

"BLACK HAWK" CORN SHELLER

Weight, 14 lbs. Shells Fast, Clean and Easily.

Black Hawk is simple, easily adjusted and will shell clean all kinds of field corn.

List Price, \$5.60 Each.

Our Special Price, Each, \$3.50.

COMBINED HAND AND POWER MILL.

No. 20—Power Mill for two-horse engine; tight and loose pulley, best of bronze boxes and cold rolled steel axle, capacity 10 to 20 bushels per day. Has no equal. List Price, \$32.00; Our Special Price, \$20.00.

Corn Sheller Attachment, shells the corn and grinds at the same time, extra. List Price, \$14.40; Our Special Price, \$9.00.

Table Meal Separator, makes fine table meal while grinding stock feed, extra. List Price, \$10.40; Our Special Price, \$6.50.

All burrs are as hard as can be made, and all of our mills will grind in a satisfactory manner dry bone, oyster shells, old china, etc. New Feed Gauge enables the operator to grind fine without mill turning hard. New Burrs will grind fine and quick.

No. 20

**No. 20 Red Chief
Grinding Mill**

REMOVABLE BASKET HANDLES

These handles are of great assistance in handling fruit and vegetable baskets.

They are automatic in operation, and the grip is sure. Made from high-grade steel, and will last a lifetime. Handles three times as many baskets in the same time.

List Price, 40c. Our Special Price, 25c.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

SCIENTIFIC No. 20 GRINDING MILL

This is an excellent mill for from 2 to 5 horse-power gasoline engine, and will grind either cob corn, shelled corn, oats, and other small grains. Has heavy flywheel. Regular size pulley is 8x4. Has cold rolled steel shaft, end thrust ball-bearing, 8-inch carbide grinding plates. A very efficient cob-crushing device, angle steel legs, babbitted shaft boxes, and is furnished with one set of fine and one set of coarse grinding plates; capacity, 8 to 25 bushels per hour; speed, 400 to 500 R. P. M.; weight, 250 pounds. **Price, \$35.00.**

SCIENTIFIC No. 30 GRINDING MILL

Same general type of mill as the Scientific No. 20, but is much larger, and has about twice the capacity. Recommended for engines from 7 to 12 horse-power. Capacity, from 20 to 40 bushels per hour; speed, 400 to 500 R. P. M.; grinding plates, 10-inch; weight, 375 pounds. **Price, \$47.00.**

SCIENTIFIC No. 132 ALFALFA AND CORN COB GRINDER

The first practical low-priced mill of the kind ever offered.

Will grind alfalfa, clover, cowpea and peanut hay either separately or in connection with cob corn, and it can be handled with from four to eight horse-power. We feel that this mill fills a long-felt want. Shipping weight, 400 pounds. **Price, \$82.50.**

The most popular sweep power grinder made. Double action; opens like a watch, giving ready access to every part.

No. 6.

The Scientific Corn and Cob Mill

The Friction Clutch Pinion Prevents Breakage of Cogs, etc.

L-1

These mills are especially valuable for large dairy farms, stables and for anyone doing custom work. They are provided with double breakers in bottom of hopper, which run at different rates of speed; a second break crusher, on main shaft, friction clutch pinion, end thrust, ball-bearing, safety break bar.

L No. 1.—Regular capacity, 20 to 40 bushels per hour; speed, 1000 to 1200 R. P. M.; horse-power required, 10 to 20; drive pulley, 8x6; weight, 550 pounds. **Price, \$95.00.**

L No. 1.—For Corn in Husks. Capacity, 20 to 30 bushels per hour; speed, 1000 to 1200 R. P. M.; horse-power required, 10 to 15; drive pulley, 8x6; weight, 500 pounds. **Price, \$110.00.**

Scientific No. 6 New Geared Sweep Mill

Gearing consists of three gear pinions, which revolve on independent chilled studs. Mill grinds all grains, but is especially effective and rapid on ear corn, and double-action feature, which is applied to these mills, prevents cobs lodging in hopper at end of a run. Its capacity is 10 to 15 bushels per hour. Weight of mill, 700 pounds. **Price of Mill, with extra plates, \$54.00.**

Scientific No. 5 Triple-Geared Sweep Mill

A triple-gear double-action sweep mill, similar in principle to the No. 6, but about one-third less in capacity, and instead of being provided with baskets for catching ground product, it is mounted on a heavy box, in which the grain is caught. The upper half of the mill does not open on a hinge like the No. 6. Well adapted to grinding ear corn or shelled grain, runs light and does splendid work; weight about 550 pounds. **Price, with one set of grinding plates, \$46.00.**

NEW SOUTH CORN MILL

The cut shows the general design of our **New South Corn Mill**, the stone burrs in this mill are made of the famous North Carolina Flint, which is the best and most successful stone for making bread meal.

The construction of the **New South Corn Mill** is of the very best, the bearings are extra long and heavy, and lined with anti-friction babbitt.

The burrs are adjusted by the means of a hand-wheel and a ball-bearing end-thrust screw, and are held in place by a lock nut, a relief spring prevents burrs from running together when mill is empty.

The **New South Corn Mill** has the most successful cleaning arrangement ever placed on a corn mill, it has a double wire screen hinged in a casing which forms the shoe, and should it become necessary to remove any obstruction in the shoe, the screen can be instantly lifted while the mill is running, and the obstruction removed without interfering with the operation of the mill.

After the grain has passed through the screen and on its way to the stones, it comes in contact with a strong current of air from a fan attached to the shaft of the runner burr, which removes all remaining foreign substances.

This combination is not found on any other mill, and is the only perfect and successful way of cleaning the grain.

The **New South Corn Mill** will produce 95 per cent. pure, wholesome meal, which is 20 per cent. more than the old style mill.

This mill is fully guaranteed as to material and workmanship, and any parts found to be defective will be replaced free of charge.

SIZE AND LIST PRICES OF NEW SOUTH CORN MILLS.

Size of Stones	Weight of Mill	Approximate Capacity Bread Meal Per Hour	Required Horse Power	Size of Pulley	Revolutions Per Minute	Floor Space Required	Our Special Price
12	500	3 to 5 Bushels	3 to 5	8 x 5	800 to 1000	3 x 4 Feet	\$95.00
14	600	5 to 6 Bushels	4 to 6	10 x 5	600 to 800	3 1/4 x 4 1/4 Feet	110.00
18	800	6 to 10 Bushels	6 to 8	12 x 6	500 to 700	3 1/2 x 4 1/2 Feet	135.00

26	1500	10 to 15 Bushels	10 to 12	16 x 8	400 to 600	4 x 5 1/2 Feet	220.00
30	1800	15 to 20 Bushels	12 to 15	16 x 8	400 to 500	5 x 5 1/2 Feet	260.00

These capacities are for grinding bread meal only; for grinding feed they will grind from 50 to 100 per cent. more.

OWENS' SUPERIOR FANNING MILL

The sieves are made of No. 8 Zinc and screens woven from best annealed wire. The screens in No. 1 Mill have a cleaning surface of **six square feet**, and No. 2 Mill **eight square feet**. The upper and lower shoes are the same size, so that the sieves and screens can be interchanged. Every **New Superior** is furnished regularly with **thirteen sieves** or screens with which more different grains can be perfectly cleaned, graded and separated than double the number in an ordinary mill, doing the work perfectly and without waste. The following special attachments are extra and only shipped when ordered, viz.: Millet, Alfalfa, Bean, Barley and Macaroni Wheat. Bagging attachment extra.

Baltimore Improved Grain Fan

Will clean from 60 to 100 bushels per hour. Made of best material and finished in a neat and tasty manner. **Price**.....\$35.00

The American Variable Friction Feed Sawmills

American Sawmills are recognized as embodying superior design, the most advanced and up-to-date ideas, superior workmanship, and, in short, they are outfits which have been carefully thought out by designers of wide experience for the purpose of giving to sawmill operators the most practical mills possible.

American No. 1 Standard Sawmill

Our No. 1 Mill is adapted to any power from 6 to 15 H. P. It is warranted capable of cutting 2000 feet of board lumber per day with a good 6 H. P. steam engine, if properly handled, and is capable of turning out 7000 to 8000 feet per day with a 15 H. P. engine. Any size up to 52 inches may be used, and the carriage will carry logs up to 36 inches diameter.

A complete Standard No. 1 Mill consists of the following:—**HUSK FRAME** 7 feet by 3 inches, built of 3½ in. by 7½ in. timbers, fitted with Variable Friction Feed, Polished Steel Mandrel 23/16 in. by 4 ft. 4 in. long. Mandrel Pulley, 20 in. by 10 in. (unless otherwise specified); also Board Roll, Spreader Wheel and Saw Guide.

CARRIAGE 16 ft. long, 26 in. wide, built of timbers 3½ in. by 5½ in., having Feed Rack 22 ft. long. Four Trucks with 6 in. wheels and 1½ in. steel axles. 40 ft. of "V" and Flat Rolled Steel Track, fitted to way timbers framed up in sections. Two Head-blocks, opening 34 inches, with Champion Duplex Dogs. "Ideal" Set Works, with Quick Receder and 14 ft. of polished steel Set Shaft; also Belt Tightener, foundation bolts, cant hook, oil can and wrenches. **Saw is extra, according to size and style selected.** Weight of mill as above, 2800 lbs. (If way timbers are not wanted, deduct 450 lbs.)

Cant Hooks, No. 318B—2½ in. x 4½ ft. Price.....
Peavies, No. 9—2½ in. x 5 ft. Price.....

American Gang Lath Mill

Can be furnished as a lath mill only as shown by illustration or as combined lath mill and bolter. The best machine of the kind on the market, possessing valuable features not found on any other make. It is adapted to cutting lath slats or crate stock of any width from ½ inch to 3 inches of various thickness; also small dimension stock from ½ by ½ inch up to 3 inches by 3 inches.

Three Saws furnished, unless otherwise ordered, but can be fitted to carry six; capacity 30,000 to 50,000 laths per day.

With 3 Saws. With 4 Saws.

'UP-TO-DATE' SHINGLE MACHINE

It will make shingles, heading, box boards, crate slats, etc., equally well. Carriage is very substantial, and provided with a strong iron yoke that will admit saws up to 36 inches in diameter; 24-inch saw is regularly furnished. Can be used either as hand power or power feed machine. When ordered an edger and knot saw with 8-inch saw and a convenient gauge are furnished. Capacity from 3,000 to 10,000 shingles per day, depending upon power, character of work and expertness of operator. Weight with edger, 625 pounds; power required, 4 to 8 H. P. Complete with edger and 24-inch shingle saw and 8-inch edging saw. **List Price, Our Special Price,** Without edger, but with 24-inch shingle saw, **List Price,**

American Contractor's Portable Variety Wood Worker

A time-saver; a money-maker. Take it right to the job, and do your work on the job, as you want it, when you want it. Built for work, and lots of it. The saw gauge and jointer fence are instantly removable for cutting off long lumber. What it is—a rip saw, a cut-off saw, a mitre saw, a scroll saw, a Dado machine, a gaining machine, a grooving machine, a rabbitting machine, a tenoning machine, a jointer or planer, a rabbitting machine, a matcher, a molder, a sander, a hollow chisel mortiser. These can be furnished with gasoline engine built in, making them self-contained, or where electric current is available with electric motor built in. Net prices, f. o. b. factory. Complete with Hollow Chisel Mortiser, Boring Attachment and Jig Saw:

With 5 H. P. Four-Cycle Gasoline Engine and Magneto built in, including Hollow-Chisel Mortiser and Boring Attachment, with Jig Saw.....
 Same without Engine and Inside Belt.....
 Same with Countershaft and Inside Belt, without Engine.....

EXTENSION TABLE POLE SAWS

Appleton Extension Table Pole Saw.

The table is so arranged as to extend nearly five feet beyond the saw blade. It makes a highly satisfactory combined pole and cord-wood saw, because the length and arrangement of the table is such as to enable the operator to handle long poles about as easily and rapidly as cord wood. To facilitate handling a roller is placed at one end of the table. Weight, 354 pounds.

Without Saw	\$33.50	With 28-inch Saw.....	\$43.50
With 24-inch Saw.....	40.80	With 30-inch Saw.....	44.85
With 26-inch Saw.....	42.15		

NEW STYLE TILTING TABLE POLE SAW

With this style of saw frame the operator can saw short and long wood with facility, and can saw the longest poles into cord wood, stove wood, or any desired lengths, because the balance wheel is under the frame where it cannot interfere with the longest pole. There is a roller at one end of the tilting table which is a great help in getting long poles on the table.

This style saw requires a higher speed than the others. To obtain the best results a 5-inch or 6-inch belt should be used, and when sawing a larger stick than 6 inches through, at least 6 horse-power should be used. Weight, 403 pounds.

MODEL 12

STAR WINDMILLS AND TOWERS

The Model 12 Star Windmill is of the most modern type of windmill construction. The material and workmanship are the very best. It has two pitmans, two heavy and strong gears and two steel wrist pins; a big one-piece main frame which sets squarely upon the tower; extra long cold-rolled, polished steel drive shaft; shock absorber, swinging cone-shaped brake which applies gently and effectively, and automatic governor. The Star is responsive in light winds because of its perfect alignment, direct center lift, perfect equalization of load and absence of friction. Equipped with No-Oil-Em Bearings guaranteed to run one year on one oiling, which insure very easy running, and the bearings will last indefinitely. The wheel and rudder are heavily galvanized.

Baker Windmills and Towers

Perhaps the most attractive feature of the BAKER WINDMILL is the fact that it is the only windmill made which revolves on the shaft with the weight of the wheel over the center of the bearing. It is very light running and hub is provided with an oil well which simplifies the lubrication.

BAKER WINDMILL TOWERS are very strong and rigid. The flat braces are accurately punched at the factory and there is no chance to put the tower up with the wrong tension. This is a particularly good feature.

Suburban Outfit.

Standard Steel Substructures for Tanks

FOUR-POST SINGLE-ANGLE STEEL SUBSTRUCTURES INCLUDING CAP CHANNELS ONLY AND FOUNDATION RODS AND PLATES.

The single-angle corner posts are spliced together by means of plate connections, to which the struts are also fastened, making a two-bolt connection for each end of the strut. The brace rods are held securely to the corner posts by means of special drop-forged eye-nuts which have right and left-hand threads, facilitating the adjusting and truing of structure. We also furnish substructures with flat-punched braces. The corner posts are anchored at the base by heavy rods or bolts built into the foundation piers and extending up through the base plates, upon which the ends of the angles bear directly.

INSTITUTE OUTFITS

Where a larger quantity of water is required than the capacity of a tank in the Suburban Outfit or where greater elevation than can be obtained in Suburban Outfit is necessary, we can supply an **Institute Outfit** equipped with either Baker or Star Windmill. The tank is erected on a standard substructure and windmill tower is built up from the bottom of the tank. A 15-ft. windmill tower can be erected inside of a 6-ft. diameter tank; a 20-ft. tower inside of a 7- or 8-ft. diameter tank; a 25-ft. tower inside of 9-ft. diameter tank; a 30-ft. tower inside of 10-ft. diameter tank, and 35-ft. tower inside of 12-ft. diameter tank. We would be pleased to submit quotation on these outfits.

These storage tanks are made of carefully selected red gulf cypress. We avoid the use of upland or cheaper grade of cypress, and in getting tanks from us you can rely upon high-grade material and workmanship. Tanks are made with round hoops and draw lugs, which give more strength and which do not rust like flat hoops.

The use of pressure tanks instead of elevated tanks for supplying water under pressure is becoming more and more universal each year. The pressure tank is nothing more than a heavy, carefully made air tight steel tank into which the water is pumped. When the tank is what is commonly called empty, it is really full of air. Into this tank which is full of air water is pumped and as the air cannot escape from the tank, it is gradually compressed until, when the tank is two-thirds full of water, you have a back pressure from the air equal to that you would get from a tank elevated 100 feet. If a high-grade tank like those furnished with our **Invincible Outfits** is used and the connections properly made you will have to pump new air into tank in very small quantities. The only reason for pumping air being to replace that which is absorbed by the water and drawn off. To replace this air, different devices are used. Sometimes simply an air cock in the suction pipe of the pump, or a Hydro-pneumatic Cylinder or a separate air compressor, which devices are listed here. The advantages of a pressure tank system are its absolute reliability, its simplicity and as these tanks are either placed in a cellar or buried in the ground, with the end extending into the cellar, the water is kept an even temperature, being neither very hot in Summer or freezing cold in Winter; this is a big advantage in watering stock. It does away with the necessity of having an elevated tank in house which is undesirable or an elevated tank on tower outside, which is frequently unsightly and very liable to freeze up in cold weather.

THE PROPER SIZE TANK TO SELECT.

The proper size of tank depends upon the total water consumption and the method of pumping. If the pump is operated by electric motor where reliable current is available, a small tank will give comparatively good service. In a case of this kind, we would suggest a tank with a total capacity of twice the usual daily consumption, although if an automatic switch is used a tank with a total capacity equal to the daily consumption will give good service. Where an engine is used for pumping, we would suggest a tank of a total capacity of not less than twice the number of gallons used daily. In fact, we consider it better to use a little larger tank than this. When you are pumping by hand, we would suggest twice as many gallons capacity as the daily consumption; and, if pumping by windmill, a tank with a total capacity of from four to six times as many gallons as are liable to be used daily.

INFORMATION BLANK.

We would be glad to mail on application to any one interested in the installation of an **Invincible Water Supply Outfit**, one of our special information blanks which will enable you to clearly give the information which will enable us to intelligently recommend suitable equipment.

INVINCIBLE WATER SUPPLY OUTFIT WITH MYERS POWER PUMP AND GASOLINE ENGINE.

The above cut shows a popular outfit where water is to be pumped from shallow well, cistern or spring. Price of this outfit as shown, not including piping, consisting of 36"x10' tank, 1 3/4 H. F. Ingeco Engine and No. 502 Bulldozer power pump with air attachment, \$340.00.

Prices on this outfit with larger tanks or on similar outfit with special head for deep-well work quoted on application.

INVINCIBLE OUTFIT WITH DOUBLE-ACTING HAND PUMP.

The hand outfit shown here consists of an **Invincible Pneumatic Tank** with a Myers Double Acting Hydro-pneumatic Pump, which will pump both air and water. This type of pump is suitable for wells not deeper than 25 feet. Price of outfit with a 30"x6' tank which has a total capacity of 220 gallons and an R285A Myers 2 1/2" double acting pump with the necessary valves and gauges. Price complete as described and illustrated with the exception of the piping and pipe fittings, \$125.00.

THE KIND OF PUMP TO SELECT AND PROPER POWER TO OPERATE IT.

While we show here two complete outfits which represent installations which are very frequently made, it is impossible to illustrate in the limited space available, combinations which suit the requirements of every one. The depth of well, the amount of water supplied by it, amount of water required per day, the kind of power most convenient to use and many other conditions make it necessary to give individual consideration to each case. In order that we may properly advise our customers as to what they should have, on the following pages will be found fully illustrated and described a line of pumps, pumping windmills, engines and electrically driven pumps which will meet all ordinary requirements.

VERTICAL AND HORIZONTAL TANKS.

Invincible tank 6 feet long and shorter are regularly furnished tapped to set vertical. Longer tanks are regularly tapped horizontal. Any tanks, however, can be furnished with either vertical or horizontal tappings and this makes no difference in price of tanks. Wherever it is practicable to use a horizontal tank we consider it preferable.

Power Air Compressors, see Page 193.

CURTIS GARAGE AIR COMPRESSORS **"CURTIS AIR—FREE FROM OIL"**

The selection of your Air Compressor has much to do with the success or failure of the service you render your customer.

PURE AIR for your customer means good service, because oil ruins tires, and AIR FREE FROM OIL means fewer blowouts—fewer punctures—greater tire mileage—less repairs; saves them many dollars up-keep every month.

The Curtis controlled-splash system, with the cylinder lubrication of the controlled-splash permanently regulated, insures AIR FREE FROM OIL.

Note these Exclusive Curtis Features

1. Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage nor waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.
2. Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.
3. High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.
4. Fan flywheel cools cylinder; increases capacity.
5. Inspectable valves; light weight, large area.
6. Valves cannot drop into cylinder and wreck machine.
7. Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8. Drop forged crankshaft. Adjustable, renewable, non-cutting die cast bearings.
9. Head removable without breaking or bending any pipe connection or pipe fittings, only one gasket.

CURTIS STEEL AIR STORAGE TANKS

The prices below do not include the compressor, but the tank, pop valve, gauge and drain cock to which the price of the compressor, as above, should be added for complete outfit, as shown in the cut. These tanks are welded tanks, and are suitable for the pressures specified, can be used either vertically or horizontally. These tanks and fittings are commercially air-tight.

FIGHT FIRES AT THEIR START

Safeguard Your Property With Pyrene.

The surest way to avoid serious fires is to have Pyrene on hand when the fire comes. It may save your home, your barn, your stock, your crops, your machinery and your automobile. Pyrene is a great economy even if you never have to use it because of the reduced insurance rates you can obtain if you have it.

All insurance companies in the United States allow 15 per cent. reduction in automobile fire insurance rates if car is equipped with Pyrene Extinguisher.

PYRENE FIRST AID KIT

REDUCE YOUR COMPENSATION INSURANCE.

The PYRENE FIRST-AID KIT is a metal, dust-proof, sanitary case divided into compartments, each designed to hold a particular article. Being portable, it is not necessary to move the injured person to receive treatment.

Filled with a wonderfully complete assortment of Medicines, Ointments, bandages and other supplies.

Price.....\$4.00

STARTING TYPE

THE GUARANTEED COLUMBIA STORAGE BATTERY

The "GUARANTEED" COLUMBIA STORAGE BATTERY is the product of the National Carbon Co., Inc., the manufacturers of the universally known and used COLUMBIA DRY BATTERY. Years of experience in building batteries of all descriptions stand behind every Columbia, backed up by many real improvements in design and construction which produces a battery qualified to give an unusually powerful and unequalled service.

The Columbia "GUARANTEE" is the result of this experience as expressed in the design and construction—brought to the highest state of perfection by many years of extensive research work. It is the only "Guarantee" which is based on an actual electrical output for a definite length of time.

The Columbia "Guarantee" is not a promise of an adjustment or a compromise (usually in favor of the adjuster), it is a "Guarantee" which is not IN FAVOR of ANYONE,—it is an actual definite "straight" guarantee covering the life and performance (service) of every Columbia Battery.

THE COLUMBIA GUARANTEE.

Every COLUMBIA Starting and Lighting battery (except the SE type) is guaranteed for one year, to be capable at any time during the guarantee period, of developing at least 80% of its original rated Ampere hour capacity.

It is furthermore guaranteed when shipped from factory or an Official COLUMBIA Service Station: To contain the full number of plates specified in the type number. To contain the full published positive plate volume and area. To contain plates of the full dimensions and thickness specified. To be free from inherent defects in workmanship and material.

The Company WILL MAKE GOOD this guarantee by replacement with another battery in first-class operating condition, should any battery of the types mentioned be returned to the factory or an Official COLUMBIA Service Station, that has failed to fulfill the terms of the guarantee. (The SE type battery is similarly guaranteed for six months.)

A GUARANTEE WITHOUT PAYMENT BY THE PURCHASER FOR FULFILLMENT OF THE GUARANTEE.

When ordering, specify type of Battery, using list, and whenever possible give compartment space available, dimensions and data from name plate of old battery to be replaced.

COLUMBIA DRY CELL BATTERIES

These batteries have been the standard for quality for many years. Wherever dry batteries are used the COLUMBIA is known to give better service than any other make, regularly furnished in round cartons, as illustrated, but can be furnished in square cartons if desired. Where spring connections are preferred they can be furnished at the same price as the screw connections.

No. 6. COLUMBIA IGNITOR.
Is the highest-grade battery on the market. It is unexcelled for any service. It is particularly satisfactory for ignition, or where the current drain is high.
Price, 40 cents each.

No. 6. COLUMBIA.
A high-grade battery for every sort of service. It stands up well under heavy drains, and is particularly useful for intermittent service, or service where the current drain is not high.
Price, 40 cents each.

COLUMBIA HOT SHOT BATTERY

COLUMBIA HOT SHOT BATTERY is a unit battery in an attractive red, moisture proof cover. Soldered copper strips connect the individually tested cells, which are entirely surrounded by a water-proof insulating compound. It is only necessary to connect two wires to the binding posts. The battery is then ready to operate. **Hot Shot** is particularly useful for ignition where the variety of sizes makes it adaptable for motors of all sorts—stationary, vehicle or motor-boat. It is very satisfactory for carriage lighting outfits.

INGECO TYPE "W" ENGINES (For Kerosene or Gasoline)

QUALITY--SERVICE--SATISFACTION--ENGINES

ECONOMY.

No one wants to pay the high price for gasoline when they can get an engine that will run better and give more power on kerosene. Ingeco Type W Engines are not gasoline engines with kerosene attachments, but their design throughout is special for the use of kerosene.

THROTTLING VALVE.

All Type W Engines, three horsepower and larger, operate on the throttling principle. Throttling Valve is under direct control of the governor; the mixture is accurately proportioned under all conditions of load. The speed of the engine is even and steady, temperature is uniform, insuring greater economy irrespective of load. The throttling type engine is the only one that will successfully operate on kerosene.

MAGNETO.

A high-grade oscillating magneto is furnished on the Type W Engine. No batteries are furnished—none are required. Engine starts on magneto more easily than on batteries.

CYLINDERS.

Cylinders are cast separate from main frame and have unusually large water hoppers, which are cast in one piece with cylinder, which does away with all possibility of leaks between hopper and cylinder.

GENERAL CONSTRUCTION.

Write for Bulletin No. 2, describing in detail the construction of Type W Engines. Lack of space here does not permit us to fully explain splendid construction, the high-grade materials and other characteristics which make the Ingeco Kerosene Engines the very best engines for you to buy.

INGECO 1 3/4 H. P. GASOLINE ENGINE—WITH HIT-AND-MISS GOVERNOR.

While this size does not have the throttling valve for operating on kerosene, its fuel consumption on such a small engine is so little that this is not much of an argument against it. It possesses all of the other splendid features of the Type W Engine and is equipped with the same high-grade magneto. It weighs 530 pounds, has a speed of 550 R. P. M. and 6x3-inch pulley. Price on wood skids, \$78.00. On hand truck, \$87.00.

THREE H. P. TYPE W KEROSENE ENGINE.

This Engine has all the features described. Shipping weight, 650 pounds; speed, 450 R. P. M.; pulley, 8x4 in. Price on either iron sub-base or wood skids with oscillating magneto, \$138.40.

FOUR H. P. TYPE W KEROSENE ENGINE.

This powerful engine is perhaps the most popular of the whole line. Shipping weight, 750 pounds; speed, 450 R. P. M.; pulley, 10x5 in. Price on either iron sub-base or wood skids with oscillating magneto, \$168.00.

SIX H. P. TYPE W KEROSENE ENGINE.

Shipping weight, 1100 pounds; speed, 450 R. P. M.; pulley, 12x6 in. Price on either iron sub-base or wood skids with oscillating magneto, \$240.00.

H. P.	Shipping Weight.	Speed R. P. M.	Pulley	
8	1800	350	14x6	\$318.00
10	2500	300	16x6	450.00
12	3500	275	18x8	509.00
15	3700	250	20x8	630.00

INGECO PORTABLE KEROSENE ENGINES.

Mounted on hand truck, 3 H. P.	\$150.00
Mounted on hand truck, 4 H. P.	181.20
Mounted on hand truck, 6 H. P.	258.00
Mounted on team truck, 6 H. P.	326.40

Larger Sizes Quoted on Application.

INGECO PORTABLE WOOD-SAWING OUTFITS.

This illustration shows the Ingeco Type W Engine on truck with Appleton Steel Frame Wood-Sawing Attachment, complete with belt and saw.

Four H. P. with Type W Kerosene Engine with 13x5-inch plain pulley and 26-inch saw. Price, \$325.00.

Six H. P. with Type W Kerosene Engine with 16x5-inch plain pulley and 28-inch saw. Price, \$423.25.

Write for Bulletin No. 2—Giving full particulars.

Farm Pump Engine

Thousands of these outfits are in daily service and giving satisfaction. The illustration shows the outfit as it comes complete ready to attach to almost any make of windmill head pump. In designing this outfit, the manufacturers had in mind a pumping engine simple, convenient and reliable and as near trouble proof as possible. Being an air-cooled engine there is no likelihood of it freezing and the way it is constructed it cools properly while doing its work. It comes complete as illustrated (pump stand not included). Engine will pump water from an ordinary well at a rate of 35 five-inch strokes per minute and has power to lift 550 gallons of water against a total lift of 100 feet or 240 gallons of water against a total lift of 200 feet. If longer stroke is desired the engine can be adjusted to 7½ or 10-inch stroke.

Price.....\$85.00

NO. 633 POWER PUMPING OUTFIT

This outfit consists of the Farm Pump Engine connected to 3x5 double acting force pump. These outfits are to be used only where water supply is within suction limit 20 to 22 feet.

No. 633 OUTFIT is especially suitable for pumping water from springs or shallow wells to elevated storage tanks, pneumatic tanks, reservoirs, etc.; has a capacity of 600 gallons per hour against a total head of 125 feet. **Price, \$130.00.**

No. 644 PUMPING OUTFIT similar to No. 633 which has a capacity of 1100 gallons per hour against a total head of 70 feet. **Price, \$132.50.**

No. 655 PUMPING OUTFIT similar to No. 633 which has a capacity of 1700 gallons per hour against a total head of 40 feet. **Price, \$135.00.**

ENGINE OIL

To get proper efficiency from your engine you should have the right oil. We recommend for use in cylinder of our T. G. Kerosene Engines our **T. G. Oil No. 1**, and having this oil made up for us we have not aimed to get a low-priced oil as we figure that 30 or 40 cents difference per gallon is wisely spent if it means an oil that will give you more power and make your engine last longer.

T. G. No. 1 Throttling Governor Engine Oil, \$1.25 per gallon can.

Heavy Polarine Oil for hit and miss governor engine cylinders, \$1.15 per gallon can.

PRESSURE TANK PUMPER

We can furnish our **Pumping Outfit No. 320** for use in connection with pneumatic water supply equipment. The No. 320 is similar to No. 633, but pump is equipped with a special air cylinder so that air can be pumped with the water. Price of No. 320 Outfit as described, including air attachment, **\$135.00.**

1 H. P. INGECO ENGINE

This Big 1 H. P. Type "W" Engine—The Ideal Size for Pumping Water—Driving Cream Separators—Churns—Washing Machines—Corn Shellers and Other Similar Jobs—Does the Work Generally Done by 1¼ to 1½ H. P. Engines.

The 1 H. P. TYPE "W" is the latest acquisition to the well known and popular INGECO Type "W" Line. Being smaller, it is mechanically proper that the design should differ from the regular line. It is very conservatively rated—having considerably more than the usual surplus power, often-times doing the work done by engines of from 1¼ to 1½ H. P. All material entering into the manufacture is most suitable for the requirements. The workmanship is of the best, the construction throughout being in keeping with that employed in our high-grade engines of larger sizes.

No matter what work you have to do—pumping water, churning, separating cream, shelling corn, washing, etc., you must have dependable and economical power. There is no economy in buying an engine at a low price unless it will do your work satisfactorily and at a low cost of operation and maintenance. The 1 H. P. TYPE "W" is an absolute necessity and may be depended upon all the year round. It minimizes the chores and eliminates drudgery. It does the work better than it can be done by hand, allowing more time for other work and recreation. This is an ideal engine on the farm.

Size, H. P.	Speed R. P. M.	Approximate Shipping Weight, Lbs.	Flywheel Diam., In.	Approximate Floor Space, In.		Size Plain Pulley	Price
				Length	Width		
1	600	200	16	18½	26	4 x 3	\$60.00

LI-PO ELECTRIC PLANTS

LI-PO DIRECT CONNECTED ELECTRIC PLANTS.

Plant No.	Size Engine	Size Generator in Amperes	Size Battery Ampere Hours	Shipping Weight	Retail Price
1	3 H. P.	20	60	525 Lbs.	\$360.00
2	3 H. P.	20	90	600 Lbs.	390.00
3	3 H. P.	20	120	675 Lbs.	430.00

If you own a gasoline engine and for that reason do not desire to purchase a **LI-PO** direct connected set, we recommend the **LI-PO BELTED** set which is made in the same capacities as the unit sets and electrically embodies the same advantageous features to be found in the unit set and to which the lamp capacities of unit sets will also apply.

The installation of **LI-PO ELECTRIC PLANT**, makes possible conveniences that will be enjoyed by each individual member of the household.

Its light is bright and steady and because of its low voltage it is impossible for either children or adults to get a shock by coming in contact with any part of the plant; hence it is also safe.

However, the feature of plenty of good light wherever and whenever it is needed is only the beginning of the advantages of **LI-PO ELECTRIC PLANTS**.

It will reduce the labor of housework if employed to operate a vacuum cleaner, electric iron, washing machine or sewing machine. And it will add pleasure at meal time if used in connection with a toaster, coffee percolator, chafing dish or fan.

In the barn or workshop it will operate small motors which can be used for innumerable purposes and it will pump water that can be piped to any part of the house or outbuildings.

In addition to all this the gasoline engine is equipped with a pulley so that its full mechanical power may be used for driving different machines. By reason of this feature, and the **LI-PO** method of recharging the batteries, the upkeep is less and the life will be longer than any other plant that is not similarly equipped.

The operation of **LI-PO ELECTRIC PLANTS** is very simple, and does not call for any knowledge of electricity. In many instances these plants are operated by children as the engine is started by a slight movement of the starting lever and a similar movement is used to stop it.

There is a **LI-PO ELECTRIC PLANT** of the proper size to equip any farm, store, garage, dwelling, church or small town, but the sizes given below are sufficiently wide in range to meet most requirements.

A complete **LI-PO** equipment consists of a 4-cycle, water-cooled 3 horse-power gasoline engine directly connected to a 20 ampere 40-volt generator, and an oil-finished slate panel switchboard equipped with instruments, switches and controls that will permit of a maximum range of operations all mounted on one base and shipped as a unit.

The size of battery to use depends somewhat on the purpose for which the **LI-PO ELECTRIC PLANT** is intended to be used. For small farms, cottages, or small stores, **Plant No. 1** is sufficiently large.

For farms with a barn and other outbuildings to be lighted in addition to the house, and for medium-size stores and garages **Plant No. 2** is the proper size.

For large farms, stores, churches or small manufacturing plants we recommend **Plant No. 3**.

Capacities of LI-PO ELECTRIC PLANTS Rated in 20 Watt 16 Candle-power Lamps.

INGECO BATTERY LIGHTING PLANTS

The illustration represents a belt-driven plant using the **INGECO THROTTLING GOVERNOR KEROSENE ENGINE** for driving the generator and the engine is also available for any other farm work you may wish to do. The switchboard illustrated is the standard **Type A**—and the battery is the 16-cell Faure glass jar battery connected in series for economical operation and mounted on rack for easy inspection. **Ingeco** Engines being of Throttling Governor Type run steadily and are well adapted for operating generators either for charging batteries or for taking lights from generator. When lights are taken direct from generator the standard type of **Ingeco** Engine with extra heavy balance wheel should be used.

SPECIAL LITERATURE OF THE ABOVE DESCRIBED ELECTRIC LIGHTING PLANTS AND FURTHER INFORMATION CHEERFULLY FURNISHED ON APPLICATION.

THE CHASE 9-18 TRACTOR

STURDY, LOW CONSTRUCTION, PERFECT BALANCE, EASE OF CONTROL, WIDE RANGE OF HITCH, PERMIT THE USE OF ANY STANDARD MAKE OF TILLAGE IMPLEMENTS. DOES YOUR FARM HAULING AND FURNISHES POWER FOR BELT WORK.

Can be furnished with single front wheel as illustrated or with double front truck if preferred or can furnish you a combination front consisting of center wheel as illustrated with two six-inch face wheels on outside of castor fork.

ONLY TRACTOR THAT TURNS IN A RADIUS OF ITS OWN WIDTH

WHY THE CHASE 9-18 FARM TRACTOR SUCCEEDS

It meets the growing demand for a medium-sized tractor especially suited for the small or medium-sized farm.

It is the product of ten years careful engineering experience coupled with an intimate knowledge of what the progressive farmer expects in a tractor.

It is made by a company known the world over as pioneer builders of motor trucks.

The Chase Farm Tractor is ideally suited for eastern farming conditions. For hill and valley work and rough land it has no equal, while its simplicity of construction and ease of control renders it especially suitable for orchard work and other difficult plowing problems.

It will handle a two gang, 14-inch, or three 12-inch plows under any reasonable conditions, operating anywhere a verticle corn binder can be successfully used. It will pull an 8½-foot double acting Disc Harrow, a three-section Spring Tooth Harrow, or a four-section Smoothing Harrow. Or it will

handle equally well a 6-foot double acting Disc Harrow and a two-section Smoothing Harrow in combination.

The rear wheels being driven by individual clutches, the Chase will work successfully under conditions where a tractor operated by ordinary differential would stall or mine. For the same reason on slippery ground where one wheel, only, can get a grip, which would be sufficient to stop a machine operated by differential, the Chase will pull out and perform its full duty without delay or hindrance.

The driving wheels being outside the frame, it is possible to use extension rims on the rear wheels, increasing their normal width from 12 inches to 22 inches each. The front wheel is so arranged that the axle extends beyond the yoke. Two additional wheels placed on this extension axle, convert the front wheel into a Roller, thereby permitting the tractor to operate on plowed ground with perfect ease, acting as a roller and clod crusher while harrowing or seeding, with no danger whatever of packing the soil.

SPECIFICATIONS

Wheels.—Front wheel or steering wheel spring mounted, 36 inches in diameter, 8-inch face. Equipped with front extension wheels, 34 inches in width. Rear driving wheels 48 inches in diameter, 12-inch face. Equipped with rear extension rims, 22-inch face each.

Kind of Fuel.—Gasoline, distillate and kerosene.

Cooling System.—Enclosed radiator equipped with fan shroud and powerful cooling fan. Water circulated by centrifugal water pump, having large shaft and bearings.

Number of Wheels.—Two driving in rear, one steering in front; with extensions applied to both front and rear wheels tractor becomes a roller covering the entire ground. 84 inches in width.

Control.—Motor, friction clutch, gear shift and brake operated by convenient hand levers. Friction clutches operating driving wheels controlled by convenient foot pedals.

Bull Pinion Gears.—High carbon steel heat treated so tough they can't be machined—so hard they can't be drilled.

Flowing Capacity.—Two 14-inch plows of any standard make, under all conditions, and three 12-inch plows in stubble or favorable soil conditions.

Harrowing Capacity.—One 8½-foot double action disc harrow. Three section spring tooth harrow, or the above equivalent in other tillage implements.

Belt Power.—All forms of farm belt work requiring up to and including 18 horsepower.

Motor.—Chase Buda long stroke, heavy duty type, 4 cylinder, 4 cycle, water-cooled.

Ignition.—High tension magneto, having set spark equipped with impulse coupling for starting. No batteries.

Carburetor.—Automatic float feed. All air going to the carburetor is cleaned and thoroughly heated by a special cleaning and heating device.

Air Cleaner.—Centrifugal visible type. Very simple and efficient.

Lubrication.—Automatic splash system and force feed pump, giving positive lubrication for motor.

Transmission.—Chase, two speeds forward, one reverse; sliding gear, in oil-tight dust-proof case. Gears operate in oil. Hyatt bearings throughout.

Speed, Miles Per Hour.—High, 2½; low, 1½; reverse, 1. Speed may be changed by a simple governor adjustment.

Motor Clutch.—Internal expanding shoe located in engine fly wheel. Bierman type.

Brake.—Powerful contracting band applied to bull pinion shaft.

Foot Clutches for Driving Wheels.—External contracting band clutches operated by convenient foot pedals, giving individual control of each driving wheel.

Dimensions.—Length, 11½ feet; width, 68 inches; height, 57 inches.

Weight.—4,700 pounds.

Frame.—Angle and channel steel. Joints hot riveted.

Tank Capacity.—Fuel tank, 11 gallons kerosene, 2 gallons gasoline.

Belt Pulley.—8 inches in diameter, 6-inch face; normal speed, 900 revolutions per minute. Adjustable.

Draw Bar.—Adjustable.

PRICE, STANDARD EQUIPMENT, \$1,252.00, PLUS FREIGHT FROM SYRACUSE.

ELECTRIC PUMPS FOR PNEUMATIC PRESSURE WATER SYSTEMS AND FOR ELEVATED TANKS

**Fig. 1330
ELECTRIC
PUMP.**

Fig. 1330 illustrates a popular type of electric pump complete with motor and automatic switch for pneumatic tank work. This is a shallow well pump limited to a 25-foot suction lift, has a capacity of 250 gallons per hour and will operate against 50 pounds discharge pressure. Pump is equipped with air valve for supplying air to the tank. The switch used is the Fig. 1350 Hoosier Automatic Pressure Regulator, described below price with 60 cycle single phase 110 volt alternating current motor.

List, \$110.00. Our Special.....\$99.00

Fig. 1332.—This pump is identical with Fig. 1330, except that it is for open tank systems and has no pressure regulator or air valve. Price with motor as described above, List, \$100.00. Our Price.....\$90.00

414 Type E. A. C. Electric Pump

A compact and convenient pump for wells of moderate depth for use in connection with Pneumatic Water Systems. Mounted on iron base, with one-third horse power motor and automatic switch and with air attachment makes a very complete and convenient pumping outfit for ordinary household requirements. Has 2x10-in. brass cylinder, which operates on five-inch stroke. Price, \$143.00. Fresh-Water Attachment, \$7.70.

HOOSIER AUTOMATIC PRESSURE REGULATOR

Fig. 1350.—Automatic Pressure Regulator is used for automatically controlling electric driven power pumps. It can be adjusted for any pressure up to 75 pounds and for a variation of 20 pounds. For domestic purposes, it is best to have it cut in and out at 30 and 50 pounds, respectively. List Price, \$15.00. Our Price, \$12.00.

No. 414 Type
E. A. C.

Gould's Gasoline Engine-Driven Outfit Mounted on Heavy Oak Plank

Hi-Speed Outfit "N"

HI-SPEED OUTFIT "N"

Outfit "N," consisting of one Figure 1695, size 1 1/4 x 1 1/2". Three GPM GOULDS "Hi-Speed" Pump, mounted on wood base, 9"x30" x 1 1/2" (without iron legs), for belt drive, to and including One Two-Cycle Gasoline Engine, 1/2 horse power, vertical type, air cooled, speed 1000 RPM, complete with spark coil, carburetor and exhaust muffler, with battery box for four dry batteries, but not including batteries. The pump will be fitted with an air cock, and we will supply a 3/8" round belt.

Price\$90.00

Weight127 1/2 lbs.

If Automatic Regulator is wanted, add \$20.00.

The Hoosier Horizontal Double Acting Power Plant

Fig.

1320

A compact high-grade horizontal pump for pumping from shallow wells to pneumatic water supply systems. The whole design of this pump is with a view to compactness, strength and accurate operation. The load is well equalized, has 2 1/2 x 4 brass-lined cylinder, superior type of stuffing box, back geared four to one; has 10x2 1/2 pulleys, capacity at 50 R. P. M. 510 gallons per hour; 1 1/4" suction and discharge. List price with machine cut gears, \$45.00. Our Price, \$40.50.

Gould's Pyramid Power Pump

A pump of high efficiency for use where water is not more than 22 feet below pump. The gearing is machine cut of hard cast iron; the crankshaft is of high carbon open-hearth steel; the bearings are lined with best-grade babbitt metal; cylinder is best quality hydraulic iron fitted with brass lining; the valves are rubber-disk type on bronze seats, convenient to get to.

Size 2 1/2 x 4, suction and discharge 1 1/4 in., capacity 408 gal. per hour.

Price, \$60.00.

Size 3 x 5, suction and discharge 1 1/2 in., 280 lbs., 720 gal. per hour.

Price, \$82.50.

Size 4 x 5, suction and discharge 2 in., 325 lbs., 1260 gal. per hour.

Price, \$97.50.

Air Attachment for either.

Price, \$15.00.

Special circular and prices on larger sizes on application.

Buckeye Power Working Heads

The Buckeye Power Working Heads are built in three sizes, and are carefully designed to meet the requirements of deep well pumping.

In addition to lifting the water from the well, they are capable of forcing the water to an elevated tank or reservoir at any ordinary height above the pump.

The cross-heads and guides are unusually well constructed, and prevent entirely the wear of the piston rod in the packing box of the pump.

The frames of these pumps are of the angle-corner type, tapering in the line of the belt pull from the base, and by disconnecting the piston rod just above the packing nut, and removing the four cap screws which attach the frame to the base, the body of the pump can be hinged out of the way when removing the plunger rod and valves from the well.

With air chamber and differential plunger.

No.	Cylinder and Elevation.	Size Stroke	Price.
1139	3-in., 150 feet.	5, 7 1/2, 10.	\$105.60
1141	5-in., 150 feet.	8, 10, 12.	136.80
1143	8-in., 100 feet.	12, 16, 20.	258.75

If air chamber is not wanted, deduct \$5.00.

Prices on these heads, with iron sub-base and with pinion and gear for motor quoted on application.

MYERS PUMPS

Fig. 398—Heavy Submerged Cylinder Deep Well Double-Acting Windmill Head Three-Way Force Pump.

An unusually heavy strong pump for deep wells. We recommend it as the best of the Myers Line of Windmill Head Pumps. Can be adjusted to 6, 8 or 10-inch stroke.

Prices of Fig. 398 Pumps.

- No. 22 with 3-inch brass-lined lower cylinder. List Price, \$30.00; Our Price, \$27.00.
- No. 23 with 3-inch brass lower cylinder. List Price, \$31.50; Our Price, \$28.35.
- No. 24 with 3½-inch brass-lined lower cylinder. List Price, \$31.50; Our Price, \$28.35.
- No. 26 with 4-inch brass-lined lower cylinder. List Price, \$34.50; Our Price, \$31.05.

Fig. 886—Myers Branch Pipe Single-Acting Windmill Head Three-Way Force Pump With Plunger Tube, 6, 8 or 10-in. Stroke.

This head embodies a construction that combines all the features required in a reliable windmill three-way cock pump in a neat design, strong and compact.

Fig. 886—No. 228 Pump with 1-inch brass plunger tube, either 2½ or 3x14-inch brass cylinder. List Price, \$28.50; Our Price, \$25.65.

R172 MYERS HAND PUMP.

A very popular cog gear lift and force pump with 3-inch brass-lined cylinder. List Price, \$13.50; Our Price, \$12.15.

R-152—A lift pump of the same style as the R-172 Lift and Force Pump. List Price, \$12.00; Our Price, \$10.80.

The Myers Imperial Working Head

Fig. 1584.

This head is a splendid combined outfit for hand or belt power. It can also be used by windmill. It is made with machine cut gears, back geared 6 to 1 and has 6 and 9-inch strokes. Can be furnished for either 2½, 3 or 3½-inch suction pipe. In ordering state which is wanted.

Fig. 1584—No. 389 Myers Imperial Working Head. List Price, \$45.00. Our Price, \$41.50.

The Myers Defiance Working Head

Fig. 1566.

This well-known type still retains its popularity. Has machine cut gears and cock spout, back geared 6 to 1—has 6 and 9-inch strokes and back outlet is tapped for 1½-inch pipe. This can be plugged and underground Tee discharge used.

chine cut gears and cock spout, back geared 6 to 1—has 6 and 9-inch strokes and back outlet is tapped for 1½-inch pipe. This can be plugged and underground Tee discharge used.

Fig. 1566—No. 388—Defiance Working Head. List Price, \$37.50. Our Price, \$33.75.

For General Service.

Fig. 1866.

Capacity 500 Gals. at 70 RPM.

No. 612—Myers Self-Oiling Bulldozer Power Pump with Vacuum Chamber, 2½x3 in. Brass Lined Cylinder, 12x2 in. Tight and Loose Pulleys, 1½ in. Brass Piston Rod, Suction and Discharge 1½ inch. List, \$63.00. Our Price, \$56.70.

Capacity 1000 Gals. Per Hour at 70 RPM.

No. 613—Myers Self-Oiling Bulldozer Power Pump with Vacuum Chamber, 3x4 in. Brass Lined Cylinder, 14x2½ in. Tight and Loose Pulleys, ½ in. Brass Piston Rod, Suction and Discharge 1½ inch. List, \$97.50. Our Price, \$87.75.

Capacity 2000 Gals. Per Hour at 65 RPM.

No. 614—Myers Self-Oiling Bulldozer Power Pump with Vacuum Chamber, 4x5 in. Brass Lined Cylinder, 16x4 in. Tight and Loose Pulleys, 1½ in. Brass Covered Piston Rod, Suction and Discharge 2 inch. List, \$127.50. Our Price, \$114.10.

Capacity 3000 Gals. Per Hour at 60 RPM.

No. 615—Myers Self-Oiling Bulldozer Power Pump with Vacuum Chamber, 5x5 in. Brass Lined Cylinder, 16x4 in. Tight and Loose Pulleys, 1½ in. Brass Covered Piston Rod, Suction and Discharge 2½ inch. List, \$137.50. Our Price, \$123.75.

Vacuum Chamber must be used when operating pumps at above specified speeds. Air Intake Valve for Pneumatic use on any of above Pumps, add to list \$3.00. Our Price, \$2.70.

Myers Bulldozer Power Working Head

Machine Cut Gears. With Anti-Freezing Set Length.

Back Geared 5 to 1. Has 5, 7½ and 10-inch Stroke.

These extension pipes form an air chamber which cushions the stream sufficiently for operation under heavy pressure.

The cross section at the bottom has a flange below tapped for any size pipe up to 3 inches.

The plunger, up to 3 inches in diameter, can be withdrawn through the top without disarranging any of the other parts.

The discharge pipe is direct from air chamber. It is tapped for 1½-inch pipe. If larger discharge pipe is required use Tee in pipe below cross section.

State size of suction to be used.

Bulldozer Power Working Head, with Anti-Freezing Set Length, complete as shown by Fig. 1332. Price, each, List, \$112.50. Our Price, \$101.25.

Myers All Brass Working Barrel or Artesian Well Cylinder

The Fig. 1404 Myers Artesian Well Cylinder is made with four cups and bronze-ball valves. This cylinder should be used with Myers Working Heads where it is desired to draw out plunger without taking pipe from well.

IMPROVED
BUCKEYE
LIFT PUMP.

The Improved Buckeye is the most beautiful in design, most elaborately finished, best constructed and most desirable Lift Pump in every particular ever offered to the trade.

Fig. 67A.—Stand only as illustrated. **Our Price, \$7.50.**

Fig. 67A. No. 321.—Five-foot set length, with 3-inch brass-lined cylinder. **Our Price, \$11.80.**

Fig. 67A. No. 323.—Five-foot set length, with 3½-inch brass-lined cylinder. **Our Price, \$14.25.**

Fig. 67A. No. 325.—Five-foot set length, with 4-inch brass-lined cylinder. **Our Price, \$16.50.**

No. 902.—A ratchet head single-acting lift pump, similar in style to the No. 932. For wells 40 feet deep or less; 4-foot set length, with 3-inch brass-lined cylinder. **Our Price, \$10.60.**

No. 932.—A simple, substantial ratchet head single-acting force pump intended for use in wells of 40 feet deep or less. The ratchet head produces a perfectly aligned stroke on the piston rod, and gives good leverage. Four-foot set length with 3x10 brass-lined cylinder. **Our Price, \$12.60.**

No. 987.—A popular double-acting deep-well force pump. Has the advantage of direct stroke and great leverage obtained from the ratchet head principle. Constructed with air chamber and discharge pipe close together, making it a good pump for drilled wells. Four-foot set length with 3-inch brass-lined cylinder. **Our Price, \$19.80.**

No. 988.—Similar to the No. 987, but with 3½-inch brass-lined cylinder. **Our Price, \$22.45.**

By four-foot set length is meant the pump with cylinder extended four feet below base which rests on platform. By stand only is meant the upper part of pump, without cylinder, like illustrated by Fig. 67A, as illustrated above, and by Fig. 423 on opposite page.

Fig. 932.

No. 987

ADDITIONAL FOR FITTING BUCKEYE OR GOULD'S PUMPS

We give below a table of the additional charge for fitting, and the amount stated in table has to be added to the price of the pump selected. In fitting pumps we use galvanized pipe and galvanized pump rod and a strainer foot valve. For wells 26 feet deep or less we leave the cylinder 5 feet below platform. For wells deeper than 26 feet we place the cylinder close to the bottom of the well.

ETTER EASY RUNNING PUMP

The original rack and pinion pump. Mr. Etter was the first to see the advantage of this construction. The features of construction are clearly shown by the illustration.

No. 125.—Force Pump with 3x11 brass cylinder for wells 150 ft. deep. Our Price, \$16.10.

No. 127.—Force Pump with 3 1/2 x 11 brass cylinder for wells up to 100 ft. deep. Our Price, \$17.35.

No. 126.—Lift Pump with 3x11 brass cylinder for wells up to 150 ft. deep. Our Price, \$13.65.

No. 134.—Stock Lift Pump with 4x14 brass cylinder for wells up to 50 ft. deep. Our Price, \$18.60.

ETTER 9-INCH STROKE DETACHABLE GEAR FORCE PUMPS, WITH WINDMILL ATTACHMENT AND THREE-WAY.

No. 153 has 2 1/2 x 14 brass cylinder. Our Price, \$24.75.

No. 155 has 3x14 brass cylinder. Our Price, \$24.75.

No. 159 has 3 1/2 x 14 brass cylinder. Our Price, \$25.35.

CENTURY LOW-DOWN DOUBLE-ACTING FORCE TANK PUMP

No. 470

Capacity 2000 gallons per hour, 5-inch polished-iron cylinder, 5-inch stroke, fitted for hose and 2-inch pipe. Valves seats of brass; valves are metal, faced with rubber, and are very conveniently placed, so that they can readily be reached; piston rod is 13-16, drawn polished steel, with heavy brass stuffing nut. Price, with hose nipple, hose attachment, hose band and strainer. **Our Special Price, \$15.90.**

HAYS JACK NO. 2

CONSTRUCTION—Tight and loose pulleys, 2½-inch face, mounted on large stationery spindle, one-eight turn takes up all wear—gear and pinion always in mesh. Special machine cast gear, every tooth uniform. Gear and crank disc keyed to revolving shaft with long bearing. Pinion cast solid with pulley and completely encased, protecting gear and preventing injury.

The jack sets solid on a wide spreading base, which may be bolted to a platform, wall or ceiling. In addition the pump and jack are firmly fastened together with a steel front clamp. This construction eliminates lifting and jerking on the pump and insures longer life and easier running to both pump and jack.

Hard wood pitman bars, riveted at the end, work in alignment with the pump. Adjustable cross head, easy and exact in adjustment—no holes to bore.

Back geared 5 to 1. Adjustable 5, 7, and 9-inch stroke.

PRICE\$8.75

LOW-DOWN DOUBLE-ACTING HOUSE FORCE PUMP

Very popular for pumping from cisterns or shallow wells into house tanks. They are furnished with either 2½ or 3-inch brass-lined cylinder, with 5-inch stroke. Three-inch cylinder pump at 40 complete strokes per minute has a capacity of about 12 gallons per minute, and 2-inch cylinder pump has a capacity of a little over 8 gallons per minute. These pumps have rubber-faced metal valves, brass valve seats and brass-covered piston rod.

No. 400
Pump Jack

No. 400 TRIUMPH JUNIOR PUMP JACK OR COUNTERSHAFT

Made with machine-cut gear; back geared 5 to 1; 4 and 6-inch stroke; especially designed for use in connection with a horizontal hand pump. The cut shows the manner of attaching jack to pump. Can be used also as a countershaft. Furnished with or without rod connection. Triumph Junior Jack complete with wood rod as illustrated. **List, \$16.50. Our Price, \$14.85.** Without wood rod and pump clamp. **List, \$15.00. Our Price, \$13.50.**

No. 366 MEYERS PUMP JACK

This Jack is back geared 6 to 1. Has machine-cut gears; 6 and 9-inch stroke; furnished with 12-inch tight and loose pulleys. The connecting rods are hard wood. Crosshead can easily be adjusted to suit height of pump stand. **List, \$15.00. Our Price, \$13.50.**

Fig. 1669.

No. 366 Pump Jack

These Pump Jacks can be equipped with larger pulleys to suit high-speed engines and motors.

I X L GALVANIZED STEEL CHAIN PUMP

Being made of No. 24 gauge galvanized steel, this pump will not rot, rust nor accumulate filth like pumps of less desirable construction, and it makes the water clear and pure. It is anti-freezing, as the reservoir piece has a small hole, which allows the water to run out. This style of pump is practical for use in wells as deep as 40 feet. The term curb means the complete upper part of pump with fixtures.

PRICES.

I X L Curb.....	\$7.00
Gem Curb	5.50
Tubing, per foot.....	.18

Rubber Buckets10
Iron Platform	10.00
Chain, per lb.....	.15

DIRECTIONS FOR FITTING UP CHAIN PUMPS

1. Use one foot more tubing than depth of well.
2. Multiply length of tubing by two and add 3 feet 6 inches to get proper length of chain.
3. Rubber buckets should be placed 6 or 7 feet apart.
4. See that tubing is held securely by tubing brace at bottom of curb.

GEM CURB.

BUCKEYE HOUSE FORCE PUMPS

The illustration shows this pump with plain spout. We furnish it also with cock spout, so that the water can be shut off from the spout and pumped to elevated tank or bathroom. This pump has 3-in. brass-lined cylinder and brass valve seat. It has large air-chamber capacity, and is a very convenient and popular pump. You will note that the base of this pump is similar to the base of pitcher-spout pumps, which makes it very suitable to use in place of the pitcher spout pump if a force pump is wanted. No. 52 pump is for use where the water is not more than 20 feet below the pump. No. 52 Pump with plain spout—

Retail, \$9.00.

With cock spout. Retail, \$10.50.

No. 2 NATIONAL WATER ELEVATOR and PURIFIER

Purifies by means of oxygen forced into water.

Price: Elevator, with 25-foot chain and jappanned bottom wheel for 10-foot cistern, \$15.00.

Extra chain, 30c. per foot.

No. 30 STAR WATER ELEVATOR and PURIFIER

Similar to the No. 2 Water Elevator, except that the buckets are slightly smaller, and there is a slight difference in the way the buckets are coupled together. On account of the smaller bucket, it is considered by some better for deep wells.

Price:—Elevator and 25-foot chain and jappanned bottom wheel for 10-foot cistern, \$13.50. Extra chain, per foot, 30c.

E. Z. BUCKET PUMP OR WATER ELEVATOR

The strongest bucket pump built. It is made of the best No. 24 galvanized steel, painted two coats best gray paint, and varnished. It has roller bearings, and they make the pump work easier, wear longer and run practically noiseless.

It has steel top and bottom bands. The buckets are made from the best galvanized steel, roll locked seams throughout. Fixtures are put on the pump complete, avoiding all trouble in fitting.

Price:—Elevator, with 25-foot chain and galvanized bottom wheel for 10-foot cistern.....\$13.50

DEMON GRIP STEEL PUMP ROD COUPLINGS

See the cut of the **DEMON GRIP COUPLING**—observe the crack. With this construction it is possible to use oversize rods without destroying the coupling, or having the trouble to either rethread the rod or coupling.

The **Demon Grip Couplings** are made in dies, which forms every one alike; never a cull, every coupling will make a straight rod.

The **Demon Grip Coupling** with all of its advantages costs no more than a malleable.

Price, each.....7c.

100.....\$5.00.

The steel construction makes the **DEMON GRIP COUPLING** stronger than the pump rod. In actual use it can never be tested to its limit, but the same grip which enables it to stand such a pull, makes it hold fast to the rod under the constant jar, which wears the thread from a malleable and causes it to be replaced.

PUMP LEATHERS

Our pump leathers are cut from the best grade of selected Oak Tan leather. We offer only such leathers as we can recommend as being absolutely high grade.

WOOD PUMP ROD.

THE FAMOUS "BOSS" WASHING MACHINE

Unlike all other Washing Machines, the "BOSS" does not merely soak the clothes, nor pound nor tumble them, nor churn the water around and among them.

When the top is down and the "BOSS" is operated, the two rub-boards oscillate in opposite directions twice to every revolution of the crank, or 180 times to every turn of the wheel—90 forward and backward strokes every minute. It is this quick double action, and the pressure to the upper rub-board that produces the action similar to the rubbing and squeezing process of washing by the hand method. The clothes, being placed between the two rub-boards, are rubbed and squeezed, rubbed and squeezed, many pieces at a time, nearly 200 times every minute, and it is this rubbing—squeezing—suction-creating action which forcibly drives the hot soapy water through every mesh and fibre and cleans the most soiled clothes so well that after-rubbing by hand is not necessary.

The lower rub-board can be removed to clean and ventilate the machine after use. The patented detachable connections can be unhooked in an instant—then the rub-board is lifted out and every particle of dirt which has settled in the dirt chamber—no other washer has this feature—is easily taken out with a cloth. There are no corners or crevices where dirt can accumulate and cause ill-smelling odors. The "BOSS" is always clean, sanitary and odorless, no matter how soiled the clothes that may be washed in it.

All wood parts are Louisiana Red Cypress—natural finish—the best wood known for Washing Machine construction. Galvanized Castings and Hardware make the "BOSS" RUST-PROOF.

The No. 5 size is fitted with a special wheel which will permit the machine to be operated by hand or engine power—making it an excellent power washer.

BOSS ENGINE POWER WASHER WITH POWER WRINGER

THE WASHER—Is the famous "BOSS" described above, but built especially heavy for power drive. Legs extra heavy, bolted to tub and well braced. Louisiana Red Cypress wood, natural finish. Heavy gauge solid copper bottom, with metal drain faucet. Machine-fit castings, noiseless in operation. Galvanized castings and hardware.

THE WRINGER—Is operated by power and has a safety device which makes wringer accident-proof. Wringer can be swung out from washer in several positions to wring from other tubs while washer is running. Operates forward or reverse or remains neutral while in any position. Has reversible drain-board. Twelve-inch highest-grade rolls; enclosed cogs and ball bearings. **PULLEYS**—Six-inch diameter with 2-inch face. Should be connected to run at speed of 300 R. P. M., which will run the washer about 90 R. P. M.—the proper speed.

connected to run at speed of 300 R. P. M. and wringer about 65 R. P. M.—the proper speed.

STANDARD PERFECTION

An excellent moderate-price washer, constructed on the rubbing-suction principle—with adjustable cylinder above—removable rub-board below. Made of cypress; natural finish. Galvanized castings and hardware.

ONE SIZE ONLY.
Capacity 6 shirts. List Price, \$10.50
Shipping weight 45 lbs. Our Special Price, 6.50

GRITCO-B ROTARY

A SUPERIOR ROTARY WASHER.

With simple roller-bearing gear, driven by large heavy flywheel, thus eliminating friction and wear—insuring smooth and easy running. Gearing imparts an alternate rotary motion to the dasher at high speed to produce proper agitation in the tub.

Covered gears. Telescopic dasher post—no projection below dasher to tangle or injure the clothes. Non-floating cypress dasher. Large cypress tub. Natural finish, with reinforced top—corrugations on inside—detachable lid—bolted wringer attachment—heavy detachable legs. Galvanized hardware and castings.

Capacity 8 shirts. Shipping weight 85 lbs.
List Price, \$22.00. Our Special Price, \$13.00.

CINCY HIGH SPEED WASHER for Hand or power

Is operated by lever with high-speed flywheel geared to make 300 revolutions per minute—this terrific momentum creating sufficient power to practically run the washer without exerting the operator. The flywheel is grooved so a belt may be used on it, making this a hand and power washer in one. Machine can be directly belted to an engine or line shaft and can be opened or closed without shutting off the power or throwing off the belt. Large cypress tub—natural finish and all improved features. Capacity 8 shirts. Shipping weight 90 lbs.

List Price, \$28.00. Belt Pulleys, extra, \$5.00.
Our Special Price, \$18.00. Belt Pulleys, extra, \$3.00.

BANNER GEARLESS MOTOR

FOR CITY WATER POWER—Guaranteed for any pressure over 20 pounds.

Motor is constructed on the turbine principle of direct action—no gears or racks—only two self-lubricating bearings—only two well-protected and practically indestructible springs—heavy brass cylinder—and parts perfectly machined—perforated metal screen before intake port to prevent anything getting into the cylinder. Consumes less water than most washer motors, and will operate on very low pressure. Dasher post adjusts through top of motor—no projection below dasher. Furnished with high-grade intake and exhaust hose. Large cypress tub—natural finish—with all improved features. Capacity 8 shirts. Shipping weight 60 lbs.

List Price, \$36.70.

Our Special Price, \$23.50.

BALTIMORE "B"

Improved construction, perfect fitting and heavy castings make the gearing unusually strong, easy to operate and free of the excessive breakages often experienced with other washers of this type. The roller guide to hold the drive gear in position is also a decided improvement and advantage in insuring ease of operation and eliminating wear.

Large cypress tub—natural finish—with cypress dasher—corrugations on inside. Galvanized hardware and castings.

Capacity 8 shirts. Shipping weight 55 lbs.
List Price, \$14.70. Our Special Price, \$9.00.

CHAMPION ELECTRIC WASHER

A high-grade Washing Machine complete with best make electric motor, at such a moderate price that every home can afford to have one. Sold entirely on its merits.

The **Champion Electric** is furnished complete with motor, as illustrated, and is ready for use by simply screwing the attachment plug into the nearest electric light socket and turning the switch. The machine needs no attention whatever while running, and is absolutely trouble-proof, but in case of emergency it can be operated by hand by simply attaching the wheel-handle furnished for the purpose.

Open View.

Consider These Advantages Features.

Metal drain faucet with hose connection. Every drop of water is drained from machine without tilting the tub or splashing the water on the floor.

Rollers on the legs. One person can easily handle the machine and move it about.

Self-adjusting cylinder—makes it possible to wash a large or small load equally as well.

Lower rubboard is removable. Machine can be easily and thoroughly cleaned after use.

Use of motor is not limited to operating

Closed View.

the washer only—it can be used to operate a churn, ice-cream freezer or any small household appliance adapted for the purpose.

The Champion Electric Is Built to Last a Lifetime.

The tub and all wood parts are Louisiana Red Cypress—the most durable and satisfactory wood known for washing machine construction. Finished natural with water proof varnish.

The mechanism is extremely simple—has no gears or breakable parts. The machine-fit bearings make it noiseless in operation. Inside iron parts and hardware are heavily galvanized and rust-proof.

The motor is high grade standard make, constant duty type, with ample power to operate the washer with maximum load. No better motor is made.

It is mounted on an adjustable bracket, making it very easy to take up any slack in the belt when necessary. As attached the motor counter-balances the weight of the cover—making the machine very easy to open—a child can handle it.

MAJESTIC

ROTARY WASHER

ELECTRIC WELDED WIRE HOOPS.

VIRGINIA WHITE CEDAR TUB.

ROLLER BEARINGS.

This is the lightest-running and easiest-working Washing Machine made. Roller bearings; no friction. Works in both directions. Very simple; nothing to get out of order. Nicely corrugated on sides and bottom. Hoops are galvanized wire and are welded by electricity; these are much stronger than the old-style flat hoops, and CANNOT DROP OFF, being sunk in grooves.

OUR SPECIAL PRICE,

\$14.00.

BALTIMORE CEDAR WASHER

ELECTRIC WELDED WIRE HOOPS.

Our Special Price,

\$9.00

Constructed of best white cedar; improved gearings; all castings japanned. Inside fully corrugated like a washboard; no nails; no crevices for dirt, and allowing no steam to escape or water to leak. A square galvanized-iron rod, instead of wood, to work the dolly; this can be lowered or raised without moving tops. Accommodates itself automatically to quantity of clothes. Impossible to tear the most delicate fabric. Our Special Price, \$9.00.

THE MARYLAND WASHER

To meet the demand for a low-priced Washer, we offer the Maryland, which is made of pine instead of cedar, but in all other respects is the same as Baltimore Cedar shown above.

Rope not Included in Price

TROLLEY ROLLER-BEARING STEEL BARN DOOR HANGER No. 20

The only difference between the No. 25 and 20 is the No. 25 has return apron, as shown in No. 25 cut below, and the No. 20 has not.

Weight, per pair, 10 lbs. Pendant, 6 inches long, 3½ inches wide, 3-16 inch thick. These Hangers have lateral adjustments, and are suitable for doors from 1½ to 2¼ inches thick. Hangers and track are sold separately. A pair of Hangers consists of two hangers and carriers, one right-end bracket, No. 51; one left-hand bracket, No. 50, and one center bracket, No. 52, complete with wood screws for hangers and lag screws for brackets. When ordering always give thickness of doors, the exact width of opening, and state whether for double or single doors. No. 31 track, No. 16 gauge, price, per foot, 28c. Hangers No. 20, per pair, \$2.50.

NO. 25 TROLLEY ROLLER-BARN DOOR HANGER

Has two adjustments—vertical and lateral. Has return apron. (See cut). Pendant 9 inches long, 3½ inches wide, 3-16 inch thick. Suitable for doors 2 to 3 inches thick and weighing from 400 to 600 pounds. Made to run on No. 31 track. A pair of hangers consists of two hangers and carriers, one right- and one left-hand bracket, complete with screws for hangers and lag screws for brackets. Hangers and track sold separately. When ordering, always give thickness of door, exact width of opening, and state whether for single or double door.

Per pair, \$3.00. No. 31 Track, per foot, 28c.

BEARING STEEL

Anti-Friction Barn Door Hanger No. 2

PRICE, PER PAIR, \$1.00.

Has roller bearings, which cause the wheel to roll easily and prevent wear. Frame of open-hearth steel, strength sufficient for heaviest doors; standard tread; can be used on other tracks.

The track is made of special carbon open-hearth steel, 1x3-16 stock; has heavy brackets well and substantially riveted every 12 inches. Ends made with tongue and groove to match. Track made in 4-, 6-, 8- and 10-foot lengths. Price, per foot, 9c.

STAY ROLLERS

For use with Barn Door Hangers. Price, each, 25c.

No. 24 Roller-Bearing Steel Barn and Fire Door Hanger

A pair of hangers consists of two hangers, one each right- and left-hand brackets, and one center bracket, complete, with wood and lag screws. The only Adjustable Double Apron made Suitable for doors weighing 400 to 600 lbs. Adjustment lateral only. No. 1—For doors, 1½ to 2¼ inches thick; weight, 12 lbs. No. 2—For doors 2¼ to 3 inches thick; weight, 12 lbs. This Hanger has return or double apron. Per pair, \$2.75. No. 31 Track, per foot, 28c.

FLEXIBLE HINGE BARN DOOR HANGER

No. 843.

The door can be swung out from the bottom at any angle. The flexible feature allows the top of the door to move away from the building at least one-half an inch. The track is heavy special high-carbon flexible steel, 3-16x1¼ inch, supported by a heavy steel bracket with square shoulder mortised through the track every 17 inches. Wt., dozen pairs, 70 lbs. Wt., track, per 100 ft., 105 lbs. Hangers, per dozen pairs, Factory List, \$24.00. Retail, per pair, \$1.80. Track, per ft., Fact. List, 16½c. Retail, 15c.

GRITCO NO. 248

HINGE BARN DOOR HANGER

Hangers, per dozen pairs, Factory List, \$24.00. Retail, per pair, \$1.80. Track, per foot, Factory List, 15c. Retail, 13c.

Extra Brackets for Trolley Track, each, 30c. One Bracket should be placed every 5 feet.

CANNON BALL BARN DOOR HANGER

The Cannon Ball Barn Door Hanger is the most widely sold hanger in America. Its heavy sales speak volumes for the merits of the hanger.

Cannon Ball Hangers are the standard by which all others are judged. They represent the height of perfection in design, construction and operation.

Special designed steel ball wheels, light running and with a wide tread, are mounted on a strong steel truss frame. The frame with wheels run completely enclosed in a tubular track; nothing exposed.

Cannon Ball Barn Door Hangers are tandem, flexible, frictionless, noiseless and built with long roller bearings, and are positively bird, water and weather proof.

Track Brackets are not included in the price of Door Hangers.

Crowbars with Pinch Point, from 20 to 25 lbs., per lb., 13c.
Crowbars with Wedge Point, from 20 to 25 lbs., per lb., 13c.
Digging Bar and Rammer combined, each, \$2.75.
Digging Bar with Loop Handle, each, \$2.75.

WEDGES

Strong steel wedges for splitting wood, have the right taper and will stick in the wood.

Weight from three to six pounds.

Price, per pound.....13c.

Novelty Lawn Weeder

A Great Back-Saver.

The curved edge of the blade enters and loosens the soil; pressure on the lever then causes the toothed jaw to grasp the plant, and a slight pull will dislodge it without disturbing the surrounding sod.

Price, \$1.25.

Dandelion Puller

To Kill Dandelions You Must Get the Roots.

You slide the steel trowel-shaped blade of the puller straight down into the soil, close to weed. Then push the handle toward the weed, and pull up.

The root is caught by a patented double-tooth prong, which projects from inside of the blade, and up comes the root to the last inch, nothing left to start new growth. As the pull is directly up, the ground and lawn around the weed is undisturbed. The clog-proof prong which gets the root is the patented feature. Besides Dandelions, it pulls plantain and other weeds. Price, \$1.00.

GIANT Corn Thiner and Weed Puller

With proper care, corn may be pulled out of hard ground with no breaking off. No more tired backs, but a pleasure to thin corn. The entire implement is made of steel, except the handle, making it very durable. It will be found very useful for taking up all kinds of weeds, briars, narrow plantain, etc. Weight, 3½ pounds. Price, \$1.25.

ERADO

ERADO does away with the old-fashioned laborious and back-breaking method of digging up dandelions and weeds of all kind by hand.

An amount of weed-killing solution is dropped on the root; then, by turning the tool the top of the plant is cut off. **ERADO** has two knives so placed that the top of a plant is cut off by only one-half turn of the tool.

It is a simple matter to re-fill **ERADO**. Remove the handle by a half turn. The solution is then put in the tube, and handle is easily replaced. **ERADO** is then ready for work. Push the plunger into the center of the plant. The solution is automatically allowed to run down on to the roots of the plant. Then give **ERADO** a quick half turn, and the top of the plant is cut off. A weed treated in this manner can never spring up again. The roots, as well as the top of the plant, are destroyed.

Erado A, galvanized iron cylinder, brass tip, iron handle, \$1.25.

Erado D, solid brass, with iron handle, \$1.75.

LUTHER POST DRILL

Luther Post Drills have the feature of higher-priced drills. The frame is built solid, and is well braced. It may be bolted or screwed to a post or an upright, and holds any ordinary Bit Stock Drill. The work is fed by a hand screw at the top, and can be adjusted to suit the quality of work in hand. When a hole is to be bored in any material, it is very handy to have one of these drills at hand, as it avoids many hours' delay, if you had to carry the work to a repair shop. The size of the work which these drills are capable of doing is altogether according to the hardness of the material which is being bored and the strength of the person doing the work.

Price.....\$6.00.

EAGLE SCREW PLATE

This screw plate is made especially for the farmer. It is made from the best material, and will be found one of the handiest tools on the farm. All bolts that have become bruised can be rethreaded in a minute, and save lots of time and worry. Can also be used for threading iron rods, which may be used for many purposes. The sizes run 1/4 in., 5-16 in., 3/8 in., 1/2 in. and 5/8 in. These are the sizes generally used. Taps and dies are both included in the price, and the whole outfit is packed in a nice wooden box.

Price.....\$9.00.

3-4	19.75	1.65

These Drills will fit any brace on the market. Will drill steel, iron or other metals as well as wood. Will bore any kind of wood without splitting.

All 1/4-inch bolts are packed 100 in package. All 5/16-inch, 3/8-inch and 1/2-inch bolts are packed 50 in package.

G. & T. Co.'s Farmers' Handy Outfit of Blacksmith's Tools

Consists of the following: 1 100-LB. **EAGLE STEEL FACE ANVIL**, 1 35-LB. **WROUGHT IRON SOLID BOX BLACKSMITH'S VISE**, 1 (No. 102) 60-LB. **DOUBLE GEARED SELF-FEED HAND POST DRILL**; 1 (No. 85) **PORTABLE FORGE**, 33" high, 22" hearth, 9½" fan. Fireplace separate from hearth, which saves breakage in expansion and shrinkage, heats 2" diameter iron to welding heat; one set of stocks and dies to cut ¾ to 3-16", 1 ¾" hot cutter, 1 ¾" cold cutter, 1 hardie, 1 2-lb. blacksmith's hand hammer, 1 farrier's hammer, 1 20" straight lip tongs, 1 20" bolt tongs, 1 14" pincers and 1 IXL farrier's knife.

364	4 in.	4½ in.	30 lbs.	4.40
365	5 in.	4½ in.	35 lbs.	6.55

Rock Island Anvil Vise

Anvil and vise combined, with jaws for holding pipe.

This vise is intended only for light work. This is the best finished vise of this type on the market. Has steel screw with cut threads, steel nut, and cold-rolled steel handle. Anvil and all finished parts highly polished and lacquered.

No. 380—Width jaw, 3 inches; opens 5 inches; weight, 26 pounds. **Retail Price, \$2.25.**

ANVILS

These anvils are ideal for farm and shop use.

Eagle cast steel with steel face. 100 lbs., per lb., **32c.**

Rock Island Semi-Steel, each, 50 lbs., **\$4.25**; 75 lbs., **\$6.50**; 100 lbs., **\$8.50.**

NAPPING HAMMERS.

1½ to 4 pounds. Per lb..... **25c.**

STAR TUBULAR STEEL BARN EQUIPMENT

No. 1A STAR STEEL STALL **(Unit System)**

No. 1A STALL

The **No. 1A STAR** Steel Stall illustrated carries a number of exclusive patented features which should recommend it use to **every** dairy owner who wants the best the market affords at a price well within reason.

By means of the **STAR** Alignment Device, the cow bed can be actually shortened or lengthened, making the cow stand in proper position with regard to the gutter.

With this new and very efficient device there are no alignment irons necessary and all projections liable to injure the animal have been done away with.

The operation of the **STAR** Alignment Device is as simple as A-B-C—simply raise the lever and move the Stanchion backward or forward, a total possible adjustment of eleven inches. Whether the cow goes into the same stall each time or not makes absolutely no difference, the litter falls into the gutter keeping both stall and cow scrupulously clean.

This stall is fitted with the **STAR** Curb Clamp, which does away with the trouble and expense of placing anchors of any sort into the curb. The **STAR** Curb Clamp not only makes the stalls easily changeable when desired, but also reduces the operation of putting them in.

The Giant **STAR** Stanchion with Automatic Sure Stop is so well known that comment is hardly necessary. It is beyond question the strongest stanchion made—equipped with the one-hand lock, which operates instantly and surely, and fitted with a wood lining which, owing to the method of setting in the U-bar, does away with the possibility of the animal loosening it through use. The Automatic Sure Stop on the **Giant STAR** Stanchion is self-operating and positively prevents the cow putting her head into the wrong opening when entering the stall. Being adjustable, the **Giant Stanchion** will fit the neck of any size animal.

Complete Mangers or Manger Partitions, Water Bowls, or Name Plates can be added to the **No. 1A STAR** Steel Stall at any time desired.

The construction of this stall is typical of all **STAR** Sanitary Barn Equipment. The stall frame or arch is of first quality steel tubing, one and eleven-sixteenths inches O. D. It has smooth, graceful curves and no corners—no couplings or other dust and dirt catchers. It has twice the strength required in ordinary use.

This stall is assembled before shipment. Its installation is so simple that it can be done by any man who can handle a wrench.

Furnished regularly in the following widths: 3 feet, weight, 80 lbs.; 3 feet 3 inches, weight, 81 lbs.; 3 feet 6 inches, weight, 82 lbs. Other widths to order.

PRICE:
No. 1A Stall as shown in cut.....\$12.40
No. 1B Stall same as above but without the Alignment Device..... 11.15

No. 452

No. 434

No. 486

STANCHIONS

No. 486 Giant Wood-Lined Stanchion—This stanchion is without a doubt the best stanchion made. The **Giant Lock**, that can be opened with one hand, and the guide, that insures perfect locking, and that takes all possible strain off the hinge; the wood lining that is pressed into the U-bar steel sides, are exclusive features that go to make it the best stanchion made. It is also adjustable, and can be closed to hold a calf, or opened wide enough to hold a bull. This is accomplished by the use of a screw driver without taking the stanchion from the stall.

Price.....\$4.00

No. 434 Adjustable Steel Stanchion, has all the advantages of other makes, with the added advantage of being adjustable in width of neck space. It is made of High Carbon U Steel, of sufficient strength to hold the heaviest dairy cow; can also be adjusted to hold a calf.

Price.....\$3.20

No. 434W Adjustable Wood-Lined Stanchion, same as the No. 434, but has Wood Lining. This lining is pressed into the U bars, and will never come out.

Price.....\$3.70

No. 452 Star Adjustable Wood Stanchion—Our Adjustable Wood Stanchion with malleable latch meets all the requirements of those desiring a perfect wood stanchion with adjustable features. The latch is automatic in operation, one piece malleable iron and no springs.

Price.....\$2.50

If Sure Stop is wanted on the Nos. 486, 434 or 434W Stanchion, add 65c. to the above prices.

Stanchions come chain or swivel hung. Chain hung always sent unless otherwise specified.

No. 695

Star Steel Stanchion **No. 695**

Star Steel Stanchion No. 695 meets the needs of those wishing a sanitary steel stanchion at a moderate price.

It is made of one-inch seamless **g**, fitted with neat malleable attachments, being made of the fewest possible parts.

The latch is so protected that it is cow proof, but the stanchion may be easily opened with one hand. The hinge is designed so that the stanchion cannot open wider than is necessary.

When the stanchion is open the crotch device attached to the movable upright engages the stall frame to hold the stanchion in place. This prevents the stanchion from swinging while open.

The neck space is of standard width. Furnished with chain hangings. Weight, 15 pounds.
Price\$2.20

STAR WATER BOWLS

Star Sanitary Water Bowls will quickly return their cost. Tempered water given the cow in the stall is more relished than icy water from the trough in the unsheltered barnyard. In this way Star Water Bowls cut out the winter slump in the production of milk.

Star Water Bowls are individual. The only water that can get in is fresh water that comes through the supply pipe. The valve is opened by pressure on the leaf which hangs into the bowl at an angle. The cow can see the water in the bowl; doesn't have to learn to drink; doesn't suck up air while drinking, and is in no danger of injury. The valve lever or leaf can be raised while the bowl is being cleaned.

Valve is easily removed and replaced if necessary. Pipe connections can be made from either above or below.

Bowl is cast in one piece with rolled edges and no seams or corners. It is as easy to keep clean as a china teacup.
Each\$3.00

COW BOWLS OR WATER BOXES

With the installation of improved cow stable equipment, these cow bowls, with automatically regulated supply, are being extensively used. A watering device of this kind should be in every stable.

New Oval Bowl, 12x7 1/4 ins., 7 ins. deep, 2 gal., weight 11 1/2 lbs. **Our Price, Plain, \$2.50; Our Price, Porcelain, \$2.80.**

Large Oval Bowl, 18x9 ins., 8 ins. deep, 3 1/2 gal., weight 23 lbs. **Our Price, Plain, \$3.90; Our Price, Porcelain, \$4.80.**

Round Bowl, 10 1/2 ins. diameter, 8 ins. deep, 2 gal., weight 11 lbs. **Our Price, Plain, \$2.30; Our Price, Porcelain, \$2.50.**

Round Bowl, 12 3/4 ins. diameter, 7 1/2 ins. deep, 3 gal., weight 15 1/2 lbs. **Our Price, Plain, \$2.70; Our Price, Porcelain, \$3.00.**

2-gal. lids for round bowls. **Our Price, \$1.00 each.**

3-gal. lids for round bowls. **Our Price, \$1.00 each.**

2-gal. lids for oval bowls. **Our Price, \$1.00 each.**

3 1/2 gal. lids for oval bowls. **Our Price, \$1.00 each.**

State whether holes to be tapped in bottom or side.

Large Regulator (complete), 28 x 10 x 9 inches deep; weight, 34 lbs. **Price, \$12.00.**

All tapped for 1-in. pipe.

STAR LETTER CARRIER

FOR RIGID TRACK

Fig. 333

The carrier pictured above is the fastest and easiest raising and lowering carrier made. The main shaft is supported at four points, all roller bearing, and the large drive wheel fitted with an endless chain is attached directly to it, no gearing or cogs to become worn or loose. Its very simplicity commends it to the man of practical mechanical knowledge, as there is nothing about it to get out of repair.

The large tracker wheels are roller bearing and run on a rigid track. It runs easy.

This, like all Star Carriers, has a rigid bail which holds the tub in shape and insures perfect working of the locks at both ends.

The tub is of heavy galvanized steel, reinforced with angle bars.

Price.
With No. 2, 6 bu. Tub, wt., 80 lbs. \$34.25
With No. 4, 8 bu. Tub, wt., 90 lbs. 36.50
With No. 6, 10 bu. Tub, wt., 100 lbs. 38.50
With No. 8, 12 bu. Tub, wt., 130 lbs. 40.50

The rigid double angle track lends the same ease of operation to all Star Carriers.

Star track is rigid and will not bend or buckle. It will support the heaviest load. Price, per foot, with splices, 27c. Weight, per foot, 2 lbs.

By means of the lag screw hanger Fig. 414 the track may be adjusted to perfect level, even if the joists do not hang evenly. These hangers are made in several lengths.

Price.
10 1/4 -in., per doz., av. wt., 3 lbs.\$1.80
15 1/4 -in., per doz., av. wt., 4 1/2 lbs. 2.30
17 1/4 -in., per doz., av. wt., 5 lbs. 2.55
19 1/4 -in., per doz., av. wt., 5 1/2 lbs. 2.75
21 1/4 -in., per doz., av. wt., 6 lbs. 3.70

Above illustration shows a two-way self-supporting switch. It is perfect in operation, being shifted to right or left by simple pull of the chain.

It locks into position automatically and is fitted with automatic guards which prevent the carrier from running off the open switch.

Two-way Switch, weight 26 lbs., as illustrated, price each,\$6.00

Three-way Switch, similar to above, weight, 29 lbs., price, each,\$7.00

Curves for Star Double Angle Steel Track are made on 4-foot radius, each curve takes the place of eight feet of track. Weight, 12 lbs. Price, each\$2.50

MANGER PARTITIONS

No. 515

The Manger Partitions with which this Stall is fitted are of heavy steel plate. They are used with concrete mangers, and prevent the cows from stealing each other's feed. This gives the slow eaters an even chance. They may be used with any of our Stalls, and are not merely raised, but are tipped back out of the way while feed manger is being cleaned.

Price, each\$3.00

STAR ROD TRACK CARRIER

No. 405

These carriers dump either way at any desired point where the trip is set, and return automatically to the barn.

The carrier, Fig. 405, shown above, is the most practical made. Rigid bail, heavy all steel reinforced tub and all the features noted above with No. 2 Tub. Price, \$26.00.

Shipping weight, 110 lbs.

STAR FEED TRUCK

No. 443. Shipping weight, 200 lbs.

The **STAR TRUCK** is so balanced on the wheels that it may be easily run, and can be turned around in its own space. It is 68x26 inches, and is 24 inches high. It holds 16 bushels. Sides of hardwood. Bottom and ends of heavy galvanized iron. Both ends slant to make unloading easy.

Price\$31.20

SEWING MACHINE No. 95-A

Head, Automatic Lift, Quartered Oak Furniture. Positive Cam Drive Take-up, Automatic Tension Release, Capped Needle Bar, Automatic Bobbin Winder, Positive Stitch Adjustment with a Reliable Scale, Long Feed Bearing to insure uniform length of stitch on all surfaces, handsomely enameled and decorated.

Has Steel Pitman with ball bearings. This is a most important improvement, as it not only contributes materially to the easy-running qualities, but also adds greatly to the appearance and durability of the Machine.

A complete set of attachments, oil can full of oil and full set of directions with each Machine.

The highest grade Machine made for such a small price.

Weight, crated for shipment, 125 pounds.

OUR SPECIAL PRICE.....\$45.00

STYLE No. 34 DROP HEAD

At the price we are listing this Machine we are placing a strictly high-grade Machine in the reach of all.

The furniture is oak and finely finished, an ornament to any home.

Has High Arm Drop Head, Flat Top Tension with a convenient Thread Release, and the Needle Bar serves as a Thread Take-up in conjunction with a Spring Thread Controller.

A strong, well-made Machine, with a Positive Feed, Large Cylinder Shuttle and an Automatic Bobbin Winder.

The Steel Pitman with ball bearings insures ease in running and adds greatly to the appearance and durability of the Machine.

The attachments are free, and include Tucker, Hemmers, Binder, Quilter, etc., Oil Can full of oil, Screw Driver and full directions with every Machine.

Weight, crated for shipment, 110 pounds.

OUR SPECIAL PRICE.....\$32.00

THE

FULTON TRUCK

SPECIFICATIONS

CAPACITY—3,000 pounds.

MOTOR—Four cylinder 3½-inch bore, 5½-inch stroke, L head type cast en bloc, 30 H. P. at 1400 revolutions.

COOLING—Fulton exclusive design radiator, in front of hood, allowing use of 20-inch fan giving positive cooling in any climate and has a 7-gallon capacity.

CARBURETOR—Automatic, float feed, hot air quick-starting device.

IGNITION—Simms high-tension magneto with advanced spark.

LUBRICATION—Combination pump and splash system. Designed especially for heavy duty motors.

CLUTCH—10-inch Borg & Beck adjustable dry disk. A unit with motor and transmission and very accessible.

SPRINGS—Special Fulton design. Front springs, semi-elliptic, 42 inches long, 2¼ inches wide. Rear springs, semi-elliptic, 50 inches long, 2½ inches wide. All springs are heavily bushed.

BRAKES—Emergency brakes 13½ inches in diameter, 2 inches wide, operated by hand lever. Service brakes, 14 inches diameter, 2½ inches wide, operated by foot pedal. All brakes applied direct to rear wheels.

FRAME—Fulton special design, heat treated steel channel section 5 1/16 inches by 2½ inches by 3/16 inches. Extra heavy, designed to carry 50% overload.

TRANSMISSION—Unit power plant type—3 speeds forward and 1 reverse. Direct on 3d speed.

AXLES—Front axle drop forged I-beam section, heat-treated steel, heavy steering knuckle spindle, with tie rod mounted aft and 10-inch road clearance. Rear axle, Russel Internal Gear, with heavy dead axle carrying the load. All power is transmitted directly to the driving axle with minimum loss.

WHEELS—Front, 34 x 3½ inches, having twelve extra heavy spokes and mounted on roller bearings. Rear, 34x5 inches, having twelve extra heavy spokes and mounted on heavy duty roller bearings.

WHEEL-BASE—136 inches, standard tread and allowing short turning radius.

STEERING-GEAR—Screw and nut irreversible with 18-inch wheel. Left side drive for American; right side for export.

GASOLINE TANK—14-gallon capacity.

TIRES—34x3½-inch front, 34x5, rear; solid rubber.

DIMENSIONS—Standard chassis over all, 200 inches. Distance from back of seat to end of frame, 9 feet.

EQUIPMENT—Horn, 2 side lamps, rear tail lamp and tool kit. Blueprint of chassis furnished to all body builders.

WEIGHT—Chassis, 3200 pounds.

DESCRIPTION

Fulton trucks are lowest in first cost and lowest in maintenance because the Fulton chassis is produced in large quantity under the supervision of three engineers concentrating upon just one model, whose training for years has been to strip a chassis to the clean lines of necessity—to reduce motor mechanism to its sole purpose of delivering the power and strength to haul continuously and effectively the rated load.

The Fulton chassis is not just a 3000-pound truck allowing a 50% overload—it has embodied in its mechanism the fundamental principles of unusual simplicity and sturdiness, in order that it may be adopted in every line of business, handled by every class of driver, and withstand every kind of service, from the army trail or use in the woods to universal farm use over unbroken fields. Fulton trucks, because of the flexible character of their construction, and ease of operation in congested or rough going have filled the long-felt need for a sturdier truck chassis in the popular-price 1½-ton class.

Fulton trucks are presented to you on the basis of the universal load unit of 1½ tons, or full 3000-pound and the 50% overload carrying capacity—they can be operated at a cost that makes horses prohibitively expensive. Average records in actual operation of 14 miles per gallon, reduces gasoline consumption to a cost under 1½ cents per ton mile. This is due entirely to using triple-heated gas.

FULTON "TRIPLE-HEATED" GAS means a balance of maximum efficiency and maximum power in gasoline which is

made as follows: The air is heated by a stove attached to the exhaust pipe, is introduced into the carburetor. As the gasoline vapor is broken up mechanically in the carburetor, this hot air vaporizes the gas to any appreciable degree. Then the gasoline vapor is conducted through a cylinder block channel between the hot firing cylinders to the opposite side of the motor where the larger particles not yet vaporized, are thrown by centrifugal force against the hot walls of the exhaust-contact manifold, and broken up by the heat. Therefore the volatility, vaporization or cracking of the gasoline particles to the point of greatest combined efficiency and power for a given volume and weight of charge, increases in direct ratio with the temperature of the gas particles from 60 degrees F up to approximately 500 degrees F to 700 degrees F. These in brief are the three features of FULTON "TRIPLE-HEATED" GAS which have given the Fulton 1½-Ton Truck the commanding position in operating cost per Ton-Miles.

The Fulton truck is equipped with the internal gear drive. This internal gear is very similar to the chain drive except that the chain is eliminated, the weight of the load is carried on a dead axle while the power is transmitted through the internal gear which is entirely separate and carries no weight whatsoever, all of the parts are fully enclosed from dirt and insure proper lubrication. In place of the chains and sprockets, the power is applied through the pinion and internal gears, near the rear of the wheels, thereby giving the maximum power.

Galvanized Steel Stock Troughs

These troughs will not rust or corrode, and will not damage by freezing.

GALVANIZED HOG TROUGH

Width, 10 in.; depth, 5 in.; and the lengths, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 12 feet. The capacity is 2 gallons per running foot. **WITH ONE ROLLED EDGE, PER FOOT.....\$1.00**

Heavy Cast-Iron Hog Troughs.

Iron Hog Troughs

No danger of them bursting in winter. Twelve inches wide at the top, 2 inches wide at the bottom and 7 inches deep. Made in lengths from 2 feet up to 12 feet, every 12 inches. Weighs 19 pounds to the foot. **Price, 90c. per foot.**

We also carry in stock a lighter weight trough like the one illustrated above. **Price, per foot, 75c.**

In addition to the square trough illustrated above, we have the cast-iron round-bottom style, which will not burst from freezing. **Price, per foot, 75c.**

FAVORITE GALVANIZED HOG TROUGH

Made of No. 20 gauge galvanized steel throughout. Handy, easily cleaned; light, yet very strong. **Twelve inches wide, five inches deep.**

No.	Length.	Weight.	Price.
No. 804	4 ft. long.	14 lbs.	\$3.25
No. 805	5 ft. long.	17 lbs.	3.75
No. 806	6 ft. long.	20 lbs.	4.35
No. 807	8 ft. long.	25 lbs.	5.25

CAST-IRON CORNER MANGERS.

No. 1—16-in. long, 16 in. wide, $9\frac{1}{2}$ in.

deep, flat front. **Price, \$2.50.**
No. 2—17 in. long, 17 in. wide, 10 in. deep, roll front. **Price, \$2.75.**
Special Prices in Quantities.

MANGERS

Solid pressed steel sanitary Manger. Can be used anywhere. Made from one piece of heavy steel pressed without seams. No places for dirt to collect. Keeps itself clean. **Price, \$2.50.**

WROUGHT HAY RACKS.

Far superior to cast-iron Racks, as frequently used. **Price, \$2.75.**

CRIMPED STALL GUARDS

$2\frac{1}{2}$ -inch diamond mesh, No. 8 steel wire, with 1-inch channel iron frames. O. G. end, oval-banded top, screw holes, bottom and end. Six feet long, 25 inches high.

Price, each, \$5.00. Square Crimped Wire Stall Guards, used for box stalls. Give size wanted. Per square foot, 80c.
Square Crimped Wire Stall Guards over 25 in. wide. Per square foot, \$1.00.

Heavy Square Bottom Cast-Iron Water Troughs.

These troughs are 8 inches wide at the bottom and 14 inches wide at the top and $8\frac{1}{2}$ inches deep. We have them in all lengths from 2 feet up. **Price, per foot, \$2.50.**

SPECIAL SHAPED GALVANIZED HOG TROUGH

The trough is built of 18-gauge galvanized sheet steel, ends are locked seamed, with reinforcing plates on the corners; angle iron dividers across the trough at intervals of 12 inches, riveted to the galvanized sheets.

These angle iron dividers are so strong that a man can stand on them without bending them; they not only give the trough great rigidity and strength so it cannot wrack, but they also separate the hogs, keeping any one hog from monopolizing the entire trough. Hogs cannot tip the trough.

The legs of the trough are of angle steel, fastened to the trough with heavy rivets. Vertical legs on one side in order that the trough may be backed up against a wall.

The bottom of the trough is V shaped, and sides have a flare, giving the trough the angles of a half of an octagon, this shape being impossible to any damage by freezing.

HIGBIE SELF-ACTING OATS CLEANER

This cleaner will remove one bushel of dust, dirt, stones, sticks, etc., from every 25 to 30 bushels of cleaned oats; or, in other words, each horse chokes down 7 to 10 bushels of dust, dirt, etc., per year, unless all oats are drawn through a Highbie Self-Acting Oats Cleaner.

The dirt box is in the base of the Cleaner, and may be emptied through a hand-hole in the bottom.

Price.....\$43.50

Rock Salt and Ground Alum Salt. Prices on Application.

ROTO SALT FEEDER

ROTO FEEDERS
Each ... **45c**

SALT CAKES
Each ... **25c**

The universal sale of refined compressed salt for horses and cattle proves that this is the accepted way of feeding salt. It is now only a question of the best shaped salt cake and the best style of feeder.

Is sanitary. Does not foul. Can be cleaned by merely wiping with a damp sponge or cloth. Has no corners to collect dirt, disease or filth. A square corner can never be absolutely cleansed. No waste; observe construction—the salt can only be licked from the bottom of the feeder; superfluous moisture is gone at once; the salt cake is not softened and wasted. Minimum surface of salt exposed to dust or dampness; no crumbling, no waste, no chance for animal to eject salt cake from the feeder. Every advantage and not a fault. We illustrate the feeder; study its points; no argument is needed.

Made of stoneware of a special composition.

CURRY COMBS

"CONSERVO" COOKER

With "CONSERVO"—the Food, Fuel and Time conserver—cooking is a joy, because food is better cooked without the work and worry of cooking it.

The principle is simply cooking by heat and steam pressure—the result is food appetizingly tender, flavory, flaky, delicious. The natural juices, aromas and flavors of the food are retained—not cooked out, tasteless and soggy. Every mouthful of "CONSERVO" cooked food is a delight.

Meat and other foods cooked ordinary ways shrink one-fifth in cooking—"CONSERVO" cooked foods weigh the same when cooked as before.

Inexpensive shoulder cuts taste like tenderloin.

You easily save 25% of your food.

Any kind of foods are quickly and easily cooked—meats, soups, bread of all kinds, vegetables, custards.

There is positively no intermingling of flavors or odors.

Trouble of cooking is done away with—the cooking foods do not have to be watched, basted, turned or stirred. Raw food is simply placed in "CONSERVO" over one burner of the stove and the water started boiling in the copper tank. "CONSERVO" will cook everything to perfection, and you never need bother about it. When the water needs replenishing a whistle will call you fifteen minutes in advance.

In two months' time "CONSERVO," saves its cost in fuel alone. All the heat necessary for cooking is just enough to keep two quarts of water boiling.

All shelves are removable, so that a large turkey or ham may be cooked by suspending from hook in top of "CONSERVO."

All models made from finest grade charcoal tin plate extra heavy tinned. Extra heavy gauge cold rolled solid coppery bottom or water tank.

Workmanship is the very finest throughout.

No. 9—13½ in. high, 11¼ in. square. Two removable shelves; one pan. Cooks for 2 or 3 persons. Holds 6 1-qt. jars for canning. Net weight, 7½ pounds. **Price—Tin, \$8.00.**

No. 20—21½ in. high, 11¼ in. square. Four removable shelves; two pans. Cooks for 3 to 15 persons. Holds 14 1-qt. jars for canning. Net weight, 12 pounds. **Price—Tin, \$11.00.**

No. 30—24 in. high, 14 in. square. Four removable shelves; two pans. Has water gauge instead of whistle. Cooks for 10 to 30 persons. Holds 18 1-qt. jars for canning. Net weight, 20 pounds. **Price—Tin, \$17.50.**

STEWART HORSE CLIPPING MACHINES-STANDARD OF THE WORLD

THE STEWART No. 1 BALL BEARING HORSE CLIPPING MACHINE.
Standard of the World.

A rigid and very durable machine. Shipped, knocked down in compact box, weighing, complete, 36 lbs. Anyone can set it up. Gears enclosed in dust-proof metal box are cut from special steel and hardened. Has six-foot easy-running flexible shaft and famous Stewart clipping head.

Price, complete, \$9.75.

Sheep-Shearing Attachment

For Use on Our No. 1 or No. 2 Horse-Clipping Machines.

This attachment consists of complete No. 5 Stewart Shear Head, four sets of shearing knives, the solid core, universal jointed shaft and cogs, as shown here. Weight, boxed, 15 lbs.. Price of complete attachment, as described, \$9.00.

Stewart Automatic Grinder

For Horse-Clipping and Sheep-Shearing Knives.

Grinds the knives in a few seconds to cut equal to new. Knives are placed in holder, so no skill is required; weight, 36 lbs.

Price—Fitted for Horse Knives, \$9.00; Fitted for Sheep Knives, \$9.00; Fitted for both, \$9.50.

THE STEWART No. 2 CHICAGO HORSE CLIPPING MACHINE.

For Large Stables.
A strong and powerful machine for large stables and custom clipping. Extra rigid construction throughout. Wearing parts all hardened tool steel. Has 6½-foot flexible shaft and Stewart clipping head. The most powerful and durable clipping machine ever made. Shipped, knocked down in strong box. Weight, 70 lbs.

Price, complete, \$14.00

Horse Clipping Attachment

Will fit any Stewart Sheep-Shearing Machine.

Consists of eye spindle and six feet of high quality flexible shaft. Also the famous Stewart clipping head. Can be attached in a few seconds. Owners of a Stewart Sheep-Shearing Machine who have horses should have this attachment. Packed in box. Price, \$6.75.

Stewart Improved Grinder Attachment

No. 11.

Attaches to a No. 1 Stewart Horse-Clipping Machine or Stewart No. 8 or No. 9 Sheep-Shearing Machine. Puts a perfect edge on horse-clipping or sheep-shearing knives. Every user of a horse-clipping or sheep-shearing machine should have one. Price, \$4.50.

THE STEWART No. 8 SHEEP SHEARING MACHINE.

A high-grade, durable Shearing Machine. Made to wear and do good work. Gears all cut from solid tool steel and run in oil in dust-proof case. Turns easy and shears fast. Equipped with the well-known Stewart No. 5 Shear and four pairs of blades. Shipped knocked down in strong box. Weight, 36 lbs. Price, \$12.00.

The Stewart No. 9 Ball-Bearing Sheep-Shearing Machine

A very strong and durable machine, shipped, knocked down in compact case. Gears are all cut from solid tool steel, are hardened and are enclosed in dust-proof metal box. Has large balance wheel to assist in easy running. Every joint in the shaft and shearing head is fitted with ball-bearings, producing the most easy running and efficient shearing machine ever made. This is the machine to buy. Fitted with No. 7 ball-bearing shear, four combs and four cutters. Weight, 50 lbs.

Price, \$14.00.

Parts of Handle and Knife Used on All

Stewart Horse Clipping Machines Before

January 1st, 1915

PARTS FOR STEWART LATEST MODEL CUTTING HEAD

FOR HORSE-CLIPPING MACHINES.

Patented.

As supplied on all Stewart horse-clipping machines since January 1, 1915.

CAUTION!

Do not file or grind any part of the clipping head in any way. It is exactly right to cut best. The only grinding to be done is to resharpen the cutting plates when they get dull, and that must be done right.

Be sure to let parts Nos. 358 and 359 alone. If they should be removed in any way, do not attempt to use the clipper head until they are properly replaced. Remove before grinding and replace after.

PLAIN TREAD.

TUBE.

THE ANDERSON GLASS AND STEEL SPARK PLUG

It is a well-known fact that there is only one material that is an absolute non-absorbent of moisture and a perfectly non-conductor of electricity. This material is glass. With the invention of the **ANDERSON SPARK PLUG** it is found possible to weld steel and glass and form a solid integral mass. The construction is practically unbreakable and positively gas-tight. There are no loose parts in this plug nor leaky joints. This plug performs all the requisite functions of a spark plug in the highest degree possible.

THE ANDERSON SPARK PLUG effects a window to the engine. Think what a convenience it is to be able to look into the cylinder whenever in doubt regard to the spark.

Price, \$1.25 each.

LONG HENRY SPARK PLUG

This plug is made only in ½-inch standard and is giving good service on pleasure cars and commercial vehicles, also on stationary, traction and marine engines. A very popular plug with our trade.

Price.....75 cents.

ELECTRIC SPARK PLUG

Same grade of plug as the **LONG HENRY** but different in style and furnished in ½-inch standard metric and A. L. A. M. threads.

Price.....75 cents.

MINUTE WHEELS

For Ford Automobile

A set of Minute Wheels consists of four main hubs to fit on the axle spindles, and all the auxiliary parts for five wheels, and an extra wheel. The proposition is simple. You keep your Ford wheels, taking out only the Ford hubs and using our hubs instead, and we furnish an extra wheel with each set of hubs that is 30x3½ plain clincher rim for Ford cars.

With your car equipped with the "Minute Wheel" you at once eliminate the objectionable feature of having to change or repair a tire on the road.

In one minute you take off the wheel with the bad tire, and replace it with the "Minute Wheel" go on your journey, and when you are at home you repair the tire at your leisure, and when you can do it properly.

With a wrench you take off one nut, replace the wheel, and in less than a minute you are on your way.

Think how much time and trouble this will save you when you are in a hurry, especially if you have a train to catch or an engagement to meet.

If you had a bad tire in the night or on a muddy road, your chagrin would be turned into a "Minute Wheel" smile.

Every Ford user should equip his car with a set.

If interested, write for special circular. Will only fit the Ford automobile.

Regular Price Set, \$32.00; Cash With Order Price, \$30.00.

PRICES ON APPLICATION.

GRITCO WAGONS

Entire wagon made of selected hardwood. Construction closely follows that of regular farm wagon, having bent hounds and adjustable reach. All parts heavily braced and ironed.

STUDEBAKER JR. WAGON

The Studebaker Junior is a substantially made miniature wagon, not a mere toy. It is one of the finest and strongest wagons of its kind in the market, and is built after the style of the regular Studebaker—oak frame, farm wagon gearing with bent hounds and adjustable reach, all parts strongly ironed and braced, welded tires, handsomely painted. Body is 17x36, wheels 12x18 inches.

G. & T. Co's Perfection Separator Oil

This oil is put up expressly for the use of separators, and we recommend it to users of all hand machines, it being a light oil and having a very low cold test.

1-quart can	\$0.40
1/2-gallon can65
1-gallon can	1.00
5-gallon can	4.00

Eureka Harness Oil

Eureka Harness Oil is especially manufactured for oiling, blacking and preserving all kinds of leather, especially harness, automobile and carriage tops, etc.

All harness needs a preservative. To neglect it means that sooner or later it will crack and break.

1-gal. cans.....	\$1.25
------------------	--------

Household Lubricant Oil

This very fine oil is put up in small oil cans, 1/4-pint and 1/2-pint sizes, very convenient to use. It is especially adapted for use on sewing machines, lawn-mowers, hinges, locks, in fact everything about the house that needs lubricating.

1/4-pint cans	\$0.15
1/2-pint cans20

POLARINE

Polarine is a scientifically prepared oil, designed to meet every need of the motorist or engine owner, and may be relied upon to lubricate properly in either zero or tropical weather. Its adoption will add many years to the life of the engine, in addition to securing freedom from carbon deposits in valves,

cylinders and spark plugs.

Polarine is all oil—all lubrication; therefore unexcelled in friction-reducing properties.

1-gallon cans	\$1.25
5-gallon cans	5.00
1/2-barrels, per gallon.....	.80
Barrels, per gallon.....	.75

AUTOLINE OIL

This is of light body; and a light yellow color. It is generally used because of this body and the high fire test. Use it in the force feed system, with either external or internal pumps, where small needle valves are used to adjust the dropping of the oil. It should always be used when there is a gravity feed, where the oil drops directly into the crank case, splashes to the pistons and penetrates every part of the bearings with which it comes in contact.

1-gallon cans	\$1.20
5-gallon cans	5.00

ROBSOCO

TRADE MARK REG. U.S. PAT. OFF.

Robsoco Transmission Oil

For use in transmission or gear cases, where a heavy bodied oil is required. It is a dark oil of highly efficient lubricating and long lasting qualities.

1-gallon cans	\$1.15
5-gallon cans	5.00

KEROSENE OIL

For Incubators and Brooders

One of the most difficult things for a poultryman to secure is a good grade of oil to use in incubators and brooders.

We have had so many complaints from this cause that we have deemed it expedient to put up a high-grade oil to assist them in this trouble. You will not be able to appreciate the difference till you have tried a can of this oil.

Put up in five-gallon shipping cans.

Price.....	\$2.25
------------	--------

ALBANY GREASE or HARD-OIL

Every grease cup, axle cap and ball and roller bearing on your car should be filled with **Albany Grease** regularly. If you want a finely running car, with no danger of bearings burning out, always use **Albany Grease**. In the Spring, Fall and Winter use

No. 0 or No. 1. In the Summer, use No. 3 or No. X to secure best results. **Albany Grease** is packed in 5-10 pound cans.

5-lb. pkgs.	\$1.50
10-lb. pkgs.	3.00

HARVESTER OIL

This oil is put up expressly for use on farm implements, Mowers and Binders and all tools on the farm should not be neglected, and care should be used to select an oil especially adapted to the needs of such machines. Many machines have been ruined by using oils that were too heavy or too light.

We strongly recommend the use of this oil.

1-gallon cans	\$1.00
5-gallon cans	4.50

THRESHER HARD-OIL

Thresher Hard Oil is a high-grade grease, slow to melt; for use in grease cups and grease boxes where a fluid oil cannot be used. It is manufactured expressly to meet the requirements of the agricultural trade.

3-pound packages	\$0.65
5-pound packages85

BOSTON COACH OIL

For oiling Buggies, Carriages, Wagons and Trucks.

An Axle Lubricant of Matchless Lasting Properties.

Prevents Corrosion or Gumming, will not injure hubs or spokes, works in winter as well as in summer.

1-gallon cans	\$1.40
---------------------	--------

Compound Neat's-foot Oil

This is a combination of Neat's-Foot and Mineral oils in right proportions and properly compounded to prevent the Animal Oil from becoming rancid, thus producing a combination that will greatly improve Harness or any leather where this oil is used.

BOB SLEDS

Description and Prices
On Application

BROWN WAGON

Axles are made of dried selected hickory. Brown's Patent Extension Chilled Skeins. These Skeins support the axle where it has the greatest load to bear. Tongue Chains and Stay Chains fitted with springs. The Tongue Chains have a branch chain to prevent jerking and switching of the tongue, and eases the draft on the horses' necks. Wheels all positively soaked in hot oil. Tires never get loose. Write for special circular fully describing these Wagons.

Coil springs are applied to tongue—eases draft on team's neck when chains are forced to control tongue or hold back. They supply the place of the vibrating neck yoke. Yield to pull of chain or branch chain, saving team from jerking of tongue. Branch chains are added to each tongue, practically destroying side jerking and whipping motion. Acts same as neck yoke.

Gamble Improved Three-Horse Equalizer No. 7

Right Hand Only.

This equalizer, while simple in construction, is strong and durable; is perfect in equalization, and absolutely removes all side draft. Can be changed very quickly from a three-horse to a doubletree by removing the long bar. **Price, \$8.50.**

New Gamble Four-Horse Equalizer No. A1

Right Hand Only.

This equalizer is similar to the above, except fitted for four horses instead of three. It is perfect in equalization, and is made of good strong material. **Price, \$9.00.**

Gamble Improved 3-Horse Equalizer No. 7. Right-hand only.

Snatch Rod regularly furnished with No. 2½ and No. 3.

Square steel axles are used, arched high, spindles turned and polished.

HASLUP WHEEL SCRAPERS

These scrapers are very popular with the contractor trade on account of their splendid construction and convenience. The wood wheels are made of thoroughly seasoned stock and are very strong. Metal wheels can be furnished on order. Tongues, best quality hardwood, heavily ironed, with double steel draft bars.

Pronounced "RU" as in RUBY

RU-BER-OID **ROOFING** COSTS MORE - WEARS LONGER

FOR OVER 23 YEARS THE STANDARD.

RU-BER-OID is the original ready-to-apply roofing, and was for several years the only roofing of this character. Different from and superior to all other prepared roofing, in that **RU-BER-OID** compound or gum, an exclusive combination of high-grade, water-proof, acid- and fire-resisting ingredients is used in its manufacture. This gum is used in no other roofing. That the first roofs of **RU-BER-OID** applied in 1892 are still giving satisfactory service is indisputable evidence of unequalled durability. **RU-BER-OID** contains no rubber. It contains no tar. It contains no paper. It contains no asbestos. It is not an asphalt roofing. **RU-BER-OID** is tasteless. It is odorless. It can be used on roofs from which drinking water is conserved. **RU-BER-OID** is fire-resisting. Hot coals thrown on a roof covered with it do not set fire to the fabric, nor to the boarding underneath. **RU-BER-OID** is a non-conductor of heat. It keeps the heat in in winter, and the heat out in summer. **RU-BER-OID** will outlast tin, iron or shingles. It has outlasted its upwards of 300 imitations, variously known as "rubber" roofings, "asphalt" roofings, "asbestos" roofings, etc. Put up in rolls 36 inches wide, containing 108 square feet.

Medium (1-ply), 108 sq. ft.; weight, 35 pounds. Price.....\$3.00

Heavy (2-ply), 108 sq. ft.; weight, 45 pounds. Price..... 3.50

Extra heavy (3-ply), 108 sq. ft.; weight, 55 pounds. Price..... 4.00

COLORED **RU-BER-OID** **ROOFING**

COLORED RU-BER-OID possesses all the enduring qualities of the Gray Ru-ber-oid. The attractive colors are permanent—built into the roofing.

COLORED RU-BER-OID is furnished in rolls either 24 inches wide, containing 110 square feet, or 36 inches wide, containing 108 square feet, sufficient to cover one hundred square feet—the extra material being allowed for the two-inch laps.

Tile-Red (Medium Weight), 45 pounds.....\$5.50

Tile-Red (Heavy Weight), 55 pounds..... 6.00

RU-BER-INE CEMENT necessary for seams, together with special large-headed sherardized (zinc coated) nails, are included in each roll of **RU-BER-OID** and **COLORED RU-BER-OID ROOFING**.

REVERSO ROOFING

Smooth surface on one side and sanded surface on the other. A good, honest roofing at a moderate price.

1-ply.....\$1.60

2-ply..... 2.00

VULCANITE ORNAMENTAL ROOFING

STYLE D (Red or Green).

This roofing is laid in strips, one edge of which is cut in a shingle or slate pattern. It is far more durable than shingles, very decorative, and fire resistant. Made in permanent emerald green and garnet, which cannot fade because they are the natural tints of the crushed rock surface.

There's no cracking of slate, nor splitting and breaking, as with wood shingles, and the roofing is of triple thickness, insuring absolute protection in all weathers. Costs half as much to lay as shingles. Is put up in rolls; 2 rolls to the square; without nails. Price, per square.....\$7.50

VULCANITE PLAIN ROOFING.

Put up in rolls; with nails and cement.

Price, per square (Red or Green Slate Surfaced).....\$3.50

Gravel Surfaced Roofing..... 3.00

VULCANOID ROOFING

Cheaper than tin, slate, tile or shingles. An attractive and permanent roofing at a moderate cost. Made from the finest grade of wool felt. Guaranteed to contain no coal tar. Weather-rot- and acid-proof. Does not taint rain water. Adaptable to every style of building. Made in 1-, 2- and 3-ply.

1-ply weighs 34 lbs. Price.....\$2.50

2-ply weighs 44 lbs. Price..... 3.00

3-ply weighs 54 lbs. Price..... 3.50

Per Roll of 108 Square Feet.

CERTAIN-TEED ROOFING

When you want a smooth surfaced Roofing for your House, Barn, Garage, Factory, Warehouse, Sky-scraper, Church, Apartment Building, or Farm Building, get

CERTAIN-TEED

—guaranteed 5, 10, or 15 years for 1, 2, or 3-ply respectively—backed by the responsibility of the World's greatest and biggest Roofing and Building Paper Mills. The **Certain-teed** label on this Roofing stands for a definite guaranteed service—a protection for you. Why try to save a dollar or two by putting on a cheap Roof that is not guaranteed, when you can buy **Certain-teed** for just a little more money and get much longer service on your Roof. In the long run it's less expensive to buy **Certain-teed**.

1-ply, 108 square feet.....\$2.50

2-ply, 108 square feet..... 3.00

3-ply, 108 square feet..... 3.50

COMPETITION GRADE **ASPHALT ROOFING**

Intended for temporary buildings and takes the place of 2 and 3-Ply Tar Paper and will give much better service.

1-ply, 108 square feet, weight 35 lbs.....\$1.90

2-ply, 108 square feet, weight 45 lbs..... 2.25

3-ply, 108 square feet, weight 55 lbs..... 2.60

REX FLINTKOTE ROOFING

This material has a continuous service record of over fifteen years. It has proved its remarkable durability, weather-protecting and fire-resisting qualities on all kinds of buildings throughout practically the entire world, and under the severest conditions.

The way to buy roofing is not on claims of what it will or may do—but on the service it has shown, and the record of **REX FLINTKOTE** is your assurance of having a roof that meets every requirement.

Packed in rolls 36 inches wide, containing 108 square feet. Nails, patent caps, cement and directions for laying furnished free with every roll.

Prices: One-Ply, \$2.75; Two-Ply, \$3.25; Three-Ply, \$3.75.

REX STRIP SHINGLES

RED—SLATE SURFACED—GREEN

These shingles possess all the durability, attractiveness, weather protection and fire-resisting qualities of the modern asphalt shingle—plus 50 per cent. or more saving in the cost of application, because they can be laid so quickly.

Five shingles laid at a time—no spacing—no chalk line—one-half less nails—one-half less nail holes—four-fifths less cracks—no painting—no repairs.

REX STRIP SHINGLES are water-proofed, with pure refined asphalt. The wearing surface is natural chipped slate in handsome red and green colors. The colors are absolutely permanent.

Price, per square.....\$7.50

This material is also put up in rolls of 108 square feet. Nails and cement furnished.

Price, per roll.....\$3.50

“ZOLIUM”

THE ROOFING WITH THE TILE EFFECT.

Zolium is composed of a solid substance, both sides of which are hardened into a practically fireproof skin, which, after being applied to the roof, gradually oxidizes, becoming almost as hard as tile.

This prevents disintegration and washing away, as is the case with roofings covered with pebbles or slate.

Zolium furnishes practically a triple three-roofs-in-one protection, any one of which is sufficient to last many years.

While you have three thicknesses of roofing, the finished weight of **Zolium** is exceedingly light in comparison with the majority of other forms of roofing.

Light Red, per square.....\$7.00

Dark Red, per square..... 7.00

Rex Red Roofing very much the same, not scolloped.... 6.00

TURCO ROOFING

Turco is a reliable roofing, but cannot be expected to give the same service as the Rex Flintkote or Gritco, because its price is less; but for temporary buildings and small buildings, where conditions are not severe, Turco will give you good service.

The materials used in the manufacture of Turco are selected with care, and are put together with care, and are carefully examined before shipped.

Sufficient nails and cement packed in each roll.

Prices: One-Ply, \$2.00; Two-Ply, \$2.40; Three-Ply, \$2.90.

108 Square Feet to Roll.

GRIFFTURNOID RUBBER ROOFING

This is a very high-grade roofing made of wood felt, thoroughly saturated with a non-drying gummy compound that remains soft and pliable in either hot or cold weather, and is absolutely water-proof. It is coated with a non-oxidizing water-proof coating. This combination produces a roof covering good for all time, in all climates, under all conditions. It is strong, durable and easy to lay. It is acid and alkali-proof, and fire-resisting. Is made in one-, two- and three-ply, weighing 35, 45 and 55 pounds, respectively.

Each roll is packed with nails, caps and cement paint.

108 square feet to roll.

1-Ply, \$2.10. 2-Ply, \$2.50. 3-Ply, \$3.00.

GRITCO ROOFING

GRITCO is an exceedingly high-grade roofing, made especially for us, and fully guaranteed. It does not possess the exclusive features found in the Rex Flintkote, although climate conditions will not affect it for many years. The ingredients used in the **GRITCO** are especially selected for their chemical adaptability, and in manufacture the utmost care is used to produce a uniform and dependable article.

Sufficient nails and cement packed in each roll.

Prices: One-Ply, \$2.30; Two-Ply, \$2.75; Three-Ply, \$3.25.

108 Square Feet to Roll.

“REGAL” ROOFING

Does not dry out and crack. This is due to the peculiar asphalt used in the saturation of the body felt, which is softer than the outer coating and which gradually gives up its oils and thus continually renews the coating. Regal Roofing is composed of natural asphalts (genuine Trinidad Lake Asphalt being its base), properly processed and combined so as to withstand oxygen, sunlight, acids, wind, rain, snow, heat and cold. It is highly fire-resisting. Each roll contains 108 square feet, allowing 8 square feet for laps and flashings; also Nails and Liquid Cement, all packed complete in a single package.

1-ply, per roll, 100 square feet.....\$2.50

2-ply, per roll, 100 square feet..... 2.75

3-ply, per roll, 100 square feet..... 3.00

Special Price in Large Quantities.

We have a cheaper grade of rubber roofing in all above sizes. Prices on application.

TILLEY ADJUSTABLE SCAFFOLDING JACKS

The iron brackets or arms, as illustrated at bottom of cut, are used when platform is wanted on one horse. These brackets are hooked into malleable castings at top of leg, and will support a platform 2 feet wide the whole length of horse. This furnishes a convenient arrangement for moving about, working side walls, or to use in narrow hallways. Price, per set of four, \$1.20 net.

These jacks will receive a beam from 1 to 2 inches thick and any width from 4 inches up. Can be used on a 3-foot to a 30-foot beam.

Are light, strong and suitable for plasterers, carpenters, painters and paperhangers, the putting up of metal ceilings, shafting, pulleys, etc. Nos. 8 and 13 have an extra end brace on slotted legs, with iron brace at each end of same. Nos. 9, 10, 14, 15 and 16 have extra end braces, same as 8 and 13; also have an extra grip on friction bolt in each traveling leg, making the jacks much stronger than formerly. This improvement consists of suspension brackets, which permits of making a scaffold at any elevation lower than the height of the jack when down to its limit. These brackets can be used with jacks already sold. They cost but \$1.20. With them and the proper size jack the scaffold can be made to fit a store or basement.

Fig. 2 shows two jacks represented in Fig. 1 as "knocked down." It is unnecessary to comment upon its compact form.

OUR IMPROVED TILLEY EXTENSION LADDERS.

These ladders are stiff, strong and well built. Have improved patent spring locks attached to traveling sections, and are automatic in action. These locks are fastened securely to the inner sides of upper section, and made of the best malleable iron. They are also provided with a durable spring, which keeps the hook thrown forward and grasps each round of the stationary ladder as the traveling ladder passes upward. A tripper forces the hook back, allowing it to pass the rounds when descending.

Tilley Trojan Step Ladder

Light, strong and stiff. Iron knees under ends of each step. These knees pass entirely through the steps and side bars, holding ladders firmly together and insuring a strong brace to the steps. Pail rests on all sizes of 5 feet and over. Furnished in 6, 7, 8, 10 and 12-foot lengths.

Price, 42c. per foot.

COMBINATION EXTENSION LADDER AND TRESTLE

GRITCO COMBINATION EXTENSION LADDER AND TRESSLE

This is a first-class ladder, with rope and pulley attachment above 18 feet. Has automatic Hooks, and can be used as an Extension Ladder, or can be converted into a Trestle, which also serves as a Stepladder. Can be taken apart. Always made in equal sections; 12 to 28 feet. **Price, per ft., 32c.**
Above 24-ft. we prefer the Rope and Pulley Extension.

GRITCO "SECURITY" STEP LADDER WITH ALL-STEEL LOCK

Made from strictly clear seasoned wood. Extra wide steps and top. Has very strong, full-looped, galvanized steel hinge or ear, with right angle flange to which top is riveted. **Every step is rodded and trussed**, so that it is constantly being drawn together when there is weight upon the steps; cannot get rickety. Braces are all-steel bound; secure in every point. **4 to 10 ft., per ft., 42c.**
12 to 16 ft., extra heavy, per ft., 50c.

GRITCO PULLEY EXTENSION LADDER

There is not a finer ladder on the market.

White spruce sides; 1 1/4-inch straight, air-dried **First-Class Hickory rounds.**

Spread at base; 6 to 10 inches more than regular width of ladder.

Has Automatic Hooks and is operated by the rope. It can be easily and quickly taken apart and put together.

26 to 30 ft., per ft., 30c.

32 to 44 ft., per ft., 32c.

42 and 44 ft., 35c.

Allow 2 feet for lap on ladders 32 feet and under, and 3 feet on ladders over 32 feet.

SINGLE LADDERS

Made of spruce, with hand-shaved oak rounds; first class in every particular. **Price, 12, 14, 16, 18 feet, 22c. per foot.** Ladders over 18 ft., 3c. per foot extra. Also have a cheaper ladder, 2c. per foot less than above prices.

Masons' or Bricklayers' Heavy Parallel Sides Straight Ladders, 18 to 24 ft., 36c. per ft.

TILLEY UMPIRE STEP LADDER.

A light, strong, well-made ladder braced under each step with strips which support the steps, tie the sides together and stiffen the entire ladder. Best ladder made for the money. **Sizes, 4, 5, 6, 7, 8, 10 and 12 steps, 36c. per step.**

GRITCO WINNER STEP LADDER

An excellent ladder at a low cost. This ladder will last a long time. It is strong, stiff and durable. Has solid board shelf. **Sizes, 4, 5, 6, 7, 8, 10 and 12 steps, 38c. per step.**

TILLEY IMPROVED SECTIONAL LADDERS.

Sections 6 feet 5 inches long. Either plate and pin lock or lock nut fastening. **Per Section, \$2.10.**

WINDOW CLEANERS' AND FRUIT PICKERS' LADDERS

Nos. 4, 3, 2, 1.

No. 1—Bottom or floor section.

No. 2—Regular or middle section.

No. 3—Top window cleaners' section.

No. 4—Top fruit pickers' section.

Price, any section, per section, \$2.10.

THE WINANS LADDER JACK

View Showing Jacks on Inside of Ladder

The Winans Ladder Jack is absolutely the strongest and best made; all other ladder Jacks are only as strong as the weakest rung of the ladder. Attaching these Jacks on the standard of the ladder instead of the rungs, gives it much greater strength. It can be raised or lowered to any desired height or angle, or reversed to either the outside or under side of the ladder in a minute's time without removing the plank or scaffolding from the Jack. They are self-locking and adjust themselves to any standard make of ladder. Being made of "Best Grade" $1\frac{1}{2} \times 1\frac{1}{2}$ angle steel we guarantee them to support one thousand pounds; yet weigh but $4\frac{1}{2}$ pounds each, and can be folded into a small compass for convenient carrying.

\$4.00 a Pair.

TELESCOPING EXTENSION PLANK

Joints near the bearing points making a stiff plank... **Price, \$4.20.**

ROOF AND GUTTER HOOKS

For Hanging Swing-
ing Stages or can be
used for many other
purposes, strong and
durable.

Folded

Strong, folds up closely; weight, 24
pounds. Made of best material. Safe,
and can be quickly adjusted to any
window.

Regular Size, 4 ft. 4 in. board, **\$6.60**
each.

Extra Size, 6 ft. board, **\$7.80 each.**

INTERNATIONAL Onepipe Heater

THE ONEPIPE or, as termed by many manufacturers, the "pipeless" heater is the most modern development of the warm air heating system, and we unhesitatingly recommend the **INTERNATIONAL ONEPIPE HEATER** as one of the most practical, durable and efficient heaters of this type on the market.

Before trying to decide on the kind of heater to buy, we recommend that you get the advice of our engineer, for it is a fact that no two houses are exactly alike, and each one presents an individual problem.

INTERNATIONAL ONEPIPE HEATERS are adapted to many city houses as well as to country homes. They are especially efficient in bungalows and the square type two-story houses with open stairways. They are ideal for heating churches, stores, etc., because of the recirculating feature which takes the cold air from the floors. Because of their low installation cost they are frequently placed in summer camps and cottages that are occupied in spring and fall and for week-end parties in the winter.

The **INTERNATIONAL ONEPIPE HEATER** is simply a device for heating the air and causing it to circulate through the rooms. It is essentially the same as a regular **INTERNATIONAL Warm Air Furnace**—not a stove, but a furnace, properly designed to get the greatest benefit from the fuel burned, and all parts carefully mounted and fitted. Surrounding this are two casings, an inner and outer casing, and on top you can see the register.

This heater uses only the one large register, which is divided into two parts. It is a well-known fact—as old as nature itself—that air when heated expands and rises. As the warm air pours up through the central portion of the register it goes at once to the ceiling of the various rooms and floods the whole house with warmth.

This warm air displaces the cooler air, which falls to the floor and is then drawn down through the outer portion of the same register, between the outer and inner casings, and is then rewarmed and recirculated. This will be understood by carefully following the direction of the arrows in this picture.

As the space between the outer and inner casings is always filled with the cooled air returning to be heated, an **INTERNATIONAL ONEPIPE** positively does not heat the cellar. This is a big advantage and does away with the objection frequently raised against ordinary warm-air furnaces in the country or in fact, anywhere the user wishes to store fruits, vegetables or anything of a perishable nature in the cellar. If the doors between rooms are left open, the heat diffuses through the whole house. The skeptical can easily test this by igniting a piece of tarred paper or oily waste over the register, and noting how the smoke fills the rooms. Remember that the heat that you cannot see, but can feel, travels in just the same way.

No one who has ever tried a **Onepipe Heater** would think of again using stoves. It not only heats more effectively, but being in the cellar, does not take up any valuable space in the living rooms. Then you do away with all litter and bother of carrying coal and ashes through the rooms. A stove heats in spots only. It is uncomfortably hot near it and uncomfortably cold at a distance from it.

THE CASING

The feature that distinguishes the **INTERNATIONAL ONEPIPE HEATER** from stoves, ordinary furnaces and all other Onepipe, or so-called "Pipeless" heaters, is the construction of its casing. The casings are surrounded by two casings or "jackets"—the heated air passes up inside of the inner casing while the cooler air is returned between the inner and outer casings. Both of these are made of rust-resisting galvanized iron and they are so shaped that there is not a single sharp angle or dead pocket to obstruct the free and easy flow of air.

The inner casing is in one piece and carried right down to the base and openings are cut in it through which the air circulates. This construction is much more stable than where this part is set up on legs.

The inner casing is triple lined—you will understand what we mean by this if you will refer to the little diagram shown on this page. Inside of the galvanized iron are placed two thicknesses of asbestos paper and one thickness of bright corrugated tin—these are all securely riveted together. The purpose of the corrugations is to provide a layer of air which, in connection with the asbestos paper and corrugated tin make an effective insulation to keep all the heat inside the casing where it is needed. Contrast this durable heavy construction with a common type of inner casing made of cheap black iron with a single asbestos lining pasted inside, or with a secondary lining of black iron.

GUARANTEE

Where we recommend an **INTERNATIONAL ONEPIPE HEATER** it is sold under the positive guarantee that if it does not prove satisfactory, after a 60-day trial in cold weather, it can be taken out and returned and the purchase price will be refunded.

International Onepipe Heater as installed in a home showing how the warm air circulates everywhere.

LIST PRICE, CAPACITY and DATA

Number	List Price	Capacity No. of Rooms	Diam. Casing	Diam. Firepot	Diam. Smoke Pipe	SIZE OF REGISTER	
						Outside	Warm Air Pipe
*38-0	\$162.00	4 to 6	38"	18"	7"	24"x27"	18"
42-0	180.00	6 to 8	42"	20"	7"	30"x30"	22"
46-0	206.40	8 to 10	46"	22"	7"	35"x35"	26"
50-0	240.00	10 to 14	50"	24"	7"	40"x40"	30"
†40-0	170.40	6 to 8	40"	20"	7"	30"x30"	22"
†44-0	194.40	8 to 10	44"	22"	7"	35"x35"	26"

*The 38-0 size does not have coil opening.

†These sizes have single feed door.

The List Prices quoted are with oxidized copper finished registers, which are always sent unless otherwise ordered.

A deduction from the net price of these heaters can be made if Black Japanned registers are wanted, as follows:

Size.	Deduct from Net Price.
24x27 in.	\$1.50
30x30 in.	2.50
35x35 in.	3.50
40x40 in.	4.50

All Double Door Heaters measure 7 feet 11 inches from base to register, but extension pipe telescopes, so as to fit without cutting, as low as 6 feet 11 inches. Special measurements can be furnished to order, when distance from basement floor to top of first floor is given.

Every Onepipe Heater is shipped complete with casings and electroplated register; and including also one galvanized smoke pipe elbow, one joint of smoke pipe and damper with regulator and chains so that it can be operated from the floor above.

LOUDEN HAY TOOLS

Louden Senior Fork Carrier

During more than fifty years of hay tool manufacture the Louden Machinery Company has held to one determination—that its products will go out in perfect working order—that they will work easily, safely, and fulfill every claim made for them. Therefore, a purchase of Louden Hay Tools is not an experiment, but a safe guarantee for satisfactory service.

The Louden Senior Hay Fork Carrier

Was designed to supply the demand for a heavy carrier that could be used for handling a hay fork in the usual way, and that could also be depended upon to handle extremely heavy loads when necessary.

This carrier throughout is built strong and sturdy and in addition, its mechanism is simple and sure. It has the wide flaring mouth and the round-topped fork pulley that has been such a popular and distinctive feature of Louden Carriers for years. The fork pulley will never fail to register from whatever angle it may be drawn, and the grappling hooks take a deep sure grip on the pulley when the load strikes the carrier and starts into the mow.

The Senior is a swivel-frame carrier and is equally efficient whether hay is taken up from the end of the barn, or from a center driveway. When used in a barn having a center drive, when one end of the barn is filled the pulley at the end of the barn, through which the draft rope passes, is carried over and hung in place at the other end. When this is done a swinging jerk on the draft rope, from the wagon or ground, will reverse the carrier and it will be ready to work in the other end.

Built regularly to operate on Louden Double Bead Steel Track.

Total length of carrier, 21 inches. Bearing surface on track (distance between front and rear axles), 15 inches. Carries fork within 20 inches of track. Frame of carrier of refined malleable iron. Rope and track wheels special quality gray iron. Safe working capacity, 1500 pounds. Weight of carrier, 34 pounds. Price, \$13.50.

The Louden Carry-All Hay Sling Carrier

As its name implies, was built to carry big loads of all kinds of hay. It is the heaviest and strongest Hay Sling Carrier made. For use in any type or size of barn.

The Louden Carry-All will handle an entire wagon load at two lifts, if the construction of your barn roof is strong enough to permit it. The rope lock in this carrier is positive and sure. There is no chance for the rope to slip. The lock will not wear the rope, as it grips it evenly. The heavier the load the more securely does the lock hold.

The frame of the Carry-All Carrier is of the Louden Swivel Type. It will work with equal satisfaction and efficiency in barns having a center driveway or where hay is taken up at one end. In center-drive barns the change from one end to the other is easily and quickly made. The pulley in one end of the barn is changed over to the other end; the carrier can be swiveled around from the barn floor. No climbing up to the carrier necessary.

Built to operate on Louden Double Bead Steel Track. Bearing surface on track (distance between front and rear axles) 19½ inches. Carries sling within 23 inches of the track. Frame of carrier of refined malleable iron. Rope and track wheels special quality gray iron. Safe working capacity, 2000 pounds. Weight, complete, 66 pounds. Price, \$23 00.

Space in this catalog will only permit us to show the above two Loudens Carriers. In addition to these we carry the full Louden line including the famous Louden Junior Fork Carrier, which is probably the most popular hay carrier ever made; the Louden Cross Draft; Louden Easy-Lock and Louden Round Barn Carriers. All of these carriers have stood the practical tests which thousands of users have put them to during the many years they have been on the market.

We also sell Louden Hay Slings, Power Hoists, and, in fact, the entire line of Louden Equipment. Let us send you the big 224-page Loudens catalog which thoroughly describes every one of these labor-saving devices. It not only tells you how to save half your barn work but gives much other valuable information as well. It's yours for the asking.

Louden Carry-All Sling Carrier

Louden Grapple Fork

Louden Balance Grapple Hay Forks

Are used in all parts of the United States and Canada and in all kinds of hay. Wherever the fork is known customers are enthusiastic in saying it cannot be beaten in any respect by any hay fork that has ever been made.

The arched support is covered by patents and is the greatest improvement ever made in grapple forks. It secures a perfect balance, by means of which the fork can be either opened or closed with the slightest touch. The fork is neat in design and perfectly balanced in all its parts and adequately strong for any work it will ever be called upon to do.

The material used in the construction of the fork is a special high-grade steel. The steel is very stiff with just enough spring to it so it will not bend or break under the heaviest work.

Spreads when open, 58 inches. Width between outside tines 19 inches. Tines go into hay 24 inches. Weight, 45 pounds. Price \$15.75.

The Double Harpoon Fork

Is built of genuine fork steel, for use in any type of barn, with any type of hay carrier, and in any kind of hay. Made in three sizes. Standard, \$2.40; Intermediate, \$3.00; Large, \$5.55.

Louden High-Grade Pulleys

Have, through many years of continuous, satisfactory service, proved themselves superior in design, construction and durability. They have no sharp corners to wear the rope. The eyes are heavily ribbed and have tubular swivels, which add materially to their strength and efficiency. The sheaves in the four pulleys shown are interchangeable.

Fig. 467—Knot-Passing Pulley, malleable frame, swivel eye, 6-inch hard maple sheave seasoned in oil. Weight, 3¼ pounds. Price, \$.88.

Fig. 494—Knot-Passing Pulley, malleable frame, swivel eye, 6-inch sheave, made of special quality gray iron. Weight, 5½ pounds. Price, \$1.14.

Fig. 468—Draft Pulley, malleable frame, swivel eye, 6-inch hard maple sheave seasoned in oil. Weight, 3 pounds. Price, \$.70.

Fig. 495—Draft Pulley, malleable frame, swivel eye, 6-inch sheave made of special quality gray iron. Weight, 5½ pounds. Price, \$1.03.

Louden Double Bead Steel Track

Louden Double Bead Steel Track is a special quality high carbon steel. It is two inches wide, one and seven-sixteenths inches high. If properly supported every twenty-four inches, it will safely carry a load of 3000 pounds. Weight per foot, 2 pounds. Price, \$.30 per foot.

The Louden Double Post Cow Stall. Fig. 812

Louden Double-Post Cow Stall. Fig. 812

Is well built, strong and durable and of neat design. It insures the comfort of the cow, is plain, smooth, and simple in construction. It is easy to clean and keep clean, thus filling all requirements of an up-to-date cow stall.

The stall posts, stall partitions, top-rail and cross braces, are all made of the best quality of 1½ O. D. steel tubing. The standard width of the stall is 3 feet, 6 inches, but this may be varied to suit requirements and the top rail will be cut to suit. The total height above the stall floor is 5 feet, 3 inches. The standard height of the manger curb at the sides is 11 inches and at the bottom of the cut-out where stanchion is anchored is 6 inches. The stall posts are 5 feet 5 inches long and with the standard High-Built-Up Curb they go 15 inches into the cement. The stall complete with Tubular Stanchion and 42 inches of top rail weighs 70 pounds. Price, complete, \$12.75.

The Louden Tubular Steel Stanchion

The best stanchion ever built, is the one we recommend and furnish with stalls unless otherwise specified. If preferred we will

stanchion with guide, \$3.30.

Louden Steel Pens

Keep the animals clean, healthy and contented, and protect them from injury. Special designs for maternity cows, bulls, calves, hogs, sheep or sick animals. Lighter, airier, stronger, easier to keep clean than wooden stalls. Each pen is furnished with a type of manger or trough suitable for its particular requirements. Pens are all constructed of high grade tubular steel of the size best suited for the strength required. All connections are of the regular Interlocking, Dust-Proof type, entirely smooth and sanitary. Painted with our Special Dairy Barn paint, or galvanized if specified. Write for prices on the different pens.

The Louden Detachable Water Bowl

Louden Detachable Water Bowl

upon the part of the attendant. Weight, 11½ pounds. Price, \$4.00.

Is without a doubt the most convenient, neatest in design, most sanitary, simplest in operation and strongest built of any water bowl ever placed on the market. One of the handiest features embodied in this bowl is that of removing it for pouring out the contents. All that is necessary for the operator to do is to raise the nose piece into a vertical position—lift up the bowl and slip it off—absolutely no set screws that are so often rusted, or the releasing of a supporting lever as is required with the ordinary bowl.

Bowl is constructed of heavy gray iron of excellent quality, with brass valve rod, valve seat, and valve spring. Bowl is constructed to fit ¾-inch supply pipe. No inlet pipes furnished. Bowl can be attached to 1¼-inch or 1 inch pipe supports. In addition, it can be attached to wood posts if so desired. No special plumbing fittings are necessary in setting up bowl. Operation is simple and always dependable—cow pushes down release valve with her nose and the water immediately begins to flow. No danger of bowl overflowing. No labor and very little attention is needed

The Louden Window Ventilator

Makes possible an abundance of fresh air in the barn without injurious draughts. Fresh air is as necessary for the comfort and health of the stock as fresh water and pure food. According to experts the average cow consumes more pounds of air than she does of either food or water. A 1000-pound cow consumes about 224 pounds of air daily.

Louden Window Ventilator

The Louden Window Ventilator is made in different sizes to fit any window where sash does not exceed 48 inches in height. Special ventilators for higher windows can be furnished on special orders at slight additional cost. Fixtures include two shields, two dogs, two braces, 1 catch and 1 keeper, 22 screws and 2 rivets. Shields are galvanized. Price, \$3.00.

The Louden Feed Truck

With side boards and end scoop, is furnished in one size, having a capacity of 20 bushels. Is well built and designed to withstand rough usage. The swiveled small wheels at either end and the large wheels in the center are all roller bearing which makes the Louden Truck easy to handle, and it is so balanced

that it can be turned within its own length.

The body of the truck is removable and four stakes are supplied with each, making it suitable for handling sacked grain, ground feed, etc. Box made of wood, reinforced with strap iron. Length of box, 86 inches; width, 28 inches; depth, 22 inches. Price, \$43.00.

Louden Feed Truck

The Louden Emancipator Litter Carrier

Louden Emancipator Litter Carrier

rier is furnished regularly with the Louden Emancipator Worm Gear Hoisting device, same as that used with the Louden Emancipator Litter Carrier, and the most powerful lifting device used with any carrier. One man can easily raise and lower six or eight hundred pounds. The track wheels being large and roller bearing, the loaded carrier can be pushed along the track with scarcely any effort. There are no brakes or ratchets to bother with, and absolutely no danger of the carrier dropping down and smashing.

Operates on Louden Double Bead Steel Track. Box is made of wood, reinforced with strap iron. Length of box, 76 inches; width, 29 inches; depth, 20 inches, outside measurements. Capacity, 14 bushels.

Box is fitted regularly to raise and lower seven feet; may be fitted to raise and lower as much as twenty feet at slight additional cost. Diameter of track wheels, 4 inches. Clearance necessary for track wheels, 5 inches. Total clearance necessary, 56 inches. Length of Hand chain, 11 feet, ends joined together. Where ceilings are high, longer chain can be furnished at slight additional cost. Shipping weight, 230 pounds. Price, \$55.00.

In addition to these steel track carriers shown, we also carry the Louden Cable Track Feed and Litter Carriers. Although this is the best cable track outfit ever designed, yet for the small difference in original cost we strongly recommend the Louden Steel Track Carriers—the best line of Feed and Litter Carriers ever built.

The Louden Machinery Company holds the first patents ever granted on Litter Carriers—they are the pioneers. Let us send you the Louden catalog telling all about them.

Is the result of years of study and experiment, and the determination to manufacture the best Barn Equipment on earth. It is made for the man who wants the best—who is satisfied with nothing short of perfection. No dangerous clutches, brakes or ratchets in connection with the Louden Carriers. The lifting ratio is forty to one—one pound pull on the hand chain will raise forty pounds in the box.

Louden Carriers operate on Louden Double Bead Steel Track. Body of box is made of 20-gauge galvanized sheet steel, reinforced with angle iron. Ends of box are made of 16-gauge galvanized sheet steel. Length of box, 48 inches; width, 27½ inches; depth, 22 inches, outside measurements. Capacity, 10 bushels.

Box is fitted regularly to raise and lower seven feet; may be made to raise and lower as much as twenty feet at slight additional cost. Track wheels are roller bearing. Diameter of track wheels, 4 inches. Clearance necessary for track wheels, 5 inches. Total clearance necessary, box upright, 50 inches; box dumped, 56 inches.

Length of hand chain, 11 feet, ends joined together. Where ceilings are high, longer chains can be furnished at slight additional cost. Shipping weight, 208 pounds. Price, \$50.00.

The Louden Double End Feed Carrier

Is a large carrier, built extra strong for heavy work. Each end of the carrier has a sloping shovel board, so two men can easily work at it if desired. The car-

Louden Double-End Feed Carrier

The Louden Garage Door Hanger

Louden Garage Door Hanger

the trolleys to be clogged or derailed. The trolley wheels revolve around a tempered steel shaft. Always roll easily. A light push will open or close the heaviest door.

The Bird-Proof Track is square, not oval. The level tread reduces friction to the minimum and over-

comes the wedging tendency frequently found on oval tracks which support heavy doors. The form of the Bird-Proof Track and the special grade steel used in its manufacture, combine to give it wonderful strength and rigidity. It is further strengthened by the curved lips on the under side of the track. Will not sag under the weight of heavy doors.

Track is made of 14 gauge special steel, is 1 5/8 inches wide by 2 1/16 inches deep.

Supporting brackets for track of steel with embossed reinforcements. Wall brackets of refined malleable iron. Supporting wall brackets may be placed 36 inches apart; for heavy doors, spaced 24 inches apart. End stops and splices for track packed with trolleys. Track is furnished in 4, 6 and 8 foot lengths. Weight of track, per foot, 1 3/4 pounds. Weight of supporting brackets, per dozen pair, 9 pounds. Hangers complete. Price, per set, \$2.50.

Roller Bearing Tandem Trolley for Bird Proof Track

Operates on roller-bearing trolleys, inside, entirely out of the weather. The door is built in three sections, hugs the corner closely when opening, and lies flat against the inside wall.

It isn't necessary to open the whole door for walking in and out or to build a special small door for that purpose—one panel of the door swings like an ordinary hinged door.

The outfit complete consists of sufficient track for 6, 8, 10 or 12 foot door, together with the following fittings: 3 special swivel trolley hangers, 6 five-inch strap hinges, 2 door handles, 2 floor stay rollers, 1 wall stay roller, 1 hasp and staple, 6 dozen screws, 1/2 pound barbed chisel-point nails. Full directions are furnished with each outfit. Any carpenter can build door and hang properly. Track comes in straight sections which are easily bent to fit building.

Track weighs 1 pound per foot. Fittings weigh 18 pounds. Price, per set, 12-foot door, \$7.50.

The Louden Bird-Proof Barn Door Hanger

Cannot be clogged by trash or birds in summer, or by ice and snow in winter. There is no chance for

Louden Bird-Proof Barn Door Hanger

The Louden Overhead Carrying System For Factories, Warehouses, Garages, Machine Shops, Etc.

THE LOUDEN MERCHANDISE CARRIER

This Carrier is especially suitable for use in factories for changing heavy dies on machinery, hoisting and carrying material from one department to another, and other all around conveying work. It is also intensely practical for lifting work in garages—being just the outfit in hoisting an engine out of its seat or raising the entire end of the car while work is being done underneath. The carrier is particularly well adapted for use in oil storage plants and warehouses where barrels are handled, or in stores for moving heavy boxes, or packages—in fact, wherever any conveying work of any kind is necessary. It is a thoroughly practical outfit, as has been demonstrated by thousands of users within the last few years.

The carrier is fitted with large roller bearing track wheels and heavy swivel truck castings, which make it easy to operate on the track and insures ample strength.

Any style of hoist can be used with the Louden Carrier. Fig. 1306 shows one style for heavy loads, and in Fig. 889 is shown an exceptionally good hoist for loads up to 500 pounds. We can furnish any of the standard hoists manufactured.

The Louden Merchandise Carrier (without Hoist), price, \$10.00.

Barrel Grabs (shown attached to barrel) price, \$2.25.

Louden Perfect Hoist (shown lifting barrel), different capacities, different prices, ranging from \$3.50 to \$13.80.

Fig. 1306

Fig. 889

Louden 888 Carrier; Loudon Perfect Hoist; Loudon Barrel Grabs; an ideal outfit for handling barrels.

DOUBLE TRUCK MERCHANDISE CARRIER. FIG. 890

The Double Merchandise Carrier is extremely well adapted for all classes of work. The eight roller bearing wheels rightly placed with respect to proper distribution of the load on the track, insures easy, smooth operation, even under the maximum load. Mechanical tests which have been made as well as the every day practical work it is being put to has proven beyond a doubt that for loads up to 1000 pounds the Loudon double truck merchandise carrier is the most practical outfit ever designed for the work. Price, \$25.00.

Louden Overhead Switches

Louden Overhead Switches are the easiest operated, the strongest and altogether the most satisfactory on the market. When the switch cord is pulled, the track is thrown into the desired position, and an automatic safety guard makes it impossible for a car to run off the track. It is made reversible, or right and left, so that branch tracks can be used on either side of the main track. As many as six branch tracks can be used with a single main track. The switches are easily installed in almost any position.

Fig. 849. Cross Over Switch

Fig. 795 shows our Three-Way Switch mounted on a plank. The switch "S" is hinged to the main track "A" at "H." By pulling on the cords "C" and "D" the switch or hinged section will slide on the opposite side of the plate "E" and change from one track to the other, so that the operator can use any of the branch tracks at will. The hinged track "S" is locked in place by a latch. It can be operated from below no matter how high the track may be hung. The guard "G" which works automatically, will prevent the carrier from running off the track, should switch be left open. Switches can be furnished unmounted on special orders, but mounted switches are recommended as they are much easier to install.

Switches should never be placed in doorway, especially when sliding doors are used. This can nearly always be avoided by reversing the curve, placing the switch inside the building and making a back switch from the side line to the main line.

Length of Mounting Block, 38 inches. Width of Mounting Block, 15 inches. Distance from top of block to bottom of track, 10 inches. Weight, 31 pounds. Price, \$9.25.

Fig. 849 shows our Cross Over Switch mounted on a plank ready to attach to ceiling. It is frequently necessary and often convenient to have tracks cross at right angles. Our Cross Over Switch solves the problem. By pulling on the cords the central section is thrown into position for either track as desired. The guards work automatically, dropping in place to guard the open end, and lifting, as shown to clear the carrier wheels when the central section is in place.

Length of Mounting Block, 24 inches. Width of Mounting Block, 12 inches. Distance from top of block to bottom of track, 10 inches. Weight, 28 pounds. Price, \$8.50.

The six Two-Way Switches shown in foreground connecting the main line up with six curves leading off onto branch tracks, gives an idea how thoroughly all overhead space can be utilized with the Louden System. This cut shows plainly how free the aisles and floors are from congestion of any sort. With the old method of trucking material this room was constantly congested.

Fig. 795. Three-Way Switch

FERTILIZERS FOR THE FARM, LAWN and GARDEN

On account of the unsettled conditions of the market on certain chemicals that go to make up fertilizers, we are unable to give prices that would likely be maintained for any length of time. We have therefore left out prices, but would be pleased to quote you on your requirements. Kindly write for prices.

The application of Fertilizers has been a topic much discussed among farmers generally. The quality and requirements of the soil are so varied, some lands being deficient in Potash, Phosphoric Acid, or some other chemical ingredient, that is frequently very difficult for the farmer to determine just what mixture he needs. We give below a line of fertilizers best adapted to the various soils and crops.

Ammoniated Alkaline Plant Food

Our old stand-by for summer crops; is used largely on Potatoes, Corn, Tobacco and other summer crops, stands the hot, dry weather particularly well.

Price Per Bag.
Price Per Ton.
Write for prices.

Ammoniated Butchers' Bone Phosphate

Is made largely from slaughter-house stock; used principally for Wheat and Grass, as well as by growers of Corn and Tomatoes for canning purposes. A good article at a low price.

Price Per Bag.
Price Per Ton.
Write for prices.

Animal Bone Phosphate

Made from Animal Bone, Potash and Ammoniates in proper proportion. A complete manure always gives good results. Specially adapted to the growth of Peas, Cabbage, Wheat and Grass. It contains the ingredients necessary to supply what may be lacking in the soil for almost any crop.

Price Per Bag.
Price Per Ton.
Write for prices.

Swifts Sheep Manure

This is purely a natural and most nutritious plant food, clean to handle, and its effect is immediate and lasting. There is nothing better to mix with soil for potting plants. Florists who use it extensively advise mixing about one-seventh manure and six-sevenths soil. As a top dressing for lawns, it is unequalled.

5 lbs. 30c. 10 lbs. 50c. 25 lbs. \$1.00
50 lbs. \$1.75. 100 lbs. \$2.75

Special prices in tons, ½ tons, or carload.

Soft Ground Bone

Made from softer material than the regular "Ground Bone," and contains some little meat and blood. The great objection to the use of Pure Bone (the price) no longer prevents its use by any one wanting to restore worn-out land. Try it and be convinced.

Hardwood Ashes Unleached

Most excellent for lawn dressing or orchards. Apply late in the fall or early spring, in order that the rains may leach the ashes and carry the elements down to the roots of the trees or grass. The ashes are in proper condition for immediate use. Apply at a rate of 1,000 to 1,500 pounds per acre.

Price, 100 pounds, Barrel,

Blood, Bone and Potash Mixture

Special High Grade Trucking Fertilizer. Extensively used by the leading truckers of Baltimore and Anne Arundel Counties with great success.

Hydrated Lime---For Improving the Soil

Hydrated Lime is a soil sweetener and is free from injurious qualities. It is cheaper than any other lime product which can claim to be at all competitive, and is more easily handled.

There has been an enormous increase in its use in recent years, keeping pace with the growing of clover and alfalfa.

Hydrated Lime while an indirect plant food is as essential to the maximum production of some crops as is direct plant food.

In addition to producing chemical changes Hydrated Lime also has mechanical effects, making clay soils more friable and more open to both air and water and so less susceptible to extreme dry and wet weather. In sandy soil the action is practically reverse; Lime in such soil has a cementing tendency and helps the soil to retain moisture.

We recommend the free use of Hydrated Lime on lawns.

Humus

As there are a number of articles on the market as high-grade Humus, it is safer to get analysis and sample.

THE GREAT SOIL BUILDER AND PLANT FOOD.

Humus comes from nature's own factory established thousands of years ago. This HUMUS is especially prepared in powdered form for your use. This preparation is no secret process, it being simply the driving out of its excessive moisture and adding further enriching properties. It is then in a powdered odorless form all ready for easy mixing with the soil. Its advantage over animal manure is that it is perfectly sanitary and odorless.

Think of the advantage of its use on your lawn where manures are both offensive and unsightly, and eventually have to be raked off. Manures are generally loaded with all kinds of weed seeds, HUMUS is guaranteed to be free from them.

In one season you can convert a practically worthless soil to one of surprising productivity. Being so reasonable in price, you can afford to use it liberally.
